Family & Consumer Sciences

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0 (0.5 Consumer Educ., 0.5 Applied Arts)
Supply fee: \$10

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. ***This course fulfills the state mandate for consumer education*** and also provides one semester credit for Elective Arts. *Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.*

FOODS & NUTRITION

Course #06501

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students ***cannot receive credit*** for both Foods & Nutrition and Senior Foods.

Suggested follow-up class: Creative Foods.

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is a continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pastries, breads and main dishes. Activities include the fundamentals of cake decorating with students designing and decorating their own cakes. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up class: Chef & Restaurant.

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or Senior Foods AND teacher approval
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a "mini restaurant" incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques. ***While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.***

SENIOR FOODS

Course #06541

Prereq: none
Level: 12
Credit: 0.5
Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students ***cannot receive credit*** for both Foods and Nutrition and Senior Foods.

Suggested follow-up class: Creative Foods.

Family & Consumer Sciences

CREATIVE SEWING

Course #06552

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student's preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design or Creative Sewing II

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities.

Suggested follow-up class: Fashion Merchandising & Design

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today's fashion industry. Activities include color analysis, textiles, fashion trends and personal selection of fashions. Creativity and projects involving fashion design and sketching, window displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

CHILD DEVELOPMENT

Course #06581

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in elementary or preschool education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children's toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children. **Students who earn a "B" or better in this class may receive articulated credit for Early Childhood Education & Care 1100 at College of DuPage.**

Suggested follow-up class: Introduction to Teaching or Understanding Relationships.

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none

Level: 11, 12

Credit: 0.5

This course encompasses "a slice of life" and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Development

Family & Consumer Sciences

ARCHITECTURAL STYLES AND INTERIOR DESIGN

Course #06621

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Architectural Styles and Interior Design is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

INTRODUCTON TO TEACHING

Course #06595

INTRODUCTON TO TEACHING

w/honors option

Course #06585

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Prereq: Recommendation of counselor, application, interview by instructor, and good academic standing. Child Development recommended.

Level: 12

Credit: 1.0 (one semester, two class periods)

Course #06585 w/honors option: Introduction to Teaching w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects might include creating classroom teaching tools, research, tutoring, or interviews.

Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the Guidance Counselor.

Personal transportation preferred, however carpooling is possible.

Applications available in FACS office (152A) or from the Guidance Counselor.

Director of the Library Media Center Ms. Ellen Lawrence

The mission of the Library Media Department is to:

- **Teach** all of our students to thoughtfully *inquire* about the world around them, efficiently *seek* information which addresses those inquiries, critically *evaluate* the quality of that information, capably *apply* the knowledge acquired to new problems, questions, or ideas, and objectively *assess* the work they produce as a result of the research process.
- **Collaborate** with other teachers to design and implement lessons and assessments which challenge our students to become effective users of ideas and information, perhaps the single most important 21st century skill.
- **Provide leadership, instruction, and expertise** in the use of information and technology that encourages creative problem solving and ethical, socially responsible sharing of information.
- **Provide access** to a variety of quality resources which support the curriculum and meet the diverse needs and interests of our school community in a vibrant learning environment equipped for the demands of 21st century teaching and learning.
- **Promote life-long learning** through programming which encourages reading, inquiry, and the use of technology to meet learning goals.

Through the Library Media Center (LMC), students have access to a wide variety of resources including; certified librarians, 25,000 books, numerous periodicals, research databases, digital books, and networked computers. In addition, scanners, music CDs, color printers, and video editing equipment are available in the AV area.

The LMC is open from 7:15 am – 3:55 pm Monday through Thursday and from 7:15 am – 3:15 pm on Fridays. The LMC opens at 9:45 am on 10:00 start days. Passes will admit students to the LMC during the school day. Student IDs serve as library cards and are required to check out materials. Most materials can be checked out for three weeks and can be renewed if needed. Fines do accrue for overdue materials. Notices of overdue materials are periodically sent via email.

Mathematics Department

Department Chairperson
Mr. Ismael Zamora

Vision: “Every student a mathematically literate problem solver.”

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become productive citizens. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

**GRAPHING CALCULATORS ARE REQUIRED FOR
ALL MATH AND SCIENCE COURSES.**

**Any brand of graphing calculator is acceptable with one exception –
Students may not use the TI-Inspire CAS.**

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year. Another option is to enroll concurrently in both Geometry and Algebra 2 during the sophomore year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence. Upward level changes require a 95% semester average in the previous course.

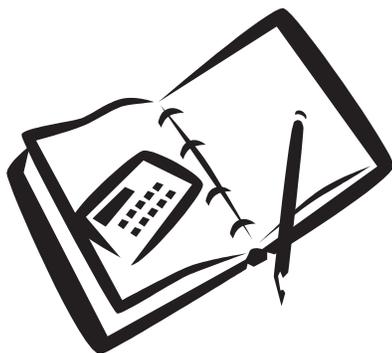

Please see Course Description for detailed Prerequisites.

Mathematics Department

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>
Algebra I	03110	Yes	1.0	9-12

Math Topics II Honors	03512	Yes	0.5	12

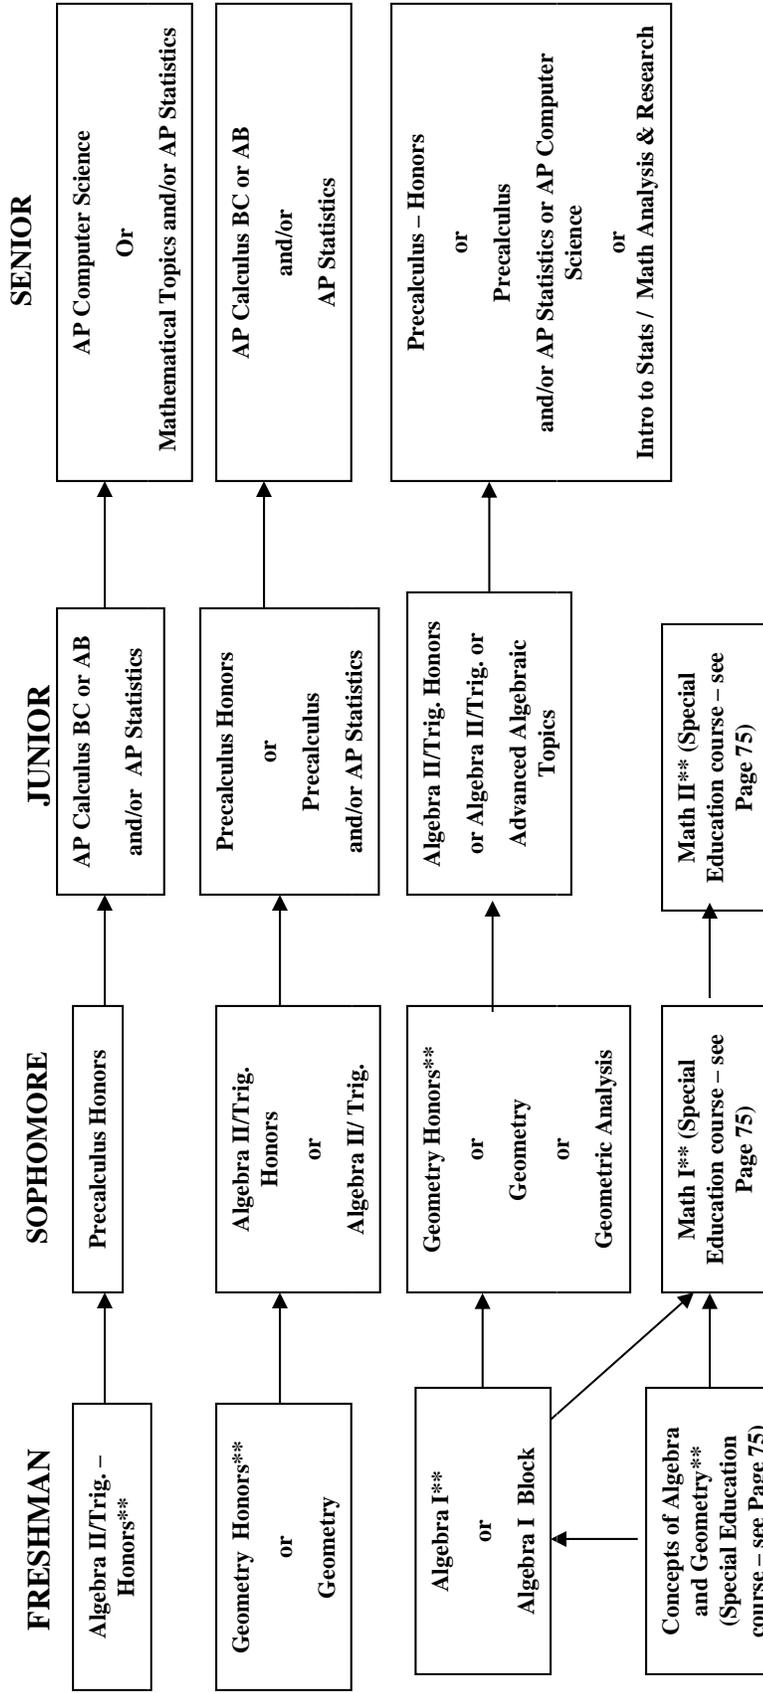

HINSDALE SOUTH HIGH SCHOOL MATHEMATICS DEPARTMENT

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content. Credits must be earned in three full-year courses.

Colleges require at least Algebra, Geometry, and Algebra II/Trig for admission. Many also require Precalculus.

** These courses require Department Chair approval for registration.

(AP Statistics may be taken any time after Algebra II with a B or better performance in Algebra II.)

COMPUTER COURSES TAUGHT BY THE MATH DEPARTMENT: Students with an aptitude in mathematics should take at least one computer course. Students should consider the AP Computer Science curriculum.

AP Computer Science A followed by Mathematical Topics I Honors ,II Honors, and/or Computer Science Honors

Note: Department chairperson approval is required when a change of level (for example, Honors to regular level) is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Mathematics Department

ALGEBRA I

Course # 03110

Prereq: Recommendation of 8th grade teacher and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are properties of numbers, equations and inequalities, and an introduction to linear and nonlinear functions, polynomials, and graphing. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I BLOCK

Course # 03140

Prereq: Recommendation of 8th grade teacher
Level: 9, 10, 11, 12
Credit: 2.0

This course is a double-period Algebra I so the student can complete Algebra in one year but devote more time to learning and applying the topics. It is designed for the student who learns at a slower pace as identified by entrance Explore test and teacher recommendation. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I Block, Identified deficiencies from Freshman exit Explore test, semester exams and teacher recommendation.
Level: 10, 11, 12
Credit: 1.0

This course is designed to follow the Algebra I. It deals with the same topics of Geometry 03210 with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. This course would be very beneficial for any student pursuing post-secondary education. Placement in this course is based on identified deficiencies as seen on Freshman exit Explore test, semester exams and teacher recommendation. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra I at the high school or pass the entrance test at the end of 7th or 8th grade Algebra I and Department Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Geometry is required for entrance into most colleges and many vocational programs. This course continues the use of algebra in geometric situations, calls on the power of logic and proof, and incorporates applications to real-world problems in the plane and in space. This course is for students who intend to pursue post-secondary education of two or more years. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I at the High School or pass the entrance test at the end of 7th or 8th grade Algebra and Department Chairperson Approval.
Level: 9, 10
Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in regular Geometry 03210, but with more depth. Three-dimensional and coordinate geometric proofs are included. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and Department Chairperson Approval
Level: 11, 12
Credit: 1.0

This course is recommended for students who completed Algebra 1 Block and Geometric Analysis. The topics studied are real and complex numbers, conic sections, and exponential, logarithmic, polynomial, and trigonometric functions. *A graphing calculator is required for this course.*

Mathematics Department

ALGEBRA II / TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I
and Geometry

Level: 10, 11, 12

Credit: 1.0

This course is designed for college bound students and useful for preparing for College Board tests like the SAT and ACT. It continues the study of linear and quadratic functions, graphing, polynomial, exponential and logarithmic functions, and introductory probability and trigonometry. *A graphing calculator is required for this course.*

ALGEBRA II / TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry
Honors or Department

Chairperson Approval

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry 03310 in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. This is a college-preparatory course. *A graphing calculator is required for this course.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II
/Trigonometry or Algebra II/
Trigonometry Honors or
Introduction to Statistics or Math
Analysis & Research

Level: 10, 11, 12

Credit: 1.0

This course is a study of functions and applications. It extends the topics of Algebra 2/Trigonometry and adds conic sections and some finite math topics. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/
Trigonometry Honors or A in
Algebra II/Trigonometry and
Department Chairperson
approval

Level: 10, 11, 12

Credit: 1.0

Precalculus Honors treats the topics of 03400 Precalculus in greater depth, with more emphasis placed on proof, abstract structure, and preciseness of thought and communication. In addition, analytic geometry of the plane, probability, and the polar coordinate system is studied. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT

CALCULUS AB

Course # 03420

Prereq: B or better in
Precalculus

Level: 10, 11, 12

Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. Students are encouraged to take the College Board Advanced Placement AB exam in calculus in May. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT

CALCULUS BC

Course # 03430

Prereq: Department
Chairperson

Approval and Precalculus

Honors

Level: 11, 12

Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, and infinite series. Students are encouraged to take College Board Advanced Placement BC exam in Calculus in May. *A graphing calculator is required for this course.*

Mathematics Department

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2 or Advanced Web Programming or Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses.

Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA. Students are encouraged to take the AP Computer Science Exam in May.

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: B or better in Algebra II/ Trigonometry

Level: 11, 12

Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *Students will be encouraged to take the Advanced Placement Statistics test in the spring. A graphing calculator is required for this course.*

INTRODUCTION TO STATISTICS

Course # 03471

Prereq: C or better in Algebra II / Trigonometry (any level) and Department Chairperson Approval.

Level: 12

Credit: .5

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey. This course is appropriate for college-bound students and is, therefore, recommended for all Algebra II-G students who achieved at the C or above level. *A graphing calculator is required for this course.*

MATHEMATICAL ANALYSIS AND RESEARCH

Course # 03472

Prereq: C or better in Algebra II Trigonometry and Department Chairperson approval

Level; 12

Credit: 0.5

This is a survey of algebraic functions, mathematical modeling, elementary probability and research techniques in mathematics. This course is appropriate for college-bound students and is, therefore, recommended for all Algebra II students who achieved at the C or above level and for Algebra II-G students who achieved at the C level or higher. *A graphing calculator is required for this course. This course is not for any student who has completed Precalculus or higher.*

MATH TOPICS I HONORS

Course # 03511

Prereq: Department Chairperson approval

Level: 12

Credit: 0.5

Math Topics I is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course. *A graphing calculator is required for this course.*

Mathematics Department

MATH TOPICS II HONORS

Course # 03512

Prereq: Math Topics I Honors
and Department Chairperson
approval

Level: 12

Credit: 0.5

Math Topics II is a continuation of Math Topics I. *A graphing calculator is required for this course.*

**MATH TOPICS COMPUTER
SCIENCE HONORS**

Course # 03510

Prereq: AP Comp Sci and
Department Chairperson
approval

Level: 12

Credit: 1.0

This course for students wishing to continue the study of AP Computer Science. This course will be taught the same period as AP Computer Science.

Music Department

Department Chairperson Mr. Gregory Gardner

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. Call 630-468-4450 to schedule an audition.

Level: 10, 11, 12

Credit: 1.0

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with counselor during registration.**

CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. Call 630-468-4450 to schedule an audition.

Level: 9-12

Credit: 1.0

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with counselor during registration.**

SYMPHONIC PERCUSSION

Course #05660

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Honors Credit is available

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with counselor during registration.**

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Sibelius* using Korg Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for the serious piano student who wants to learn how to compose and perform original compositions. Students learn to use the music writing program *Sibelius* using Korg Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will enter competitions with songs they create and additional performance opportunities may be available. Students will create a CD of selections they compose.

Music Department

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students who are going to take the AP Music Test in May. Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are required to take the AP Music Test in May. Students will use the music theory learned to compose chorals, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using Sibelius 4 music composition software.

ORCHESTRA

CHAMBER ORCHESTRA STRINGS

Course #05780

Prereq: Audition by High School Director.

Call 630.468.4450 to schedule an audition.

CHAMBER ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Director approval

Level: 9, 10, 11, 12

Credit: 1.0

The Chamber Orchestra Strings is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Music Department

BASS CHORUS

Course #05710

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

VARSITY TREBLE CHORUS

Course # 05800

VARSITY TREBLE CHORUS HONORS

Course #05850

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

VARSITY MIXED CHORUS

Course # 05820

VARSITY MIXED CHORUS HONORS

Course # 05810

Prereq: Audition with Director

Level: 10, 11, 12

Credit: 1.0

Varsity Mixed Chorus is the top-level large group choral music ensemble for sophomore, junior and senior singers with previous musical experience. Admittance is by audition only. Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

MADRIGALS/JAZZ CHOIR

Course # 05830

MADRIGAL/JAZZ HONORS

Course # 05840

---See Honors Requirements---

Prereq: Consent of Choral Director

Level: 10, 11, 12

Credit: 1.0

Madrigals/Jazz Choir is a full-year course for selected 10th, 11th, and 12th grade students, which will focus on the performance of the Madrigal Dinner in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Admittance is by audition only. Concurrent membership in another music course is highly recommended. Madrigal students are also required to learn and perform the repertoire of Varsity Mixed Chorus.

HONORS STUDY IN MUSIC

Students will have the opportunity to qualify for honors study in the following performance programs: Symphonic Band Honors (including Symphonic Percussion), Concert Orchestra Honors, Varsity Mixed Chorus, and Madrigal/Jazz Honors. Selections will be the *Illinois Music Educators Association* audition music, which can be obtained from the instructors in June of each year. Honors selection will be based on the IMEA material performed during the third week of September. ***Please read the section below for more information on requirements.***

REQUIREMENTS FOR HONORS STUDY

Advanced students in Concert Band, Percussion, Varsity Choir, Concert Orchestra and Madrigals/Jazz Choir may audition for the honors level of that ensemble. *These students will, as part of the requirements, remain as members of their curricular ensemble and fulfill all obligations of that ensemble.* In addition, students will be required to perform the following activities:

1. Students must audition for the IMEA District Festival on the State Audition material. This audition will be held in October at a local high school.
2. Private lessons once a week for thirty minutes. The number of lessons per quarter will be one less than the number of weeks in the Quarter. For example, if we have ten weeks in one quarter the students must take nine lessons during that quarter. Students will be responsible for turning in the completed lesson form signed by the private teacher. The teaching staff will approve the private teachers each year.
3. Two solo performances. One will be an Honors Recital in November, which will be open to the public. Instrumentalists will perform a major solo work with piano accompaniment. Vocalists must perform at least two songs, one in a foreign language. The recital will be a graded event. Students will be given a set of guidelines before the event, which will be used to assess the performance. Students must show the director the solo selected to check for level of difficulty and appropriateness at least four weeks before the performance.
4. In addition, by the November recital, each student will turn in a 1000 word paper (typed, double spaced) about the selection they are performing. The research paper should cover the composer and his works, historical perspective, as well as the repertoire being performed. Students must use proper format as well as a minimum of five sources with a maximum of two Internet sites.
5. A second performance of a different solo will be in March at the Illinois High School Association State Solo and Ensemble contest. The directors of the honors students will grade the solo and the performance before the contest. Then the students will perform the same solo for the state judge who will rate and make written comments and suggestions. The importance of this experience is that the student receives an outside critique of his/her playing/singing ability and can be better prepared for college auditions, which will be very similar to the this solo experience.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs.

PHYSICAL EDUCATION ACTIVITIES

Freshman Choices

Aerobics
 Badminton
 Basketball
 Floor Hockey
 Folk/Square/Swing Dance
 Gymnastics
 Physical Fitness Concepts (9)
 Physical Fitness Applications (10)
 Physical Fitness Testing
 Soccer
 Softball
 Speed-A-Way
 Swimming
 Tennis
 Touch Football
 Track & Field
 Volleyball

Sophomore, Junior and Senior Choices

Aerobics	Recreational Sports
Aerobic Fitness	Rhythmic Gymnastics
Archery	Roller Blading
Badminton	Snorkeling
Basketball	Soccer
CC Skiing	Softball
Flickerball	Speed-A-Way
Floor Hockey	Tchoukball
Golf	Team Handball
Ice Skating	Tennis
Lacrosse	Touch Football
Navy Football	Ultimate Frisbee
Net Games	Volleyball (indoor)
Outdoor Ed.	Water Games
Pickleball	Weight Lifting
Physical Fitness Applications	Yoga
Lifeguard Certification (2 nd sem. only)	

Freshmen, Juniors, and Seniors must register for Physical Education EACH semester.

<u>Grade</u>	<u>Semester 1</u>	<u>Semester 2</u>
9 (Learning Readiness PE) <i>This class will stress movement, cross lateral activities, and aerobic exercise; taking full advantage of the effects that exercise and movement have on learning.</i>	Course No. 07161	Course No. 07162
10/11*/12* (Upper Level PE)	Course No. 07471	Course No. 07472
10/11*/12* (Tumbling)	Course No. 07481	Course No. 07482
9^/10/11/12 (Early Bird PE) <i>Early Bird Physical Education starts prior to the regular school day and runs from 7:00 am until 7:50 am. This class allows students to enjoy the positive effects associated with exercise and the benefits it has on learning.</i> (^See page 9 for exclusions)	Course No. 07431	Course No. 07432

***Junior & Senior Athletes may be exempt from Physical Education during their sport season. Please inquire with counselor during registration.**

Physical, Health, & Driver Education

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.**

Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws. **In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.**

HEALTH EDUCATION

Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)

Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information.

ADVANCED HEALTH

Course #07511

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Any students may see the teacher should they have questions on taking the course for 'honors' credit.

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Science Department

Department Chairperson Ms. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

AP Physics C	03940	Yes	1	11, 12

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, and reading, writing and note-taking skills.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

CORE COURSES

GEOPHYSICS

Course # 03640

Prereq: Department Chair recommendation.

Level: 9 (higher with recommendation)

Credit: 1.0

This course combines Earth Science content and explores the Physics that underlie observable phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, history of the Earth, velocity, acceleration, waves, energy, forces, magnetism, and atomic structure. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. *This course is also offered in an Academic Reading (AR) format (#03610A) for students who need extra assistance in reading comprehension.*

PHYSICS HONORS

Course #03920

Prereq: Department Chair recommendation; Concurrent with Geometry or higher.

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging.

CORE COURSES (CONTINUED)

CONCEPTS IN CHEMISTRY

Course # 03840

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered, including: nature of science, atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students with below average math ability and does not serve as a Prereq for AP science courses. *This course is also offered in an Academic Reading (AR) format (#03850A) for students who need extra assistance in reading comprehension.*

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit; Teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered and include: nature of science and chemistry, atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability and can serve as a Prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level understanding is expected, and problem-solving will be more challenging. This course is appropriate for students with above average math abilities and serves as a Prereq for AP science courses.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11, 12

Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include scientific method, cellular and molecular biology, ecology, evolution, biochemistry, plants and body systems. *This course is also offered in an Academic Reading (AR) format (#03750A) for students who need extra assistance in reading. This course can also be taken for dual credit through the College of DuPage (#03700D). Interested students should see page 8 and speak with the Science Department Chair for details.*

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level), and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12

Credit: 1.0

This course is for students who took GeoPhysics as freshmen but who would like to take a full physics course to better prepare them for college. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy and waves.

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry Honors OR Chemistry and Biology; Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Biology covers two semesters of college-level biology which applies previous knowledge to biochemistry, cellular biology, molecular biology, phylogeny and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course. Typically, students can earn 8 college credit hours depending on AP exam scores (see www.collegeboard.com/ap/credpolicy).

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Biology and Chemistry; Biology may be concurrent; Teacher recommendation. Completion of Physics recommended.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry is a college-level chemistry course which applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics and thermodynamics. Typically, students can earn 8 college credit hours depending on AP exam scores (see www.collegeboard.com/ap/creditpolicy).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Successful completion of Biology and Chemistry; Teacher recommendation.

Level: 12

Credit: 1.0

Advanced Placement Environmental Science is a college-level science course that explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered. Typically, students can earn 3 college credits depending on AP exam scores (see www.collegeboard.com/ap/creditpolicy).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE "RISE"

Course # 03680

Prereq: Dept. Chairperson approval

Level: 12

Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Environmental Science section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Science department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Environmental Science students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Environmental Science teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Environmental Science exam.

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: A or B in Physics; Concurrent with Calculus or higher; successful completion of three core science courses; may be taken concurrently with third core course; Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics C is a calculus-based physics course that covers in-depth investigations into mechanics, electricity and magnetism. Typically, students can earn up to 8 college credit hours for physics/engineering or general majors depending on AP exam scores (see www.collegeboard.com/ap/creditpolicy).

ELECTIVE COURSES

ASTRONOMY: THE SOLAR SYSTEM/STARS AND GALAXIES

Course # 03691/03692

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.

Level: 11, 12

Credit: 0.5 each

Astronomy—The Solar System investigates the history and origins of astronomy, telescopes, calendars, and the solar system. *Astronomy—Stars and Galaxies* investigates ordinary stars, stellar distances and motions, supernovae, pulsars and black holes, overview of the universe, stellar evolution, and galaxy formation. These two semester courses may be taken independently of each other.

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Biology and Chemistry (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

This course develops students' understanding of the workings of the human body. Dissections, including various cow organs and joints and a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

Social Studies Department

Department Chairperson

Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

- Students are strongly encouraged to take **four** years of social studies courses. Students may take multiple social studies courses their sophomore, junior and senior years.
- All social studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.
- Advanced Placement (AP) courses provide students with an opportunity to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of the level of study presented in AP courses, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites and to develop skills and work habits that will prepare them for AP classes their sophomore, junior and senior years.
- Hinsdale South also offers a variety of electives for sophomores, juniors and seniors that allow students to explore the social studies and expand their knowledge base. Electives can be taken concurrently with core courses. Listed course prerequisites may be waived by teacher or department chair recommendation.

Social Studies Department

<u>WORLD STUDIES</u> Course # 02470 Prereq: None Level: 9 Credit: 1.0	An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.
<u>WORLD STUDIES HONORS</u> Course # 02390 Prereq: Dept. Chairperson Recommendation Level: 9 Credit: 1.0	An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. <i>Students are prepared to take Advanced Placement courses.</i>
<u>WORLD CULTURES</u> Course # 02460 Prereq: Dept. Chairperson Recommendation Level: 10 Credit: 1.0	This full year social studies course is for sophomores and other students who due to schedule constraints or other factors still need to fulfill the graduation requirement for World Studies. World Cultures explores the geographic, economic, historic, cultural and current issues pertaining to the world's major civilizations. A variety of activities and assessments will be used to foster the acquisition of not only content knowledge, but also critical thinking skills appropriate to the social studies.
<u>ADVANCED PLACEMENT EUROPEAN HISTORY</u> Course # 02520 Prereq: Recommendation of World Studies teacher and Dept. Chairperson approval. Level: 10 Credit: 1.0	This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture. This course will prepare students to take the Advanced Placement exam in May.
<u>AFRICAN-AMERICAN HISTORY</u> Course # 02331 Prereq: None Level: 10, 11, 12 Credit: 0.5	An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.
<u>GEOGRAPHY</u> Course # 02501 Prereq: None Level: 10, 11, 12 Credit: 0.5	An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.
<u>PSYCHOLOGY I</u> Course # 02431 Prereq: None Level: 10, 11, 12 Credit: 0.5	An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

Social Studies Department

PSYCHOLOGY II**Course # 02462**

Prereq: Psychology I (above average grades) and Dept. Chairperson approval.

Level: 11, 12

Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY**Course # 02510**

Prereq: Dept. Chairperson approval

Level: 10, 11, 12

Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned. *This course will prepare students for the Advanced Placement exam in May.*

ADVANCED PLACEMENT PSYCHOLOGY "RISE"**Course # 02530**

Prereq: Dept. Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

SOCIOLOGY**Course # 02381**

Prereq: None

Level: 11, 12

Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

AMERICAN POLITICS**Course # 02351**

Prereq: None

Level: 10, 11, 12

Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties.

UNITED STATES HISTORY**Course # 02310**

Prereq: None

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. *Transfer students who have not previously done so must pass a test on the Illinois and U.S. Constitutions as a requirement for graduation.* In U.S. History students satisfy Illinois requirements for study of the Declaration of Independence, United States Constitution, Illinois State Constitution, and Flag Code. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation.

AMERICAN STUDIES**Course # 01360**

Prereq: None

Level: 11

Credit: 2.0 (one in English; one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

Social Studies Department

ADVANCED PLACEMENT U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson approval

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. A test on the Illinois and U.S. Constitution is offered to satisfy the graduation requirement. *This course will prepare students for the Advanced Placement exam in May.* **Students enrolling in AP US History will not be able to drop to regular U.S. History or American Studies in the same school year.**

ECONOMICS

Course # 02341

Prereq: Average or above average grades

Level: 10, 11, 12

Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity.

This course fulfills the state mandate for consumer education.

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The second half of the course will examine the role the U. S. government should play in regulating the American economy, the wages workers should receive for different jobs, and how outsourcing is affecting America's economy. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. *This course will prepare students for the Advanced Placement exam in May.* ***This course fulfills the state mandate for consumer education.***

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372

Prereq: Completion of Economics or AP Econ: Micro, and Dept. Chairperson approval.

Level: 11, 12

Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. *This course will prepare students for the Advanced Placement exam in May.* ***This course fulfills the state mandate for consumer education.*** This course is offered second semester only.

PHILOSOPHY & ETHICS

Course # 02541

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course will not be so much to cover a particular body of philosophers, but to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions.

Social Studies Department

CONSTITUTIONAL LAW

Course # 02551

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, discrimination, and search and seizure law. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, an alternative final exam is available for those students who would prefer a project.

ADVANCED PLACEMENT GOVERNMENT & POLITICS, U.S.

Course # 02451

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare. *This course will prepare students for the Advanced Placement exam in May.*

HUMANITIES

Course # 02260

Prereq: Average to above-average grades and Dept. Chairperson approval

Level: 12

Credit: 2.0

(one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

Special Education

**Department Chairperson
Ms. Anne Kairis**

The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students. These supports include direct instruction, co-teaching in core classes, collaboration with general education teachers, and resource support. Additional supports available for students as determined in their individual educational plan could include occupational therapy, physical therapy, speech/language therapy, psychological and social work services. All of the classes are structured to assist in the attainment of the students' goals as written in the IEP.

PLACEMENT IN SPECIAL EDUCATION COURSES IS BASED UPON AN INDIVIDUAL CASE STUDY EVALUATION AND RECOMMENDATION BY THE SPECIAL EDUCATION STUDENT SUPPORT TEAM.

Please see Course Description for detailed Prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>
Resource I	01720	No	1.0	9

<p><u>RESOURCE I</u> Course #01720 Level: 9 Credit: 1.0</p> <p><u>RESOURCE II</u> Course #02010 Level: 10 Credit: 1.0</p> <p><u>RESOURCE III/IV</u> Course #01971/01972 Level: 11,12 Credit: .5 per semester</p>	<p>In these courses, students receive targeted instruction to improve progress on goals in identified areas of need. Student growth is monitored and families are informed of progress quarterly. The smaller group setting is structured so that students can receive assistance accessing the general education curriculum as well as instruction in executive functioning skills such as organization, time management, and test preparation.</p>
<p><u>EXTENDED RESOURCE</u> Course #11720 Level: 9, 10, 11, 12 Credit: 1.0</p>	<p>In this class, students receive targeted instruction to improve basic academic skills and progress toward identified IEP goals. Emphasis is placed on developing executive function skills, including organization, time management, and study strategies. Students also receive individual and/or small group tutorial assistance with academic assignments and test preparation. Extended resource teachers consult with case managers and classroom teachers to monitor student progress in all school settings.</p>
<p><u>PERSONAL ADJUSTMENT</u> Course #01991/01992 Prereq: Approval of Dept. Chairperson Level: 9, 10, 11, 12 Credit: 1.0</p>	<p>This class provides a highly supportive academic environment structured to address the behavioral/ emotional needs of students throughout the school day. Students also receive instruction in identified goal areas.</p>
<p><u>FOUNDATIONS FOR LEARNING</u> Course #11710 Prereq: Approval of Dept. Chairperson Level: 9, 10, 11, 12 Credit: 1.0 per class period Supply fee: \$180</p>	<p>This course is available to students enrolled in the Foundations for Learning program and emphasizes the acquisition and mastery of functional skills in three areas: academic, social, and prevocational. The course provides for extensive community-based, experiential learning.</p>
<p><u>PREVOCATIONAL JOB TRAINING</u> Course #01850 Prereq: Approval of Department Chairperson Level: 9, 10 Credit: 1.0</p>	<p>The goal of the program is to develop job responsibility, initiative, and positive employer--employee relationships within a controlled school job station. The student will work one period per day at a school station, which may include: audio-visual, laundry, library or cafeteria. The student will maintain time and log activity sheets. <i>Pass/Fail grades are issued for this course.</i></p>
<p><u>COOPERATIVE WORK TRAINING</u> Course #01770 Prereq: Approval of Dept. Chairperson Level: 11, 12 Credit: 1.0</p>	<p>Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and case manager on a quarterly basis. <i>Pass/Fail grades are issued for this course.</i></p>

Special Education

ADULT OPPORTUNITIES (SOAR)

Course #02930

Level: Ages 18, 19, 20, 21, 22

Credit: No credit

Supply fee: \$180

This is a District 86 program offered at the Transition Center.

Students will achieve within the overall mission of Hinsdale South High School by creating an exemplary adult-centered learning community. Students will seek and implement strategies and opportunities for improving good citizenship; facilitating adult independence and growth; uniting with students, families, and community entities to achieve definite goals with a common purpose; and demonstrate a commitment to the success and well being of all members.

Students engage in real-world opportunities and training that engage the qualities of good citizenship, in the areas of Vocational/Employment, Recreation/Leisure, Independent Living, Community Access, Interpersonal Relationships.

ENGLISH DYNAMICS

Course #01670

Level: 9, 10, 11

Credit: 1.0

English Dynamics, an adapted English course, is for students who have reading and writing skills that are significantly below grade level. Students can earn English credit in order to meet graduation requirements and master goals according to their individual education plans. This full year course emphasizes reading comprehension, vocabulary, communication, and written expression. Curriculum is largely delivered through scientifically research based programming. *This course can be taken multiple times with teacher approval.*

READING FUNDAMENTALS

Course #01715

Level: 9

Credit: 1.0

Reading Fundamentals is designed as a "blocked" class with English Dynamics for incoming freshmen. It is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary.

CONCEPTS OF ALGEBRA AND GEOMETRY

Course #03150

Prereq: Department Chair approval

Level: 9

Credit: 1.0

This course is offered through the math department.

This course is designed for students who require a refresher in foundational mathematics facts, in addition to giving them the tools which will allow them to be successful in Algebra I Block, Geometric Analysis, and future math courses. It meets the state requirement as a course that addresses Geometry content, but not the year-long Algebra credit. *A graphing calculator is required for this course. This course satisfies the Geometry content requirement.*

MATH 1

Course #01740

Prereq: Concepts of Algebra & Geometry or Algebra 1 Block

Level: 10,11

Credit: 1.0

Math I is a full year course designed for students who are looking to gain knowledge and mathematical skills for everyday life. After completion of this course, students will have a sense of confidence when faced with math in the real world.

MATH 2

Course #01750

Prereq: Math 1

Level: 11,12

Credit: 1.0

Math II continues the work started in the Math I class targeting continued acquisition of knowledge and skill in everyday mathematics.

EARTH SCIENCE

Course #01730

Prereq: None

Level: 9

Credit: 1.0

This course is a modified version of GeoPhysics (03640). Please see the course description located on Page 65. *This course is offered during the 2012-2013 school year.*

BIOLOGY

Course #01830

Prereq: None

Level: 10, 11, 12

Credit: 1.0

This course is a modified version of Biology (03720). Please see the course description located on Page 66. *This course will be offered during the 2013-2014 school year.*

FOODS I

Course #01722

Prereq: Approval of Dept.

Chairperson

Level: 9, 10, 11, 12

Credit: .5

This course is offered jointly between the Family and Consumer Sciences Department and Special Education Department. This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork. Student "peer helpers" add a unique component to the classroom as they assist, support and interact with the students during daily labs and activities.

This course is recommended for students in the Foundations or Extended Resource program before they take Foods and Nutrition. The course may be repeated as necessary.

DIGITAL COMMUNICATION

Course # 01731

Prereq: Approval of Dept.

Chairperson

Level: 9, 10, 11, 12

Credit:.5

This course is offered jointly between the Business Department and Special Education Department. Student programs are individualized to meet varying ability levels and needs in developing and improve computer skills for both career and personal use. The student learns and develops correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Evaluations are based on keyboarding techniques, daily class work, timed writings, assignments, written tests and projects. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

Technology Center of DuPage

Mr. Edward Susmilch, TCD Principal

301 S. Swift Road, Addison, IL 60190

(630) 620-8770

www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Dr. Gary Hutchinson

The Technology Education Department offers two areas of study which include computer aided design and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields.

Please see Course Description for detailed prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>
Pre-Engineering I	06741	No	0.5	9-12
Pre-Engineering I w/honors option	06731	Yes	0.5	9-12

Technology Education Department

PRE-ENGINEERING I

Course #06741

PRE-ENGINEERING I w/honors option

Course #06731

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process.

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings.

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I

PRE-ENGINEERING II w/honors option

Course #06751

Prereq: Pre-Engineering I &

Teacher recommendation

Level: 9, 10, 11, 12

Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course.

Course #06751 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept.

ARCHITECTURAL DESIGN

Course #06730

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$15

This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ENGINEERING DESIGN

Course #06721

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 0.5

This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

WOODS I

Course #06771

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$47

This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

Technology Education Department

WOODS II

Course #06780

Prereq: Woods I

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$137

This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval

Level: 11, 12

Credit: 1.0

This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college. A four-year sequence of honors level courses is available in all languages offered by the department.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed Prerequisites.

**HINSDALE SOUTH HIGH SCHOOL
WORLD LANGUAGES DEPARTMENT**

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

World Languages Department

GERMAN

GERMAN I

Course # 04200

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

German I is an introduction to the German language and culture. An intensive listening and speaking experience, based on everyday situations is provided. Students will learn the basic sounds of the language, pronunciation, grammar, vocabulary, and sentence patterns. Active reading and writing are introduced. Language skills and an understanding of the German people are obtained from the study of folk tales, recipes, songs, videos, and introductory reading from newspaper.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. In addition to the content of the German I course, students will be involved in higher level learning activities in listening, speaking, reading, and writing as a required part of the course. Additional enrichment reading assignments, projects, and presentations are integrated in the form of simple narratives, fairy tales, songs, and poems.

GERMAN II

Course # 04220

Prereq: "C" in German I
Level: 10, 11, 12
Credit: 1.0

German II provides a continuation of the skills learned in German I with an emphasis on communication and culture, while writing skills and practical vocabulary are greatly increased. Writing and performing skits gives the students the chance to "live" the language and an opportunity to more fully enjoy listening to and speaking German.

GERMAN II HONORS

Course # 04270

Prereq: "A" in German I or "B" in German I with Dept. Chairperson approval, or "C" in German I Honors
Level: 10, 11, 12
Credit: 1.0

In addition to the content of the German II course, German II Honors emphasizes higher level learning in listening, speaking, reading and writing. More advanced vocabulary and grammar structures will be studied, as well as German culture, customs, and history. Students are challenged by the addition of reading selection and urged towards mastery in communication skills

GERMAN III

Course # 04280

Prereq: "C" in German II
Level: 11, 12
Credit: 1.0

German III continues to emphasize communication skills, grammatical structures and a cultural approach. Students will increase their reading skills and vocabulary by reading short stories and a selection of poetry. Individualized study projects are integrated as well.

GERMAN III HONORS

Course # 04230

Prereq: "A" in German II or "B" in German II with Dept. Chairperson approval, or "C" in German II Honors
Level: 11, 12
Credit: 1.0

In this course previously learned skills are enhanced. Advanced vocabulary and grammar are studied along with short stories, cultural readings and selections from newspapers and classical literature. A thematic approach is used to integrate advanced learning in speaking, writing and active listening. Individualized study projects are pursued. Students will gain cultural understanding through excerpts from history, art, music, literature, geography, and films. Students are encouraged to begin to prepare for the Advanced Placement Exam in German.

World Languages Department

GERMAN IV

Course # 04290

Prereq: "C" in German III

Level: 11, 12

Credit: 1.0

German IV will continue the reading, grammar, listening, and composition writing in German. It will emphasize verbal and written communication and present selections from literature, art, music, science, history, and films. Students enrolled in the class are encouraged to prepare for College Placement tests

ADVANCED PLACEMENT

GERMAN LANGUAGE

Course # 04240

Prereq: A" in German III "B" in German III with Dept. Chairperson approval, or "C" in German III Honors

Level: 11, 12

Credit: 1.0

Advanced Placement German Language is the fourth course in the German sequence and is a college level course requiring the ability to work independently on a college level. This class emphasizes higher level learning skills in order to increase the student's reading rate and comprehension. Through the reading of literary masterpieces the student is enriched in his personal life as well as in his understanding of contemporary and historical Germany. Individual study projects are pursued. *Students enrolled in this course are encouraged to take the Advanced Placement Test in German in May.*

GERMAN V HONORS

Course # 04260

Prereq: "A" or "B" in German IV or Depart. Chairperson approval or "C" in Adv. Placement German

Language

Level: 12

Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors

Level: 9, 10, 11, 12

Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: "C" in Latin I

Level: 11, 12

Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin: Vergil or Advanced Placement Latin: Literature*

World Languages Department

LATIN II HONORS

Course # 04350

Prereq: "B" in Latin I Honors or "A" in Latin I

Level: 10, 11, 12

Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. Students are encouraged and prepared to take the College Board Achievement Test in Latin. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin: Vergil or Advanced Placement Latin: Literature*

ADVANCED PLACEMENT

LATIN: VERGIL

Course # 04360

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

This course is designed to prepare students to take the Advanced Placement examination in Vergil in May. Students in this course will read Vergil's epic poem, *The Aeneid*. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire.

This course alternates yearly with Latin Literature Honors and will be offered in 2012-2013

LATIN LITERATURE HONORS

Course # 04370

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

This course is designed to solidify the students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Petronius, Ovid, Catullus, and others. Students will also be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the students' exploration of ancient culture and society.

This course alternates yearly with Advanced Placement Latin: Vergil and will not be offered in 2012-2013. It will be offered in 2013-2014.

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: "C" in the Foreign Language most recently studied

Level: 10, 11, 12

Credit: 0.5

This course is designed to increase knowledge and understanding of English vocabulary. Students learn to discover meanings of words through recognition and interpretation of their elements. Supplementary activities add variety to the learning process. Etymology is especially recommended for students who plan to take the PSAT, ACT, SAT or other college entrance exams.

World Languages Department

FRENCH

FRENCH I

Course # 04100

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using textbook examples. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Although grammar concepts may be taught in English, students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred

Level: 9, 10, 11, 12

Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

FRENCH II

Course # 04120

Prereq: “C” in French I

Level: 9, 10, 11, 12

Credit: 1.0

French II is a continuation of the French 1 program and continues to build upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: “A” in French I or “B” in French I and Dept. Chairperson approval or “C” in French I Honors

Level: 9, 10, 11, 12

Credit: 1.0

The core material is the same as French 2 with an accelerated pace to allow for the reading and discussion of short stories and short books, as well as other activities to challenge the Honors student. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: “C” in French II

Level: 10, 11, 12

Credit: 1.0

This course reviews and expands upon skills learned in level II with an increased emphasis on extensive vocabulary acquisition and a more complete study of grammar. Students will continue their culturally based study of the language, do oral presentations, write short compositions, and short stories. Students will read a variety of sample literature pieces. During second semester, students read and discuss *Le Petit Prince*. This course is conducted extensively in French.

World Languages Department

FRENCH III HONORS

Course # 04180

Prereq: "A" in French II or "B" in French II and Dept. Chairperson approval or "C" in French II Honors
Level: 9, 10, 11, 12
Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: French III
Level: 11, 12
Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

ADVANCED PLACEMENT

FRENCH LANGUAGE

Course # 04150

Prereq: "C" in French III Honors or "A" in French III or "B" in French III with Dept. Chairperson approval
Level: 11, 12
Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

FRENCH V HONORS

Course # 04190

Prereq: Successful completion of Advanced Placement French IV and Dept. Chairperson approval
Level: 12
Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

SPANISH

SPANISH I

Course # 04510

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish I, the students develop communication skills, study grammatical structures, and learn about culture. Students study the basics of the language: speaking, listening comprehension, reading and writing. Cultural studies include a variety of media that illustrate culture and customs and discussion of the psychology of the Hispanic people and geography.

World Languages Department

SPANISH II

Course # 04520

Prereq: "C" in Spanish I

Level: 9, 10, 11, 12

Credit: 1.0

In Spanish II, the students will continue to develop communication skills, study grammatical structures and learn about culture. Specific cultural emphasis will be given to Mexico, Central America and South America. Specific communication skills will emphasize listening and speaking with increased instruction and practice in reading and writing.

SPANISH II HONORS

Course # 04580

Prereq: "A" in Spanish I

Level: 9, 10, 11, 12

Credit: 1.0

In addition to the content covered in Spanish II, Spanish II Honors will emphasize listening comprehension, meaningful conversation, reading selected text for conversation-stimulating content, and development of writing skills.

SPANISH III

Course # 04530

Prereq: "C" in Spanish II

Level: 10, 11, 12

Credit: 1.0

In Spanish III, students will continue to develop communication skills, grammatical structures and learn about the culture of various Spanish-speaking countries. Specific communication skills will emphasize the development of improved listening comprehension, speaking and writing, as well as further practice in reading and vocabulary building.

SPANISH III HONORS

Course # 04570

Prereq: "A" in Spanish II or "A"

or "B" in Spanish II Honors

Level: 10, 11, 12

Credit: 1.0

Spanish III Honors provides the opportunity for students to progress from a structured sequential language program to one, which emphasizes, in a thematic approach, integration of all language skills. Students will progress toward the goal of independent use of the language in speaking, reading, writing, and active listening. Furthermore, students will gain an understanding of Spanish culture through the study of history, art, music, literature, geography, and customs.

SPANISH IV

Course # 04540

Prereq: "C" in Spanish III

Level: 11, 12

Credit: 1.0

Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and to strengthen their skills in writing, reading, listening, vocabulary and comprehension. Culture is studied through reading, movies, field trips, and skits.

ADVANCED PLACEMENT

SPANISH LANGUAGE

Course # 04550

Prereq: "A" in Spanish III or "A" or

"B" in Spanish III Honors or

Department Chair approval

Level: 11, 12

Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through reading selection and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. *Students enrolled in this course are encouraged to take the Advanced Placement Test in Spanish in May.*

SPANISH V HONORS

Course # 04590

Prereq: "C" in AP Spanish

Language or "C" in Spanish IV

Level: 12

Credit: 1.0

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature. *Students enrolled in this course are encouraged to take the Advanced Placement Test in Spanish in May.*

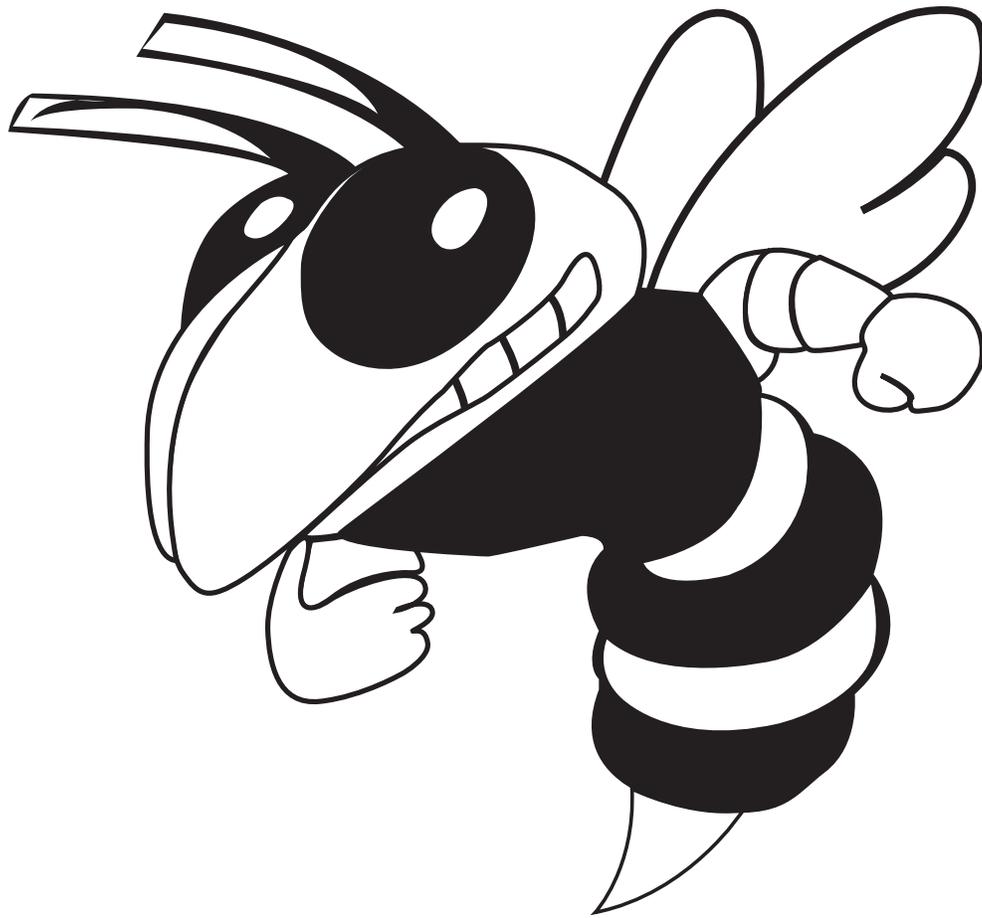

HINSDALE SOUTH GUIDANCE DEPARTMENT FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. This plan will be retained by your counselor and used for future academic planning.
6. *Indicates flexibility in academic scheduling.*

Hinsdale South High School

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2013-2014 school year. This *Program of Studies Handbook* provides you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Guidance and Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to challenge their academic potential.

Please take the time to carefully review the full Program of Studies Handbook at <http://south.hinsdale86.org/Program-of-Studies/>. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Guidance Department at (630) 468-4251.

Sincerely,

Brian P. Waterman

Principal

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. Each student must also take the Prairie State Achievement Exam (PSAE) in order to receive a regular high school diploma unless the student is exempt under state law.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. In this case, two credits of the 24 minimum credits may be earned in classes taken to fulfill the “intensive writing” requirement. English I and English II fulfill this requirement.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three years of Mathematics must be an Algebra course and one course must include Geometry content. Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Studies, World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>Personal Money Management Introduction to Business Economics Exploring Family and Consumer Sciences AP Economics: Micro AP Economics: Macro</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0
Prairie State Achievement Exam (PSAE) <i>This two-day exam is taken by all 11th grade students in April and is required for graduation. In order to be classified as an 11th grader, students must earn a minimum of 11.75 credits prior to the beginning of entering their third year in high school. Students who begin their third year in high school with fewer than 11.75 credits will be classified as 10th graders solely for the purpose of PSAE testing.</i>

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality of the student's academic record
- Performance on college admission tests – SAT I & ACT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	<p>Four (4) Credits</p> <p>Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.</p>
Mathematics	<p>Three (3) Credits</p> <p>Traditional preparation for college mathematics is a year each of Algebra I, Geometry, and Advanced Algebra, with a fourth year of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.</p>
Science	<p>Three (3) Credits of a laboratory science</p> <p>Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.</p>
Social Studies	<p>Three (3) Credits (emphasizing history and government)</p> <p>One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.</p>
Other	<p>Two (2) Credits in world languages, music, or art.</p> <p>If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.</p>

In most cases, students pursuing admission to a four year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

General Information

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "F" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: Students wishing to initiate a level change within the same department must complete the add/drop form and obtain all required signatures (parent/guardian, teacher, department chair, counselor).

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments.

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to, e-learning, correspondence, distance/blend learning, or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (American School, Illinois Virtual School, etc..) will not appear on the District 86 transcript *unless there has been prior written approval by the Director of Counseling*. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school.

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): The College of DuPage awards articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher. Excessive absences may result in removal from class and/or a loss of credit.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends
- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

- computer input error
- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Counseling recommendation
- successful completion of a summer school class

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (01671/01672) to recover lost credits. Students should speak with their school counselor and the appropriate department chairperson, if interested. *Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab.* The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts.

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1 Block. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation must be submitted by the family to the Director of Counseling for consideration.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), after school (Course #09400), and off-site on Tuesday and Thursday evenings (Course #09600).*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

General Information

Dean’s List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student’s grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F	1.0	1.0
I	1.0	1.0

Dean’s List and Honor Roll designation will be determined by the following criteria:

Dean’s List: 4.5 Weighted GPA with no grade in any course below a “C”

Honor Roll: 4.0 Weighted GPA with no grade in any course below a “D”

Dean’s List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean’s Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the department chairperson, the student’s school counselor, and the Assistant Principal for Curriculum & Instruction.

Junior High/Middle School Students: Junior high schools that feed into D86 unable to offer advanced coursework for their students may send their students to D86 for those courses. In these cases, all courses, grades and credit earned will appear on the transcript but will not be calculated into the grade-point average earned in subsequent years at a high school in District 86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day.

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student’s previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. All new transfer students and families must supply proof of in-district residency in order to register. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be presented to verify residency. The acceptable forms include but are not limited to the following: valid driver’s license or state ID, voter registration card, library card, home or renter’s insurance documentation, auto registration, gas, cable, or electric bill, or a public aid card. A student’s grade-point average previously earned at a high school other than a high school in District 86 will be calculated with the grade-point average earned at a District 86 high school. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript and will be indicated as transfer coursework.

Registration Requirements for New Students (Continued): The record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but *the preferred date of completion for the freshman physical is July 1*. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the "Adding/Dropping Courses" procedure outlined on Page 8.

Study Hall and "Hornet Honor" Seniors: All students enrolled in Study Hall are required to attend. The only exception is Seniors who have earned a place on the "*Hornet Honor*" list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. "*Hornet Honor*" seniors have the option of requesting a 1st period "Late Arrival" or a 10th period "Early Dismissal" in lieu of Study Hall during the course request process. Only "Hornet Honor" seniors who have "Late Arrival" or "Early Dismissal" on their official schedules have earned this privilege of late arrival/early dismissal. "Hornet Honor" seniors who have "Late Arrival" are expected to arrive on time to their 2nd period class and those enrolled in "Early Dismissal" are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for "*Hornet Honor*" seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with "Study Hall" on their official schedule regardless of what period the study hall is or what year the child is in school.

Art Department

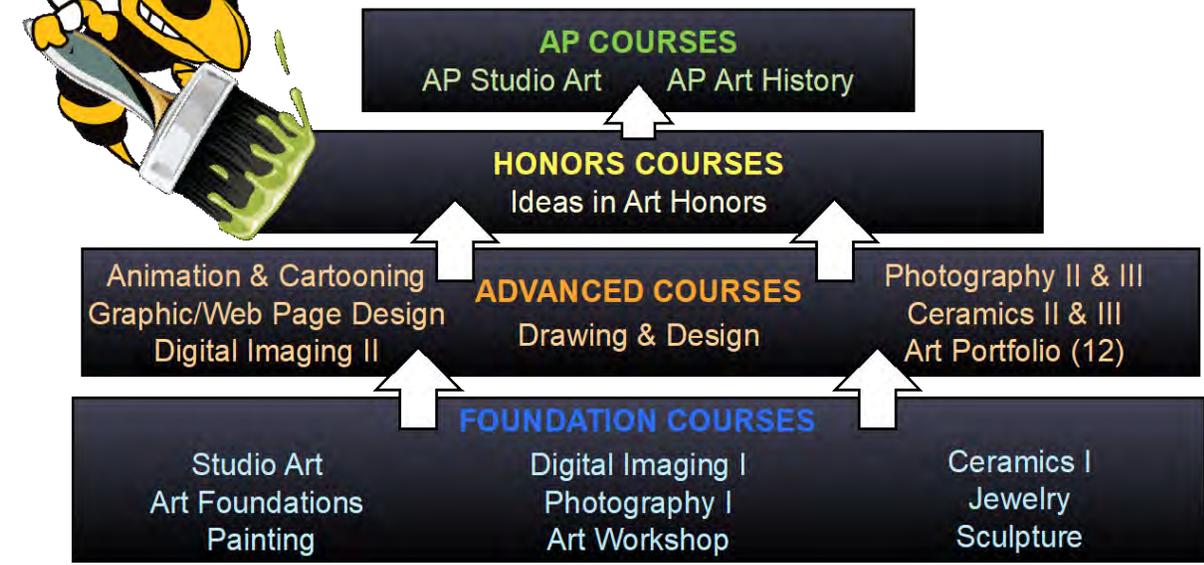

Department Chairperson
Mr. Gregory Gardner

Left to right
Larry James Jr.
Laura Packeviciute
Brenda Hu & Allison Jue
Logan Obermeyer

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, Internet images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Students purchase a course specific fee card at the bookstore that helps defray the cost of art supplies.**

Business Department

Department Chairperson

Dr. Gary Hutchinson

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies –

Deaf and Hard of Hearing

**Department Chairperson
Ms. Patricia Even**

The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

VISION STATEMENT

Strengthening the Deaf Community through Excellence in Education

MISSION STATEMENT

We will provide opportunities to improve learning and communication skills that will enable each student to be responsible and independent to their maximum potential, as well as provide opportunities to support each other in their continuous growth that leads them into their future.

DHH PROGRAM GOALS

- Teach the value of education as it relates to the future
- Encourage independence, responsibility and self-advocacy
- Support collaboration, respect and collegiality

Deaf and Hard of Hearing

English Department

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques is used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen:	English I <u>or</u> English I Honors
Sophomores:	English II <u>or</u> English II AR <u>or</u> English II Honors
Juniors:	English III-American Literature <u>or</u> English III-American Studies <u>or</u> Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their Guidance counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

Introduction to Theatre Arts
Journalism Lab: Yearbook
Journalism Lab: Yearbook w/ honors option

Humanities
AP English Literature

One semester (0.5 credit) classes

** indicates classes available to seniors only*

World Literature I*
World Literature II*
African-American Literature*
College Literacy*
English IV: Popular Literature*
English IV: Science Fiction *
Rhetoric*
Writing Workshop*
Advanced Acting
Advanced Communications
Film as Literature
Creative Writing
Journalistic Writing
Journalistic Writing w/honors option

Electives: Although the following courses broaden the students' experience in English, they DO NOT satisfy the required 4.0 credits in English. Instead, these classes count towards students' elective credits.

Academic Reading
Mass Media
Digital Video Production

Courses for Students with Limited English Proficiency: These classes are designed for students with limited experience with the English language. Students must have the permission of the Director of English Language Learning in order to be placed into these classes.

Transitional English Language Learning I
Transitional English Language Learning II
ELL Tutorial
English as a Second Language I
English as a Second Language II
English as a Second Language III

Family & Consumer Sciences

Department Chairperson Dr. Gary Hutchinson

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses. A fee is required in most foods related courses. Students are required to purchase materials for sewing.

Family & Consumer Sciences related careers and the suggested course sequencing:

CAREER	APPLICABLE COURSES
Dietitian Chef/Baker Hotel/Restaurant Management	Foods & Nutrition Creative Foods Bakery and Pastry Arts Chef & Restaurant
Fashion Designer/Buyer Fashion Display/Illustrator	Fashion Merchandising & Design Creative Sewing Creative Sewing II
Architect Interior Designer	Architectural Styles & Interior Design

Family & Consumer Sciences

Mathematics Department

Department Chairperson
Mr. Ismael Zamora

Vision: “Every student a mathematically literate problem solver.”

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become productive citizens. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

GRAPHING CALCULATORS ARE REQUIRED FOR
ALL MATH AND SCIENCE COURSES.

Any brand of graphing calculator is acceptable with one exception –
Students may not use the TI-Inspire CAS.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year. Another option is to double up Geometry and Algebra 2 during the student’s sophomore year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence. Upward level changes require a 95% semester average in the previous course.

Please see Course Description for detailed Prerequisites.

of-Studies/](http://south.hinsdale86.org/Program-of-Studies/)**

Mathematics Department

Mathematics Department

ALGEBRA I

Course # 03110

Prereq: Recommendation of 8th grade teacher and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are properties of numbers, equations and inequalities, and an introduction to linear and nonlinear functions, polynomials, and graphing. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I BLOCK

Course # 03140

Prereq: Recommendation of 8th grade teacher
Level: 9, 10, 11, 12
Credit: 2.0

This course is a double-period Algebra I so the student can complete Algebra in one year but devote more time to learning and applying the topics. It is designed for the student who learns at a slower pace as identified by entrance Explore test and teacher recommendation. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and Explore Test Score
Level: 9, 10, 11, 12
Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 focuses on operations with signed numbers and basic variable manipulation. Core topics include: working with inequalities, equation solving (one-step through multi-step), basic exponent operations, graphing linear functions, and polynomial operations. Algebra I Part 1 establishes the foundational skills necessary for success in future mathematics classes. ***This course in conjunction with Algebra I Part 2 fulfills the Algebra I requirement.** A graphing calculator is required for this course.*

ALGEBRA I Part 2

Course #03130

Prereq: 8th Grade teacher recommendation and Explore Test Score.
Level: 9, 10, 11, 12
Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 focuses on nonlinear functions polynomials and graphing. ***This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement.** A graphing calculator is required for this course. Most students will take this class in conjunction with Geometric Analysis. This class will not be offered in 2013-2014.*

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I at the High School or pass the entrance test at the end of 7th or 8th grade Algebra and Department Chairperson Approval.
Level: 9, 10
Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in regular Geometry 03210, but with more depth. Three-dimensional and coordinate geometric proofs are included. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra I at the high school or pass the entrance test at the end of 7th or 8th grade Algebra I and Department Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Geometry is required for entrance into most colleges and many vocational programs. This course continues the use of algebra in geometric situations, calls on the power of logic and proof, and incorporates applications to real-world problems in the plane and in space. This course is for students who intend to pursue post-secondary education of two or more years. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

Mathematics Department

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I Block,
Identified deficiencies from
Freshman exit Explore test,
semester exams and teacher
recommendation.

Level: 10, 11, 12

Credit: 1.0

This course is designed to follow the Algebra I. It deals with the same topics of Geometry 03210 with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. This course would be very beneficial for any student pursuing post-secondary education. Placement in this course is based on identified deficiencies as seen on Freshman exit Explore test, semester exams and teacher recommendation. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

ALGEBRA II / TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry
Honors or Department
Chairperson Approval

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry 03310 in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. This is a college-preparatory course. *A graphing calculator is required for this course.*

ALGEBRA II / TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I
and Geometry

Level: 10, 11, 12

Credit: 1.0

This course is designed for college bound students and useful for preparing for College Board tests like the SAT and ACT. It continues the study of linear and quadratic functions, graphing, polynomial, exponential and logarithmic functions, and introductory probability and trigonometry. *A graphing calculator is required for this course.*

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and
Department Chairperson
Approval

Level: 11, 12

Credit: 1.0

This course is recommended for students who completed Algebra 1 Block and Geometric Analysis. The topics studied are real and complex numbers, conic sections, and exponential, logarithmic, polynomial, and trigonometric functions. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/
Trigonometry Honors or A in
Algebra II/Trigonometry and
Department Chairperson
approval

Level: 10, 11, 12

Credit: 1.0

Precalculus Honors treats the topics of 03400 Precalculus in greater depth, with more emphasis placed on proof, abstract structure, and preciseness of thought and communication. In addition, analytic geometry of the plane, probability, and the polar coordinate system is studied. *A graphing calculator is required for this course.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II
/Trigonometry or Algebra II/
Trigonometry Honors or
Introduction to Statistics or Math
Analysis & Research

Level: 10, 11, 12

Credit: 1.0

This course is a study of functions and applications. It extends the topics of Algebra 2/Trigonometry and adds conic sections and some finite math topics. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

Mathematics Department

ADVANCED PLACEMENT CALCULUS AB

Course # 03420

Prereq: B or better in Alg II/
Trigonometry (Honors or
regular) or successful
completion of Precalculus
Level: 10, 11, 12
Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. Students are encouraged to take the College Board Advanced Placement AB exam in calculus in May. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT CALCULUS BC

Course # 03430

Prereq: Precalculus Honors
Level: 11, 12
Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, and infinite series. Students are encouraged to take College Board Advanced Placement BC exam in Calculus in May. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Level: 11, 12
Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *Students will be encouraged to take the Advanced Placement Statistics test in the spring. A graphing calculator is required for this course.*

STATISTICS

Course # 03470

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Approval.
Level: 12
Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course will prepare students to take the AP Statistics exam. *A graphing calculator is required for this course.*

MATH TOPICS I HONORS

Course # 03511

Prereq: Department
Chairperson approval
Level: 12
Credit: 0.5

Math Topics I is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course. *A graphing calculator is required for this course.*

MATH TOPICS II HONORS

Course # 03512

Prereq: Math Topics I Honors
and Department Chairperson
approval
Level: 12
Credit: 0.5

Math Topics II is a continuation of Math Topics I. *A graphing calculator is required for this course.*

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: AP Comp Sci and
Department Chairperson
approval
Level: 12
Credit: 1.0

This course for students wishing to continue the study of AP Computer Science. This course will be taught the same period as AP Computer Science.

Mathematics Department

HINSDALE SOUTH HIGH SCHOOL MATHEMATICS DEPARTMENT

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content. Credits must be earned in three full-year courses spread out over three school years.

Colleges require at least Algebra, Geometry, and Algebra II/Trig for admission. Many also require a 4th year Math course.

** These courses require Department Chair approval for registration.

Freshman	Sophomore	Junior	Senior
Algebra II/Trig. – Honors**	AP Calculus AB and/or Pre-calculus Honors and/or AP Statistics and/or AP Computer Science	AP Calculus BC and/or AP Statistics and/or AP Computer Science	AP Statistics and/or AP Computer Science and/or Math Topics Honors and/or Math Topics Computer Science Honors
Geometry Honors** or Geometry	Algebra II/Trig. Honors or Algebra II/Trig.	AP Calculus AB or Pre-Calculus Honors or Pre-Calculus and/or AP Statistics and/or AP Computer Science	AP Calculus AB or BC and/or AP Statistics and/or AP Computer Science
Algebra I or Algebra I Block	Geometry Honors or Geometry or Geometric Analysis	Algebra II/Trig. Honors or Algebra II/Trig. or Advanced Algebraic Topics	AP Calculus AB or Pre-Calculus Honors or Pre-Calculus and/or AP Statistics or Statistics and/or AP Computer Science
Algebra I Part 1	Algebra 1 Part 2 <u>AND</u> Geometry or Geometric Analysis	Algebra II/Trig. or Advanced Algebraic Topics	Pre-Calculus and/or AP Statistics or Statistics and/or AP Computer Science
Applied Fundamentals of Mathematics** (Special Education course)	Math I** (Special Education course)	Math II** (Special Education course)	Math II** (Special Education course)

Note: Department chairperson approval is required when a change of level (for example, Honors to regular level) is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

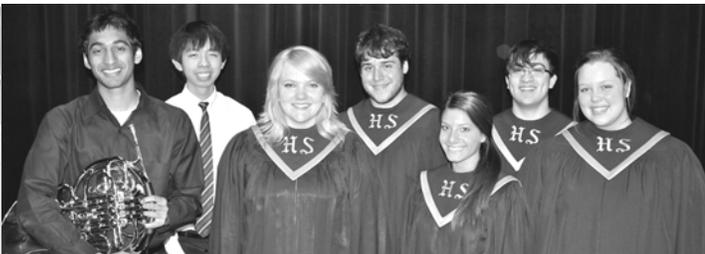

Music Department

Department Chairperson Mr. Gregory Gardner

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Music Department

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs.

PHYSICAL EDUCATION ACTIVITIES

Freshman Choices

Aerobics
 Badminton
 Basketball
 Floor Hockey
 Folk/Square/Swing Dance
 Gymnastics
 Physical Fitness Concepts (9)
 Physical Fitness Applications (10)
 Physical Fitness Testing
 Soccer
 Softball
 Speed-A-Way
 Swimming
 Tennis
 Touch Football
 Track & Field
 Volleyball

Sophomore, Junior and Senior Choices

Aerobics	Recreational Sports
Aerobic Fitness	Rhythmic Gymnastics
Archery	Roller Blading
Badminton	Snorkeling
Basketball	Soccer
CC Skiing	Softball
Flickerball	Speed-A-Way
Floor Hockey	Tchoukball
Golf	Team Handball
Ice Skating	Tennis
Lacrosse	Touch Football
Navy Football	Ultimate Frisbee
Net Games	Volleyball (indoor)
Outdoor Ed.	Water Games
Pickleball	Weight Lifting
Physical Fitness Applications	Yoga
Lifeguard Certification (2 nd sem. only)	

Freshmen, Juniors, and Seniors must register for Physical Education EACH semester.

<u>Grade</u>	<u>Semester 1</u>	<u>Semester 2</u>
9 (Learning Readiness PE) <i>This class will stress movement, cross lateral activities, and aerobic exercise; taking full advantage of the effects that exercise and movement have on learning.</i>	Course No. 07161	Course No. 07162
10/11*/12* (Upper Level PE)	Course No. 07471	Course No. 07472
10/11*/12* (Tumbling)	Course No. 07481	Course No. 07482
9^/10/11/12 (Early Bird PE) <i>Early Bird Physical Education starts prior to the regular school day and runs from 7:00 am until 7:50 am. This class allows students to enjoy the positive effects associated with exercise and the benefits it has on learning.</i> (^See page 9 for exclusions)	Course No. 07431	Course No. 07432

***Junior & Senior Athletes may be exempt from Physical Education during their sport season. Please inquire with counselor during registration.**

Department Chairperson Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see **Course Descriptions** for detailed **Prerequisites** located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

AP Physics C	03940	Yes	1	11, 12

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, and reading, writing and note-taking skills.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

HSHS SCIENCE DEPARTMENT COURSE SEQUENCE:

8 th Grade	9 th Grade	10 th Grade	11 th Grade	12 th Grade

Social Studies Department

Department Chairperson Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

Senior	<u>Electives:</u> African-American History American Politics Economics Geography Humanities Psychology I/Psychology II Sociology Philosophy & Ethics Constitutional Law AP Psychology RISE	<u>Electives:</u> AP Economics: Macro AP Economics: Micro AP Government & Politics, U.S. AP Psychology

- Students are strongly encouraged to take **four** years of social studies courses. Students may take multiple social studies courses their sophomore, junior and senior years.
- All social studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.
- Advanced Placement (AP) courses provide students with an opportunity to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of the level of study presented in AP courses, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites and to develop skills and work habits that will prepare them for AP classes their sophomore, junior and senior years.
- Hinsdale South also offers a variety of electives for sophomores, juniors and seniors that allow students to explore the social studies and expand their knowledge base. Electives can be taken concurrently with core courses. Listed course prerequisites may be waived by teacher or department chair recommendation.

Social Studies Department

Department Chairperson Ms. Kristen Prokup

The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students. These supports include direct instruction, co-teaching in core classes, collaboration with general education teachers, and resource support. Additional supports available for students as determined in their individual educational plan could include occupational therapy, physical therapy, speech/language therapy, psychological and social work services. All of the classes are structured to assist in the attainment of the students' goals as written in the IEP.

PLACEMENT IN SPECIAL EDUCATION COURSES IS BASED UPON AN INDIVIDUAL CASE STUDY EVALUATION AND RECOMMENDATION BY THE SPECIAL EDUCATION STUDENT SUPPORT TEAM.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

Special Education

Technology Center of DuPage

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190

(630) 620-8770

www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Dr. Gary Hutchinson

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

Technology Education Department

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college. A four-year sequence of honors level courses is available in all languages offered by the department.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

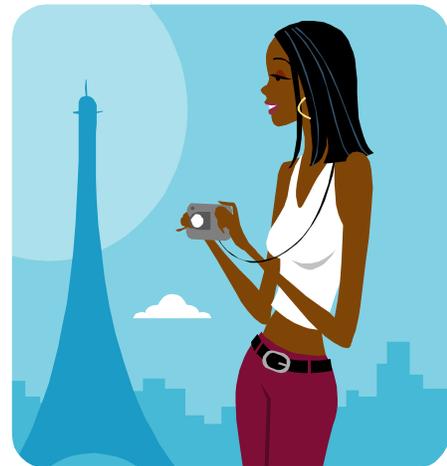

Please see Course Descriptions for detailed Prerequisites located within the full version of the Hinsdale South High School Program of Studies – <http://south.hinsdale86.org/Program-of-Studies/>

World Languages Department

**HINSDALE SOUTH HIGH SCHOOL
WORLD LANGUAGES DEPARTMENT**

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

HINSDALE SOUTH HIGH SCHOOL FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. This plan will be retained by your counselor and used for future academic planning.
6. *Indicates flexibility in academic scheduling.*

Vision Statement

A Partnership in Learning

Mission Statement

We will achieve the vision of Hinsdale South High School by creating an exemplary learning community where everyone...

- Seeks and implements strategies for improving student achievement;
- Facilitates student growth;
- Unites to achieve definite goals with a common purpose; and
- Demonstrates a commitment to the success and well being of all members.

Hinsdale South High School

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2014-2015 school year. This *Program of Studies Handbook* is derived from the District 86 course catalog to provide you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Guidance and Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to challenge their academic potential.

Please take the time to carefully review the *Program of Studies Handbook*. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Guidance Department at (630) 468-4251.

Sincerely,

Brian P. Waterman

Principal

General Information

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. Each student must also take the Prairie State Achievement Exam (or equivalent) in order to receive a regular high school diploma unless the student is exempt under state law.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. English I and English II fulfill this requirement as do Applied English and Foundations English.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three years of Mathematics must be an Algebra course (Algebra 1, Part 1 AND Algebra 1, Part 2, Algebra 1 Block, Algebra 1, Applied Math, or Foundations Math) and one course must include Geometry content (Geometric Analysis, Geometry, Applied Math or Foundations Math) . Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Studies, World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>AP Economics: Micro AP Economics: Macro Economics Exploring Family and Consumer Sciences Foundations Consumer Education Introduction to Business Money Management</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0

Prairie State Achievement Exam (PSAE)

This two-day exam is taken by all 11th grade students in April and is required for graduation. In order to be classified as an 11th grader, students must earn a minimum of 11.75 credits prior to the beginning of entering their third year in high school. Students who begin their third year in high school with fewer than 11.75 credits will be classified as 10th graders solely for the purpose of PSAE testing.

General Information

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality of the student's academic record
- Performance on college admission tests –ACT and/or SAT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	<p>Four (4) Credits</p> <p>Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.</p>
Mathematics	<p>Three (3) Credits</p> <p>Traditional preparation for college mathematics is a year each of Algebra I, Geometry, and Advanced Algebra, with a fourth year of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.</p>
Science	<p>Three (3) Credits of a laboratory science</p> <p>Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.</p>
Social Studies	<p>Three (3) Credits (emphasizing history and government)</p> <p>One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.</p>
Other	<p>Two (2) Credits in world languages, music, or art.</p> <p>If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.</p>

In most cases, students pursuing admission to a four year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "F" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: Students wishing to initiate a level change within the same department must complete the schedule change request form and obtain all required signatures (parent/guardian, department chair, counselor).

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to, e-learning, correspondence, distance/blend learning, or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (American School, Illinois Virtual School, etc..) will not appear on the District 86 transcript *unless there has been prior written approval by the Director of Counseling*. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher. Excessive absences may result in removal from class and/or a loss of credit.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends
- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

- computer input error

General Information

- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Guidance recommendation
- successful completion of a summer school class

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation must be submitted by the family to the Director of Counseling for consideration.

Dean’s List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student’s grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F	1.0	1.0
I	1.0	1.0

Dean’s List and Honor Roll designation will be determined by the following criteria:

Dean’s List: 4.5 Weighted GPA with no grade in any course below a “C”

Honor Roll: 4.0 Weighted GPA with no grade in any course below a “D”

Dean’s List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean’s Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Junior High/Middle School Students: Junior high schools that feed into D86 unable to offer advanced coursework for their students may send their students to D86 for those courses. In these cases, all courses, grades and credit earned will appear on the transcript but will not be calculated into the grade-point average earned in subsequent years at a high school in District 86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day.

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student’s previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. Pursuant to Hinsdale Township High School District 86 Board of Education Policy 7:50 and 7:60, every family must provide acceptable evidence of residency. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be

General Information

Registration Requirements for New Students (cont.): presented to verify residency. Contact the registrar for more information on adequate proof of residency. A student's grade-point average previously earned at a high school other than a high school in District 86 will be re-calculated based on the grade-point average processes currently used in District 86. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript exactly as they are titled on the sending school's transcript and will be indicated as transfer coursework. If the previous school assigned numerical grades, we will use their key to assign letter grades on the District 86 transcript. If no key is available, these courses will be recorded as "Pass" or "Fail". Transfer courses from schools outside of the United States may receive credit, but grades will be reflected as "Pass" or "Fail". A record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but *the preferred date of completion for the freshman physical is July 1*. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

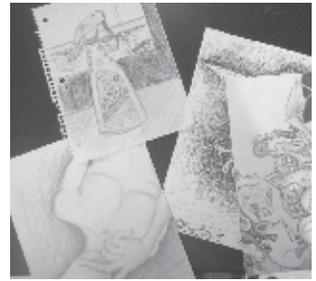

R-Rated Films Used in Instruction: If R-rated movies or clips from R-rated movies will be used in instruction in any course; a list of those movies will be made available at the time of registration through each department and online. Written permission must be obtained by a parent at the beginning of any course showing R-rated movies or clips from R-rated movies to allow students to view in whole or in part the R-rated movies associated with the class.

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the "Adding/Dropping Courses" procedure outlined on Page 8.

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, digital images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Supply fees are required for participation in all studio courses.**

Hinsdale South Art Courses

STUDIO ART

Course #05211

Prereq: none

Level: 9, 10, 11

Credit: 0.5

Supply fee: \$15

Students will be able to explore aspects of design, drawing, painting, mixed media, and sculpture in a one semester experience. Emphasis will be placed in creativity, craftsmanship, and problem solving. Studio Art is a course in which introductory students can experiment with a variety of media. Sketchbooks assignments supplement class work. *It is highly recommended that students interested in Drawing or Painting start with either Studio Art or Art Foundations.*

Art Department

ART FOUNDATIONS

Course #05100

ART FOUNDATIONS

w/honors option

Course #05110

Prereq: none

Level: 9, 10, 11

Credit: 1.0

Supply fee: \$22

Course #05100: The yearlong Art Foundations course allows students the optimum time to develop and master the basic skills and techniques of drawing, color theory, painting, sculpture, ceramics, printmaking, calligraphy, and graphic design. Students are introduced to the art elements and principles of design, evaluation of projects, and digital imaging. Connections are made to art history, popular culture, and advertising within the units. Sketchbook assignments supplement class work. *It is highly recommended that students interested in Drawing or Painting start with either Studio Art or Art Foundations.*

Course #5110 w/honors option: The yearlong Art Foundations w/honors option course allows students the time to expand upon the skills and concepts within the Art Foundations course. Enhanced opportunities to go above and beyond the regular curriculum through the creation of their own portfolio and exhibition of artwork are required. Mastery of techniques and development of personal style, concept, and student voice are emphasized.

DRAWING AND DESIGN

Course #05201

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$36

Drawing and Design is a specialized course that teaches students a variety of strategies to improve his/her ability to draw from life and improve design skills. Students are introduced to a variety of media such as pencil, charcoal, ink, technical pen, pastel and digital imaging. Complex drawing and design problems in perspective, value, and composition as well as experiences in critiquing their own work and the work of masters help to reinforce the technical skills. *It is strongly recommended that students interested in Honors Portfolio begin with Drawing and Design sequencing as a foundation.*

ADVANCED DRAWING AND DESIGN

Course #05231

Prereq: Drawing & Design

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$36

Advanced Drawing and Design is a continuation of the themes and techniques started in the Drawing and Design course in which students are asked to develop artwork which demonstrates mature drawing ability and design skills. Students are expected to investigate how drawings can be designed to communicate original ideas to a viewer. A development of an individual style and understanding of design will be stressed. *It is strongly recommended that students interested in Honors Portfolio begin with Drawing and Design sequencing as a foundation.*

PAINTING

Course #05400

Prereq: none

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

In this studio class students learn how to use a variety of media and techniques including acrylics and watercolor. Students produce paintings on paper and student stretched canvasses. Students execute six to eight paintings during the school year and possibly a group mural. Students will learn to discuss art through writing reflections and group critiques. The history of painting is introduced and explored through research and in class presentations.

GLASS WORKSHOP

Course #05561

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

This class is designed to introduce students to an assortment of fine arts and glass media. Projects include glass fusing, slumping and mosaic, bookmaking and collage techniques and beading. Patience and thoughtful planning are required as students turn in detail design sketches for each project. Students will also learn to apply the elements and principles of design to each project.

SCULPTURE

Course #05171

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$25

In this studio course, students will explore the manipulation of materials to create a variety of three-dimensional objects. Students will learn wood burning, mold making, clay modeling, stone carving, and a variety of surface finishing techniques. Emphasis is on creative thinking, design, and having fun. Students will have experiences in art criticism, the history of sculpture and organizing school exhibitions.

JEWELRY

Course #05331

Prereq: none
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$55

This course introduces students to basic and complex beading and wire wrapping techniques used to create jewelry. Fine motor skills, good vision and patience are needed to design and create a variety of beaded bracelets, chainmail bracelets, knotted/necklaces, crochet wire bead necklaces, earrings and unique pins. Students will vocabulary and be tested on technical skills and tool/bead identification.

CERAMICS I

Course #05301

Prereq: none
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$25

A variety of projects in this studio course introduce the steps to finished ceramic pieces: preparation of clay, hand-building techniques, firing, decorating, and glazing. Craftsmanship, good design and problem solving are emphasized. Students will learn and apply basic ceramic vocabulary including the art elements and principles of design, evaluate projects, complete multiple sketches prior to construction and utilize their ceramic booklet in class.

CERAMICS II

Course #05312

Prereq: Ceramics I; Approval of Ceramics Instructor
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$25

Building on techniques learned in Ceramics I, students are involved in more advanced hand-building projects and are able to create exciting work on the potter's wheel for the first time. Projects involving conceptual exploration are a foundation for the ceramic hobbyist or college bound student. A written report and presentation will be assigned.

CERAMICS III

Course #05321

Prereq: Ceramics II; Approval of Ceramics Instructor
Level: 11, 12
Credit: 0.5
Supply fee: \$25

This course allows the serious ceramics-minded student to expand his/her ability to design and produce clay pieces of artistic merit and personal style. Students will develop and use their own glazes. An individual course of study is arranged between the instructor and student. Ceramics III, with teacher approval, may be taken for AP Studio Art credit (#05210).

DIGITAL IMAGING I

Course #05071

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$8

This course is designed for students who want to create art on a computer. Artistic and creative problem solving strategies are developed which can help students in all areas of learning. Participants will use images to create original works of art using Adobe Photoshop, Illustrator, and other online applications. Emphasis is placed on using the computer as the media to create fine art.

DIGITAL IMAGING II

Course #05072

Prereq: Digital Imaging I
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$8

Digital Imaging 2 further explores the artistic potential of the computer and creative problem solving strategies. Creation of graphic images using advanced software features of Adobe Photoshop and Illustrator will be explored. Composition, color theory, rendering, and personal interpretation of subject matter will be stressed. Students will develop a portfolio of images that reflect the development of their personal style and voice.

ANIMATION AND CARTOONING

Course #05591

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

This course introduces the student to the art and history of cartooning and animation. Students learn caricature cartooning as well as developing their own cartoon character and comic strips. Techniques of animation are taught and enable students to produce their own animated film shorts. Students will also have hands-on experience using a color video animation system and Toon-Boom software.

Art Department

GRAPHIC DESIGN

Course #05111

Prereq: Digital Imaging I

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$8

This course introduces students to the various career and free-lance opportunities available in the visual communications field. Emphasis is placed on the development of an idea from thumbnail sketch to finished computer-generated image. Acquisition of basic commercial skills will be stressed in activities such as logo design, business cards, brochure design, point of purchase design, and advertising layouts. Presentation and critique skills will be incorporated into every project. Software such as Photoshop, Dreamweaver, and Flash will be utilized in the class.

PHOTOGRAPHY I

Course #05001

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$35

Change the way you look at the world. Use traditional film cameras and digital cameras to understand how to communicate your ideas visually. Students will also develop and print black and white film in an actual darkroom. Composition, class evaluation and assessments help students to develop a strong photographic portfolio.

Students are required to have their own SLR camera that uses 35mm film. Students will pay a lab fee for film, negative sleeves, photo paper and photographic developing supplies.

PHOTOGRAPHY II

Course #05012

Students who loved Photo 1 will enjoy capturing more photographic images in Photo 2. Students can experiment with traditional and digital photographic techniques. Do you want a career in photojournalism, advertising, photography, portrait photography, or fine art photography? Create, communicate and evaluate your images as you develop your photographic portfolio and blog online.

Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.

PHOTOGRAPHY II w/honors option

Course # 05022

Prereq: Photography I

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$35

Course # 05022 w/honors option: Honors students will be required to take an outside workshop or equivalent event. Honors students will submit a portfolio to the Scholastic Art competition. Honors students complete a written and picture BLOG as a journaling record of their theme. Honors students will increase rigor by participating in school spirit activities as photojournalism photographers.

PHOTOGRAPHY III

Course #05422

Prereq: Photography II

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$35

Serious photography students can get earn AP Credit at the conclusion of this course. Expand your knowledge and skills to create artistic photographs with your own personal style. An individual course of study will be arranged between student and teacher at the beginning of the semester. Students will organize their images into a photographic portfolio that will be submitted for portfolio competition. With teacher approval, Photo 3 may be taken for AP Studio Art credit (#05210) as a yearlong class.

Students are required to have their own SLR 35mm film cameras and/or a Digital Camera. Students will pay a lab fee for film, negative sleeves and photo paper and photographic developing supplies.

HONORS PORTFOLIO

Course #05441

Prereq: Advanced level course and Dept. Chair approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$30

Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen medias. The work produced in this course may be used as part of the Advanced Placement portfolio.

**ADVANCED PLACEMENT
ART HISTORY**

Course #05580

Prereq: Dept. Chair approval

Level: 10,11,12

Credit: 1.0

This course provides a survey of the history of western and non-western art from pre-historic times to the present and teaches methods of interpreting and analyzing works of art. Students with good writing skills and an interest in art and its place in our world can do well in the course. Hands on projects, focusing on process rather than product, cooperative group assignments and Internet searches are correlated with the period under study. Field trips to Chicago area museums and important architectural structures enhance classroom learning and help familiarize the students with the cultural offerings of the city.

SENIOR PORTFOLIO

Course #05570

Prereq: One advanced art course and Dept. Chair approval

(or comprehensive portfolio review by the Art Department)

Level: 12

Credit: 1.0

Supply fee: \$40

This course is for students who desire the rigorous challenge of a senior level studio class. Students complete a portfolio which includes fourteen to sixteen pieces of art work - drawings, paintings, prints, digital, and three-dimensional work are some of the materials used. A culminating series project will also be assigned demonstrating the students' artistic statement. Students will have experiences in art criticism, and will organize a group show in the Hinsdale South Art Gallery.

**ADVANCED PLACEMENT
STUDIO ART**

Course #05210

Prereq: One advanced art course and Dept. Chair approval

(or comprehensive portfolio review by the Art Department)

Level: 11, 12

Credit: 1.0

Supply fee: \$40

This course provides accelerated students with a challenging program of college-level studio work. Prior to the end of the academic year, a portfolio of approximately 24 pieces will be submitted to the College Board for evaluation and possible college credit. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work.

Business Department

Department Chairperson Dr. Gary Hutchinson

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

See course description for detailed prerequisites.

ESSENTIAL TECHNOLOGIES

Course # 06121

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Essential Technologies is designed for the student who wants to acquire skills necessary to enhance the value of the computer for academic and personal use. This course will focus on developing 21st Century technology skills by incorporating study in keyboarding, Internet research, and computer literacy. Through the use of Microsoft Office and SharePoint, we will focus on building a student's essential technology skills that will be needed at Hinsdale HSD 86. *Students who desire improvement in keyboarding, computer usage, and basic software application skills will benefit from this course and be better prepared for all high school classes.*

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

FINANCIAL APPLICATIONS

Course # 06162

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Financial Applications will help students gain an understanding of how to use technology to help them manage financial resources that are essential for success in college, a career, and personal finance. With a focus on financial spreadsheets and reports, students will learn business and personal financial management using various financial software/resources. *Students interested in the areas of Finance, Marketing, Management and Economics should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Management/Entrepreneurial Studies, Marketing, Business Work Experience, and Internship.*

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

Business Department

TECHNOLOGIES FOR COLLEGE AND CAREERS

Course # 06172

Prereq: None
Level: 9, 10, 11, 12
Credit: 0.5

This course will expand a student's abilities to work creatively and communicate effectively while exploring how the Internet and associated technology that support college and careers. Through the use of technology and project-based learning, students will further their skills in the Microsoft Office Suite w/Expression, Internet Explorer and various online tools and be exposed to a variety of personal, educational and business applications. *Students interested in ANY business- or technology-related fields should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Law I/II (Honors), Business Management/Entrepreneurial Studies (Honors), Marketing (Honors), Business Work Experience, and Internship.*

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

MULTIMEDIA INNOVATIONS

Course # 06182

Prereq: None
Level: 9, 10, 11, 12
Credit: 0.5

Students will enhance their communication and presentation skills through various forms of multimedia. Editing, animating, and digital-publishing will be emphasized. Using various software programs and online resources, students will design and create audio and visual projects/presentations. *Students interested in Entrepreneurship, Management, and Marketing, should take this course.*

Suggested courses taken after or during: Business Law I/II (Honors), Business Management/Entrepreneurial Studies (Honors), Marketing, Business Work Experience, and Internship.

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

FOUNDATIONS DIGITAL COMMUNICATION

Course # 01731

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: .5

This course is individualized to meet varying ability levels and needs in developing and improving computer skills for both career and personal use. Each student will learn and develop correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

APPLIED BUSINESS

MONEY MANAGEMENT

Course # 06111

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Money Management will integrate economic concepts with the student's important role in the economy as a citizen, consumer, and worker. Topics include: money management, buying goods and services, banking (savings and checking), investments, the efficient use of credit and loans, consumer protection, insurance, housing, and our tax system.

This course fulfills the state mandate for Consumer Education.

FOUNDATIONS CONSUMER EDUCATION

Course #11790

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

Students enrolled in this course focus on the concepts of budgeting, money management, self-advocacy, roles of consumers, communication, socialization, functional life skills, recreation/leisure skills, and applying those concepts to real world opportunities through weekly community experiences.

INTRODUCTION TO BUSINESS

Course # 06100

Prereq: None

INTRODUCTION TO BUSINESS w/Honors

Option

Course #06300

Prereq: Instructor approval

Level: 9, 10

Credit: 1.0

Course # 06100: This course gives students a background in the basic operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities. This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

Course # 06300 w/Honors Option: Introduction to Business Honors option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business. This course gives students a background in the operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, consumerism, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities that have more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

BUSINESS LAW I

Course # 06231

Prereq: None

Course #06231: Students will gain an appreciation of our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: our legal system (courts, criminal and civil law) contracts, personal, and consumer law. A field trip to a local court and participation in mock trials as lawyers, witnesses, and/or jurors help students gain an understanding and an appreciation of how the American legal system functions.

BUSINESS LAW I w/Honors Option

Course #06221

Prereq: Instructor approval

Level: 11, 12

Credit: 0.5

Course #06221 w/Honors Option: Business Law I w/Honors Option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Students electing the honors option will be required to complete a more rigorous and in depth curriculum for each unit. Students electing the honors credit option will work with the same topical material as the Business Law class. However the topics will be looked at on a different level by all honors students. All unit materials in this course will have the following emphasis: (1) Writing intensive, (2) Research based, (3) Higher complexity of analysis and reasoning, and (4) Professional level presentation of work.

BUSINESS LAW II

Course # 06242

Prereq: Business Law I

This course will not be offered in the 2013-2014 school year.

Course # 06242: Students will investigate our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Students will also participate in The National On-line Youth Summit sponsored by the American Bar Association.

Business Department

BUSINESS LAW II **w/Honors Option**

Course #06252

Prereq: Business Law I
w/Honors Option and
instructor approval

Level: 11, 12

Credit: 0.5

Course #06252 w/Honors Option: This course is an extension of Business Law I Honors Option and is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Topics covered include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Projects and assessments for this option will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. **Business Law II will not be offered during 2014-2015 school year.**

MANAGEMENT, MARKETING & FINANCE

ACCOUNTING

Course # 06320

Prereq: None

Level: 11, 12

Credit: 1.0

This course covers the principles and procedures of accounting. Both manual and computerized double-entry systems are taught. Practice sets and exercises are used during supervised laboratory sessions to develop skills in practical applications. Through the use of microcomputers, students also gain familiarity with computerized accounting procedures. The objectives of this course include preparing students for initial accounting jobs in business and providing a technical background for college-bound students who plan to enter certain fields of business.

ACCOUNTING HONORS

Course # 06350

Prereq: Department
Chairperson approval

Level; 11, 12

Credit: 1.0

In this course, students develop an understanding of double-entry accounting. Topics covered include the following: accounting cycle, banking activities, special journals, payroll, accounting systems and design, internal controls, financial statement analysis, and deferrals and accruals. Students also utilize computer software for problem solving and learn spreadsheet applications.

INVESTMENT PLANNING

Course # 06331

Prereq: None

Level; 10, 11, 12

Credit: 0.5

In this course students will study basic investment principles involving stocks, commodities, bonds, and mutual funds. Students will also learn about tax information, effects of the economy on the market, government regulations of securities and on-line investing. Current issues as they relate to investing will be discussed. Teams will be formed to participate in the Stock Market Game by trading on-line.

ENTREPRENEURIAL **STUDIES**

Course # 06421

Prereq: None

Course # 06421: Business Management and Entrepreneurial Studies is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. This course is an introduction to current practices in the world of business. Units of instruction include economic trends, entrepreneurship, business organization, human relations, ethics, management, marketing, finance, and international business.

ENTREPRENEURIAL **STUDIES w/Honors** **Option**

Course # 06431

Prereq: Instructor approval

Level: 11, 12

Credit: 0.5

Course #06431 w/Honors Option: Business Management and Entrepreneurial Studies w/honors option is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. Students will prepare themselves for the challenges of the business world and becoming an entrepreneur/manager by relating current practices in the world of business to: economic trends, business organization, human relations, ethics, management, marketing, finance, and international business.

MARKETING

Course # 06470/#06480

Prereq: None

Marketing is designed to prepare students for the challenges and opportunities in the field of marketing. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

Course # 06470: Students not enrolled in Business Work Experiences (Course #06490) should select Course #06470. Marketing 06470 is beneficial for those planning to enroll in related business/marketing programs in college.

Course # 06480: Students enrolling in Business Work Experiences (Course #06490) need to be concurrently enrolled in Marketing #06480. This course is designed for students working part-time in related jobs and also for students planning to enroll in related programs in college.

MARKETING w/Honors Option

Course # 06460

Prereq: Instructor approval

Level: 11, 12

Credit: 1.0

Supply fee: \$25

Course # 06460 w/Honors Option: The Honors Option is designed for students with above-average grades, managerial/organizational and intellectual abilities, who plan to major in business/marketing in college. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

In addition, all Marketing students participate in the activities of BPA, an organization for business students.

Though there is no prerequisite for Marketing, successful completion of or concurrent enrollment in another Business course is encouraged.

EMPLOYMENT EXPERIENCE

BUSINESS WORK EXPERIENCES

Course # 06490

Prereq: *Marketing or concurrent enrollment in Marketing and coordinator approval*

Level: 11, 12

Credit: 1.0

Business Work Experiences provides the student with actual paid business experience related to their career goals. Students are employed in local businesses from a minimum of 15 hours to a maximum of 25 hours per week for which they receive monetary compensation. A wide variety of experience is available in fields such as apparel and accessories, automotive, food distribution, food service, hotel and tourism, general merchandise retailing, and various office related careers, including banking, accounting, and administrative assistant positions. This work experience program prepares students for further study or a career in marketing, retailing, management, finance, accounting, or administrative office positions. Students are selected by application and interview with emphasis on factors including reliability, integrity, and career goal. ***It is the student's responsibility to make travel arrangements to and from the job. Students must maintain enrollment and earn a passing grade in Marketing to receive credit for this work experience program.***

Business Department

INTERNSHIP

Course # 06461

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 per semester (this class may be repeated for up to 1 credit)

Internship is an elective semester program for the highly motivated junior or senior. The program provides students with opportunities in the local community for hands-on career exploration in their chosen field. Acceptance into the program is determined by factors such as faculty letters of recommendation, availability of a community sponsor, and interviews with the coordinator and the community sponsor. Students are required to keep a journal of their experiences and complete a summary report. During the internship, students observe daily operations, confer with other personnel, and participate and contribute to the functions of the organization for at least 50% of the hours spent in the internship experience. Student performance in the Internship program is evaluated on a pass-fail basis. ***The internship is conducted exclusively outside of the school day with no pay for a minimum of 50 hours during the semester. Students must make the travel arrangements necessary to fulfill their internship responsibilities.***

INTERNSHIP w/Honors Option

Course # 06441

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 per semester (this class may be repeated for up to 1 credit)

Course #06441 w/honors option: The core material for this course is similar to Course #06461; however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time. This course is highly recommended for motivated students giving serious consideration to a specific career.

PREVOCATIONAL JOB TRAINING

Course #01850

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

The goal of this course is to develop job responsibility, initiative, and positive employer--employee relationships. Emphasis will be placed on hands-on in school job training and entry level workplace skill development which may include: following a schedule, time management, efficiency, responsibility, work etiquette, following directions and communicating with coworkers and supervisors. *Pass/Fail grades are issued for this course.*

COOPERATIVE WORK TRAINING

Course #01770

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and teacher on a quarterly basis. *Pass/Fail grades are issued for this course.*

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques is used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Please see Course Description for detailed Prerequisites.

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen: English I or English I Honors
Sophomores: English II or English II AR or English II Honors
Juniors: English III-American Literature or English III-American Studies
or Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their Guidance counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

Introduction to Theatre Arts
Journalism: Yearbook
Journalism: Yearbook w/ honors option

Humanities
AP English Literature

One semester (0.5 credit) classes

** indicates classes available to seniors only*

English as a Second Language I
English as a Second Language II
English as a Second Language III

English Department

CORE CREDITS

ENGLISH I

Course # 01110

Prereq: None

Level: 9

Credit: 1.0

English I teaches essential written language and communication skills in a program that integrates literary analysis, library research, listening skills, problem-solving strategies, teamwork, and multimedia presentations. Students will explore fiction and non-fiction works including short stories, novels, poetry, drama, mythology, and biographies. The course allows students to express their understanding of important concepts and mastery of skills through discussions, projects, compositions, creative writing, and presentations.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH I HONORS

Course # 01120

Prereq: Dept. Chairperson

Approval

Level: 9

Credit: 1.0

This course, for the superior academic student, not only incorporates the materials and skills of English I, but also is designed to provide an enriched study of literary forms and purposes, a great variety of student written expression, and more formal oral communication activities. The student will be introduced to the development of literature from its beginnings in the oral tradition to the standard modern literary genres – short story, novel, drama, biography, and poetry. Written assignments stress expository writing, especially mastery of the multi-paragraph essay. More sophisticated grammatical concepts are presented to improve the student's style of expression. Students perform a variety of speech assignments. A vocabulary text is also included.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II

Course # 01210

Prereq: Pass both semesters of English I

Level: 10

Credit: 1.0

A variety of literary works, composition assignments, and oral activities is presented. Within thematic units, various literary types (novel, short story, poetry, drama) will be studied and compositions written. Composition assignments stress the multi-paragraph essay organizational format, although some creative writing is also expected. Special emphasis is placed on the more sophisticated modes of persuasive, comparison/contrast, and cause and effect essay development. Research strategies of varying scope are presented during the second semester.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II AR

Course # 01200

Prereq: Pass both semesters of English I & Dept. Chair

Approval

Level: 10

Credit: 1.0

Along with following the curriculum of English II, this course also focuses on additional strategies to improve students' academic reading (AR) abilities. Placement in this class is dependent on students' test scores, achievement in English I, and teacher recommendations.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II HONORS

Course # 01220

Prereq: English I Honors
and/or Dept. Chairperson
approval

Level: 10

Credit: 1.0

This course, for the superior academic sophomore student, is a general survey approach to English literature in which major English authors and their representative works are studied. Authors' themes as well as specific literary types are studied: poetry, drama (especially Shakespeare), short story, and novel. Composition skill development is divided between exposition (critical analysis and personal essays) and creative writing. A research paper is also required. Vocabulary will be studied in the context of the literature.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH III – AMERICAN LITERATURE

Course # 01330

Prereq: Pass both semesters
of English II

Level: 11

Credit: 1.0

English III builds on the skills acquired in English I and English II. The course focuses on American Literature and emphasizes outstanding American authors from early to modern times in the genres of fiction, non-fiction, drama, and poetry. In addition, there is a challenging emphasis on grammar, vocabulary, and study skills development. Written work consists of the expository essay and the completion of a college level research paper.

There is required reading during the summer before beginning this course.

AMERICAN STUDIES

Course # 01360

Prereq: Pass both semesters
of English II

Level: 11

Credit: 2.0 one for junior level
English; one for U.S. History

This interdisciplinary class is offered for a wide range of junior students who are academically motivated, self-directed, or college bound. The course will take an intensive survey approach to American literature and American history, emphasizing the advantage of seeing the "sense of connectedness" between the history of each era and its relationship to and influence on the art, music, and literature produced during that period. Challenging literary and historical analysis will be pursued throughout the course in lectures, discussions, and writing assignments. In addition, there will be emphasis on vocabulary, study skills, and the development of research expertise. Writing assignments will include the development of literary analysis, expository essays, some creative writing, and independent study towards the research paper. Special projects coordinated between the two disciplines will include the research paper and enrichment field experiences. Reflective of their overall effort and ability to excel in this interdisciplinary environment, students earn a single grade for this two-part course.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LANGUAGE & COMPOSITION

Course # 01320

Prereq: English II Honors
and/or Dept. Chairperson
approval

Level: 11

Credit: 1.0

The AP English Language and Composition course "engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing" (College Board). Major American authors and their representative works will be studied as students comprehend, analyze, and evaluate American literature that encompasses various time periods and literary movements with a focus on rhetorical analysis. Students will develop stylistic maturity in their prose by enhancing their ability to use writing conventions both appropriately and with sophistication focusing on expository, analytical and argumentative writing. ***There is required reading during the summer before beginning this course.***

English Department

APPLIED ENGLISH DYNAMICS

Course #01670
Prereq: Department chairperson placement
Level: 9, 10, 11
Credit: 1.0

This course is for students who are reading and writing below grade level. Curriculum is largely delivered through scientifically research-based programming and emphasizes reading comprehension, vocabulary, communication and written expression. *This course can be taken multiple times with teacher approval.*
This course fulfills one of two "Intensive Writing" requirement credits.

APPLIED READING FUNDAMENTALS

Course #01715
Prereq: Department chairperson placement
Level: 9
Credit: 1.0

This course is designed as a "blocked" class with Applied English Dynamics for incoming freshmen. It is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary.

APPLIED ENGLISH 4

Course #01820
Prereq: Department chairperson placement
Level: 12
Credit: 1.0

This course will focus on development and application of skills needed for success in the work place and community. Skill areas include comprehension of informational texts and ability to communicate in the areas of listening, speaking and writing.

FOUNDATIONS ENGLISH

Course #11750
Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental elements of reading, writing, listening and speaking skills that can be generalized in various facets of daily life. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.
This course fulfills one of two "Intensive Writing" requirement credits.

OPTIONS FOR FOURTH CREDIT

ADVANCED ACTING

Course # 01601
Prereq: Introduction to Theatre Arts or Dept. Chairperson approval
Level: 10, 11, 12
Credit: 0.5

Advanced Acting is a performance-oriented course that gives the student concentrated training in developing various acting styles and performance techniques. In addition, students advance their study of the art of characterization through the development of bodily movement and vocal expression. Students are individually graded on their progress in learning and applying skills through class performance as they relate to the various dramatic forms. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

SPEECH/COMMUNICATION

Course # 01631
Prereq: Pass both semesters of English I
Level: 10, 11, 12
Credit: 0.5

This class is designed to give the student background and experience in the study of public speaking and performance. It provides opportunities for the student to learn organizational speech and writing and research skills, write scripts and speeches, prepare cuttings from the works of noted authors, and evaluate his performance and the performances of others. Students will analyze the work of professional and gifted performers in all areas of communication and performance. Students will also receive instruction and practical experience in a variety of speech forms: oratory, extemporaneous speaking, oral interpretation of literature (both prose and poetry), humorous and dramatic interpretation (individual, duet, and group), and radio and television broadcasting.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LITERATURE & COMPOSITION

Course # 01480

Prereq: AP English
Language & Composition
and/or Dept. Chairperson
approval
Level: 12
Credit: 1.0

AP English Literature & Composition, "Great Books," focuses on selected major works of Western Civilization in the field of literature, philosophy, political theory, history, theology, and psychology. Required readings in all the genres of fiction include such writers as Joyce, Dante, Austen, Dostoevsky, Shakespeare, and Sophocles and a spectrum of non-fiction: letters, treatises, essays, handbooks, and dialogues by such writers as Mill, Nietzsche, Locke, Epictetus, and Plato. A summer reading list is required. Students read critically and participate actively in the great and continuing conversations on the pivotal human issues found in these classics. Student partners lead discussions according to the Great Books method. Compositions include papers on analysis, synthesis, evaluation, and hypothesis as well as delineation of each author's arguments in non-fiction. Two semester term papers are also required, analyzing, comparing, and contrasting at least three works, two of which are read outside of class. *This course prepares the student for the Advanced Placement exam in May. **There is required reading during the summer before beginning this course.***

SENIOR COMPOSITION

Course # 01621

Prereq: Pass both semesters
of English III
Level: 12
Credit: 0.5

This college bound course is designed for students who wish to improve their critical thinking skills and reading and writing strategies for the heavier demands of college coursework. The topics covered will be literary analysis, reading for the research paper, vocabulary development, and textbook reading strategies. Students will read self-selected novels from a college-bound list. ***There is required reading during the summer before beginning this course.***

FILM STUDIES

Course # 1451

Prereq: Pass both semesters
of English II
Level: 11, 12
Credit: 0.5

Film Studies is a course designed for students who enjoy movies, yet wish to go beyond merely watching them and into the realm of thinking critically about how and why they are made, just as literature is studied. Throughout the semester, students will attempt to define the essential question: what makes a film great? We will consider how directors use sound, lighting, camera movement, and editing in order to create meaning and enjoyment. The class will critique a wide variety of genres, both past and present, and will demonstrate their understanding through engaging class discussions, collaborative projects, and writing, both formal and informal. By the end of the semester, students will grow in their ability to interpret film (as well as written texts) and to appreciate the fascinating world of cinema.

*Although not all movies are shown in their entirety, written permission must be obtained by a parent at the beginning of this course to allow for students to view the R-rated movies associated with this class. At the time of registration, if R-rated movies are to be utilized in whole or in part, a list of these movies will be available through the English department and online. **There is required reading during the summer before beginning this course.***

SCIENCE FICTION

Course # 01431

Prereq: Pass both semesters
of English III
Level: 12
Credit: 0.5

This senior elective explores views presented by various science fiction writers. Through this survey of classic and contemporary science fiction, students will consider different attitudes regarding the future of humankind. Along with the reading of novels, students will have a variety of writing experiences including a research paper. Course evaluation will be measured through tests, quizzes, class discussions, three analysis papers, and one research paper. Texts include *Ender's Game*, *The Maze Runner*, *The House of the Scorpion*, and the anthology: *Science Fiction, Science Fact and You*. ***There is required reading during the summer before beginning this course.***

English Department

POPULAR LITERATURE

Course # 01461

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

Designed for college and non-college bound seniors, "Popular Literature" focuses on works of 90s and today, while emphasizing the differences of popular and classical literatures. The origin and dynamic characteristics of this genre in today's society will be analyzed through the reading of class books and literature circles. Types of reading audiences and "requirements" of a popular literature author will also be studied. Students will be required to complete written, oral and group projects in addition to the readings; class discussion will constitute a major portion of the class. Authors to be read and studied may include John Grisham, Harlan Coben, Dan Brown, James Patterson, Patricia Cornwell, Sandra Brown, Stephen King, Danielle Steel, Nicholas Sparks, Mary Higgins Clark, and Tom Clancy. Novels may include *Dark Tower*, *The Notebook*, *The Partner*, *Roses are Red*, *Tell No One*, *Hello Darkness*, *DaVinci Code*, and *Angels and Demons*.

There is required reading during the summer before beginning this course.

CREATIVE WRITING

Course # 01561

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

This elective is designed for students who are interested in exploring more creative aspects of their writing and studies of literature. Creative Writing emphasizes an understanding of traditional literary techniques combined with unconventional, individualized forms of speaking and writing to effectively communicate in an interesting way. The class incorporates a wide variety of verbal and written exercises that require a balancing of individual creativity with disciplined focus for success in the course. Time is dedicated to better understanding the creative process and helping students find inspiration to improve all aspects of their writing. In addition to improvisational exercises and participation in writing groups, students complete a portfolio project each quarter that is the culmination of daily journaling and reading assignments. Emphasis will be placed upon both recognizing the elements of style in classical and contemporary authors in selected reading passages and in developing individual style.

There is required reading during the summer before beginning this course.

RHETORIC

Course # 01531

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This elective is designed for college-bound seniors who desire experience in writing. The course develops student writing in freshman college composition classes. Much emphasis is placed upon review of grammatical principles, improvement of vocabulary, and development of an organized, individual writing style. In addition, the student is also required to apply these principles to a research unit and paper. Students use computers to complete their writing and research assignments.

There is required reading during the summer before beginning this course.

HUMANITIES

Course # 02260

Prereq: Average to above average grades. Dept. Chairperson approval.

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

There is required reading during the summer before beginning this course.

INTRODUCTION TO THEATRE ARTS

Course # 01380

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Introduction to Theatre Arts is a performance-oriented drama course geared to developing the creative and dramatic talents of individual students. This course uses student acting and teacher-student evaluation as the major teaching method to help the student understand the medium of theatre. It develops sensitivity to the thoughts, beliefs, and ideas of mankind through study, in-class performance, and theatre attendance. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

AFRICAN-AMERICAN LITERATURE

Course # 01471

Prereq: Pass both semesters of English III
Level: 12
Credit: .5

This course explores the African-American experience as reflected in the literature and oral tradition of the community, from the earliest days of our nation to current writers and thinkers. The course will explore not only traditional literary genres such as fiction, poetry, drama, and essays, but also consider areas of film, music, and art as well. Students will study the wide span of the African-American experience from slave narratives to current rap music. Students will also have an opportunity to explore the history and experience of Chicago's African-American experience and literature as a specific focus as well as pursue a major research project on some area of the African-American experience such as a specific author, prominent figure, or essential artistic/cultural movement. ***Extensive reading is expected in this class.***

JOURNALISM: YEARBOOK

Course # 01400

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01400: This is a writing and production course for students interested in designing a yearbook. The classroom portion of the course emphasizes the mechanics of strong, journalistic writing, strategies for effective communication, digital photography, and graphic design. Researching and interviewing are also covered as students prepare to write stories for the school yearbook, *Vespa*. The student should have above average writing skills. Additional work outside of class is required; the outside assignments may focus on writing, photography, page-layout skills, and the business aspect of the yearbook. Students will also be part of the extra-curricular yearbook activity and must take the course to be eligible for an editor position. Journalism may be repeated for credit with consent of instructor and department chairperson. ***This course does NOT fulfill NCAA initial eligibility requirements for college.***

JOURNALISM: YEARBOOK w/honors option

Course # 01410

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01410 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the book, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

JOURNALISTIC WRITING

Course # 01361

Course # 01371

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Course #01361: This course is an intensive writing course for those interested in writing for newspapers and magazines. The course covers all types of journalistic writing, including news, features, sports, editorials, columns, and reviews. Information gathering through interviews and library research will refine reading, listening, and speaking skills. In addition, students will learn about the ethics and the history of the journalistic field. Some of the material will be written for publication in *The Stinger*, the student newspaper. This course is a prerequisite for appointment to editorial positions on *The Stinger* staff. ***This class can be taken multiple times with teacher approval.***

English Department

JOURNALISTIC WRITING **w/honors option**

Course # 01371

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Course #01371 w/honors option: To receive honors credit, the student must serve as an editor on the Stinger student news magazine. Editors are chosen through previous journalism experience, an application, and a formal interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle, that include being responsible for a section of the paper, attending be-weekly meetings, attending deadline week, and editing, designing and writing the Stinger. Honors students (editors) will also lead small mini-lessons on topics they have previously mastered; these opportunities will help to increase and sharpen communication and leadership skills. Honors students (editors) must also attend required events scheduled by the adviser.

WRITING WORKSHOP

Course # 01611

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This course is designed for the student with average to below-average writing skills. The course will build upon writing skills learned freshman, sophomore, and junior years and focuses on using word processing as a tool for writing improvement. This course's structure uses a workshop-style format to help students develop basic writing skills such as brainstorming, effective organizational patterns, establishing a purpose, writing to an audience, vocabulary development, and sentence correctness. Some of the writing assignments include, but are not limited to, descriptive writing, personal narrative, persuasion, and analytic essays. Students will also learn to write for the workplace and will complete a job portfolio. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE: **AFRICAN LITERATURE**

Course # 01571

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This course is designed for college-bound seniors and will take students on a literary tour of modern Africa. The class will focus on novels from a variety of geographic regions and historical time periods, but it will also incorporate other media such as film, food, music, and drama. Topics may include analysis of personal freedoms under imperialism as well as the historical role played by language and economics in development across the continent. *World Literature classes are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE: **LITERATURE OF ASIA &** **THE MIDDLE EAST**

Course # 01581

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This course is designed for college-bound seniors. It will focus on novels representing various cultural groups; however, students will study Asia and the Middle East. Topics may include the role of women in modern Iran, the Chinese Cultural Revolution, and historical opinions of nuclear warfare in Japan. *World Literature courses are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course.***

ORAL INTERPRETATION

Course # 01511

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.5

This one-semester course blends an interest in literature with the ability to perform in front of a small group. Students first learn to analyze selections of their choice from various genres: novel, short story, poetry, and drama. Next, they must interpret and communicate the meaning and mood by the way they use the voice and body in reading aloud the selection. The semester will end with a final group performance of a piece of literature that the teacher will direct.

STAGECRAFT***Course # 01521***

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.5

This one-semester course strengthens students' knowledge of technical theatre. Participation in set construction after school and with the stage crew outside of class is required. Emphasis is placed on both practical experience and academic learning. One half of the course is geared toward a student in scenic design, a variety of scenic styles, play reading, technical crew positions, lighting and sound design, and make-up and costume design. These assignments include written set designs, written reports on script readings, construction of a set model, construction of a stage manager's prompt book, and test on lighting, sound, costumes, make-up, and staging. The second half of the course involves construction of dramatic production: building flats and major set pieces, painting, shadowing, and stenciling.

DISCUSSION AND DEBATE***Course # 01641***

Prereq: Pass both semesters of English II

Level: 11,12

Credit: 0.5

Listening, leadership, courtesy, topic analysis, research, evaluation of sources and databases, articulation, and confidence—these are the lifelong skills fostered in Discussion and Debate. This course helps students learn to access a range of informational sources available at the Hinsdale South library in order to build arguments about contemporary topics used in debates. Students will participate in formal and informal class discussions, a simulated town meeting, a group discussion panel, debates, current event speeches, and a role play of an individual's life after reading a biography or autobiography. Reading, writing, researching, and active participation are all major components of this course. Because multiple performances will be required during the semester, students should already have a familiarity with and a sense of confidence about public speaking. By the end of the semester, students should feel a sense of mastery at organizing, working cooperatively with others, researching, preparing for, and delivering public performances.

English Department

ELECTIVES

ACADEMIC READING

Course # A01100

Prereq: Dept. Chairperson recommendation

Level: 9

Credit: 1.0

Academic Reading is designed for ninth grade students whose standardized test scores demonstrate that they would benefit from direct instruction on reading and vocabulary strategies. Students will complete diagnostic tests in several skill areas at both the beginning and end of the school year to track their growth. The curriculum is comprised of units that address skills that “good readers” internalize including previewing, predicting, summarizing, questioning, and analysis of text structure. In addition to these lessons, students will also receive weekly vocabulary instruction. Finally, students will engage in daily sustained silent reading both inside and outside of class. Comprehension of these novels is assessed both orally and in writing through book talks, presentations, class discussions, journals, projects, more formal writing, and a variety of other authentic assessments. Academic Reading students are simultaneously enrolled in both this course and English I; both classes are taught by the same English teacher. Although both Academic Reading and English I have separate curricula, Academic Reading will include some pre-teaching and re-teaching of skills and strategies taught in English I.

MASS MEDIA

Course # 01661

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

Mass Media is offered as an introduction to the subject of media issues and contains a blend of theory and practice. Units to be studied include: television, advertising, film, newspapers, radio broadcasting, and audio and video recording. Various creative projects will be pursued as well as projects involving writing and reading. A certain amount of independent library research in the areas studied is expected. An evening film study is also required. Course activities are designed to enable students to understand and evaluate the influence of mass media on their lives.

Mass Media will not be offered in 2014-2015.

DIGITAL VIDEO PRODUCTION

Course # 01651

Prereq: Department chairperson approval

Level: 10, 11, 12

Credit: 0.5

This course is designed to immerse students in all aspects of media production. The classroom portion of the course emphasizes the composition of media, the production process, and the analysis of media and its impact on society. Throughout the course, students will plan and produce a variety of video and audio productions, some of which may be featured in our new student video publication, *The Buzz*. Topics covered in the course will include camera and lighting techniques, audio engineering, research and planning skills, interviewing standards, and teamwork. Students will also be encouraged to be a part of our extra-curricular multi-media activity, and must take this course to be eligible for a producer position for this activity. Digital Video Production may be repeated for credit if the student is a member of the multi-media activity; these “advanced students” will work together with the instructor to create a body of work, some of which will be featured in *The Buzz*. These students will also tend to business and production tasks involved in the quarterly student video production.

COURSES FOR ENGLISH LANGUAGE LEARNERS (ELL)

ELL TUTORIAL

Course # 04801

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 0

This course is designed to create daily opportunities for students to receive the necessary assistance they may need to succeed in the mainstream content courses at the secondary level. Individual time and attention will be provided to supplement and augment the content delivered in the students' mainstream coursework. There will also be supplementary activities to encourage knowledge of and adjustment to the new culture and how to succeed academically.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH LANGUAGE LEARNING I

Course # 04790

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is for "Limited English Proficiency" students who function adequately even though English is not their primary language, but whose performance could be improved by supportive help in language skills. It will include individual and group instruction designed to "fill the gaps" of culture and language which inhibit these students from reaching full academic potential. Students enrolled in this course for credit may also enroll in Course # 04801 Tutorial to replace study hall(s) when additional help is necessary.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH LANGUAGE LEARNING II

Course # 04710

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is for "Limited English Proficiency" students who function adequately even though English is not their primary language, but whose performance could be improved by supportive help in language skills and who have taken Transitional English I. It will include individual and group instruction designed to "fill the gaps" of culture and language which inhibit these students from reaching full academic potential. Students enrolled in this course for credit may also enroll in Course # 04801 Tutorial to replace study hall(s) when additional help is necessary.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH AS A SECOND LANGUAGE I

Course # 04770

Prereq: Recommendation by the Coordinator of English Language Learning

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students whose first language is not English and whose communication skills need more support than can be provided in a regular English class. The course provides a sequential curriculum that allows the students to acquire standard American English. The course parallels, when and where possible, the regular English I curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL II with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

English Department

ENGLISH AS A SECOND LANGUAGE II

Course # 04780

Prereq: Recommendation by the Coordinator of English Language Learning

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students who have limited English proficiency but have a basic vocabulary and understanding of the language. The course provides a sequential curriculum that allows the students increased practice in standard American English. The course parallels, when and where possible, the regular English II curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL I and ESL III with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

ENGLISH AS A SECOND LANGUAGE III

Course # 04760

Prereq: Recommendation by the Coordinator of English Language Learning

Level: 11, 12

Credit: 1.0

This course is designed primarily for immigrant students arriving as juniors or seniors. Students should have a basic vocabulary and understanding of the language. The course provides a sequential curriculum that allows the students increased practice in standard American English. The course parallels, when and where possible, the regular English III curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL II with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

Family & Consumer Sciences

Department Chairperson Dr. Gary Hutchinson

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses. A fee is required in most foods related courses. Students are required to purchase materials for sewing.

Family & Consumer Sciences related careers and the suggested course sequencing:

CAREER	APPLICABLE COURSES
Dietitian Chef/Baker Hotel/Restaurant Management	Foods & Nutrition Creative Foods Bakery and Pastry Arts Chef & Restaurant
Fashion Designer/Buyer Fashion Display/Illustrator	Fashion Merchandising & Design Creative Sewing Creative Sewing II
Architect Interior Designer	Architectural Design & Housing
Social Worker Teacher Preschool Teacher Child Care Worker	Child Care & Development Understanding Relationships Invitation to Teach
Tailor Seamstress	Creative Sewing Creative Sewing II

Please see Course Description for detailed Prerequisites.

Family & Consumer Sciences

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0 (0.5 Consumer Educ., 0.5

Applied Arts)

Supply fee: \$10

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. ***This course fulfills the state mandate for consumer education*** and also provides one semester credit for Elective Arts. ***Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.***

FOUNDATIONS FOODS

Course #01722

Prereq: Department Chairperson placement

Level: 9, 10, 11, 12

Credit: .5

This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork. ***This course may be repeated as necessary.***

FOODS & NUTRITION

Course #06501

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students ***cannot receive credit*** for both Foods & Nutrition and Senior Foods.

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is an in-depth continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pasta, breads, deserts, and main dishes. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Bakery & Pastry Arts, Chef & Restaurant.

BAKERY AND PASTRY ARTS

Course #06511

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce pastry works of art? Baking and Pastry Arts builds on the skills learned in Foods and Nutrition/Senior Foods, emphasizing student preferences and creativity in the pastry area. Students select and prepare a variety of cookies, cakes, breads, and deserts. Activities focus on European baked products and decorating a cake. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Chef & Restaurant, Creative Foods.

Family & Consumer Sciences

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or
Senior Foods AND teacher approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a "mini restaurant" incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques.

While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.

SENIOR FOODS

Course #06541

Prereq: none

Level: 12

Credit: 0.5

Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students ***cannot receive credit*** for both Foods and Nutrition and Senior Foods

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts

CREATIVE SEWING

Course #06552

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student's preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design, Creative Sewing II

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities.

Suggested follow-up class: Fashion Merchandising & Design

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today's fashion industry. Activities include style analysis, clothing design, fashion trends and personal selection of fashions. Creative projects involving fashion design/sketching, visual displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

Family & Consumer Sciences

CHILD CARE & DEVELOPMENT

Course #06581

Prereq: none
Level: 10, 11, 12
Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in preschool or elementary education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children's toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children.

Suggested follow-up class: Invitation to Teach or Understanding Relationships.

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none
Level: 11, 12
Credit: 0.5

This course encompasses "a slice of life" and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Care & Development

INTERIOR DESIGN & HOUSING

Course #06621

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$10

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Interior Design & Housing is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

INVITATION TO TEACH

Course #06595

Prereq: Students signing up for Invitation to Teach will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible

**INVITATION TO TEACH w/Honors
Option**

Course #06585

Prereq: Students signing up for Introduction to Teaching w/Honors
Option will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing.
Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #06585 w/honors option: Invitation to Teach w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects may include creating classroom teaching tools, research, tutoring, or interviews. Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible.

Library Media Center

Director of the Library Media Center Mrs. Ellen Lawrence

2012 National School Library Program of the Year

The mission of the Library Media Department is to:

- **Teach** all of our students to thoughtfully *inquire* about the world around them, efficiently *seek* information which addresses those inquiries, critically *evaluate* the quality of that information, capably *apply* the knowledge acquired to new problems, questions, or ideas, and objectively *assess* the work they produce as a result of the research process.
- **Collaborate** with other teachers to design and implement lessons and assessments which challenge our students to become effective users of ideas and information, perhaps the single most important 21st century skill.
- **Provide leadership, instruction, and expertise** in the use of information and technology that encourages creative problem solving and ethical, socially responsible sharing of information.
- **Provide access** to a variety of quality resources which support the curriculum and meet the diverse needs and interests of our school community in a vibrant learning environment equipped for the demands of 21st century teaching and learning.
- **Promote life-long learning** through programming which encourages reading, inquiry, and the use of technology to meet learning goals.

Through the Library Media Center (LMC), students have access to a wide variety of resources including: certified teacher-librarians; an array of research databases; over 25,000 books in print as well as digital books; Nook ereaders; and over 100 networked computers. In addition, scanners, color printers, and video editing equipment are available in the AV area.

The LMC is open from 7:15 am – 3:55 pm Monday through Thursday and from 7:15 am – 3:00 pm on Fridays. The LMC opens at 9:45 am on 10:00 start days. Passes will admit students to the LMC during the school day. Student IDs serve as library cards and are required to check out materials. Most materials can be checked out for three weeks and can be renewed if needed. Fines accrue for overdue materials. Notices of overdue materials are periodically sent via email.

**Department Chairperson
Mr. Ismael Zamora**

Vision: “Every student a mathematically literate problem solver.”

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become productive citizens. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

**GRAPHING CALCULATORS ARE REQUIRED FOR
ALL MATH AND SCIENCE COURSES.**

Unless a student already has a graphing calculator.

We recommend any CASIO brand graphing calculator.

THE FOLLOWING ARE NOT ALLOWED: TI-Inspire CAS or TI-89.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year. Another option is to double up Geometry and Algebra 2 during the student’s sophomore year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence. Upward level changes require a 95% semester average in the previous course.

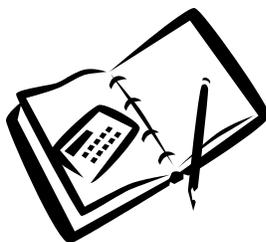

Please see Course Description for detailed Prerequisites.

HINSDALE SOUTH HIGH SCHOOL MATHEMATICS DEPARTMENT

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content. Credits must be earned over three school years.

Colleges require at least Algebra, Geometry, and Algebra II/Trig for admission and many also require a 4th year Math course.

** These courses require Department Chair approval for registration.

Note: Department chairperson approval is required when a change of level (for example, Honors to regular level) is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Mathematics Department

FOUNDATIONS MATH

Course #11760

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental math concepts that can be generalized in various facets of daily life. Curriculum includes problem solving and computations, money and number sense, and basic estimation and measurement. Basic analytical methods, geometry and data analysis are also emphasized. *This course can be taken multiple times with department chair approval. Pass/Fail grades are issued for this course. **This course fulfills the Algebra I and Geometry content requirements.***

APPLIED MATH

Course #01700

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course covers a variety of practical topics such as basic probability, creating and interpreting graphs, formulas, fractions, percents, measurement, perimeter, basic geometry, consumer skills, and basic algebra. Students will be prepared to enter the Applied Consumer 1, Applied Consumer Math 2 course sequence or Algebra Part 1 or Algebra 1 Block sequence in the mathematics department. ***This course fulfills the Algebra I and Geometry content requirements.***

APPLIED CONSUMER MATH 1

Course #01740

Prereq: Department
Chairperson placement
Level: 10,11
Credit: 1.0

This course is designed for students who are looking to gain knowledge and mathematical skills for everyday life. This course will guide students through tackling consumer math scenarios. After completion of this course, students will have a sense of confidence when faced with math in the real world.

APPLIED CONSUMER MATH 2

Course #01750

Prereq: Department
Chairperson placement
Level: 11,12
Credit: 1.0

This course continues the work started in the Math 1. The course targets continued acquisition of basic mathematical knowledge and skills. Students will practice independently applying problem solving skills in consumer and everyday scenarios. *This course can be taken multiple times with department chair approval.*

ALGEBRA I

Course # 03110

Prereq: Recommendation of 8th grade teacher and Dept.
Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are properties of numbers, equations and inequalities, and an introduction to linear and nonlinear functions, polynomials, and graphing. *A graphing calculator is required for this course. A CASIO brand is recommended. **This course fulfills the Algebra I requirement.***

ALGEBRA I BLOCK

Course # 03140

Prereq: Recommendation of 8th grade teacher
Level: 9, 10, 11, 12
Credit: 2.0

This course is a double-period Algebra I so the student can complete Algebra in one year but devote more time to learning and applying the topics. It is designed for the student with skill deficiencies in mathematics as identified by the Explore test and teacher recommendation. *A graphing calculator is required for this course. A CASIO brand is recommended. **This course fulfills the Algebra I requirement.***

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and Explore Test Score
Level: 9, 10, 11, 12
Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 focuses on operations with signed numbers and basic variable manipulation. Core topics include: working with inequalities, equation solving (one-step through multi-step), basic exponent operations, graphing linear functions, and polynomial operations. Algebra I Part 1 establishes the foundational skills necessary for success in future mathematics classes. ***This course in conjunction with Algebra I Part 2 fulfills the Algebra I requirement. A graphing calculator is required for this course. A CASIO brand is recommended.***

Mathematics Department

ALGEBRA I Part 2

Course #03130

Prereq: 8th Grade teacher recommendation and Explore Test Score.

Level: 9, 10, 11, 12

Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 focuses on nonlinear functions polynomials and graphing. ***This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement. A graphing calculator is required for this course. A CASIO brand is recommended. Most students will take this class in conjunction with Geometric Analysis.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I at the High School or pass the entrance test at the end of 7th or 8th grade Algebra and Department Chairperson Approval.

Level: 9, 10

Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in regular Geometry (Course #03210), but with more depth. Three-dimensional and coordinate geometric proofs are included. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. ***A graphing calculator is required for this course. A CASIO brand is recommended. This course satisfies the Geometry content requirement.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra I at the high school or pass the entrance test at the end of 7th or 8th grade Algebra I and Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Geometry is required for entrance into most colleges and many vocational programs. This course continues the use of algebra in geometric situations, calls on the power of logic and proof, and incorporates applications to real-world problems in the plane and in space. This course is for students who intend to pursue post-secondary education of two or more years. ***A graphing calculator is required for this course. A CASIO brand is recommended. This course satisfies the Geometry content requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I Block, Identified deficiencies from Freshman exit Explore test, semester exams and teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

This course is designed to follow the Algebra I. It deals with the same topics of Geometry (Course #03210) with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. This course would be very beneficial for any student pursuing post-secondary education. Placement in this course is based on identified skill deficiencies as evidenced by the Explore test, semester exams and teacher recommendation. ***A graphing calculator is required for this course. A CASIO brand is recommended. This course satisfies the Geometry content requirement.***

ALGEBRA II /

TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry Honors or Department Chairperson Approval

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry (Course #03310) in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. This is a college-preparatory course. ***A graphing calculator is required for this course. A CASIO brand is recommended.***

ALGEBRA II /

TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

This course is designed for college bound students and useful for preparing for College Board tests like the SAT and ACT. It continues the study of linear and quadratic functions, graphing, polynomial, exponential and logarithmic functions, and introductory probability and trigonometry. ***A graphing calculator is required for this course. A CASIO brand is recommended.***

Mathematics Department

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and Department Chairperson

Approval

Level: 11, 12

Credit: 1.0

This course is recommended for students who completed Algebra 1 Block or Algebra 1 Part 1/Algebra 1 Part 2 and Geometric Analysis. The topics studied are real and complex numbers, conic sections, and exponential, logarithmic, polynomial, and trigonometric functions. *A graphing calculator is required for this course. A CASIO brand is recommended.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/ Trigonometry Honors or A in Algebra II/Trigonometry and Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Precalculus Honors treats the topics of Precalculus (Course #03400) in greater depth, with more emphasis placed on proof, abstract structure, and preciseness of thought and communication. In addition, analytic geometry of the plane, probability, and the polar coordinate system is studied. *A graphing calculator is required for this course. A CASIO brand is recommended.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II /Trigonometry or Algebra II/ Trigonometry Honors or Introduction to Statistics or Math Analysis & Research

Level: 10, 11, 12

Credit: 1.0

This course is a study of functions and applications. It extends the topics of Algebra 2/Trigonometry and adds conic sections and some finite math topics. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course. A CASIO brand is recommended.*

ADVANCED PLACEMENT CALCULUS AB

Course # 03420

Prereq: B or better in Alg II/ Trigonometry (Honors or regular) or successful completion of Precalculus

Level: 10, 11, 12

Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. Students are encouraged to take the College Board Advanced Placement AB exam in calculus in May. *A graphing calculator is required for this course. A CASIO brand is recommended.*

ADVANCED PLACEMENT CALCULUS BC

Course # 03430

Prereq: Precalculus Honors

Level: 11, 12

Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, and infinite series. Students are encouraged to take College Board Advanced Placement BC exam in Calculus in May. *A graphing calculator is required for this course. A CASIO brand is recommended.*

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/ Trigonometry (any level) and Department Chairperson

Level: 11, 12

Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *Students will be encouraged to take the Advanced Placement Statistics test in the spring. A graphing calculator is required for this course. A CASIO brand is recommended.*

Mathematics Department

STATISTICS

Course # 03470

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Approval.

Level: 12

Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course will prepare students to take the AP Statistics exam. *A graphing calculator is required for this course. A CASIO brand is recommended.*

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2 Trigonometry
and Department Chairperson
approval

Level: 10, 11, 12

Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses. Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA.

MATH TOPICS I HONORS

Course # 03511

Prereq: Department
Chairperson approval

Level: 12

Credit: 0.5

Math Topics I is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course. *A CASIO graphing calculator is required for this course.*

MATH TOPICS II HONORS

Course # 03512

Prereq: Math Topics I Honors
and Department Chairperson
approval

Level: 12

Credit: 0.5

Math Topics II is a continuation of Math Topics I. *A CASIO graphing calculator is required for this course.*

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: Advance Placement
Computer Science A
Department Chairperson
approval

Level: 11,12

Credit: 1.0

Math Topics Computer Science Honors reviews and builds upon the concepts taught in the AP Computer Science A course. The primary emphasis of the course is on data structures algorithms using the JAVA programming language. Stacks, queues, linked lists, trees, heaps, hash tables, sets, maps, and graphs are covered in great detail. Following the data structures unit, students learn a second programming language. GUIs, advanced sorting algorithms, and cell phone applications are explored. Students have the opportunity to complete an independent study project at the conclusion of the course.

Music Department

Department Chairperson Mr. Gregory Gardner

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4450 to schedule an audition.*

Level: 9-12

Credit: 1.0

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with the P.E. Department Chair during registration.**

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. *Call 630-468-4450 to schedule an audition.*

Level: 10, 11, 12

Credit: 1.0

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with the P.E. Department Chair during registration.**

SYMPHONIC PERCUSSION ENSEMBLE

Course #05660

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4450 to schedule an audition.*

Level: 9, 10, 11, 12

Credit: 1.0

Honors Credit is available

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests. **Marching band students in grades 10 - 12 may be exempt from Physical Education during football season. Please inquire with the P.E. Department Chair during registration.**

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Finale* using Yamaha Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(Offered during 2014-2015)

This course is designed for the serious piano student who wants to learn how to improve piano performance, compose and perform original compositions. Students learn to use music writing programs like *Sibelius*, *Finale*, *Band in a Box* and *Cakewalk* using Yamaha synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students may enter competitions with songs they create and additional performance opportunities may be available.

Music Department

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is not offered during 2014-2015, and will be offered during 2015-2016)

This course is designed for students who are going to take the AP Music Test in May. Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are required to take the AP Music Test in May. Students will use the music theory learned to compose chorals, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using music composition software.

ORCHESTRA

CONCERT ORCHESTRA

Course #05780

Prereq: Audition by High School Director.
Call 630.468.4450 to schedule an audition.

CONCERT ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Director approval

Level: 9, 10, 11, 12

Credit: 1.0

The Chamber Orchestra Strings is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade females and to all other grade levels who have not participated in vocal music at school before.

BASS CHORUS**Course #05710**

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade males and to all other grade levels who have not participated in vocal music at school before.

VARSITY TREBLE CHORUS**Course # 05800****VARSITY TREBLE CHORUS HONORS****Course #05850**

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Director approval. Open to females in grades 10, 11, and 12.

VARSITY MIXED CHORUS**Course # 05820****VARSITY MIXED CHORUS HONORS****Course # 05810**

Prereq: Audition Required

Level: 10, 11, 12

Credit: 1.0

Varsity Mixed Chorus is the top-level large group choral music ensemble for sophomore, junior and senior singers with previous musical experience. Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Director approval. Top-level choir, open to grades 10, 11, and 12.

MADRIGALS/JAZZ CHOIR**Course # 05830****MADRIGAL/JAZZ HONORS****Course # 05840**

---See Honors Requirements---

Prereq: Audition Required

Level: 10, 11, 12

Credit: 1.0

Madrigals/Jazz Choir is a full-year course for selected 10th, 11th, and 12th grade students, which will focus on the performance of the Madrigal Dinner in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Madrigal students are also required to learn and perform the repertoire of Varsity Mixed Chorus.

Prerequisite: Director approval. Top-level choir, open to grades 11, and 12.

Music Department

HONORS STUDY IN MUSIC

Students will have the opportunity to qualify for honors study in the following performance programs: Symphonic Band Honors (including Symphonic Percussion), Concert Orchestra Honors, Varsity Mixed Chorus, and Madrigal/Jazz Honors. Selections will be the *Illinois Music Educators Association* audition music, which can be obtained from the instructors in June of each year. Honors selection will be based on the IMEA material performed during the third week of September. **Please read the section below for more information on requirements.**

REQUIREMENTS FOR HONORS STUDY

Advanced students in Concert Band, Percussion, Varsity Choir, Concert Orchestra and Madrigals/Jazz Choir may audition for the honors level of that ensemble. *These students will, as part of the requirements, remain as members of their curricular ensemble and fulfill all obligations of that ensemble.* In addition, students will be required to perform the following activities:

1. Students must audition for the IMEA District Festival on the State Audition material. This audition will be held in October at a local high school.
2. Private lessons once a week for thirty minutes. The number of lessons per quarter will be one less than the number of weeks in the Quarter. For example, if we have ten weeks in one quarter the students must take nine lessons during that quarter. Students will be responsible for turning in the completed lesson form signed by the private teacher. The teaching staff will approve the private teachers each year.
3. Two solo performances. One will be an Honors Recital in November, which will be open to the public. Instrumentalists will perform a major solo work with piano accompaniment. Vocalists must perform at least two songs, one in a foreign language. The recital will be a graded event. Students will be given a set of guidelines before the event, which will be used to assess the performance. Students must show the director the solo selected to check for level of difficulty and appropriateness at least four weeks before the performance.
4. In addition, by the November recital, each student will turn in a 1000 word paper (typed, double spaced) about the selection they are performing. The research paper should cover the composer and his works, historical perspective, as well as the repertoire being performed. Students must use proper format as well as a minimum of five sources with a maximum of two Internet sites.
5. A second performance of a different solo will be in March at the Illinois High School Association State Solo and Ensemble contest. The directors of the honors students will grade the solo and the performance before the contest. Then the students will perform the same solo for the state judge who will rate and make written comments and suggestions. The importance of this experience is that the student receives an outside critique of his/her playing/singing ability and can be better prepared for college auditions, which will be very similar to the this solo experience.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs.

PHYSICAL EDUCATION ACTIVITIES

Freshman Activities

Aerobics
Badminton
Basketball
Floor Hockey
Folk/Square/Swing Dance
Gymnastics
Physical Fitness Concepts
Physical Fitness Testing
Soccer
Softball
Speed-A-Way
Swimming
Tennis
Touch Football
Track & Field
Volleyball

Sophomore, Junior and Senior Choices

Aerobics	Recreational Sports
Aerobic Fitness	Rhythmic Gymnastics
Archery	Roller Blading
Badminton	Snorkeling
Basketball	Soccer
CC Skiing	Softball
Flickerball	Speed-A-Way
Floor Hockey	Tchoukball
Golf	Team Handball
Ice Skating	Tennis
Lacrosse	Trampolines
Navy Football	Touch Football
Net Games	Ultimate Frisbee
Outdoor Ed.	Volleyball (indoor)
Pickleball	Water Games
Physical Fitness Applications	Weight Lifting
Lifeguard Certification (2 nd sem. only)	Yoga

Freshmen, Juniors, and Seniors must register for Physical Education EACH semester.

<u>Grade</u>	<u>Semester 1</u>	<u>Semester 2</u>
9 (Learning Readiness PE) <i>This class will stress movement, cross lateral activities, and aerobic exercise; taking full advantage of the effects that exercise and movement have on learning.</i>	Course No. 07161	Course No. 07162
10/11*/12* (Upper Level PE)	Course No. 07471	Course No. 07472
Adaptive PE/Peer Partners	Course No. 07901/07801	Course No. 07902/07802

***Junior & Senior Athletes may be exempt from Physical Education during their sport season. Please inquire with P.E. Department Chair during registration.**

Physical, Health, & Driver Education

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.**

Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws. **In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.**

HEALTH EDUCATION

Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)

Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information. *With department chair approval, the Adaptive PE course (07901/#07902) can be taken for Foundations Health credit (#11701).*

ADVANCED HEALTH

Course #07511

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Any students may see the teacher should they have questions on taking the course for 'honors' credit.

Department Chairperson Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

Science Department

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, and reading, writing and note-taking skills.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

CORE COURSES

FOUNDATIONS SCIENCE

Course #11770

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students will investigate key elements of physical and social wellness that can be generalized in various facets of daily life, including proper nutrition, sleep, self-care and exercise. They will explore the benefits of leisure activities and socialization. Students will also explore fundamental concepts, principles and interconnections of the life, physical and earth sciences. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This course will not be offered during the 2014-2015 school year and will be offered during the 2015-2016 school year.

APPLIED EARTH SCIENCE

Course #01730

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: earth, moon, and solar system; stars and galaxies; weather, climate, and the earth's atmosphere; weathering and erosion and forces in the earth. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills.

This course will be offered during the 2014-2015 school year.

APPLIED BIOLOGY

Course #01830

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: classification of living things, plants, animals, ecology, the human body and health. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills.

This course will not be offered during the 2014-2015 school year and will be offered during the 2015-2016 school year.

GEOPHYSICS

Course # 03640

Prereq: Department Chair recommendation.

Level: 9 (higher with recommendation)

Credit: 1.0

This course combines Earth Science content and explores the Physics that underlie observable phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, history of the Earth, velocity, acceleration, waves, energy, forces, magnetism, and atomic structure. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. *This course is also offered in an Academic Reading (AR) format (#03610A) for students who need extra assistance in reading comprehension.*

PHYSICS HONORS

Course #03920

Prereq: Department Chair recommendation; Concurrent with Geometry or higher.

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging. *Freshmen concurrently enrolled in Algebra II/Trig can take AP Physics 1 as their science option if desired.*

CONCEPTS IN CHEMISTRY

Course # 03840

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered, including the nature of science, atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students who need targeted assistance in mathematics and does not serve as a prereq for AP science courses.

For the 2014-2015 school year, this course is offered in an Academic Reading (AR) format (#03850A) for students who need extra assistance in reading comprehension.

Science Department

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit, successful completion of Algebra I or higher; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered and include the nature of science and chemistry, atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability and serves as a prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level understanding is expected, and problem-solving will be more challenging. This course is appropriate for students with above average math abilities.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11

Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include scientific method, cellular and molecular biology, ecology, evolution, biochemistry, plants and body systems. *This course is also offered in an Academic Reading (AR) format (#03750A) for students who need extra assistance in reading. This course can also be taken for dual credit through the College of DuPage (#03700D). Interested students should see page 8 and speak with the Science Department Chair for details.*

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level) and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12

Credit: 1.0

This math-intensive course (requires strong Algebra I skills) is for students who took GeoPhysics as freshmen but who would like to take a full physics course to better prepare them for college. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy and waves.

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Biology covers two semesters of college-level biology, and applies previous knowledge to topics as designated by the College Board curriculum, such as biochemistry, cellular biology, molecular biology, phylogeny, and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course.

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry covers two semesters of college-level chemistry, and applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics and thermodynamics.

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Completion of Chemistry and Biology (may be concurrent with Biology);

Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Environmental Science covers one semester of college-level environmental science, and explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered.

This is open only to students identified and recommended by the Science department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Environmental Science students who have no previous honors or AP level classes in their background. This class is taught by one of the AP Environmental Science teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Environmental Science exam.

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE "RISE"

Course # 03680

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Environmental Science section.

ADVANCED PLACEMENT PHYSICS 1

Course # 03900 (9) / #03910 (11,12)

Prereq: Freshmen must be concurrently placed in Algebra II/Trig; Juniors have completed Chemistry Honors and be concurrently enrolled in a Biology course; Seniors must have completed one or more Honors or AP Science courses; Teacher or Dept. Chairperson approval.

Level: 9, 11, 12

Credit: 1.0

Advanced Placement Physics 1 is equivalent to a first-semester college-level Algebra-based physics course. Topics include motion, work, energy, forces, rotation, momentum, power, waves, sound, and electromagnetism. This course can be taken by freshmen in Algebra II/Trig (Course #03900) or by juniors and seniors as an elective (Course #03910).

ADVANCED PLACEMENT PHYSICS 2

Course #03950

Prereq: AP Physics 1; Teacher recommendation

Level: 11, 12

Credit: 1.0

Advanced Placement Physics 2 is equivalent to a second-semester college-level Algebra-based physics course. Topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic/nuclear physics.

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: Concurrent with Calculus or higher; Completion of Physics, Chemistry, and Biology (may be taken concurrently with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics C is equivalent to two-semesters of college-level calculus-based physics course. Topics include in-depth investigations into mechanics, electricity and magnetism.

ELECTIVE COURSES

ASTRONOMY: THE SOLAR SYSTEM/STARS AND GALAXIES

Course # 03691/03692

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.

Level: 11, 12

Astronomy—The Solar System investigates the history and origins of astronomy, telescopes, calendars, and the solar system. *Astronomy—Stars and Galaxies* investigates ordinary stars, stellar distances and motions, supernovae, pulsars and black holes, overview of the universe, stellar evolution, and galaxy formation. These two semester courses may be taken independently of each other.

Science Department

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

This course develops students' understanding of the workings of the human body. Dissections, including various cow organs and joints and a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

STUDENT INQUIRY AND RESEARCH HONORS

Course #03910

Prereq: Successful completion of an honors level science course or successful completion of a regular level science course and teacher recommendation.

Sophomores and Juniors must be concurrently enrolled in a core science course.

Level: 10, 11, 12

Credit 1.0

This course is designed to teach students the basic methods used in scientific research. Students communicate their findings through research papers and posters. Students collaborate on whole-class research projects, and complete individual research projects. This is an elective science course and does not count towards the science graduation requirement.

This course is conducted at Hinsdale Central High School during 1st or 10th period.

Department Chairperson Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

Social Studies Department

SOCIAL STUDIES PATHS: GENERAL INFORMATION

- Students are strongly encouraged to take **four** years of social studies courses. Students may take multiple social studies courses their sophomore, junior and senior years.
- All social studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.
- Advanced Placement (AP) courses provide students with an opportunity to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of the level of study presented in AP courses, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites and to develop skills and work habits that will prepare them for AP classes their sophomore, junior and senior years.
- Hinsdale South also offers a variety of electives for sophomores, juniors and seniors that allow students to explore the social studies and expand their knowledge base. Electives can be taken concurrently with core courses. Listed course prerequisites may be waived by teacher or department chair recommendation.

WORLD CULTURES

Course # 02470

Prereq: None

Level: 9

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

WORLD STUDIES HONORS

Course # 02390

Prereq: Dept. Chairperson

Recommendation

Level: 9

Credit: 1.0

An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. *Students are prepared to take Advanced Placement courses.*

WORLD CULTURES AR

Course # 02460

Prereq: Dept. Chairperson

Recommendation

Level: 9, 10

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized, with additional focus on reading strategies. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

ADVANCED PLACEMENT EUROPEAN HISTORY

Course # 02520

Prereq: Recommendation of
World Studies teacher and
Dept. Chairperson approval.

Level: 10

Credit: 1.0

This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture. This course will prepare students to take the Advanced Placement exam in May.

Social Studies Department

AFRICAN-AMERICAN HISTORY**Course # 02331**Prereq: None
Level: 10, 11, 12
Credit: 0.5

An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.

GEOGRAPHY**Course # 02501**Prereq: None
Level: 10, 11, 12
Credit: 0.5

An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.

PSYCHOLOGY I**Course # 02431**Prereq: None
Level: 10, 11, 12
Credit: 0.5

An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

PSYCHOLOGY II**Course # 02462**Prereq: Psychology I (above average grades) and Dept. Chairperson approval.
Level: 10, 11, 12
Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY**Course # 02510**Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned. *This course will prepare students for the Advanced Placement exam in May.*

ADVANCED PLACEMENT PSYCHOLOGY "RISE"**Course # 02530**Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0
Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

SOCIOLOGY**Course # 02381**Prereq: None
Level: 11, 12
Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

Social Studies Department

AMERICAN POLITICS

Course # 02351

Prereq: None
Level: 10, 11, 12
Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties.

UNITED STATES HISTORY

Course # 02310

Prereq: None
Level: 11
Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Transfer students who have not previously done so must pass a test on the Illinois and U.S. Constitutions as a requirement for graduation. In U.S. History students satisfy Illinois requirements for study of the Declaration of Independence, United States Constitution, Illinois State Constitution, and Flag Code. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation.

AMERICAN STUDIES

Course # 01360

Prereq: None
Level: 11
Credit: 2.0 (one in English;
one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

ADVANCED PLACEMENT U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson
approval
Level: 11
Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. A test on the Illinois and U.S. Constitution is offered to satisfy the graduation requirement. *This course will prepare students for the Advanced Placement exam in May.* **Students enrolling in AP US History will not be able to drop to regular U.S. History or American Studies in the same school year.**

ECONOMICS

Course # 02341

Prereq: Average or above
average grades
Level: 10, 11, 12
Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity. ***This course fulfills the state mandate for consumer education.***

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361

Prereq: Teacher
recommendation
Level: 11, 12
Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The course will examine the role the U. S. government should play in regulating the American economy and the wages workers should receive for different jobs. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. *This course will prepare students for the Advanced Placement exam in May.* ***This course fulfills the state mandate for consumer education.*** Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year.

Social Studies Department

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372

Prereq: Teacher recommendation

Level: 11, 12

Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. *This course will prepare students for the Advanced Placement exam in May. **This course fulfills the state mandate for consumer education.*** This course is offered second semester only. Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year.

PHILOSOPHY & ETHICS

Course # 02541

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course will not be so much to cover a particular body of philosophers, but to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions.

CONSTITUTIONAL LAW

Course # 02551

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, and the American jury system. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, students try a case for their final exam.

EAST ASIAN STUDIES

Course #02411

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Asian Studies will examine the history and culture of China, Japan and Korea. Possible topics of study include the Samurai and code of Bushido, the emergence of Japan as a colonial power, the Rape of Nanking, the Korean War, the development of nuclear weapons by North Korea, and the emergence of China as a 21st century global superpower. The course is project, writing, and discussion oriented complimented with a field trip and experiential learning. Students will be challenged to avoid ethnocentrism and to understand these civilizations from the perspective of the people who came from them.

GLOBAL ISSUES

Course #02421

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Global Issues examines several major contemporary political, social, and diplomatic dilemmas of the 21st century. After tracing the historical roots of contemporary issues, students will analyze and evaluate each issue from a variety of perspectives. Possible topics include the proliferation of nuclear weapons, human rights and genocide, democracy and dissent, the future of the Middle East, the "war on terror," U.S. foreign policy since Vietnam, and major domestic challenges. Active student participation on a daily basis and developing written and oral arguments are major components of a student's grade.

ADVANCED PLACEMENT GOVERNMENT & POLITICS, U.S.

Course # 02451

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare. *This course will prepare students for the Advanced Placement exam in May.*

Social Studies Department

HUMANITIES

Course # 02260

Prereq: Average to above-average grades and Dept. Chairperson approval

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

FOUNDATIONS SOCIAL STUDIES

Course #11780

Prereq: Dept. Chairperson placement

Level: 9,10,11, 12

Credit: 1.0

The goal of this course is to develop in students an understanding of citizenship that can be generalized in various facets of daily life. Students will sharpen their basic understanding of history, government and social systems through the exploration of current and historical events. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

Technology Center of DuPage

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190
(630) 620-8770
www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Dr. Gary Hutchinson

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Description for detailed prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

Woods II	06780	Yes	1.0	10-12
Woods III	06790	Yes	1.0	11-12

PRE-ENGINEERING I

Course #06741

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process.

PRE-ENGINEERING I w/honors option

Course #06731

Prereq: Teacher approval

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings.

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I
Level: 9, 10, 11, 12
Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course.

PRE-ENGINEERING II w/honors option

Course #06761

Prereq: Pre-Engineering I &
Teacher recommendation

Course #06761 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept.

ARCHITECTURE & DESIGN

Course #06730

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 1.0
Supply fee: \$15

Course #06730: This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ARCHITECTURE & DESIGN w/honors option

Course #06710

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 1.0
Supply fee: \$15

Course #6710 w/honors option: The core material for this course is similar to Architecture & Design course #06730, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program or architecture program.

Technology Education Department

ENGINEERING & DESIGN

Course #06721

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06721: This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

ENGINEERING & DESIGN w/honors option

Course #06711

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06711 w/honors option: The core material for this course is similar to Engineering & Design course #06711, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

Course #06700

Prereq: Architecture & Design or Architecture & Design w/honors option and Engineering & Design or Engineering & Design or Engineering Design w/honors option.
Level: 10, 11, 12
Credit: 1.0

Course #06700: This is the culminating course in our Technology Education program. Students will have additional challenges as they are introduced to several 3D modeling software programs. Students will be required to use the skills learned in both their engineering and architecture courses as they make the transition from 2D to 3D.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING w/Honors Option

Course #06710

Prereq: Architecture & Design or Architecture & Design w/honors option and Engineering & Design or Engineering & Design or Engineering Design w/honors option.
Level: 10, 11, 12
Credit: 1.0

Course #06701 w/honors option: The core material for this course is similar to Advanced Engineering and Architectural Modeling, however, projects and assessments will involve more depth, complexity, and rigor.

WOODS I

Course #06771

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$47

This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

WOODS II

Course #06780

Prereq: Woods I & teacher approval
Level: 10, 11, 12
Credit: 1.0
Supply fee: \$137

This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval
Level: 11, 12
Credit: 1.0

This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college. A four-year sequence of honors level courses is available in all languages offered by the department.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed Prerequisites.

HINSDALE SOUTH HIGH SCHOOL WORLD LANGUAGES DEPARTMENT

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

In addition to French, German, Latin and Spanish, students can also enroll in American Sign Language courses.

World Languages Department

GERMAN

GERMAN I

Course # 04200

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

German I is an introduction to the German language and culture. An intensive listening and speaking experience, based on everyday situations is provided. Students will learn the basic sounds of the language, pronunciation, grammar, vocabulary, and sentence patterns. Active reading and writing are introduced. Language skills and an understanding of the German people are obtained from the study of folk tales, recipes, songs, videos, and introductory reading from newspaper.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. In addition to the content of the German I course, students will be involved in higher level learning activities in listening, speaking, reading, and writing as a required part of the course. Additional enrichment reading assignments, projects, and presentations are integrated in the form of simple narratives, fairy tales, songs, and poems.

GERMAN II

Course # 04220

Prereq: "C" in German I

Level: 10, 11, 12

Credit: 1.0

German II provides a continuation of the skills learned in German I with an emphasis on communication and culture, while writing skills and practical vocabulary are greatly increased. Writing and performing skits gives the students the chance to "live" the language and an opportunity to more fully enjoy listening to and speaking German.

GERMAN II HONORS

Course # 04270

Prereq: "A" in German I or "B" in German I with Dept. Chairperson approval, or "C" in German I Honors

Level: 10, 11, 12

Credit: 1.0

In addition to the content of the German II course, German II Honors emphasizes higher level learning in listening, speaking, reading and writing. More advanced vocabulary and grammar structures will be studied, as well as German culture, customs, and history. Students are challenged by the addition of reading selection and urged towards mastery in communication skills

GERMAN III

Course # 04280

Prereq: "C" in German II

Level: 11, 12

Credit: 1.0

German III continues to emphasize communication skills, grammatical structures and a cultural approach. Students will increase their reading skills and vocabulary by reading short stories and a selection of poetry. Individualized study projects are integrated as well.

GERMAN III HONORS

Course # 04230

Prereq: "A" in German II or "B" in German II with Dept. Chairperson approval, or "C" in German II Honors

Level: 11, 12

Credit: 1.0

In this course previously learned skills are enhanced. Advanced vocabulary and grammar are studied along with short stories, cultural readings and selections from newspapers and classical literature. A thematic approach is used to integrate advanced learning in speaking, writing and active listening. Individualized study projects are pursued. Students will gain cultural understanding through excerpts from history, art, music, literature, geography, and films. Students are encouraged to begin to prepare for the Advanced Placement Exam in German.

GERMAN IV

Course # 04290

Prereq: "C" in German III

Level: 11, 12

Credit: 1.0

German IV will continue the reading, grammar, listening, and composition writing in German. It will emphasize verbal and written communication and present selections from literature, art, music, science, history, and films. Students enrolled in the class are encouraged to prepare for College Placement tests

World Languages Department

ADVANCED PLACEMENT GERMAN LANGUAGE

Course # 04240

Prereq: "A" in German III "B" in German III with Dept. Chairperson approval, or "C" in German III Honors
Level: 11, 12
Credit: 1.0

Advanced Placement German Language is the fourth course in the German sequence and is a college level course requiring the ability to work independently on a college level. This class emphasizes higher level learning skills in order to increase the student's reading rate and comprehension. Through the reading of literary masterpieces the student is enriched in his personal life as well as in his understanding of contemporary and historical Germany. Individual study projects are pursued. *Students enrolled in this course are encouraged to take the Advanced Placement Test in German in May.*

GERMAN V HONORS

Course # 04260

Prereq: "A" or "B" in German IV or Depart. Chairperson approval or "C" in Adv. Placement German Language
Level: 12
Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language, since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors
Level: 9, 10, 11, 12
Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: "C" in Latin I
Level: 11, 12
Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

LATIN II HONORS

Course # 04350

Prereq: "B" in Latin I Honors or "A" in Latin I
Level: 10, 11, 12
Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

World Languages Department

ADVANCED PLACEMENT

LATIN

Course # 04360

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

This course is designed to prepare students to take the advanced Placement examination in Vergil and Caesar in May. Students in this course will read Vergil's epic poem, *The Aeneid* and Caesar's *Gallic War*. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry and prose style. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire.

This course alternates yearly with Latin Literature Honors and it will be offered in 2014-2015.

LATIN LITERATURE HONORS

Course # 04370

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

This course is designed to solidify students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Cicero, Ovid, Catullus, and others. Students will be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the students' exploration of ancient culture and society.

This course alternates yearly with Advanced Placement Latin and will be offered again in 2015-2016.

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: "C" in the World Language most recently studied

Level: 10, 11, 12

Credit: 0.5

This course is designed to increase knowledge and understanding of English vocabulary. Students learn to discover meanings of words through recognition and interpretation of their elements. Supplementary activities add variety to the learning process. Etymology is especially recommended for students who plan to take the PSAT, ACT, SAT or other college entrance exams.

FRENCH

FRENCH I

Course # 04100

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using textbook examples. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Although grammar concepts may be taught in English, students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred

Level: 9, 10, 11, 12

Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

World Languages Department

FRENCH II

Course # 04120

Prereq: "C" in French I
Level: 9, 10, 11, 12
Credit: 1.0

French II is a continuation of the French 1 program and continues to build upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: "A" in French I or "B" in French I and Dept. Chairperson approval or "C" in French I Honors
Level: 9, 10, 11, 12
Credit: 1.0

The core material is the same as French 2 with an accelerated pace to allow for the reading and discussion of short stories and short books, as well as other activities to challenge the Honors student. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: "C" in French II
Level: 10, 11, 12
Credit: 1.0

This course reviews and expands upon skills learned in level II with an increased emphasis on extensive vocabulary acquisition and a more complete study of grammar. Students will continue their culturally based study of the language, do oral presentations, write short compositions, and short stories. Students will read a variety of sample literature pieces. During second semester, students read and discuss *Le Petit Prince*. This course is conducted extensively in French.

FRENCH III HONORS

Course # 04180

Prereq: "A" in French II or "B" in French II and Dept. Chairperson approval or "C" in French II Honors
Level: 10, 11, 12
Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: French III
Level: 11, 12
Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

ADVANCED PLACEMENT

FRENCH LANGUAGE

Course # 04150

Prereq: "C" in French III Honors or "A" in French III or "B" in French III with Dept. Chairperson approval
Level: 11, 12
Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

World Languages Department

FRENCH V HONORS

Course # 04190

Prereq: Successful completion of Advanced Placement French IV and Dept. Chairperson approval

Level: 12

Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

SPANISH

SPANISH I

Course # 04510

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

In Spanish I, the students develop communication skills, study grammatical structures, and learn about culture. Students study the basics of the language: speaking, listening comprehension, reading and writing.

SPANISH II

Course # 04520

Prereq: "C" in Spanish I

Level: 9, 10, 11, 12

Credit: 1.0

In Spanish II, the students will continue to develop communication skills, study grammatical structures and learn about culture. Specific cultural emphasis will be given to Mexico, Central America and South America. Specific communication skills will emphasize listening and speaking with increased instruction and practice in reading and writing.

SPANISH II HONORS

Course # 04580

Prereq: "A" in Spanish I

Level: 9, 10, 11, 12

Credit: 1.0

In addition to the content covered in Spanish II, Spanish II Honors will emphasize listening comprehension, meaningful conversation, reading selected text for conversation-stimulating content, and development of writing skills.

SPANISH III

Course # 04530

Prereq: "C" in Spanish II

Level: 10, 11, 12

Credit: 1.0

In Spanish III, students will continue to develop communication skills, grammatical structures and learn about the culture of various Spanish-speaking countries. Specific communication skills will emphasize the development of improved listening comprehension, speaking and writing, as well as further practice in reading and vocabulary building.

SPANISH III HONORS

Course # 04570

Prereq: "A" in Spanish II or "A" or "B" in Spanish II Honors

Level: 10, 11, 12

Credit: 1.0

Spanish III Honors provides the opportunity for students to progress from a structured sequential language program to one, which emphasizes, in a thematic approach, integration of all language skills. Students will progress toward the goal of independent use of the language in speaking, reading, writing, and active listening. Furthermore, students will gain an understanding of Spanish culture through the study of history, art, music, literature, geography, and customs.

SPANISH IV

Course # 04540

Prereq: "C" in Spanish III

Level: 11, 12

Credit: 1.0

Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study and to strengthen their skills in writing, reading, listening, vocabulary and comprehension. Culture is studied through reading, skits and a series entitled "Destinos".

World Languages Department

ADVANCED PLACEMENT SPANISH LANGUAGE

Course # 04550

Prereq: "A" in Spanish III or "A" or "B" in Spanish III Honors or Department Chair approval
Level: 11, 12
Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through listening selections, reading selections and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. *Students enrolled in this course are encouraged to take the Advanced Placement Test in Spanish in May.*

SPANISH V HONORS

Course # 04590

Prereq: "C" in AP Spanish Language or "C" in Spanish IV
Level: 12
Credit: 1

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature. *Students enrolled in this course are encouraged to take the Advanced Placement Test in Spanish in May.*

AMERICAN SIGN LANGUAGE

AMERICAN SIGN LANGUAGE I

Course # 08070

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language I is an introduction to American Sign Language and Deaf culture. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Fundamental skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness, deaf perspectives will also be taught.

AMERICAN SIGN LANGUAGE II

Course # 08080

Prereq: "C" or better in American Sign Language I
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language II is a continuation of American Sign Language I. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Advanced skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness and deaf perspectives will be taught along with deaf perspectives, technology related to deafness and potential career options.

Additional Academic Opportunities

Adult Opportunities: Adult Opportunities (*Course #02930*) is a Community-Based Program for students ages 18-21. The purpose of the program is to implement an innovative, adult-centered community program through a collaborative approach that prepares students for adulthood success while promoting opportunities for independence in the areas of: employment, post-secondary education and training, independent living skills, and community. The goals of the Adult Opportunities program are to: increase independence in adult living situations; improve self-determination skills; improve social and communication skills; increase leisure, recreation, and life skills; experience work-based learning and volunteer work; and prepare for community living and participation. *This District 86 course is offered at the Transition Center.*

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments

Applied Academic Strategies: In these courses, students receive targeted instruction to improve academic strategies and executive functioning skills such as organization, time management and test preparation. In addition, students receive individual and/or small group tutorial assistance with academic assignments. *Students taking this course are enrolled in Applied Academic Strategies 9 (Course #01720), Applied Academic Strategies 10 (Course #02010), or Applied Academic Strategies 11/12 (Course #01971/#01972).*

Applied Learning Strategies: In this course, students receive targeted instruction to improve basic academic skills. Emphasis is also placed on developing executive function skills, including organization, time management, and study strategies. Students also receive individual and/or small group tutorial assistance with academic assignments and test preparation. *Students taking this course are enrolled in Course #11720.*

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): The College of DuPage awards articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (*Course #01671/#01672*) to recover lost credits from failed courses. Students should speak with their school counselor and the appropriate department chairperson, if interested. *Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab.* The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts

Deaf and Hard Hearing Program: The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Additional Academic Opportunities

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education (*Course #07431/#07432*) which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1 Block. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), and after school (Course #09400).*

Excel-erate Program: Excel-erate is a program for non-traditional students who need to earn credits via supported virtual instruction. This program runs 11:15 am - 4:00 pm (Periods 5 – 11) and students must have the recommendation from the Director of Counseling in order to enroll. *This is Course #09401/#09402.*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the department chairperson, the student's school counselor, and the Assistant Principal for Curriculum & Instruction.

Program Success: This course provides a highly supportive academic environment with a focus on future planning and social emotional learning. The setting provides an opportunity to process interactions that have occurred and are having an impact on the student. *This is Course #01991/#01992.*

Special Education Program: The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students to assist in the attainment of the students' goals as written in the IEP.

Study Hall and "Hornet Honor" Seniors: All students enrolled in Study Hall are required to attend. The only exception is Seniors who have earned a place on the "*Hornet Honor*" list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. "*Hornet Honor*" seniors have the option of requesting a 1st period "Late Arrival" (*Course #09921/09922*) or a 10th period "Early Dismissal" (*Course #09931/#09932*) in lieu of Study Hall during the course request process. Only "Hornet Honor" seniors who have "Late Arrival" or "Early Dismissal" on their official schedules have earned this privilege of late arrival/early dismissal. "Hornet Honor" seniors who have "Late Arrival" are expected to arrive on time to their 2nd period class and those enrolled in "Early Dismissal" are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for "*Hornet Honor*" seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with "Study Hall" on their official schedule regardless of what period the study hall is or what year the child is in school.

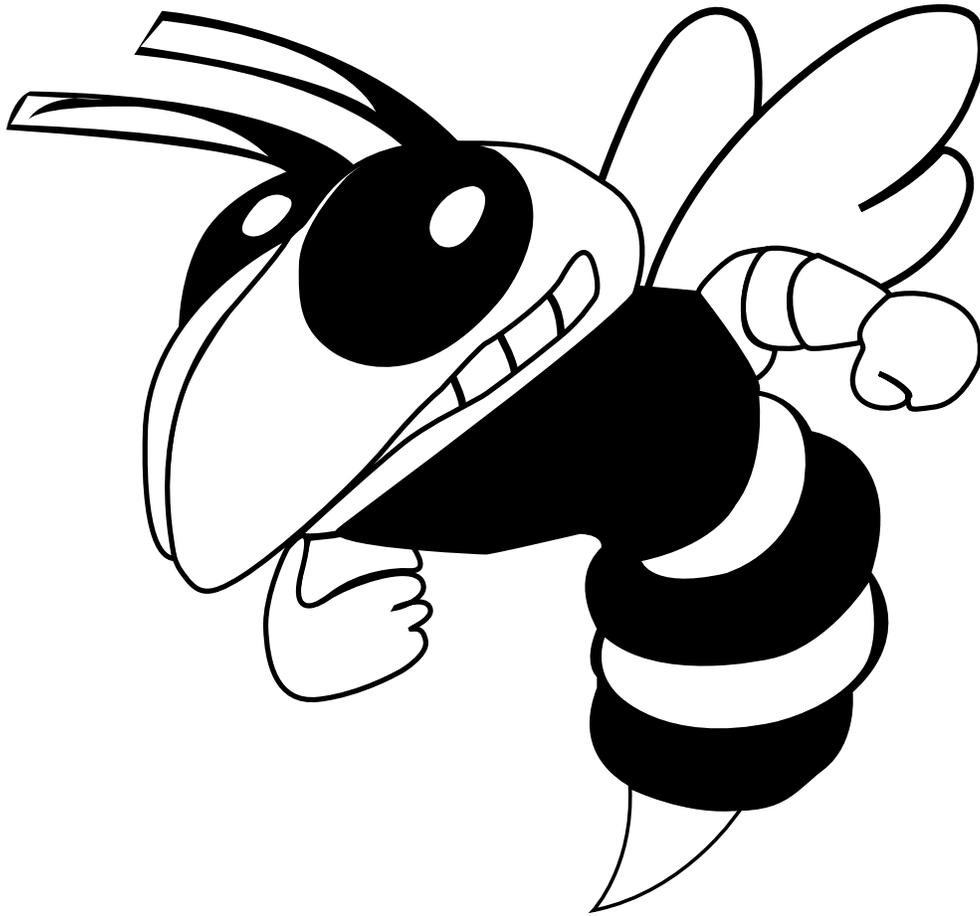

HINSDALE SOUTH HIGH SCHOOL FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. This plan will be retained by your counselor and used for future academic planning.
6. *Indicates flexibility in academic scheduling.*

Hinsdale South High School

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2015-2016 school year. This *Program of Studies Handbook* is derived from the District 86 course catalog to provide you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to maximize their academic potential.

Please take the time to carefully review the *Program of Studies Handbook*. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Counseling Department at (630) 468-4251.

Sincerely,

Stephanie Palmer

General Information

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. *In order to earn a diploma, students must comply with all state mandated requirements for standardized testing.* All students must complete state-mandated CPR and AED training through their physical education class.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. English I and English II fulfill this requirement as do Applied English and Foundations English.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three years of Mathematics must be an Algebra course (Algebra 1, Part 1 AND Algebra 1, Part 2, Algebra 1 Block, Algebra 1, Applied Math, or Foundations Math) and one course must include Geometry content (Geometric Analysis, Geometry, Applied Math or Foundations Math) . Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>AP Economics: Micro AP Economics: Macro Economics Exploring Family and Consumer Sciences Foundations Consumer Education Introduction to Business Money Management</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0

General Information

Hinsdale South Special Education Program Overview

The Special Education Department provides a full continuum of services and supports designed to meet the Individual Education Program (IEP) needs of students. Students in need of special education services can receive instruction and programming through one or more of the following approaches:

- academic accommodations within the general education classrooms,
- structured assistance within the general education classrooms through co-taught supports,
- structured assistance outside the general education classrooms through consultation services,
- related services, and
- direct instruction in specialized course offerings through a Foundations or Applied philosophical approach:
 - Foundations* courses provide students with an opportunity to focus on functional life skills curriculum within the context of each content area.
 - Applied* courses focus on specific content area concepts and skills with an additional emphasis on practical application.

All of the courses below meet the graduation requirements for either core academic or elective credit.

Department	Foundations Approach	Applied Approach
Business	Foundations Consumer Education Foundations Digital Communication	Prevocational Job Training Cooperative Work Training
English	Foundations English	Applied English Dynamics Applied Reading Fundamentals Applied English 4 Applied Social Communication

General Information

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality of the student's academic record
- Performance on college admission tests –ACT and/or SAT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	<p>Four (4) Credits</p> <p>Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.</p>
Mathematics	<p>Three (3) Credits</p> <p>Traditional preparation for college mathematics is a year each of Algebra I, Geometry, and Advanced Algebra, with a fourth year of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.</p>
Science	<p>Three (3) Credits of a laboratory science</p> <p>Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.</p>
Social Studies	<p>Three (3) Credits (emphasizing history and government)</p> <p>One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.</p>
Other	<p>Two (2) Credits in world languages, music, or art.</p> <p>If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.</p>

In most cases, students pursuing admission to a four year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

General Information

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "F" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: Students wishing to initiate a level change within the same department must complete the schedule change request form and obtain all required signatures (parent/guardian, department chair, counselor).

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to, e-learning, correspondence, distance/blend learning, or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (American School, Illinois Virtual School, etc..) will not appear on the District 86 transcript unless there has been prior written approval by the Director of Counseling. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school. Per Board Policy 6:320, students can earn World Language proficiency credit for their 8th grade language class and/or their enrollment in a state-approved ethnic school program or American Sign Language program.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher. Excessive absences may result in removal from class and/or a loss of credit.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends
- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

General Information

- computer input error
- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Counseling recommendation
- successful completion of a summer school class

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation with clearly written rationale must be submitted by the family to the Director of Counseling for consideration.

Dean's List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student's grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F	1.0	1.0
I	1.0	1.0

Dean's List and Honor Roll designation will be determined by the following criteria:

Dean's List: 4.5 Weighted GPA with no grade in any course below a "C"

Honor Roll: 4.0 Weighted GPA with no grade in any course below a "D"

Dean's List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean's Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Junior High/Middle School Students: Junior high schools that feed into D86 unable to offer advanced coursework for their students may send their students to D86 for those courses. In these cases, all courses, grades and credit earned will appear on the transcript and will be calculated into the grade-point average earned in subsequent years at a high school in District 86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day.

Physical Education Exemptions: Per Board Policy 6:310, students may submit a written request to be excused from physical education courses for the following reasons: (1) For students in grades 11-12, ongoing participation in an interscholastic athletic program as recognized by IHSA, (2) For students in grades 11-12, to enroll in academic classes which are required for graduation from high school, provided that failure to take such classes will result in the pupil being unable to graduate, or (3) For all students, ongoing participation in a Marching Band program for credit. In addition, students in grades 11-12 may also qualify for a Physical Education exemption in order to enroll in an academic class or classes required for admission to the college(s) or university(ies) which said student intends to apply as long as documented substantiation of the prerequisite secondary courses required for admittance to the post-

General Information

secondary institution is provided. Policy 6:310 also contains provisions for students with IEPs to qualify for PE exemptions based on an IEP team decision or participation in adaptive athletic programs outside the school setting.

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student's previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. Pursuant to Hinsdale Township High School District 86 Board of Education Policy 7:50 and 7:60, every family must provide acceptable evidence of residency. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be presented to verify residency. Contact the registrar for more information on adequate proof of residency. A student's grade-point average previously earned at a high school other than a high school in District 86 will be re-calculated based on the grade-point average processes currently used in District 86. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript exactly as they are titled on the sending school's transcript and will be indicated as transfer coursework. If the previous school assigned numerical grades, we will use their key to assign letter grades on the District 86 transcript. If no key is available, these courses will be recorded as "Pass" or "Fail". Transfer courses from schools outside of the United States may receive credit, but grades will be reflected as "Pass" or "Fail". A record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but *the preferred date of completion for the freshman physical is July 1*. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

R-Rated Films Used in Instruction: If R-rated movies or clips from R-rated movies will be used in instruction in any course; a list of those movies will be made available at the time of registration through each department and online. Written permission must be obtained by a parent at the beginning of any course showing R-rated movies or clips from R-rated movies to allow students to view in whole or in part the R-rated movies associated with the class.

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the "Adding/Dropping Courses" procedure outlined on Page 8.

Logan Obermeyer

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, digital images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Supply fees are required for participation in all studio courses.**

STUDIO ART
Course #05211
 Prereq: none
 Level: 9, 10, 11
 Credit: 0.5
 Supply fee: \$15

Students will be able to explore aspects of design, drawing, painting, mixed media, and sculpture in a one semester experience. Emphasis will be placed in creativity, craftsmanship, and problem solving. Studio Art is a course in which introductory students can experiment with a variety of media. Sketchbooks assignments supplement class work. *It is highly recommended that students interested in Drawing or Painting start with either Studio Art or Art Foundations.*

Art Department

ART FOUNDATIONS

Course #05100

ART FOUNDATIONS

w/honors option

Course #05110

Prereq: none

Level: 9, 10, 11

Credit: 1.0

Supply fee: \$22

Course #05100: The yearlong Art Foundations course allows students the optimum time to develop and master the basic skills and techniques of drawing, color theory, painting, sculpture, ceramics, printmaking, calligraphy, and graphic design. Students are introduced to the art elements and principles of design, evaluation of projects, and digital imaging. Connections are made to art history, popular culture, and advertising within the units. Sketchbook assignments supplement class work. *It is highly recommended that students interested in Drawing or Painting start with either Studio Art or Art Foundations.*

Course #5110 w/honors option: The yearlong Art Foundations w/honors option course allows students the time to expand upon the skills and concepts within the Art Foundations course. Enhanced opportunities to go above and beyond the regular curriculum through the creation of their own portfolio and exhibition of artwork are required. Mastery of techniques and development of personal style, concept, and student voice are emphasized.

DRAWING AND DESIGN

Course #05201

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$36

Drawing and Design is a specialized course that teaches students a variety of strategies to improve his/her ability to draw from life and improve design skills. Students are introduced to a variety of media such as pencil, charcoal, ink, technical pen, pastel and digital imaging. Complex drawing and design problems in perspective, value, and composition as well as experiences in critiquing their own work and the work of masters help to reinforce the technical skills.

It is strongly recommended that students interested in Honors Portfolio begin with Drawing and Design sequencing as a foundation.

ADVANCED DRAWING AND DESIGN

Course #05231

Prereq: Drawing & Design

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$36

Advanced Drawing and Design is a continuation of the themes and techniques started in the Drawing and Design course in which students are asked to develop artwork which demonstrates mature drawing ability and design skills. Students are expected to investigate how drawings can be designed to communicate original ideas to a viewer. A development of an individual style and understanding of design will be stressed.

It is strongly recommended that students interested in Honors Portfolio begin with Drawing and Design sequencing as a foundation.

PAINTING

Course #05400

Prereq: none

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

In this studio class students learn how to use a variety of media and techniques including acrylics and watercolor. Students produce paintings on paper and student stretched canvasses. Students execute six to eight paintings during the school year and possibly a group mural. Students will learn to discuss art through writing reflections and group critiques. The history of painting is introduced and explored through research and in class presentations.

GLASS WORKSHOP

Course #05561

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

This class is designed to introduce students to an assortment of fine arts glass projects. Projects include glass fusing light catchers, jewelry, slumping dishes and glass mosaic techniques. Patience and thoughtful planning are required as students turn in detail design sketches for each project. Students will also learn to apply and discuss the elements and principles of design to each project.

Glass Workshop, with teacher and department chair approval, may be taken for AP Studio Art credit (#05210).

Art Department

SCULPTURE

Course #05171

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$25

In this studio course, students will explore the manipulation of materials to create a variety of three-dimensional objects. Students will learn wood burning, mold making, clay modeling, stone carving, and a variety of surface finishing techniques. Emphasis is on creative thinking, design, and having fun. Students will have experiences in art criticism, the history of sculpture and organizing gallery exhibitions of their work. *Sculpture*, with teacher and department chair approval, may be taken for *AP Studio Art* credit (#05210).

JEWELRY

Course #05331

Prereq: none
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$55

This course introduces students to basic and complex beading skills and wire wrapping techniques used to create beaded jewelry. Fine motor skills, good vision and patience are needed to design and create a variety of beaded bracelets, chainmail bracelets, wire crochet beaded necklaces, crochet wire bead necklaces, earrings and unique pins. Students will learn specific jewelry vocabulary and be tested on technical skills and tool/bead identification. *Jewelry*, with teacher and department chair approval, may be taken for *AP Studio Art* credit (#05210).

CERAMICS I

Course #05301

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$25

This is a beginning ceramic studio course in which students will be introduced to different types of clay, the preparation of clay, a variety of hand-building, decorating and glazing techniques and the process of firing their ware. Good craftsmanship, design and problem solving skills are emphasized. Students will learn and apply basic ceramic vocabulary, the elements of art and principles of design, evaluate their projects, complete multiple sketches prior to construction as they utilize their ceramic booklet in class.

CERAMICS II

Course #05312

Prereq: Ceramics I; Approval of Ceramics Instructor
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$25

Building on techniques learned in Ceramics I, students are involved in more advanced hand-building projects and are able to create exciting work on the potter's wheel for the first time. Projects involving conceptual exploration are a foundation for the ceramic hobbyist or college bound student. A written report and presentation will be assigned.

CERAMICS III

Course #05321

Prereq: Ceramics II; Approval of Ceramics Instructor
Level: 11, 12
Credit: 0.5
Supply fee: \$25

This course allows the serious ceramics-minded student to expand his/her ability to design and produce clay pieces of artistic merit and personal style. Students will develop and use their own glaze. An individual course of study is arranged between the instructor and student for the second half of the semester. *Ceramics III*, with teacher and department chair approval, may be taken for *AP Studio Art* credit (#05210).

DIGITAL IMAGING I

Course #05071

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$8

This course is designed for students who want to create art on a computer. Artistic and creative problem solving strategies are developed which can help students in all areas of learning. Participants will use images to create original works of art using Adobe Photoshop, Illustrator, and other online applications. Emphasis is placed on using the computer as the media to create fine art.

DIGITAL IMAGING II

Course #05072

Prereq: Digital Imaging I
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$8

Digital Imaging 2 further explores the artistic potential of the computer and creative problem solving strategies. Creation of graphic images using advanced software features of Adobe Photoshop and Illustrator will be explored. Composition, color theory, rendering, and personal interpretation of subject matter will be stressed. Students will develop a portfolio of images that reflect the development of their personal style and voice.

Art Department

ANIMATION AND CARTOONING

Course #05591

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

This course introduces the student to the art and history of cartooning and animation. Students learn caricature cartooning as well as developing their own cartoon character and comic strips. Techniques of animation are taught and enable students to produce their own animated film shorts. Students will also have hands-on experience using a color video animation system and Toon-Boom software.

GRAPHIC DESIGN

Course #05111

Prereq: Digital Imaging I
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$8

This course introduces students to the various career and free-lance opportunities available in the visual communications field. Emphasis is placed on the development of an idea from thumbnail sketch to finished computer-generated image. Acquisition of basic commercial skills will be stressed in activities such as logo design, business cards, brochure design, point of purchase design, and advertising layouts. Presentation and critique skills will be incorporated into every project. Software such as Photoshop, Dreamweaver, and Flash will be utilized in the class.

PHOTOGRAPHY I

Course #05001

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

Change the way you look at the world. Use traditional film cameras and digital cameras to understand how to communicate your ideas visually. Students will also develop and print black and white film in an actual darkroom. Composition, class evaluation and assessments help students to develop a strong photographic portfolio.

Students are required to have their own SLR camera that uses 35mm film. Students will pay a lab fee for film, negative sleeves, photo paper and photographic developing supplies.

PHOTOGRAPHY II

Course #05012

Prereq: Photography I
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

Students who loved Photo I will enjoy capturing more photographic images in Photo II. Students can experiment with traditional and digital photographic techniques. Do you want a career in photojournalism, advertising, photography, portrait photography, or fine art photography? Create, communicate and evaluate your images as you develop your photographic portfolio and blog online.

Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.

PHOTOGRAPHY II

w/honors option

Course # 05022

Prereq: Photography I
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

Course # 05022 w/honors option: Honors students will be required to take an outside workshop or equivalent event. Honors students will submit a portfolio to the Scholastic Art competition. Honors students complete a written and picture BLOG as a journaling record of their theme. Honors students will increase rigor by participating in school spirit activities as photojournalism photographers.

PHOTOGRAPHY III

Course #05422

Prereq: Photography II
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$35

Serious photography students can get earn AP Credit at the conclusion of this course. Expand your knowledge and skills to create artistic photographs with your own personal style. An individual course of study will be arranged between student and teacher at the beginning of the semester. Students will organize their images into a photographic portfolio that will be submitted for portfolio competition. With teacher and department chairperson approval, Photo 3 may be taken for AP Studio Art credit (#05210).

Students are required to have their own SLR 35mm film cameras and/or a Digital Camera. Students will pay a lab fee for film, negative sleeves and photo paper and photographic developing supplies.

Business Department

HONORS PORTFOLIO

Course #05441

Prereq: Advanced level course and Dept. Chair approval
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$30

Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen medias. The work produced in this course may be used as part of the Advanced Placement portfolio. *This course may be repeated.*

ADVANCED PLACEMENT

ART HISTORY

Course #05580

Prereq: Dept. Chair approval
Level: 10,11,12
Credit: 1.0

This course provides a survey of the history of western and non-western art from pre-historic times to the present and teaches methods of interpreting and analyzing works of art. Students with good writing skills and an interest in art and its place in our world can do well in the course. Hands on projects, focusing on process rather than product, cooperative group assignments and Internet searches are correlated with the period under study. Field trips to Chicago area museums and important architectural structures enhance classroom learning and help familiarize the students with the cultural offerings of the city.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

SENIOR PORTFOLIO

Course #05570

Prereq: One advanced art course and Dept. Chair approval
(or comprehensive portfolio review by the Art Department)
Level: 12
Credit: 1.0
Supply fee: \$40

This course is for students who desire the rigorous challenge of a senior level studio class. Students complete a portfolio which includes fourteen to sixteen pieces of art work - drawings, paintings, prints, digital, and three-dimensional work are some of the materials used. A culminating series project will also be assigned demonstrating the students' artistic statement. Students will have experiences in art criticism, and will organize a group show in the Hinsdale South Art Gallery. *This course may be repeated.*

ADVANCED PLACEMENT

STUDIO ART

Course #05210

Prereq: One advanced art course and Dept. Chair approval
(or comprehensive portfolio review by the Art Department)
Level: 11, 12
Credit: 1.0
Supply fee: \$40

This course provides accelerated students with a challenging program of college-level studio work. Prior to the end of the academic year, a portfolio of approximately 24 pieces will be submitted to the College Board for evaluation and possible college credit. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work.

Business Department

Department Chairperson Mr. Matthew Swedko

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

See course description for detailed prerequisites.

INFORMATION PROCESSING

ESSENTIAL TECHNOLOGIES

Course # 06121

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Essential Technologies is designed for the student who wants to acquire skills necessary to enhance the value of the computer for academic and personal use. This course will focus on developing 21st Century technology skills by incorporating study in keyboarding, Internet research, and computer literacy. Through the use of Microsoft Office and SharePoint, we will focus on building a student's essential technology skills that will be needed at Hinsdale HSD 86. *Students who desire improvement in keyboarding, computer usage, and basic software application skills will benefit from this course and be better prepared for all high school classes.*

FINANCIAL APPLICATIONS

Course # 06162

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Financial Applications will help students gain an understanding of how to use technology to help them manage financial resources that are essential for success in college, a career, and personal finance. With a focus on financial spreadsheets and reports, students will learn business and personal financial management using various financial software/resources.

Students interested in the areas of Finance, Marketing, Management and Economics should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Management/Entrepreneurial Studies, Marketing, Business Work Experience, and Internship.

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

Business Department

TECHNOLOGIES FOR COLLEGE AND CAREERS

Course # 06172

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

This course will expand a student's abilities to work creatively and communicate effectively while exploring how the Internet and associated technology that support college and careers. Through the use of technology and project-based learning, students will further their skills in the Microsoft Office Suite w/Expression, Internet Explorer and various online tools and be exposed to a variety of personal, educational and business applications. *Students interested in ANY business- or technology-related fields should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Law I/II (Honors), Business Management/Entrepreneurial Studies (Honors), Marketing (Honors), Business Work Experience, and Internship.*

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

MULTIMEDIA INNOVATIONS

Course # 06182

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Students will enhance their communication and presentation skills through various forms of multimedia. Editing, animating, and digital-publishing will be emphasized. Using various software programs and online resources, students will design and create audio and visual projects/presentations. *Students interested in Entrepreneurship, Management, and Marketing, should take this course.*

Though there is no prerequisite proper keyboarding technique and speed, along with basic document development, formatting, and proofreading are expected.

APPLIED DIGITAL COMMUNICATION

Course # 01731

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: .5

This course is individualized to meet varying ability levels and needs in developing and improving computer skills for both career and personal use. Each student will learn and develop correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

APPLIED BUSINESS

MONEY MANAGEMENT

Course # 06111

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Money Management will integrate economic concepts with the student's important role in the economy as a citizen, consumer, and worker. Topics include: money management, buying goods and services, banking (savings and checking), investments, the efficient use of credit and loans, consumer protection, insurance, housing, and our tax system.

This course fulfills the state mandate for Consumer Education.

FOUNDATIONS CONSUMER EDUCATION

Course #11790

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

Students enrolled in this course focus on the concepts of budgeting, money management, self-advocacy, roles of consumers, communication, socialization, functional life skills, recreation/leisure skills, and applying those concepts to real world opportunities through weekly community experiences.

Business Department

INTRODUCTION TO BUSINESS

Course # 06100

Prereq: None

Level: 9, 10

Credit: 1.0

Course # 06100: This course gives students a background in the basic operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities. This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

INTRODUCTION TO BUSINESS w/Honors Option

Course #06300

Prereq: Instructor approval

Level: 9, 10

Credit: 1.0

Course # 06300 w/Honors Option: Introduction to Business Honors option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business. This course gives students a background in the operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, consumerism, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities that have more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

BUSINESS LAW I

Course # 06231

Prereq: None

Level: 11, 12

Credit: 0.5

Course #06231: Students will gain an appreciation of our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: our legal system (courts, criminal and civil law) contracts, personal, and consumer law. A field trip to a local court and participation in mock trials as lawyers, witnesses, and/or jurors help students gain an understanding and an appreciation of how the American legal system functions.

BUSINESS LAW I w/Honors Option

Course #06221

Prereq: Instructor approval

Level: 11, 12

Credit: 0.5

Course #06221 w/Honors Option: Business Law I w/Honors Option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Students electing the honors option will be required to complete a more rigorous and in depth curriculum for each unit. Students electing the honors credit option will work with the same topical material as the Business Law class. However the topics will be looked at on a different level by all honors students. All unit materials in this course will have the following emphasis: (1) Writing intensive, (2) Research based, (3) Higher complexity of analysis and reasoning, and (4) Professional level presentation of work.

Business Department

BUSINESS LAW II

Course # 06242

Prereq: Business Law I

Level: 11, 12

Credit: 0.5

Course # 06242: Students will investigate our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Students will also participate in The National On-line Youth Summit sponsored by the American Bar Association.

BUSINESS LAW II w/Honors Option

Course #06252

Prereq: Business Law I

w/Honors Option and

instructor approval

Level: 11, 12

Credit: 0.5

Course #06252 w/Honors Option: This course is an extension of Business Law I Honors Option and is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Topics covered include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Projects and assessments for this option will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time spent out of class.

MANAGEMENT, MARKETING & FINANCE

ACCOUNTING

Course # 06320

Prereq: None

Level: 11, 12

Credit: 1.0

This course covers the principles and procedures of accounting. Both manual and computerized double-entry systems are taught. Practice sets and exercises are used during supervised laboratory sessions to develop skills in practical applications. Through the use of microcomputers, students also gain familiarity with computerized accounting procedures. The objectives of this course include preparing students for initial accounting jobs in business and providing a technical background for college-bound students who plan to enter certain fields of business. All assignments are created using spreadsheet software

ACCOUNTING HONORS

Course # 06350

Prereq: Department

Chairperson approval

Level; 11, 12

Credit: 1.0

In this course, students develop an understanding of double-entry accounting. Topics covered include the following: accounting cycle, banking activities, special journals, payroll, accounting systems and design, internal controls, financial statement analysis, and deferrals and accruals. Students also utilize computer software for problem solving and learn spreadsheet applications. All assignments are created using spreadsheet software.

INVESTMENT PLANNING

Course # 06331

Prereq: None

Level; 10, 11, 12

Credit: 0.5

In this course students will study basic investment principles involving stocks, commodities, bonds, and mutual funds. Students will also learn about tax information, effects of the economy on the market, government regulations of securities and on-line investing. Current issues as they relate to investing will be discussed. Teams will be formed to participate in the Stock Market Game by trading on-line.

ENTREPRENEURIAL STUDIES

Course # 06421

Prereq: None

Level: 11, 12

Credit: 0.5

Course # 06421: Entrepreneurial Studies is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. This course is an introduction to current practices in the world of business. Units of instruction include economic trends, entrepreneurship, business organization, human relations, ethics, management, marketing, finance, and international business.

Business Department

ENTREPRENEURIAL STUDIES w/Honors Option

Course # 06431

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06431 w/Honors Option: Entrepreneurial Studies w/honors option is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. Students will prepare themselves for the challenges of the business world and becoming an entrepreneur/manager by relating current practices in the world of business to: economic trends, business organization, human relations, ethics, management, marketing, finance, and international business.

MARKETING

Course # 06470/#06480

Prereq: None
Credit: 1.0
Supply fee: \$25

Marketing is designed to prepare students for the challenges and opportunities in the field of marketing. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

Course # 06470: Students not enrolled in Business Work Experiences (Course #06490) should select Course #06470. Marketing 06470 is beneficial for those planning to enroll in related business/marketing programs in college.

Course # 06480: Students enrolling in Business Work Experiences (Course #06490) need to be concurrently enrolled in Marketing #06480. This course is designed for students working part-time in related jobs and also for students planning to enroll in related programs in college.

MARKETING w/Honors Option

Course # 06460

Prereq: Instructor approval
Level: 11, 12
Credit: 1.0
Supply fee: \$25

Course # 06460 w/Honors Option: The Honors Option is designed for students with above-average grades, managerial/organizational and intellectual abilities, who plan to major in business/marketing in college. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing. ***In addition, all Marketing students participate in the activities of BPA, an organization for business students.***

Though there is no prerequisite for Marketing, successful completion of or concurrent enrollment in another Business course is encouraged.

EMPLOYMENT EXPERIENCE

BUSINESS WORK EXPERIENCES

Course # 06490

Prereq: Marketing or concurrent enrollment in Marketing and coordinator approval
Level: 11, 12
Credit: 1.0

Business Work Experiences provides the student with actual paid business experience related to their career goals. Students are employed in local businesses from a minimum of 15 hours to a maximum of 25 hours per week for which they receive monetary compensation. A wide variety of experience is available in fields such as apparel and accessories, automotive, food distribution, food service, hotel and tourism, general merchandise retailing, and various office related careers, including banking, accounting, and administrative assistant positions. This work experience program prepares students for further study or a career in marketing, retailing, management, finance, accounting, or administrative office positions. Students are selected by application and interview with emphasis on factors including reliability, integrity, and career goal. ***It is the student's responsibility to make travel arrangements to and from the job. Students must maintain enrollment and earn a passing grade in Marketing to receive credit for this work experience program.***

Business Department

INTERNSHIP

Course # 06461

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 per semester (this class may be repeated for up to 1 credit)

Internship is an elective semester program for the highly motivated junior or senior. The program provides students with opportunities in the local community for hands-on career exploration in their chosen field. Acceptance into the program is determined by factors such as faculty letters of recommendation, availability of a community sponsor, and interviews with the coordinator and the community sponsor. Students are required to keep a journal of their experiences and complete a summary report. During the internship, students observe daily operations, confer with other personnel, and participate and contribute to the functions of the organization for at least 50% of the hours spent in the internship experience. Student performance in the Internship program is evaluated on a pass-fail basis. **The internship is conducted exclusively outside of the school day with no pay for a minimum of 50 hours during the semester. Students must make the travel arrangements necessary to fulfill their internship responsibilities.**

INTERNSHIP w/Honors Option

Course # 06441

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 per semester (this class may be repeated for up to 1 credit)

Course #06441 w/honors option: The core material for this course is similar to Course #06461; however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time. This course is highly recommended for motivated students giving serious consideration to a specific career.

PREVOCATIONAL JOB TRAINING

Course #01850

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

The goal of this course is to provide students with an opportunity to learn theory and engage in practical hands on experience. Students will develop job responsibility, initiative, and positive employer-employee relationships. Emphasis will be placed on hands-on in school job training and entry level workplace skill development which may include: following a schedule, time management, efficiency, responsibility, work etiquette, following directions and communicating with coworkers and supervisors. Students may have the opportunity to participate in an off-campus volunteer experience based on student evaluations, opportunity availability and scheduling flexibility.

COOPERATIVE WORK TRAINING

Course #01770

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and teacher on a quarterly basis. *Pass/Fail grades are issued for this course.*

English Department

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques is used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Please see Course Description for detailed Prerequisites.

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen:	English I <u>or</u> English I Honors
Sophomores:	English II <u>or</u> English II AR <u>or</u> English II Honors
Juniors:	English III-American Literature <u>or</u> English III-American Studies <u>or</u> Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their Guidance counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

- Introduction to Theatre Arts
- Journalism: Yearbook
- Journalism: Yearbook w/ honors option
- Humanities
- AP English Literature

One semester (0.5 credit) classes

** indicates classes available to seniors only*

- World Literature: Africa
- World Literature: Asia
- African-American Literature*
- Senior Composition*
- Popular Literature*
- Science Fiction *
- Rhetoric*
- Writing Workshop*
- Advanced Acting
- Speech/Communication
- Film Studies
- Creative Writing
- Journalistic Writing
- Journalistic Writing w/honors option
- Stagecraft
- Oral Interpretation
- Discussion and Debate

Electives: Although the following courses broaden the students' experience in English, they DO NOT satisfy the required 4.0 credits in English. Instead, these classes count towards students' elective credits.

- Academic Reading
- Mass Media
- Digital Video Production

Courses for Students with Limited English Proficiency: These classes are designed for students with limited experience with the English language. Students must have the permission of the Director of English Language Learning in order to be placed into these classes.

- Transitional English Language Learning I
- Transitional English Language Learning II
- ELL Tutorial
- English as a Second Language I
- English as a Second Language II
- English as a Second Language III

CORE CREDITS

ENGLISH I

Course # 01110

Prereq: None

Level: 9

Credit: 1.0

English I teaches essential written language and communication skills in a program that integrates literary analysis, library research, listening skills, problem-solving strategies, teamwork, and multimedia presentations. Students will explore fiction and non-fiction works including short stories, novels, poetry, drama, mythology, and biographies. The course allows students to express their understanding of important concepts and mastery of skills through discussions, projects, compositions, creative writing, and presentations.

This course fulfills one of two “Intensive Writing” requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH I HONORS

Course # 01120

Prereq: Dept. Chairperson

Approval

Level: 9

Credit: 1.0

This course, for the superior academic student, not only incorporates the materials and skills of English I, but also is designed to provide an enriched study of literary forms and purposes, a great variety of student written expression, and more formal oral communication activities. The student will be introduced to the development of literature from its beginnings in the oral tradition to the standard modern literary genres – short story, novel, drama, biography, and poetry. Written assignments stress expository writing, especially mastery of the multi-paragraph essay. More sophisticated grammatical concepts are presented to improve the student’s style of expression. Students perform a variety of speech assignments. A vocabulary text is also included.

This course fulfills one of two “Intensive Writing” requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II

Course # 01210

Prereq: Pass both semesters of English I

Level: 10

Credit: 1.0

A variety of literary works, composition assignments, and oral activities is presented. Within thematic units, various literary types (novel, short story, poetry, drama) will be studied and compositions written. Composition assignments stress the multi-paragraph essay organizational format, although some creative writing is also expected. Special emphasis is placed on the more sophisticated modes of persuasive, comparison/contrast, and cause and effect essay development. Research strategies of varying scope are presented during the second semester.

This course fulfills one of two “Intensive Writing” requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II (AR)

Course # 01200A

Prereq: Pass both semesters of English I & Dept. Chair

Approval

Level: 10

Credit: 1.0

Along with following the curriculum of English II, this course also focuses on additional strategies to improve students’ academic reading (AR) abilities. Placement in this class is dependent on students’ test scores, achievement in English I, and teacher recommendations.

This course fulfills one of two “Intensive Writing” requirement credits.

There is required reading during the summer before beginning this course.

English Department

ENGLISH II HONORS

Course # 01220

Prereq: English I Honors
and/or Dept. Chairperson
approval

Level: 10

Credit: 1.0

This course, for the superior academic sophomore student, is a general survey approach to English literature in which major English authors and their representative works are studied. Authors' themes as well as specific literary types are studied: poetry, drama (especially Shakespeare), short story, and novel. Composition skill development is divided between exposition (critical analysis and personal essays) and creative writing. A research paper is also required. Vocabulary will be studied in the context of the literature.

This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.

ENGLISH III – AMERICAN LITERATURE

Course # 01330

Prereq: Pass both semesters
of English II

Level: 11

Credit: 1.0

English III builds on the skills acquired in English I and English II. The course focuses on American Literature and emphasizes outstanding American authors from early to modern times in the genres of fiction, non-fiction, drama, and poetry. In addition, there is a challenging emphasis on grammar, vocabulary, and study skills development. Written work consists of the expository essay and the completion of a college level research paper. ***There is required reading during the summer before beginning this course.***

AMERICAN STUDIES

Course # 01360

Prereq: Pass both semesters
of English II

Level: 11

Credit: 2.0 one for junior level
English; one for U.S. History

This interdisciplinary class is offered for a wide range of junior students who are academically motivated, self-directed, or college bound. The course will take an intensive survey approach to American literature and American history, emphasizing the advantage of seeing the "sense of connectedness" between the history of each era and its relationship to and influence on the art, music, and literature produced during that period. Challenging literary and historical analysis will be pursued throughout the course in lectures, discussions, and writing assignments. In addition, there will be emphasis on vocabulary, study skills, and the development of research expertise. Writing assignments will include the development of literary analysis, expository essays, some creative writing, and independent study towards the research paper. Special projects coordinated between the two disciplines will include the research paper and enrichment field experiences. Reflective of their overall effort and ability to excel in this interdisciplinary environment, students earn a single grade for this two-part course.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LANGUAGE & COMPOSITION

Course # 01320

Prereq: English II Honors
and/or Dept. Chairperson
approval

Level: 11

Credit: 1.0

The AP English Language and Composition course "engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing" (College Board). Major American authors and their representative works will be studied as students comprehend, analyze, and evaluate American literature that encompasses various time periods and literary movements with a focus on rhetorical analysis. Students will develop stylistic maturity in their prose by enhancing their ability to use writing conventions both appropriately and with sophistication focusing on expository, analytical and argumentative writing. ***There is required reading during the summer before beginning this course.***

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

English Department

APPLIED ENGLISH DYNAMICS

Course #01670

Prereq: Department chairperson placement
Level: 9, 10, 11
Credit: 1.0

This course is for students who are reading and writing below grade level. Curriculum is delivered both through scientifically research-based computer programming and teacher facilitated instruction which emphasize basic reading skills, reading comprehension strategies, fluency, vocabulary and writing. In addition, students will participate in various projects that explicitly teach research skills as well as various modes of presentation. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two "Intensive Writing" requirement credits.

APPLIED READING FUNDAMENTALS

Course #01715

Prereq: Department chairperson placement
Level: 9
Credit: 1.0

This course is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary. In addition, students are explicitly taught various reading strategies using fiction and non-fiction texts. It is designed as a "blocked" class with Applied English Dynamics for freshmen students that demonstrate a need for direct instruction in reading strategies because their reading skills are below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED ENGLISH 4

Course #01820

Prereq: Department chairperson placement
Level: 12
Credit: 1.0

The focus is on development and application of skills needed for success in the work place and community. Skill areas include comprehension of informational texts and ability to communicate in the areas of listening, speaking and writing. This course is for students who are reading and writing below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

FOUNDATIONS ENGLISH

Course #11750

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental elements of reading, writing, listening and speaking skills that can be generalized in various facets of daily life. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two "Intensive Writing" requirement credits.

OPTIONS FOR FOURTH CREDIT

ADVANCED ACTING

Course # 01601

Prereq: Introduction to Theatre Arts or Dept. Chairperson approval
Level: 10, 11, 12
Credit: 0.5

Advanced Acting is a performance-oriented course that gives the student concentrated training in developing various acting styles and performance techniques. In addition, students advance their study of the art of characterization through the development of bodily movement and vocal expression. Students are individually graded on their progress in learning and applying skills through class performance as they relate to the various dramatic forms. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

English Department

SPEECH/COMMUNICATION

Course # 01631

Prereq: Pass both semesters of English I
Level: 10, 11, 12
Credit: 0.5

This class is designed to give the student background and experience in the study of public speaking and performance. It provides opportunities for the student to learn organizational speech and writing and research skills, write scripts and speeches, prepare cuttings from the works of noted authors, and evaluate his performance and the performances of others. Students will analyze the work of professional and gifted performers in all areas of communication and performance. Students will also receive instruction and practical experience in a variety of speech forms: oratory, extemporaneous speaking, oral interpretation of literature (both prose and poetry), humorous and dramatic interpretation (individual, duet, and group), and radio and television broadcasting.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LITERATURE & COMPOSITION

Course # 01480

Prereq: AP English Language & Composition and/or Dept. Chairperson approval
Level: 12
Credit: 1.0

AP English Literature & Composition, "Great Books," focuses on selected major works of Western Civilization in the field of literature, philosophy, political theory, history, theology, and psychology. Required readings in all the genres of fiction include such writers as Joyce, Dante, Austen, Dostoevsky, Shakespeare, and Sophocles and a spectrum of non-fiction: letters, treatises, essays, handbooks, and dialogues by such writers as Mill, Nietzsche, Locke, Epictetus, and Plato. A summer reading list is required. Students read critically and participate actively in the great and continuing conversations on the pivotal human issues found in these classics. Student partners lead discussions according to the Great Books method. Compositions include papers on analysis, synthesis, evaluation, and hypothesis as well as delineation of each author's arguments in non-fiction. Two semester term papers are also required, analyzing, comparing, and contrasting at least three works, two of which are read outside of class. *This course prepares the student for the Advanced Placement exam in May. There is required reading during the summer before beginning this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

SENIOR COMPOSITION

Course # 01621

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This college bound course is designed for students who wish to improve their critical thinking skills and reading and writing strategies for the heavier demands of college coursework. The topics covered will be literary analysis, reading for the research paper, vocabulary development, and textbook reading strategies. Students will read self-selected novels from a college-bound list. ***There is required reading during the summer before beginning this course.***

FILM STUDIES

Course # 1451

Prereq: Pass both semesters of English II
Level: 11, 12
Credit: 0.5

Film Studies is a course designed for students who enjoy movies and wish to go beyond merely watching them and into the realm of thinking critically about how they are made. We will consider how directors use sound, lighting, camera movement, and editing in order to create meaning and enjoyment. The students will critique a wide variety of genres, both past and present, and will demonstrate their understanding through engaging class discussions, collaborative projects, and writing, both formal and informal. By the end of the semester, students will grow in their ability to interpret film (as well as written texts) and to appreciate the fascinating world of cinema. *Although not all movies are shown in their entirety, written permission must be obtained by a parent at the beginning of this course to allow for students to view the R-rated movies associated with this class. At the time of registration, if R-rated movies are to be utilized in whole or in part, a list of these movies will be available through the English department and online. There is required reading during the summer before beginning this course.*

English Department

SCIENCE FICTION

Course # 01431

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This senior elective explores views presented by various science fiction writers. Through this survey of classic and contemporary science fiction, students will consider different attitudes regarding the future of humankind. Along with the reading of novels, students will have a variety of writing experiences including a research paper. Course evaluation will be measured through tests, quizzes, class discussions, three analysis papers, and one research paper. Texts include *Ender's Game*, *The Maze Runner*, *The House of the Scorpion*, and the anthology: *Science Fiction, Science Fact and You*. **There is required reading during the summer before beginning this course.**

POPULAR LITERATURE

Course # 01461

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

Designed for college and non-college bound seniors, "Popular Literature" focuses on works of 90s and today, while emphasizing the differences of popular and classical literatures. The origin and dynamic characteristics of this genre in today's society will be analyzed through the reading of class books and literature circles. Types of reading audiences and "requirements" of a popular literature author will also be studied. Students will be required to complete written, oral and group projects in addition to the readings; class discussion will constitute a major portion of the class. Authors to be read and studied may include John Grisham, Harlan Coben, Dan Brown, James Patterson, Patricia Cornwell, Sandra Brown, Stephen King, Danielle Steel, Nicholas Sparks, Mary Higgins Clark, and Tom Clancy. Novels may include *Dark Tower*, *The Notebook*, *The Partner*, *Roses are Red*, *Tell No One*, *Hello Darkness*, *DaVinci Code*, and *Angels and Demons*.

There is required reading during the summer before beginning this course.

CREATIVE WRITING

Course # 01561

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

This elective is designed for students who are interested in exploring more creative aspects of their writing and studies of literature. Creative Writing emphasizes an understanding of traditional literary techniques combined with unconventional, individualized forms of speaking and writing to effectively communicate in an interesting way. The class incorporates a wide variety of verbal and written exercises that require a balancing of individual creativity with disciplined focus for success in the course. Time is dedicated to better understanding the creative process and helping students find inspiration to improve all aspects of their writing. In addition to improvisational exercises and participation in writing groups, students complete a portfolio project each quarter that is the culmination of daily journaling and reading assignments. Emphasis will be placed upon both recognizing the elements of style in classical and contemporary authors in selected reading passages and in developing individual style.

There is required reading during the summer before beginning this course.

RHETORIC

Course # 01531

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This elective is designed for college-bound seniors who desire experience in writing. The course develops student writing in freshman college composition classes. Much emphasis is placed upon review of grammatical principles, improvement of vocabulary, and development of an organized, individual writing style. In addition, the student is also required to apply these principles to a research unit and paper. Students use computers to complete their writing and research assignments.

There is required reading during the summer before beginning this course.

English Department

HUMANITIES

Course # 02260

Prereq: Average to above average grades. Dept. Chairperson approval.
Level: 12
Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

There is required reading during the summer before beginning this course.

INTRODUCTION TO THEATRE ARTS

Course # 01380

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Introduction to Theatre Arts is a performance-oriented drama course geared to developing the creative and dramatic talents of individual students. This course uses student acting and teacher-student evaluation as the major teaching method to help the student understand the medium of theatre. It develops sensitivity to the thoughts, beliefs, and ideas of mankind through study, in-class performance, and theatre attendance. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

AFRICAN-AMERICAN LITERATURE

Course # 01471

Prereq: Pass both semesters of English III
Level: 12
Credit: .5

This course explores the African-American experience as reflected in the literature and oral tradition of the community, from the earliest days of our nation to current writers and thinkers. The course will explore not only traditional literary genres such as fiction, poetry, drama, and essays, but also consider areas of film, music, and art as well. Students will study the wide span of the African-American experience from slave narratives to current rap music. Students will also have an opportunity to explore the history and experience of Chicago's African-American experience and literature as a specific focus as well as pursue a major research project on some area of the African-American experience such as a specific author, prominent figure, or essential artistic/cultural movement. ***Extensive reading is expected in this class.***

JOURNALISM: YEARBOOK

Course # 01400

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01400: This is a writing and production course for students interested in designing a yearbook. The classroom portion of the course emphasizes the mechanics of strong, journalistic writing, strategies for effective communication, digital photography, and graphic design. Researching and interviewing are also covered as students prepare to write stories for the school yearbook, *Vespa*. The student should have above average writing skills. Additional work outside of class is required; the outside assignments may focus on writing, photography, page-layout skills, and the business aspect of the yearbook. Students will also be part of the extra-curricular yearbook activity and must take the course to be eligible for an editor position. Journalism may be repeated for credit with consent of instructor and department chairperson. ***This course does NOT fulfill NCAA initial eligibility requirements for college.***

JOURNALISM: YEARBOOK w/honors option

Course # 01410

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01410 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the book, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

English Department

JOURNALISTIC WRITING

Course # 01361

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Course #01361: This course is an intensive writing course for those interested in writing for newspapers and magazines. The course covers all types of journalistic writing, including news, features, sports, editorials, columns, and reviews. Information gathering through interviews and library research will refine reading, listening, and speaking skills. In addition, students will learn about the ethics and the history of the journalistic field. Some of the material will be written for publication in *The Stinger*, the student newspaper. This course is a prerequisite for appointment to editorial positions on *The Stinger* staff. *This class can be taken multiple times with teacher approval.*

JOURNALISTIC WRITING w/honors option

Course # 01371

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Course #01371 w/honors option: To receive honors credit, the student must serve as an editor on the Stinger student news magazine. Editors are chosen through previous journalism experience, an application, and a formal interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle, that include being responsible for a section of the paper, attending be-weekly meetings, attending deadline week, and editing, designing and writing the Stinger. Honors students (editors) will also lead small mini-lessons on topics they have previously mastered; these opportunities will help to increase and sharpen communication and leadership skills. Honors students (editors) must also attend required events scheduled by the adviser.

WRITING WORKSHOP

Course # 01611

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for the student with average to below-average writing skills. The course will build upon writing skills learned freshman, sophomore, and junior years and focuses on using word processing as a tool for writing improvement. This course's structure uses a workshop-style format to help students develop basic writing skills such as brainstorming, effective organizational patterns, establishing a purpose, writing to an audience, vocabulary development, and sentence correctness. Some of the writing assignments include, but are not limited to, descriptive writing, personal narrative, persuasion, and analytic essays. Students will also learn to write for the workplace and will complete a job portfolio. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE: AFRICAN LITERATURE

Course # 01571

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors and will take students on a literary tour of modern Africa. The class will focus on novels from a variety of geographic regions and historical time periods, but it will also incorporate other media such as film, food, music, and drama. Topics may include analysis of personal freedoms under imperialism as well as the historical role played by language and economics in development across the continent. *World Literature classes are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE: LITERATURE OF ASIA & THE MIDDLE EAST

Course # 01581

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors. It will focus on novels representing various cultural groups; however, students will study Asia and the Middle East. Topics may include the role of women in modern Iran, the Chinese Cultural Revolution, and historical opinions of nuclear warfare in Japan. *World Literature courses are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course.***

English Department

ORAL INTERPRETATION

Course # 01511

Prereq: Pass both semesters of English I

Level: 9, 10,11,12

Credit: 0.5

This one-semester course blends an interest in literature with the ability to perform in front of a small group. Students first learn to analyze selections of their choice from various genres: novel, short story, poetry, and drama. Next, they must interpret and communicate the meaning and mood by the way they use the voice and body in reading aloud the selection. The semester will end with a final group performance of a piece of literature that the teacher will direct.

STAGECRAFT

Course # 01521

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.59,

This one-semester course strengthens students' knowledge of technical theatre. Participation in set construction after school and with the stage crew outside of class is required. Emphasis is placed on both practical experience and academic learning. One half of the course is geared toward a student in scenic design, a variety of scenic styles, play reading, technical crew positions, lighting and sound design, and make-up and costume design. These assignments include written set designs, written reports on script readings, construction of a set model, construction of a stage manager's prompt book, and test on lighting, sound, costumes, make-up, and staging. The second half of the course involves construction of dramatic production: building flats and major set pieces, painting, shadowing, and stenciling.

DISCUSSION AND DEBATE

Course # 01641

Prereq: Pass both semesters of English II

Level: 11,12

Credit: 0.5

Listening, leadership, courtesy, topic analysis, research, evaluation of sources and databases, articulation, and confidence—these are the lifelong skills fostered in Discussion and Debate. This course helps students learn to access a range of informational sources available at the Hinsdale South library in order to build arguments about contemporary topics used in debates. Students will participate in formal and informal class discussions, a simulated town meeting, a group discussion panel, debates, current event speeches, and a role play of an individual's life after reading a biography or autobiography. Reading, writing, researching, and active participation are all major components of this course. Because multiple performances will be required during the semester, students should already have a familiarity with and a sense of confidence about public speaking. By the end of the semester, students should feel a sense of mastery at organizing, working cooperatively with others, researching, preparing for, and delivering public performances.

ELECTIVES

ACADEMIC READING

Course # A01100

Prereq: Dept. Chairperson recommendation

Level: 9

Credit: 1.0

Academic Reading is designed for ninth grade students whose standardized test scores demonstrate that they would benefit from direct instruction on reading and vocabulary strategies. Students will complete diagnostic tests in several skill areas at both the beginning and end of the school year to track their growth. The curriculum is comprised of units that address skills that “good readers” internalize including previewing, predicting, summarizing, questioning, and analysis of text structure. In addition to these lessons, students will also receive weekly vocabulary instruction. Finally, students will engage in daily sustained silent reading both inside and outside of class. Comprehension of these novels is assessed both orally and in writing through book talks, presentations, class discussions, journals, projects, more formal writing, and a variety of other authentic assessments. Academic Reading students are simultaneously enrolled in both this course and English I; both classes are taught by the same English teacher. Although both Academic Reading and English I have separate curricula, Academic Reading will include some pre-teaching and re-teaching of skills and strategies taught in English I.

MASS MEDIA

Course # 01661

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

Mass Media is offered as an introduction to the subject of media issues and contains a blend of theory and practice. Units to be studied include: television, advertising, film, newspapers, radio broadcasting, and audio and video recording. Various creative projects will be pursued as well as projects involving writing and reading. A certain amount of independent library research in the areas studied is expected. An evening film study is also required. Course activities are designed to enable students to understand and evaluate the influence of mass media on their lives.

Mass Media will not be offered in 2014-2015.

DIGITAL VIDEO PRODUCTION

Course # 01651

Prereq: Department chairperson approval

Level: 10, 11, 12

Credit: 0.5

This course is designed to immerse students in all aspects of media production. The classroom portion of the course emphasizes the composition of media, the production process, and the analysis of media and its impact on society. Throughout the course, students will plan and produce a variety of video and audio productions, some of which may be featured in our new student video publication, *The Buzz*. Topics covered in the course will include camera and lighting techniques, audio engineering, research and planning skills, interviewing standards, and teamwork. Students will also be encouraged to be a part of our extra-curricular multi-media activity, and must take this course to be eligible for a producer position for this activity. Digital Video Production may be repeated for credit if the student is a member of the multi-media activity; these “advanced students” will work together with the instructor to create a body of work, some of which will be featured in *The Buzz*. These students will also tend to business and production tasks involved in the quarterly student video production.

English Department

COURSES FOR ENGLISH LANGUAGE LEARNERS (ELL)

ELL TUTORIAL

Course # 04801

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 0

This course is designed to create daily opportunities for students to receive the necessary assistance they may need to succeed in the mainstream content courses at the secondary level. Individual time and attention will be provided to supplement and augment the content delivered in the students' mainstream coursework. There will also be supplementary activities to encourage knowledge of and adjustment to the new culture and how to succeed academically.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH LANGUAGE LEARNING I

Course # 04790

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is for "Limited English Proficiency" students who function adequately even though English is not their primary language, but whose performance could be improved by supportive help in language skills. It will include individual and group instruction designed to "fill the gaps" of culture and language which inhibit these students from reaching full academic potential. Students enrolled in this course for credit may also enroll in Course # 04801 Tutorial to replace study hall(s) when additional help is necessary.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH LANGUAGE LEARNING II

Course # 04710

Prereq: Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is for "Limited English Proficiency" students who function adequately even though English is not their primary language, but whose performance could be improved by supportive help in language skills and who have taken Transitional English I. It will include individual and group instruction designed to "fill the gaps" of culture and language which inhibit these students from reaching full academic potential. Students enrolled in this course for credit may also enroll in Course # 04801 Tutorial to replace study hall(s) when additional help is necessary.

This course does NOT fulfill NCAA initial eligibility requirements for college athletics.

ENGLISH AS A SECOND LANGUAGE I

Course # 04770

Prereq: Recommendation by the Coordinator of English Language Learning

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students whose first language is not English and whose communication skills need more support than can be provided in a regular English class. The course provides a sequential curriculum that allows the students to acquire standard American English. The course parallels, when and where possible, the regular English I curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL II with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

English Department

ENGLISH AS A SECOND LANGUAGE II

Course # 04780

Prereq: Recommendation by the Coordinator of English Language Learning
Level: 9, 10, 11, 12
Credit: 1.0

This course is designed for students who have limited English proficiency but have a basic vocabulary and understanding of the language. The course provides a sequential curriculum that allows the students increased practice in standard American English. The course parallels, when and where possible, the regular English II curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL I and ESL III with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

ENGLISH AS A SECOND LANGUAGE III

Course # 04760

Prereq: Recommendation by the Coordinator of English Language Learning
Level: 11, 12
Credit: 1.0

This course is designed primarily for immigrant students arriving as juniors or seniors. Students should have a basic vocabulary and understanding of the language. The course provides a sequential curriculum that allows the students increased practice in standard American English. The course parallels, when and where possible, the regular English III curriculum. It will also provide supplementary activities to encourage knowledge of and adjustment to U.S. culture. This class may be taken concurrently with ESL II with permission from the Director of English Language Learning. This class may be taken as supplementary coursework with mainstream English classes with permission of the English Department Chair and the Director of English Language Learning.

Family & Consumer Sciences

Department Chairperson Mr. Matthew Swedko

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses. A fee is required in most foods related courses. Students are required to purchase materials for sewing.

Family & Consumer Sciences related careers and the suggested course sequencing:

CAREER	APPLICABLE COURSES
Architect Interior Designer Construction Project Manager Historical Restoration	Architectural Design & Housing
Dietitian Chef/Baker Hotel/Restaurant Management Food Sales and Marketing	Foods & Nutrition Creative Foods Bakery and Pastry Arts Chef & Restaurant
Fashion Designer/Buyer Fashion Display/Illustrator Tailor/Alterations/Seamstress	Fashion Merchandising & Design Creative Sewing Creative Sewing II
Social Worker Teacher Preschool Teacher Child Care Worker	Child Care & Development Understanding Relationships Invitation to Teach

Family & Consumer Sciences

INTERIOR DESIGN & HOUSING

Course #06621

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Interior Design & Housing is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0 (0.5 Consumer Educ., 0.5

Applied Arts)

Supply fee: \$10

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. ***This course fulfills the state mandate for consumer education*** and also provides one semester credit for Elective Arts. ***Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.***

FOUNDATIONS FOODS

Course #01722

Prereq: Department Chairperson placement

Level: 9, 10, 11, 12

Credit: .5

This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork. ***This course may be repeated as necessary.***

FOODS & NUTRITION

Course #06501

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students ***cannot receive credit*** for both Foods & Nutrition and Senior Foods.

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is an in-depth continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pasta, breads, deserts, and main dishes. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Bakery & Pastry Arts, Chef & Restaurant.

BAKERY AND PASTRY ARTS

Course #06511

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce pastry works of art? Baking and Pastry Arts builds on the skills learned in Foods and Nutrition/Senior Foods, emphasizing student preferences and creativity in the pastry area. Students select and prepare a variety of cookies, cakes, breads, and desserts. Activities focus on European baked products and decorating a cake. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Chef & Restaurant, Creative Foods.

Family & Consumer Sciences

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or Senior Foods AND teacher approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a “mini restaurant” incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques.

While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.

SENIOR FOODS

Course #06541

Prereq: none

Level: 12

Credit: 0.5

Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students **cannot receive credit** for both Foods and Nutrition and Senior Foods

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts.

CREATIVE SEWING

Course #06552

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student’s preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design, Creative Sewing II

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities.

Suggested follow-up class: Fashion Merchandising & Design

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today’s fashion industry. Activities include style analysis, clothing design, fashion trends and personal selection of fashions. Creative projects involving fashion design/sketching, visual displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

CHILD CARE & DEVELOPMENT

Course #06581

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in preschool or elementary education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children’s toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children.

Suggested follow-up class: Invitation to Teach or Understanding Relationships.

Family & Consumer Sciences

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none
Level: 11, 12
Credit: 0.5

This course encompasses “a slice of life” and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Care & Development

INVITATION TO TEACH

Course #06595

Prereq: Students signing up for Invitation to Teach will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible

INVITATION TO TEACH w/Honors Option

Course #06585

Prereq: Students signing up for Introduction to Teaching w/Honors Option will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #06585 w/honors option: Invitation to Teach w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects may include creating classroom teaching tools, research, tutoring, or interviews. Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible.

Library Media Center

Director of the Library Media Center Mrs. Ellen Lawrence

2012 National School Library Program of the Year

The mission of the Library Media Department is to:

- **Teach** all of our students to thoughtfully *inquire* about the world around them, efficiently *seek* information which addresses those inquiries, critically *evaluate* the quality of that information, capably *apply* the knowledge acquired to new problems, questions, or ideas, and objectively *assess* the work they produce as a result of the research process.
- **Collaborate** with other teachers to design and implement lessons and assessments which challenge our students to become effective users of ideas and information, perhaps the single most important 21st century skill.
- **Provide leadership, instruction, and expertise** in the use of information and technology that encourages creative problem solving and ethical, socially responsible sharing of information.
- **Provide access** to a variety of quality resources which support the curriculum and meet the diverse needs and interests of our school community in a vibrant learning environment equipped for the demands of 21st century teaching and learning.
- **Promote life-long learning** through programming which encourages reading, inquiry, and the use of technology to meet learning goals.

Through the Library Media Center (LMC), students have access to a wide variety of resources including: certified teacher-librarians; an array of research databases; over 25,000 books in print as well as digital books; Nook ereaders; and over 100 networked computers. In addition, scanners, color printers, and video editing equipment are available in the AV area.

The LMC is open from 7:15 am – 3:55 pm Monday through Thursday and from 7:15 am – 3:00 pm on Fridays. The LMC opens at 9:45 am on 10:00 start days. Passes will admit students to the LMC during the school day. Student IDs serve as library cards and are required to check out materials. Most materials can be checked out for three weeks and can be renewed if needed. Fines accrue for overdue materials. Notices of overdue materials are periodically sent via email.

Mathematics Department

Department Chairperson
Mrs. Kerin Sancken

Vision: "Every student a mathematically literate problem solver."

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become productive citizens. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

GRAPHING CALCULATORS ARE REQUIRED FOR ALL MATH AND SCIENCE COURSES.

**Suggested calculators: Texas Instruments TI 83, Ti 84, TI 84+
Casio 9750, Casio 9860, Casio Prizm**
THE FOLLOWING ARE NOT ALLOWED: TI-Inspire CAS or TI-89.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I or Algebra II in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

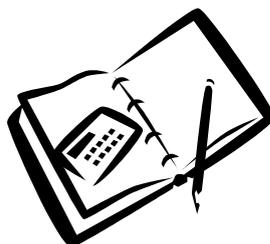

Please see Course Description for detailed Prerequisites.

HINSDALE SOUTH HIGH SCHOOL MATHEMATICS DEPARTMENT

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content. Credits must be earned over three school years.

Colleges require at least Algebra, Geometry, and Algebra II/Trig for admission and many also require a 4th year Math course.

** These courses require Department Chair approval for registration.

Freshman	Sophomore	Junior	Senior
Algebra II/Trig. – Honors**	Pre-calculus Honors and/or AP Statistics and/or AP Computer Science	AP Calculus BC and/or AP Statistics and/or AP Computer Science	AP Statistics and/or AP Computer Science and/or Math Topics Honors and/or Math Topics Computer Science Honors
Geometry Honors** or Geometry	Algebra II/Trig. Honors or Algebra II/Trig.	Pre-Calculus Honors or Pre-Calculus and/or AP Statistics and/or AP Computer Science	AP Calculus AB or BC and/or AP Statistics and/or AP Computer Science
Algebra I or Algebra I Block	Geometry Honors or Geometry or Geometric Analysis	Algebra II/Trig. Honors or Algebra II/Trig. or Advanced Algebraic Topics	Pre-Calculus Honors or Pre-Calculus and/or AP Statistics or Statistics and/or AP Computer Science
Algebra I Part 1	Algebra 1 Part 2 <u>AND</u> Geometry or Geometric Analysis	Algebra II/Trig. or Advanced Algebraic Topics	Pre-Calculus and/or AP Statistics or Statistics and/or AP Computer Science

Note: Department chairperson approval is required when a change of level (for example, Honors to regular level) is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Mathematics Department

FOUNDATIONS MATH

Course #11760

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental math concepts that can be generalized in various facets of daily life. Curriculum includes problem solving and computations, money and number sense, and basic estimation and measurement. Basic analytical methods, geometry and data analysis are also emphasized. *This course can be taken multiple times with department chair approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. **This course fulfills the Algebra I and Geometry content requirements.***

APPLIED MATH

Course #01700

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course is designed for students performing significantly below grade level in math. A variety of practical topics are covered such as basic probability, creating and interpreting graphs, formulas, fractions, percent's, measurement, perimeter, basic geometry, consumer skills, and basic algebra. Students will be prepared to enter the Applied Consumer Math 1 course sequence or an Algebra 1 course within the mathematics department. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. **This course fulfills the Algebra I and Geometry content requirements.***

APPLIED CONSUMER MATH 1

Course #01740

Prereq: Department
Chairperson placement
Level: 10,11
Credit: 1.0

Students that take this course are looking to gain knowledge and mathematical skills for everyday life. This course will guide students through tackling consumer math scenarios. It is designed for students performing significantly below grade level in math. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED CONSUMER MATH 2

Course #01750

Prereq: Department
Chairperson placement
Level: 11,12
Credit: 1.0

This course continues the work started in the Applied Consumer Math 1. The course targets continued acquisition of basic mathematical knowledge and skills. Students will practice independently applying problem solving skills in consumer and everyday scenarios. *This course can be taken multiple times with department chair approval. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

ALGEBRA I

Course # 03110

Prereq: Recommendation of 8th grade teacher and Dept.
Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are properties of numbers, equations and inequalities, and an introduction to linear and nonlinear functions, polynomials, graphing, and introductory statistics. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I BLOCK

Course # 03140

Prereq: Recommendation of 8th grade teacher
Level: 9, 10, 11, 12
Credit: 2.0

This course is a double-period Algebra I so the student can complete Algebra in one year but devote more time to learning and applying the topics. It is designed for the student with skill deficiencies in mathematics as identified by the Explore test and teacher recommendation.

*A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and Explore Test Score
Level: 9, 10, 11, 12
Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 focuses on operations with signed numbers and basic variable manipulation. Core topics include: properties of numbers, polynomial expressions, equations (one-step through multi-step), inequalities, functions, graphing, probability, introductory statistics. Algebra I Part 1 establishes the foundational skills necessary for success in future mathematics classes. ***This course in conjunction with Algebra I Part 2 fulfills the Algebra I requirement.** A graphing calculator is required for this course.*

Mathematics Department

ALGEBRA I Part 2

Course #03130

Prereq: 8th Grade teacher recommendation and Explore Test Score.

Level: 9, 10, 11, 12

Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 addresses linear and nonlinear functions, polynomials, systems, and graphing. ***This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement. A graphing calculator is required for this course. Most students will take this class in conjunction with Geometric Analysis.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I at the High School or 8th grade teacher recommendation and Department Chairperson Approval.

Level: 9, 10

Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in regular Geometry (Course #03210), but with more depth. Three-dimensional and coordinate geometric proofs are included. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra I at the high school or 8th grade teacher recommendation and Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Geometry is required for entrance into most colleges and many vocational programs. This course continues the use of algebra in geometric situations, calls on the power of logic and proof, and incorporates applications to real-world problems in the plane and in space. This course is for students who intend to pursue post-secondary education of two or more years. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I Block, Identified deficiencies from Freshman exit Explore test, semester exams and teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

This course is designed to follow the Algebra I. It deals with the same topics of Geometry (Course #03210) with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. This course would be very beneficial for any student pursuing post-secondary education. Placement in this course is based on identified skill deficiencies as evidenced by the Explore test, semester exams and teacher recommendation. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

ALGEBRA II /

TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry Honors or Department Chairperson Approval

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry (Course #03310) in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. This is a college-preparatory course. ***A graphing calculator is required for this course.***

ALGEBRA II /

TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

This course is designed for college bound students and useful for preparing for College Board tests like the SAT and ACT. It continues the study of linear and quadratic functions, graphing, polynomial, exponential, and logarithmic functions, trigonometry, statistics, and introductory probability. ***A graphing calculator is required for this course.***

Mathematics Department

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and Department Chairperson Approval
Level: 11, 12
Credit: 1.0

This course is recommended for students who completed Algebra 1 Block or Algebra 1 Part 1/Algebra 1 Part 2 and Geometric Analysis. The topics studied are real and complex numbers, conic sections, exponential, logarithmic, polynomial, and trigonometric functions, statistics, and introductory probability. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/ Trigonometry Honors or A in Algebra II/Trigonometry and Department Chairperson approval
Level: 10, 11, 12
Credit: 1.0

Precalculus Honors treats the topics of Precalculus (Course #03400) in greater depth, with more emphasis placed on proof, abstract structure, and preciseness of thought and communication. In addition, analytic geometry of the plane, probability, and the polar coordinate system is studied. *A graphing calculator is required for this course.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II /Trigonometry or Algebra II/ Trigonometry Honors or Introduction to Statistics or Math Analysis & Research
Level: 10, 11, 12
Credit: 1.0

This course is a study of functions and applications. It extends the topics of Algebra 2/Trigonometry and adds conic sections and some finite math topics. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT CALCULUS AB

Course # 03420

Prereq: Successful completion of Precalculus or Department Chairperson approval
Level: 10, 11, 12
Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT CALCULUS BC

Course # 03430

Prereq: Precalculus Honors
Level: 11, 12
Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, and infinite series. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/ Trigonometry (any level) and Department Chairperson
Level: 11, 12
Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Mathematics Department

STATISTICS

Course # 03470

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Approval.

Level: 12

Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course will prepare students to take the AP Statistics exam. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2 Trigonometry
and Department Chairperson
approval

Level: 10, 11, 12

Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses. Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

MATH TOPICS I HONORS

Course # 03511

Prereq: Department
Chairperson approval

Level: 12

Credit: 0.5

Math Topics I is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course.

MATH TOPICS II HONORS

Course # 03512

Prereq: Math Topics I Honors
and Department Chairperson
approval

Level: 12

Credit: 0.5

Math Topics II is a continuation of Math Topics I.

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: Advance Placement
Computer Science A
Department Chairperson
approval

Level: 11,12

Credit: 1.0

Math Topics Computer Science Honors reviews and builds upon the concepts taught in the AP Computer Science A course. The primary emphasis of the course is on data structures algorithms using the JAVA programming language. Stacks, queues, linked lists, trees, heaps, hash tables, sets, maps, and graphs are covered in great detail. Following the data structures unit, students learn a second programming language. GUIs, advanced sorting algorithms, and cell phone applications are explored. Students have the opportunity to complete an independent study project at the conclusion of the course.

Music Department

Department Chairperson Mr. Patrick Maag

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

JAZZ BAND / JAZZ ENSEMBLE

Course #05600

Prerequisites: Audition required and concurrent registration in a band class (exceptions made for piano, bass and guitar). *Call 630-468-4151 to schedule an audition*

Level: 9-12

Credit: 1.0

The Jazz Ensemble is the top auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles and frequently perform. Enrolled students should have a good understanding of scale and chord theory and must be comfortable practicing improvisation. This class meets every other day during the "Early Bird" Period 0.

The Jazz Band is an auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles. The class develops an understanding of scale and chord theory and encourages improvisation. This class meets every other day during the "Early Bird" Period 0.

CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4151 to schedule an audition.*

Level: 9-12

Credit: 1.0

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Per Policy 6:310, Marching band students may be exempt from Physical Education during the school year for participation in band (see page 10 for details). Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. *Call 630-468-4151 to schedule an audition.*

Level: 10, 11, 12

Credit: 1.0

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Per Policy 6:310, Marching band students may be exempt from Physical Education during the school year for participation in band (see page 10 for details). Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC PERCUSSION ENSEMBLE

Course #05660

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4151 to schedule an audition.*

Level: 9, 10, 11, 12

Credit: 1.0

Honors Credit is available

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests. **Per Policy 6:310, Marching band students may be exempt from Physical Education during the school year for participation in band (see page 10 for details). Please complete P.E. waiver form and return to your counselor during registration.**

Music Department

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Finale* using Yamaha Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is not offered during 2015-2016, and will be offered next during 2016-2017)

This course is designed for the serious piano student who wants to learn how to improve piano performance, compose and perform original compositions. Students learn to use music writing programs like *Sibelius*, *Finale*, *Band in a Box* and *Cakewalk* using Yamaha synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students may enter competitions with songs they create and additional performance opportunities may be available.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is offered during the 2015-2016 school year)

Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are required to take the AP Music Test in May. Students will use the music theory learned to compose chorales, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using music composition software.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ORCHESTRA

CONCERT ORCHESTRA

Course #05780

Prereq: Audition by High School Director.
Call 630.468.4151 to schedule an audition.

CONCERT ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Director approval

Level: 9, 10, 11, 12

Credit: 1.0

The Concert Orchestra is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade females and to all other grade levels who have not participated in vocal music at school before.

BASS CHORUS

Course #05710

Level: 9, 10, 11, 12

Credit: 1.0

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade males and to all other grade levels who have not participated in vocal music at school before.

VARSITY TREBLE CHORUS

Course # 05800

VARSITY TREBLE CHORUS HONORS

Course #05850

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Director approval. Open to females in grades 10, 11, and 12.

VARSITY MIXED CHORUS

Course # 05820

VARSITY MIXED CHORUS HONORS

Course # 05810

Prereq: Audition Required

Level: 10, 11, 12

Credit: 1.0

Varsity Mixed Chorus is the top-level large group choral music ensemble for sophomore, junior and senior singers with previous musical experience. Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Director approval. Top-level choir, open to grades 10, 11, and 12.

MADRIGALS/JAZZ CHOIR

Course # 05830

MADRIGAL/JAZZ HONORS

Course # 05840

---See Honors Requirements---

Prereq: Audition Required

Level: 10, 11, 12

Credit: 1.0

Madrigals/Jazz Choir is a full-year course for selected 10th, 11th, and 12th grade students, which will focus on the performance of the Madrigal Dinner in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Madrigal students are also required to learn and perform the repertoire of Varsity Mixed Chorus.

Prerequisite: Director approval. Top-level choir, open to grades 11, and 12.

Music Department

HONORS STUDY IN MUSIC

Students will have the opportunity to qualify for honors study in the following performance programs: Symphonic Band Honors (including Symphonic Percussion), Concert Orchestra Honors, Varsity Mixed Chorus, and Madrigal/Jazz Honors. Selections will be the *Illinois Music Educators Association* audition music, which can be obtained from the instructors in June of each year. Honors selection will be based on the IMEA material performed during the third week of September. ***Please read the section below for more information on requirements.***

REQUIREMENTS FOR HONORS STUDY

Advanced students in Concert Band, Symphonic Band, Symphonic Percussion Ensemble, Varsity Choir, Concert Orchestra and Madrigals/Jazz Choir may audition for the honors level of that ensemble. *These students will, as part of the requirements, remain as members of their curricular ensemble and fulfill all obligations of that ensemble.* In addition, students will be required to perform the following activities:

1. Students must audition for the IMEA District Festival on the State Audition material. This audition will be held in October at a local high school.
2. Private lessons once a week for thirty minutes. The number of lessons per quarter will be one less than the number of weeks in the Quarter. For example, if we have ten weeks in one quarter the students must take nine lessons during that quarter. Students will be responsible for turning in the completed lesson form signed by the private teacher. The teaching staff will approve the private teachers each year.
3. Two solo performances. One will be an Honors Recital in November, which will be open to the public. Instrumentalists will perform a major solo work with piano accompaniment. Vocalists must perform at least two songs, one in a foreign language. The recital will be a graded event. Students will be given a set of guidelines before the event, which will be used to assess the performance. Students must show the director the solo selected to check for level of difficulty and appropriateness at least four weeks before the performance.
4. In addition, by the November recital, each student will turn in a 1000 word paper (typed, double spaced) about the selection they are performing. The research paper should cover the composer and his works, historical perspective, as well as the repertoire being performed. Students must use proper format as well as a minimum of five sources with a maximum of two Internet sites.
5. A second performance of a different solo will be in March at the Illinois High School Association State Solo and Ensemble contest. The directors of the honors students will grade the solo and the performance before the contest. Then the students will perform the same solo for the state judge who will rate and make written comments and suggestions. The importance of this experience is that the student receives an outside critique of his/her playing/singing ability and can be better prepared for college auditions, which will be very similar to the this solo experience.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs. Per Board Policy 6:310, some students may qualify for an exemption from their PE course (see page 10 for details).

PHYSICAL EDUCATION ACTIVITIES

Freshman Activities

Aerobics
Badminton
Basketball
Floor Hockey
Folk/Square/Swing Dance
Gymnastics
Physical Fitness Concepts
Physical Fitness Testing
Soccer
Softball
Speed-A-Way
Swimming
Tennis
Touch Football
Track & Field
Volleyball

Sophomore, Junior and Senior Choices

Aerobics	Recreational Sports
Aerobic Fitness	Rhythmic Gymnastics
Archery	Roller Blading
Badminton	Snorkeling
Basketball	Soccer
CC Skiing	Softball
Flickerball	Speed-A-Way
Floor Hockey	Tchoukball
Golf	Team Handball
Ice Skating	Tennis
Lacrosse	Trampolines
Navy Football	Touch Football
Net Games	Ultimate Frisbee
Outdoor Ed.	Volleyball (indoor)
Pickleball	Water Games
Physical Fitness Applications	Weight Lifting
Lifeguard Certification (2 nd sem. only)	Yoga

Freshmen, Juniors, and Seniors must register for Physical Education EACH semester.

<u>Grade</u>	<u>Semester 1</u>	<u>Semester 2</u>
9 (Learning Readiness PE) <i>This class will stress movement, cross lateral activities, and aerobic exercise; taking full advantage of the effects that exercise and movement have on learning.</i>	Course No. 07161	Course No. 07162
10/11*/12* (Upper Level PE)	Course No. 07471	Course No. 07472

9^/10/11/12 (Early Bird PE) <i>Early Bird Physical Education starts prior to the regular school day and runs from 7:00 am until 7:50 am. This class allows students to enjoy the positive effects associated with exercise and the benefits it has on learning.</i> (^See page 9 for exclusions)	Course No. 07431	Course No. 07432

Physical, Health, & Driver Education

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.**

Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws. **In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.**

HEALTH EDUCATION

Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)

Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information. *With department chair approval, the Adaptive PE course (07901/#07902) can be taken for Foundations Health credit (#11701).*

ADVANCED HEALTH

Course #07511

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Any students may see the teacher should they have questions on taking the course for 'honors' credit.

Science Department

Department Chairperson Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

Science Department

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, and reading, writing and note-taking skills.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

CORE COURSES

FOUNDATIONS SCIENCE

Course #11770

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students will investigate key elements of physical and social wellness that can be generalized in various facets of daily life, including proper nutrition, sleep, self-care and exercise. They will explore the benefits of leisure activities and socialization. Students will also explore fundamental concepts, principles and interconnections of the life, physical and earth sciences. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This course will be offered during the 2015-2016 school year; it will not be offered during the 2016-2017 school year.

APPLIED EARTH SCIENCE

Course #01730

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: earth, moon, and solar system; stars and galaxies; weather, climate, and the earth's atmosphere; weathering and erosion and forces in the earth. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will not be offered during the 2015-2016 school year but will be offered during the 2016-2017 school year.

APPLIED BIOLOGY

Course #01830

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: classification of living things, plants, animals, ecology, the human body and health. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will be offered during the 2015-2016 school year; it will not be offered during the 2016-2017 school year.

GEOPHYSICS

Course # 03640

Prereq: Department Chair recommendation.

Level: 9 (higher with recommendation)

Credit: 1.0

This course combines Earth Science content and explores the Physics that underlie observable phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, history of the Earth, velocity, acceleration, waves, energy, forces, magnetism, and atomic structure. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. *This course is also offered in an Academic Reading (AR) format (#03610A) for students who need extra assistance in reading comprehension.*

PHYSICS HONORS

Course #03920

Prereq: Department Chair recommendation; Concurrent with Geometry or higher.

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging. *Freshmen concurrently enrolled in Algebra II/Trig can take AP Physics 1 as their science option if desired.*

CONCEPTS IN CHEMISTRY

Course # 03840

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10

Traditional chemistry topics are covered, including the nature of science, atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students who need targeted assistance in mathematics and does not serve as a prereq for AP science courses.

Science Department

Credit: 1.0
Supply fee: \$10

For the 2014-2015 school year, this course is offered in an Academic Reading (AR) format (#03850A) for students who need extra assistance in reading comprehension.

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit, successful completion of Algebra I or higher; Teacher recommendation.

Level: 10
Credit: 1.0
Supply fee: \$10

Traditional chemistry topics are covered and include the nature of science and chemistry, atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability and serves as a prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10
Credit: 1.0
Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level understanding is expected, and problem-solving will be more challenging. This course is appropriate for students with above average math abilities.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11
Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include scientific method, cellular and molecular biology, ecology, evolution, biochemistry, plants and body systems. *This course is also offered in an Academic Reading (AR) format (#03750A) for students who need extra assistance in reading. This course can also be taken for dual credit through the College of DuPage (#03700D). Interested students should see page 8 and speak with the Science Department Chair for details.*

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level) and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12
Credit: 1.0

This math-intensive course (requires strong Algebra I skills) is for students who took GeoPhysics as freshmen but who would like to take a full physics course to better prepare them for college. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy and waves.

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry Teacher recommendation.

Level: 11, 12
Credit: 1.0

Advanced Placement Biology covers two semesters of college-level biology, and applies previous knowledge to topics as designated by the College Board curriculum, such as biochemistry, cellular biology, molecular biology, phylogeny, and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12
Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry covers two semesters of college-level chemistry, and applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics and thermodynamics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Science Department

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.
Level: 11, 12
Credit: 1.0

Advanced Placement Environmental Science covers one semester of college-level environmental science, and explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered.

This is open only to students identified and recommended by the Science department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Environmental Science students who have no previous honors or AP level classes in their background. This class is taught by one of the AP Environmental Science teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Environmental Science exam.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE "RISE"

Course # 03680

Prereq: Dept. Chairperson approval
Level: 11, 12
Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Environmental Science section.

ADVANCED PLACEMENT PHYSICS 1

Course # 03900 (9) / #03910 (11,12)

Prereq: Freshmen must be concurrently placed in Algebra II/Trig; Juniors have completed Chemistry Honors and be concurrently enrolled in a Biology course; Seniors must have completed one or more Honors or AP Science courses; Teacher or Dept. Chairperson approval.
Level: 9, 11, 12
Credit: 1.0

Advanced Placement Physics 1 is equivalent to a first-semester college-level Algebra-based physics course. Topics include motion, work, energy, forces, rotation, momentum, power, waves, sound, and electromagnetism. This course can be taken by freshmen in Algebra II/Trig (Course #03900) or by juniors and seniors as an elective (Course #03910).

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PHYSICS 2

Course #03950

Prereq: AP Physics 1; Teacher recommendation
Level: 11, 12
Credit: 1.0

Advanced Placement Physics 2 is equivalent to a second-semester college-level Algebra-based physics course. Topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic/nuclear physics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: Concurrent with Calculus or higher; Completion of Physics, Chemistry, and Biology (may be taken concurrently with Biology); Teacher recommendation.
Level: 11, 12
Credit: 1.0

Advanced Placement Physics C is equivalent to two-semesters of college-level calculus-based physics course. Topics include in-depth investigations into mechanics, electricity and magnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ELECTIVE COURSES

ASTRONOMY: THE SOLAR SYSTEM/STARS AND GALAXIES

Course # 03691/03692

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.
Level: 11, 12
Credit: 0.5 each

Astronomy—The Solar System investigates the history and origins of astronomy, telescopes, calendars, and the solar system. *Astronomy—Stars and Galaxies* investigates ordinary stars, stellar distances and motions, supernovae, pulsars and black holes, overview of the universe, stellar evolution, and galaxy formation. These two semester courses may be taken independently of each other.

Science Department

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

This course develops students' understanding of the workings of the human body. Dissections, including various cow organs and joints and a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

STUDENT INQUIRY AND RESEARCH HONORS

Course #03850

Prereq: Successful completion of an honors level science course or successful completion of a regular level science course and teacher recommendation. Sophomores and Juniors must be concurrently enrolled in a core science course.

Level: 10, 11, 12

Credit 1.0

This is an honors science course designed to teach students the basic methods used in scientific research such as conducting background research, formulating hypotheses, and designing experiments. Students will analyze collected data using various statistical methods. Students will communicate their findings through a research paper, create a research poster, and present their findings orally at a public symposium at the end of the course. Throughout the course, students will collaborate on a whole-class research projects, work collaboratively and individually on an engineering projects, and complete an individual research project on a topic of their choice. This is an elective science course and does not count towards your science graduation requirement nor does it serve as a prerequisite for Advanced Placement science courses. Earned credit will be applied to the student's overall graduation credit total.

Students registered for seven classes who wish to enroll in SIR may be eligible to enroll in eSIR. Interested students must make an appointment with the Department Chair.

Prerequisite: Successful completion of an honors level science course or successful completion of a regular level science course and teacher recommendation. During the school year, 2 years of science or concurrent enrollment in a second year of science. Open to grades 10, 11 and 12.

Pending College Board Approval:

Upon completion of the first year of SIR, a student is eligible to earn credit for the College Board's A.P. Seminar 1 course by completing the assessment.

Upon completion of the second year of SIR, a student is eligible to earn credit for the College Board's A.P. Seminar 2 course by completing the assessment.

A student enrolled in eSIR is not eligible to complete the assessment for the College Board's A.P. Seminar 1 course because they will not complete the group component required by this course.

This course is conducted at Hinsdale Central High School during 1st or 10th period.

Social Studies Department

Department Chairperson Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

Social Studies Department

SOCIAL STUDIES PATHS: GENERAL INFORMATION

- Students are strongly encouraged to take **four** years of social studies courses. Students may take multiple social studies courses their sophomore, junior and senior years.
- All social studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.
- Advanced Placement (AP) courses provide students with an opportunity to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of the level of study presented in AP courses, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites and to develop skills and work habits that will prepare them for AP classes their sophomore, junior and senior years.
- Hinsdale South also offers a variety of electives for sophomores, juniors and seniors that allow students to explore the social studies and expand their knowledge base. Electives can be taken concurrently with core courses. Listed course prerequisites may be waived by teacher or department chair recommendation.

WORLD CULTURES

Course # 02470

Prereq: None

Level: 9

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

WORLD STUDIES HONORS

Course # 02390

Prereq: Dept. Chairperson
Recommendation

Level: 9

Credit: 1.0

An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. *Students are prepared to take Advanced Placement courses.*

WORLD CULTURES (AR)

Course # 02460A

Prereq: Dept. Chairperson
Recommendation

Level: 9, 10

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized, with additional focus on reading strategies. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

ADVANCED PLACEMENT EUROPEAN HISTORY

Course # 02520

Prereq: Recommendation of
World Studies teacher and
Dept. Chairperson approval.

Level: 10

Credit: 1.0

This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Social Studies Department

AFRICAN-AMERICAN HISTORY

Course # 02331

Prereq: None
Level: 10, 11, 12
Credit: 0.5

An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.

GEOGRAPHY

Course # 02501

Prereq: None
Level: 10, 11, 12
Credit: 0.5

An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.

PSYCHOLOGY I

Course # 02431

Prereq: None
Level: 10, 11, 12
Credit: 0.5

An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

PSYCHOLOGY II

Course # 02462

Prereq: Psychology I (above average grades) and Dept. Chairperson approval.
Level: 10, 11, 12
Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY

Course # 02510

Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PSYCHOLOGY "RISE"

Course # 02530

Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

SOCIOLOGY

Course # 02381

Prereq: None
Level: 11, 12
Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

Social Studies Department

AMERICAN POLITICS

Course # 02351

Prereq: None

Level: 10, 11, 12

Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties.

UNITED STATES HISTORY

Course # 02310

Prereq: None

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Transfer students who have not previously done so must pass a test on the Illinois and U.S. Constitutions as a requirement for graduation. In U.S. History students satisfy Illinois requirements for study of the Declaration of Independence, United States Constitution, Illinois State Constitution, and Flag Code. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation.

AMERICAN STUDIES

Course # 01360

Prereq: None

Level: 11

Credit: 2.0 (one in English;
one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

ADVANCED PLACEMENT U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson
approval

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. A test on the Illinois and U.S. Constitution is offered to satisfy the graduation requirement. *This course will prepare students for the Advanced Placement exam in May.* **Students enrolling in AP US History will not be able to drop to regular U.S. History or American Studies in the same school year.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ECONOMICS

Course # 02341

Prereq: Average or above
average grades

Level: 10, 11, 12

Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity.

This course fulfills the state mandate for consumer education.

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361

Prereq: Teacher
recommendation

Level: 11, 12

Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The course will examine the role the U. S. government should play in regulating the American economy and the wages workers should receive for different jobs. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Social Studies Department

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372

Prereq: Teacher recommendation
Level: 11, 12
Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** This course is offered second semester only. Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

PHILOSOPHY & ETHICS

Course # 02541

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course will not be so much to cover a particular body of philosophers, but to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions.

CONSTITUTIONAL LAW

Course # 02551

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, and the American jury system. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, students try a case for their final exam.

EAST ASIAN STUDIES

Course #02411

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Asian Studies will examine the history and culture of China, Japan and Korea. Possible topics of study include the Samurai and code of Bushido, the emergence of Japan as a colonial power, the Rape of Nanking, the Korean War, the development of nuclear weapons by North Korea, and the emergence of China as a 21st century global superpower. The course is project, writing, and discussion oriented complimented with a field trip and experiential learning. Students will be challenged to avoid ethnocentrism and to understand these civilizations from the perspective of the people who came from them.

GLOBAL ISSUES

Course #02421

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Global Issues examines several major contemporary political, social, and diplomatic dilemmas of the 21st century. After tracing the historical roots of contemporary issues, students will analyze and evaluate each issue from a variety of perspectives. Possible topics include the proliferation of nuclear weapons, human rights and genocide, democracy and dissent, the future of the Middle East, the "war on terror," U.S. foreign policy since Vietnam, and major domestic challenges. Active student participation on a daily basis and developing written and oral arguments are major components of a student's grade.

Social Studies Department

**ADVANCED PLACEMENT
GOVERNMENT & POLITICS,
U.S.**

Course # 02451

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

HUMANITIES

Course # 02260

Prereq: Average to above-average grades and Dept. Chairperson approval

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

**FOUNDATIONS SOCIAL
STUDIES**

Course #11780

Prereq: Dept. Chairperson placement

Level: 9,10,11, 12

Credit: 1.0

The goal of this course is to develop in students an understanding of citizenship that can be generalized in various facets of daily life. Students will sharpen their basic understanding of history, government and social systems through the exploration of current and historical events. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This will not be offered during the 2015-2016 school year, and will be offered again in 2016-2017.

Technology Center of DuPage

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190

(630) 620-8770

www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Mr. Matthew Swedko

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Description for detailed prerequisites.

Technology Education Department

PRE-ENGINEERING I

Course #06741

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process.

PRE-ENGINEERING I

w/honors option

Course #06731

Prereq: Teacher approval

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings.

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I

Level: 9, 10, 11, 12

Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course.

PRE-ENGINEERING II

w/honors option

Course #06761

Prereq: Pre-Engineering I &

Teacher recommendation

Course #06761 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept.

ARCHITECTURE & DESIGN

Course #06730

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$15

Course #06730: This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ARCHITECTURE & DESIGN

w/honors option

Course #06710

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$15

Course #6710 w/honors option: The core material for this course is similar to Architecture & Design course #06730, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program or architecture program.

Technology Education Department

ENGINEERING & DESIGN

Course #06721

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06721: This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

ENGINEERING & DESIGN w/honors option

Course #06711

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06711 w/honors option: The core material for this course is similar to Engineering & Design course #06711, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

Course #06700

Prereq: Architecture & Design or Architecture & Design w/honors option and Engineering & Design or Engineering Design w/honors option.
Level: 10, 11, 12
Credit: 1.0

Course #06700: This is the culminating course in our Technology Education program. Students will have additional challenges as they are introduced to several 3D modeling software programs. Students will be required to use the skills learned in both their engineering and architecture courses as they make the transition from 2D to 3D.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING w/Honors Option

Course #06720

Prereq: Architecture & Design or Architecture & Design w/honors option and Engineering & Design or Engineering & Design or Engineering Design w/honors option.
Level: 10, 11, 12
Credit: 1.0

Course #06720 w/honors option: The core material for this course is similar to Advanced Engineering and Architectural Modeling, however, projects and assessments will involve more depth, complexity, and rigor.

WOODS I

Course #06771

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$47

This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

WOODS II

Course #06780

Prereq: Woods I & teacher approval
Level: 10, 11, 12
Credit: 1.0
Supply fee: \$137

This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval
Level: 11, 12
Credit: 1.0

This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent. A four-year sequence of honors level courses is available in all languages offered by the department.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. In accordance with board policy 6:320, students who enter high school in Level 2 of any language course can opt-in to receive 1.0 proficiency credit upon earning a C or higher in the Level 2 language course. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed Prerequisites.

World Languages Department

HINSDALE SOUTH HIGH SCHOOL WORLD LANGUAGES DEPARTMENT

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

In addition to French, German, Latin and Spanish, students can also enroll in American Sign Language courses.

World Languages Department

GERMAN

GERMAN I

Course # 04200

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

German I is an introduction to the German language and culture. An intensive listening and speaking experience, based on everyday situations is provided. Students will learn the basic sounds of the language, pronunciation, grammar, vocabulary, and sentence patterns. Active reading and writing are introduced. Language skills and an understanding of the German people are obtained from the study of folk tales, recipes, songs, videos, and introductory reading from newspaper.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. In addition to the content of the German I course, students will be involved in higher level learning activities in listening, speaking, reading, and writing as a required part of the course. Additional enrichment reading assignments, projects, and presentations are integrated in the form of simple narratives, fairy tales, songs, and poems.

GERMAN II

Course # 04220

Prereq: "C" in German I

Level: 10, 11, 12

Credit: 1.0

German II provides a continuation of the skills learned in German I with an emphasis on communication and culture, while writing skills and practical vocabulary are greatly increased. Writing and performing skits gives the students the chance to "live" the language and an opportunity to more fully enjoy listening to and speaking German.

GERMAN II HONORS

Course # 04270

Prereq: "A" in German I or "B" in German I with Dept. Chairperson approval, or "C" in German I Honors

Level: 10, 11, 12

Credit: 1.0

In addition to the content of the German II course, German II Honors emphasizes higher level learning in listening, speaking, reading and writing. More advanced vocabulary and grammar structures will be studied, as well as German culture, customs, and history. Students are challenged by the addition of reading selection and urged towards mastery in communication skills

GERMAN III

Course # 04280

Prereq: "C" in German II

Level: 11, 12

Credit: 1.0

German III continues to emphasize communication skills, grammatical structures and a cultural approach. Students will increase their reading skills and vocabulary by reading short stories and a selection of poetry. Individualized study projects are integrated as well.

GERMAN III HONORS

Course # 04230

Prereq: "A" in German II or "B" in German II with Dept. Chairperson approval, or "C" in German II Honors

Level: 11, 12

Credit: 1.0

In this course previously learned skills are enhanced. Advanced vocabulary and grammar are studied along with short stories, cultural readings and selections from newspapers and classical literature. A thematic approach is used to integrate advanced learning in speaking, writing and active listening. Individualized study projects are pursued. Students will gain cultural understanding through excerpts from history, art, music, literature, geography, and films. Students are encouraged to begin to prepare for the Advanced Placement Exam in German.

GERMAN IV

Course # 04290

Prereq: "C" in German III

Level: 11, 12

Credit: 1.0

German IV will continue the reading, grammar, listening, and composition writing in German. It will emphasize verbal and written communication and present selections from literature, art, music, science, history, and films. Students enrolled in the class are encouraged to prepare for College Placement tests

World Languages Department

ADVANCED PLACEMENT GERMAN LANGUAGE

Course # 04240

Prereq: "A" in German III "B" in German III with Dept. Chairperson approval, or "C" in German III Honors
Level: 11, 12
Credit: 1.0

Advanced Placement German Language is the fourth course in the German sequence and is a college level course requiring the ability to work independently on a college level. This class emphasizes higher level learning skills in order to increase the student's reading rate and comprehension. Through the reading of literary masterpieces the student is enriched in his personal life as well as in his understanding of contemporary and historical Germany. Individual study projects are pursued.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

GERMAN V HONORS

Course # 04260

Prereq: "A" or "B" in German IV or Depart. Chairperson approval or "C" in Adv. Placement German Language
Level: 12
Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language, since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors
Level: 9, 10, 11, 12
Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: "C" in Latin I
Level: 11, 12
Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

LATIN II HONORS

Course # 04350

Prereq: "B" in Latin I Honors or "A" in Latin I
Level: 10, 11, 12
Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

World Languages Department

ADVANCED PLACEMENT LATIN

Course # 04360

Prereq: Successful completion of a Latin II
Level: 11, 12
Credit: 1.0

Students in this course will read Vergil's epic poem, *The Aeneid* and Caesar's *Gallic War*. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry and prose style. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

This course alternates yearly with Advanced Placement Latin and will be offered again in 2016-2017.

LATIN LITERATURE HONORS

Course # 04370

Prereq: Successful completion of a Latin II
Level: 11, 12
Credit: 1.0

This course is designed to solidify students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Cicero, Ovid, Catullus, and others. Students will be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the students' exploration of ancient culture and society.

This course alternates yearly with Latin Literature Honors and it will be offered in 2015-2016.

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: "C" in the World Language most recently studied
Level: 10, 11, 12
Credit: 0.5

This course is designed to increase knowledge and understanding of English vocabulary. Students learn to discover meanings of words through recognition and interpretation of their elements. Supplementary activities add variety to the learning process. Etymology is especially recommended for students who plan to take the PSAT, ACT, SAT or other college entrance exams.

FRENCH

FRENCH I

Course # 04100

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using textbook examples. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Although grammar concepts may be taught in English, students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred
Level: 9, 10, 11, 12
Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

World Languages Department

FRENCH II

Course # 04120

Prereq: "C" in French I

Level: 9, 10, 11, 12

Credit: 1.0

French II is a continuation of the French 1 program and continues to build upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: "A" in French I or "B" in French I and Dept. Chairperson approval or "C" in French I Honors

Level: 9, 10, 11, 12

Credit: 1.0

The core material is the same as French 2 with an accelerated pace to allow for the reading and discussion of short stories and short books, as well as other activities to challenge the Honors student. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: "C" in French II

Level: 10, 11, 12

Credit: 1.0

This course reviews and expands upon skills learned in level II with an increased emphasis on extensive vocabulary acquisition and a more complete study of grammar. Students will continue their culturally based study of the language, do oral presentations, write short compositions, and short stories. Students will read a variety of sample literature pieces. During second semester, students read and discuss *Le Petit Prince*. This course is conducted extensively in French.

FRENCH III HONORS

Course # 04180

Prereq: "A" in French II or "B" in French II and Dept. Chairperson approval or "C" in French II Honors

Level: 10, 11, 12

Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: French III

Level: 11, 12

Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

ADVANCED PLACEMENT

FRENCH LANGUAGE

Course # 04150

Prereq: "C" in French III Honors or "A" in French III or "B" in French III with Dept. Chairperson approval

Level: 11, 12

Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

World Languages Department

FRENCH V HONORS

Course # 04190

Prereq: Successful completion of Advanced Placement French IV and Dept. Chairperson approval
Level: 12
Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

SPANISH

SPANISH I

Course # 04510

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish I, the students develop communication skills, study grammatical structures, and learn about culture. Students study the basics of the language: speaking, listening comprehension, reading and writing.

SPANISH II

Course # 04520

Prereq: "C" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish II, the students will continue to develop communication skills, study grammatical structures and learn about culture. Specific cultural emphasis will be given to Mexico, Central America and South America. Specific communication skills will emphasize listening and speaking with increased instruction and practice in reading and writing.

SPANISH II HONORS

Course # 04580

Prereq: "A" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In addition to the content covered in Spanish II, Spanish II Honors will emphasize listening comprehension, meaningful conversation, reading selected text for conversation-stimulating content, and development of writing skills.

SPANISH III

Course # 04530

Prereq: "C" in Spanish II
Level: 10, 11, 12
Credit: 1.0

In Spanish III, students will continue to develop communication skills, grammatical structures and learn about the culture of various Spanish-speaking countries. Specific communication skills will emphasize the development of improved listening comprehension, speaking and writing, as well as further practice in reading and vocabulary building.

SPANISH III HONORS

Course # 04570

Prereq: "A" in Spanish II or "A" or "B" in Spanish II Honors
Level: 10, 11, 12
Credit: 1.0

Spanish III Honors provides the opportunity for students to progress from a structured sequential language program to one, which emphasizes, in a thematic approach, integration of all language skills. Students will progress toward the goal of independent use of the language in speaking, reading, writing, and active listening. Furthermore, students will gain an understanding of Spanish culture through the study of history, art, music, literature, geography, and customs.

SPANISH IV

Course # 04540

Prereq: "C" in Spanish III
Level: 11, 12
Credit: 1.0

Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study and to strengthen their skills in writing, reading, listening, vocabulary and comprehension. Culture is studied through reading, skits and a series entitled "Destinos".

World Languages Department

ADVANCED PLACEMENT SPANISH LANGUAGE

Course # 04550

Prereq: "A" in Spanish III or "A" or "B" in Spanish III Honors or Department Chair approval
Level: 11, 12
Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through listening selections, reading selections and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement.

Upon the conclusion of this course or the Spanish V Honors course, students are expected to take the AP exam (see page 85 for details).

SPANISH V HONORS

Course # 04590

Prereq: "C" in AP Spanish Language or "C" in Spanish IV
Level: 12
Credit: 1

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

AMERICAN SIGN LANGUAGE

AMERICAN SIGN LANGUAGE I

Course # 08070

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language I is an introduction to American Sign Language and Deaf culture. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Fundamental skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness, deaf perspectives will also be taught.

AMERICAN SIGN LANGUAGE II

Course # 08080

Prereq: "C" or better in American Sign Language I
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language II is a continuation of American Sign Language I. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Advanced skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness and deaf perspectives will be taught along with deaf perspectives, technology related to deafness and potential career options.

Additional Academic Opportunities

Adult Opportunities: Adult Opportunities (*Course #02930*) is a Community-Based Program for students ages 18-21. The purpose of the program is to implement an innovative, adult-centered community program through a collaborative approach that prepares students for adulthood success while promoting opportunities for independence in the areas of: employment, post-secondary education and training, independent living skills, and community. The goals of the Adult Opportunities program are to: increase independence in adult living situations; improve self-determination skills; improve social and communication skills; increase leisure, recreation, and life skills; experience work-based learning and volunteer work; and prepare for community living and participation. *This District 86 course is offered at the Transition Center.*

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Last year's fee for each AP exam as established by the College Board was \$91 with an additional \$45 per exam late-testing fee. For schools participating in AP Capstone in 2014-15, the fee for AP Seminar is \$139. The College Board has not released the fee for the 2016 AP exams yet. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments.

Applied Academic Strategies: In these courses, students receive targeted instruction to improve academic strategies and executive functioning skills such as organization, time management and test preparation. In addition, students receive individual and/or small group tutorial assistance with academic assignments. *Students taking this course are enrolled in Applied Academic Strategies 9 (Course #01720), Applied Academic Strategies 10 (Course #02010), or Applied Academic Strategies 11/12 (Course #01971/#01972).*

Applied Learning Strategies: In this course, students receive targeted instruction to improve basic academic skills. Emphasis is also placed on developing executive function skills, including organization, time management, and study strategies. Students also receive individual and/or small group tutorial assistance with academic assignments and test preparation. *Students taking this course are enrolled in Course #11720.*

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): The College of DuPage awards articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (*Course #01671/#01672*) to recover lost credits from failed courses. Students should speak with their school counselor and the appropriate department chairperson, if interested. *Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab.* The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts.

Additional Academic Opportunities

Deaf and Hard Hearing Program: The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education (Course #07431/#07432) which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1 Block. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), and after school (Course #09400).*

Excel-erate Program: Excel-erate is a program for non-traditional students who need to earn credits via supported virtual instruction. This program runs 11:15 am - 4:00 pm (Periods 5 – 11) and students must have the recommendation from the Director of Counseling in order to enroll. *This is Course #09401/#09402.*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course or field of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the relevant department chairperson, the student's counselor, and the Assistant Principal for Curriculum & Instruction. Upon the approval of all of the aforementioned, final approval is contingent upon the workload of the teacher involved.

Program Success: This course provides a highly supportive academic environment with a focus on future planning and social emotional learning. The setting provides an opportunity to process interactions that have occurred and are having an impact on the student. *This is Course #01991/#01992.*

Special Education Program: The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students to assist in the attainment of the students' goals as written in the IEP.

Additional Academic Opportunities

Study Hall and “Hornet Honor” Seniors: All students enrolled in Study Hall are required to attend. The only exception is Seniors who have earned a place on the “*Hornet Honor*” list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. “*Hornet Honor*” seniors have the option of requesting a 1st period “Late Arrival” (*Course #09921/09922*) or a 10th period “Early Dismissal” (*Course #09931/#09932*) in lieu of Study Hall during the course request process. Only “Hornet Honor” seniors who have “Late Arrival” or “Early Dismissal” on their official schedules have earned this privilege of late arrival/early dismissal. “Hornet Honor” seniors who have “Late Arrival” are expected to arrive on time to their 2nd period class and those enrolled in “Early Dismissal” are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for “*Hornet Honor*” seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with “Study Hall” on their official schedule regardless of what period the study hall is or what year the child is in school.

Therapeutic Program: The new District 86 therapeutic program is for students whose behavioral and emotional needs impede and/or significantly disrupts the learning environment for other students despite learning environment supports attempted. The goal is to provide students with developmentally appropriate Pro-Social Independence. The program is designed to assess the level of pro-social independence of each student and to devise strategies, interventions and experiences that help the student build their capacity to become increasingly independent and successful in a school setting. Students will engage in academic course work in order to meet District 86 requirements toward graduation. These supports are provided to students a small class setting in order to ensure that their academic and social goals are being met.

HINSDALE SOUTH HIGH SCHOOL FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. This plan will be retained by your counselor and used for future academic planning.
6. Indicates flexibility in academic scheduling.

Hinsdale South High School

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2016-2017 school year. This *Program of Studies Handbook* is derived from the District 86 course catalog to provide you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to maximize their academic potential.

Please take the time to carefully review the *Program of Studies Handbook*. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Counseling Department at (630) 468-4251.

Sincerely,

Stephanie Palmer

General Information

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. *In order to earn a diploma, students must comply with all state mandated requirements for standardized testing.* All students must complete state-mandated CPR and AED training through their physical education class.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. English I and English II fulfill this requirement as do Applied English and Foundations English.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three years of Mathematics must be an Algebra course (Algebra 1, Part 1 AND Algebra 1, Part 2, Algebra 1 Block, Algebra 1, Applied Math, or Foundations Math) and one course must include Geometry content (Geometric Analysis, Geometry, Applied Math or Foundations Math) . Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test -Beginning with the Class of 2020, students must also take and pass either American Politics or AP Government to meet the state-mandated Civics graduation requirement.</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>AP Economics: Micro AP Economics: Macro Economics Exploring Family and Consumer Sciences Foundations Consumer Education Introduction to Business Money Management</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0

General Information

Hinsdale South Special Education Program Overview

The Special Education Department provides a full continuum of services and supports designed to meet the Individual Education Program (IEP) needs of students. Students in need of special education services can receive instruction and programming through one or more of the following approaches:

- academic accommodations within the general education classrooms,
- structured assistance within the general education classrooms through co-taught supports,
- structured assistance outside the general education classrooms through consultation services,
- related services, and
- direct instruction in specialized course offerings through a Foundations or Applied philosophical approach:
 - Foundations* courses provide students with an opportunity to focus on functional life skills curriculum within the context of each content area.
 - Applied* courses focus on specific content area concepts and skills with an additional emphasis on practical application.

All of the courses below meet the graduation requirements for either core academic or elective credit.

Department	Foundations Approach	Applied Approach
Business	Foundations Consumer Education	Prevocational Job Training Cooperative Work Training Applied Digital Communication
English	Foundations English	Applied English Dynamics Applied Reading Fundamentals Applied English 4
FACS	Foundations Foods	Applied Social Communication

Science	Foundations Science	Applied Earth Science Applied Biology
Social Studies	Foundations Social Studies	
Course descriptions for these courses can be found in the Additional Academic Opportunities section of the Program of Studies.		Applied Learning Strategies Applied Academic Strategies 9, 10, 11/12 Program Success Therapeutic Program Adult Opportunities

General Information

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality of the student's academic record
- Performance on college admission tests –ACT and/or SAT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	<p>Four (4) Credits</p> <p>Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.</p>
Mathematics	<p>Three (3) Credits</p> <p>Traditional preparation for college mathematics is a year each of Algebra I, Geometry, and Advanced Algebra, with a fourth year of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.</p>
Science	<p>Three (3) Credits of a laboratory science</p> <p>Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.</p>
Social Studies	<p>Three (3) Credits (emphasizing history and government)</p> <p>One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.</p>
Other	<p>Two (2) Credits in world languages, music, or art.</p> <p>If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.</p>

In most cases, students pursuing admission to a four year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

General Information

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "F" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: Students wishing to initiate a level change within the same department must complete the schedule change request form and obtain all required signatures (parent/guardian, department chair, counselor).

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to e-learning, correspondence, distance/blended learning, TCD (see page 70), or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (American School, Illinois Virtual School, etc.) will not appear on the District 86 transcript unless there has been prior written approval by the Director of Counseling. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school. Per Board Policy 6:320, students can earn World Language proficiency credit for their 8th grade language class and/or their enrollment in a state-approved ethnic school program or American Sign Language program.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher. Excessive absences may result in removal from class and/or a loss of credit.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends
- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

General Information

- computer input error
- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Counseling recommendation
- successful completion of a summer school class

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation with clearly written rationale must be submitted by the family to the Director of Counseling for consideration.

Dean's List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student's grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F	1.0	1.0
I	1.0	1.0

Dean's List and Honor Roll designation will be determined by the following criteria:

Dean's List: 4.5 Weighted GPA with no grade in any course below a "C"

Honor Roll: 4.0 Weighted GPA with no grade in any course below a "D"

Dean's List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean's Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Junior High/Middle School Students: Junior high schools that feed into D86 unable to offer advanced coursework for their students may send their students to D86 for those courses. In these cases, all courses, grades and credit earned will appear on the transcript and will be calculated into the grade-point average earned in subsequent years at a high school in District 86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day.

Physical Education Exemptions: Per Board Policy 6:310, students may submit a written request to be excused from physical education courses for the following reasons: (1) For students in grades 11-12, ongoing participation in an interscholastic athletic program as recognized by IHSA, (2) For students in grades 11-12, to enroll in academic classes which are required for graduation from high school, provided that failure to take such classes will result in the pupil being unable to graduate, or (3) For all students, ongoing participation in a Marching Band program for credit. In addition, students in grades 11-12 may also qualify for a Physical Education exemption in order to enroll in an academic class or classes required for admission to the college(s) or university(ies) which said student intends to apply as long as documented substantiation of the prerequisite secondary courses required for admittance to the post-

General Information

secondary institution is provided. Policy 6:310 also contains provisions for students with IEPs to qualify for PE exemptions based on an IEP team decision or participation in adaptive athletic programs outside the school setting.

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student's previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. Pursuant to Hinsdale Township High School District 86 Board of Education Policy 7:50 and 7:60, every family must provide acceptable evidence of residency. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be presented to verify residency. Contact the registrar for more information on adequate proof of residency. A student's grade-point average previously earned at a high school other than a high school in District 86 will be re-calculated based on the grade-point average processes currently used in District 86. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript exactly as they are titled on the sending school's transcript and will be indicated as transfer coursework. If the previous school assigned numerical grades, we will use their key to assign letter grades on the District 86 transcript. If no key is available, these courses will be recorded as "Pass" or "Fail". Transfer courses from schools outside of the United States may receive credit, but grades will be reflected as "Pass" or "Fail". A record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but *the preferred date of completion for the freshman physical is July 1*. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

R-Rated Films Used in Instruction: If R-rated movies or clips from R-rated movies will be used in instruction in any course; a list of those movies will be made available at the time of registration through each department and online. Written permission must be obtained by a parent at the beginning of any course showing R-rated movies or clips from R-rated movies to allow students to view in whole or in part the R-rated movies associated with the class.

Seal of Biliteracy: Students who demonstrate proficiency in both English and another language may qualify to earn a Seal of Biliteracy on their transcripts. Students should ask their counselor for more information regarding how to earn this distinction.

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the "Adding/Dropping Courses" procedure outlined on Page 8.

Art Department

Department Chairperson
Mr. Patrick Maag

Left to right
Larry James Jr.
Laura Packeviciute
Brenda Hu & Allison Jue
Logan Obermeyer

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, digital images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Supply fees are required for participation in all studio courses.**

					
 <p>Beginner Level Courses: All Beginner courses are .5 credits and are open to all grades and require no previous knowledge or pre-requisite. These courses introduce students to materials and processes.</p> <p>Intermediate Level Courses: All Intermediate courses are .5 credits and are open to all grades and require the prerequisite above it on the chart. These courses further build on the processes and practices using materials learned in the intro class.</p> <p>Advanced Level Courses: All Advanced courses are .5 credits and can be repeated. Art Department

ANIMATION & CARTOONING

Course #05591

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

No experience required - This is an enjoyable course that introduces the student to the art and history of cartooning and animation. Students learn caricature cartooning as well as developing their own cartoon character and comic strips. Techniques of animation are taught and enable students to produce their own animated film shorts. Students will also have hands-on experience using a color video animation system and Toon-Boom software.

VISUAL ART IN OUR WORLD

Course #05011

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee:

No experience required - This is an enjoyable beginning level art class at Hinsdale South. You can be successful even if you have always said, "I cannot draw!" Students will explore what types of art and artists are currently trending and contemporary in the world around us. Gaining an understanding of visual art that surrounds us is as important as the music you listen to or the books you read. Expand your knowledge and have fun trying your hand at some basic art techniques that are used in today's art. Students will get to explore materials including paint markers, spray paint, collage, camera phones, internet images, drawing tablets and various other studio art supplies. Field trips to contemporary art museums in Chicago will also occur.

DRAWING & PAINTING 1

Course #05031

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the beginner studio art class at Hinsdale South. Students will be introduced to a variety of drawing materials such as drawing and colored pencils, charcoals, pastels, markers, pens and other mixed medias. Students will also be introduced to watercolor and acrylic paints as well as painting on paper and canvas boards. Students will learn how to use materials and create 5-7 projects over the semester-long course. Color theory, composition and the elements of art will be the focus of the work in this class.

DRAWING & PAINTING 2

Course #05041

Prereq: Drawing & Painting 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the intermediate studio art class at Hinsdale South. Students who enjoyed Drawing & Painting 1 will further build on the processes learned and materials used in the introductory class. In this class, students will continue to work with the same drawing and painting materials with the addition of more complex project assignments. Students will also be allowed to work with more personal choices for the subjects of their artwork.

DRAWING & PAINTING 3

Course #05051

DRAWING & PAINTING 3

w/Honors Option

Course #05052

Prereq: Drawing & Painting 2
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the advanced studio art class at Hinsdale South. Students must complete Drawing & Painting 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen medias. The work produced in this course will now either be all drawing or all painting and may be used as part of the Advanced Placement portfolio.

** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. *(Course may be repeated)*

Art Department

AP STUDIO ART (2D)

Course #05200

Prereq: Drawing & Painting 3 or Digital Imaging & Design 3

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement studio art class at Hinsdale South. Students must complete Drawing & Painting 3 or Drawing & Painting 3 Honors in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 85 for details).

DIGITAL IMAGING & DESIGN 1

Course #05071

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the beginner computer art class at Hinsdale South. Students will be introduced to two Adobe Design programs including Photoshop and Illustrator. Artistic and creative problem solving strategies are developed where students will use personal photos and images to create original works of art. Various practice exercises will aid the students in creating 4-6 major projects in this class. Color theory, composition and the elements and principles of design will be the focus of study.

DIGITAL IMAGING & DESIGN 2

Course #05072

Prereq: Digital Imaging & Design 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the intermediate computer art class at Hinsdale South. Students who enjoyed Digital Imaging 1 will further explore the artistic potential of the computer and creative problem solving strategies used in the introductory class. The first part of this course will continue to explore digital art options while the second part of the course will explore graphic design opportunities. Digital artists and designers will use Wacom Drawing Tablets to aide in their art making as well.

DIGITAL IMAGING & DESIGN 3

Course #05081

DIGITAL IMAGING & DESIGN 3

w/Honors Option

Course #05082

Prereq: Digital Imaging & Design 2

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the advanced computer art class at Hinsdale South. Students must complete Digital Imaging 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen ideas. The work produced in this course may be used as part of the Advanced Placement portfolio.** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. *(Course may be repeated)*

INTRO TO 3D ART

Course #05091

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

Intro to 3D Art is designed to introduce students to a wide assortment of media in a hands-on approach to creating three dimensional art. Students will learn basics construction techniques for working in clay, glass, wire and mixed media. Students will also design and create beaded and glass fused jewelry. Emphasis is on creativity, design, vocabulary and having fun. This is a pre-requisite class for taking Glass Workshop, Jewelry and Ceramics.

CERAMICS

Course #05302

Prereq: 3D Art 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$25

Ceramics further explores the challenges of hand building in clay as students learn to make lids and attach handles, feet and spouts to functional projects. They will also learn the art of sgraffito for surface decoration, expand their ceramic vocabulary and continue to utilize the elements of art and principles of design as they design and create more advanced work. *(Course may be repeated)*

Art Department

JEWELRY

Course #05331

Prereq: 3D Art 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$55

Jewelry further explores the process of beading and wire wrapping techniques used to create more unique pieces of beaded jewelry. Fine motor skills, good vision and patience are needed as students design and create more unique beaded pieces of jewelry, chainmail, knotted necklaces, crochet wire beaded necklaces, and macramé. Vocabulary and tool/bead identification will be tested. *(Course may be repeated)*

GLASS WORKSHOP

Course #05561

Prereq: 3D Art 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

Glass Workshop will expand on the processes used in fusing, slumping and working with a blow torch as students explore the processes of screen printing, digital photograph, etching, copper inlay, bead making and creating glass mosaics. Patience, attention to detail and thoughtful planning are required as students turn in detailed design sketches for each project and assist with daily clean up. *(Course may be repeated)*

PHOTOGRAPHY 1

Course #05001

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the beginning photo class at Hinsdale South. Change the way you look at the world. Use traditional film cameras and digital cameras to understand how to communicate your ideas visually. Students will also develop and print black and white film in an actual darkroom. Composition, class evaluation and assessments help students to develop a strong photographic portfolio. *Students are required to have their own SLR camera that uses 35mm film. Students will pay a lab fee for film, negative photo paper and photographic developing supplies.*

PHOTOGRAPHY 2

Course # 05012

Prereq: Photography 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the intermediate photography class at Hinsdale South. Students who loved photo 1 will enjoy capturing more photographic images in photo 2. Students can experiment with traditional and digital photographic techniques. Do you want a career in photojournalism, advertising photography, portrait photography or fine art photography? Create, communicate and evaluate your images as you develop your photographic portfolio and blog online. *Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.*

PHOTOGRAPHY 3

Course # 05422

PHOTOGRAPHY 3 w/ Honors

Course # 05021

Prereq: Photography 2
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the advanced photography class at Hinsdale South. Students must complete Photo 2 to have a complete understanding of what is required in this class. Expand your knowledge and skills to create artistic photographs with your own personal style. An individual course of study will be arranged between student and teacher at the beginning of the semester. Students will organize their images into a photographic portfolio that will be submitted for portfolio competition.

** Honors students will be required to take an outside workshop or equivalent event. Honors students will submit a portfolio to the Scholastic Art competition. Honors students complete a written and picture BLOG as a journaling record of their theme. Honors students will increase rigor by participating in school spirit activities as photojournalism photographers. *Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.*

Art Department

ADVANCED PLACEMENT

ART HISTORY

Course #05580

Prereq: none

Level: 10,11,12

Credit: 1.0

This course provides a survey of the history of western and non-western art from pre-historic times to the present and teaches methods of interpreting and analyzing works of art. Students with good writing skills and an interest in art and its place in our world can do well in the course. Hands on projects, focusing on process rather than product, cooperative group assignments and Internet searches are correlated with the period under study. Field trips to Chicago area museums and important architectural structures enhance classroom learning and help familiarize the students with the cultural offerings of the city.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

AP STUDIO ART (3D)

Course #05400

Prereq: 3D Art 1 and Ceramics, Glass Workshop or Jewelry (2 of the 3)

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement 3D art class at Hinsdale South. Students must complete 3D Art 1 and two of the three other 3D art classes (Ceramics, Jewelry and Glass Workshop) in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 8 thematic artworks called Concentrations in addition to 8 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 85 for details).

AP STUDIO ART (Photography)

Course #05300

Prereq: Photography 3

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement photography class at Hinsdale South. Students must complete Photo 3 in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 85 for details).

Business Department

Department Chairperson Mr. Matthew Swedko

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

ESSENTIAL TECHNOLOGIES

Course # 06121

Prereq: None
Level: 9, 10, 11, 12
Credit: 0.5

Essential Technologies is designed for the student who wants to acquire skills necessary to enhance the value of the computer for academic and personal use. This course will focus on developing 21st Century technology skills by incorporating study in keyboarding, Internet research, and computer literacy. Through the use of Microsoft Office and other online tools, we will focus on building a student's essential technology skills that will be needed at Hinsdale HSD 86. *Students who desire improvement in keyboarding, computer usage, and basic software application skills will benefit from this course and be better prepared for all high school classes.*

FINANCIAL APPLICATIONS

Course # 06162

Prereq: None
Level: 9, 10, 11, 12
Credit: 0.5

Financial Applications will help students gain an understanding of how to use technology to help them manage financial resources that are essential for success in college, a career, and personal finance. With a focus on financial spreadsheets and reports, students will learn business and personal financial management using various financial software/resources. *Students interested in the areas of Finance, Marketing, Management and Economics should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Management/Entrepreneurial Studies, Marketing, Business Work Experience, and Internship.*

MULTIMEDIA INNOVATIONS

Course # 06182

Prereq: None
Level: 9, 10, 11, 12
Credit: 0.5

Students will develop a broad perspective of the design, communication theory, processes and tools, applications and occupational opportunities in multimedia design. Editing, animating, and digital-publishing will be emphasized. Using various software programs and online resources, students will design and create audio and visual projects/presentations. *Students interested in Entrepreneurship, Management, and Marketing, should take this course.*

APPLIED DIGITAL COMMUNICATION

Course # 01731

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: .5

This course is individualized to meet varying ability levels and needs in developing and improving computer skills for both career and personal use. Each student will learn and develop correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

Business Department

APPLIED BUSINESS

MONEY MANAGEMENT

Course # 06111

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Money Management will integrate economic concepts with the student's important role in the economy as a citizen, consumer, and worker. Topics include: money management, buying goods and services, banking (savings and checking), investments, the efficient use of credit and loans, consumer protection, insurance, housing, and our tax system.

This course fulfills the state mandate for Consumer Education.

FOUNDATIONS

CONSUMER EDUCATION

Course #11790

Prereq: Department chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

Students enrolled in this course focus on the concepts of budgeting, money management, self-advocacy, roles of consumers, communication, socialization, functional life skills, recreation/leisure skills, and applying those concepts to real world opportunities through weekly community experiences.

INTRODUCTION TO BUSINESS

Course # 06100

Prereq: None

Level: 9, 10

Credit: 1.0

Course # 06100: This course gives students a background in the basic operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities. This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

INTRODUCTION TO BUSINESS w/Honors Option

Course #06300

Prereq: Instructor approval

Level: 9, 10

Credit: 1.0

Course # 06300 w/Honors Option: Introduction to Business Honors option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business. This course gives students a background in the operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, consumerism, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities that have more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

BUSINESS LAW I

Course # 06231

Prereq: None

Level: 11, 12

Credit: 0.5

Course #06231: Students will gain an appreciation of our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: our legal system (courts, criminal and civil law) contracts, personal, and consumer law. A field trip to a local court and participation in mock trials as lawyers, witnesses, and/or jurors help students gain an understanding and an appreciation of how the American legal system functions.

Business Department

BUSINESS LAW I w/Honors Option

Course #06221

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06221 w/Honors Option: Business Law I w/Honors Option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Students electing the honors option will be required to complete a more rigorous and in depth curriculum for each unit. Students electing the honors credit option will work with the same topical material as the Business Law class. However the topics will be looked at on a different level by all honors students. All unit materials in this course will have the following emphasis: (1) Writing intensive, (2) Research based, (3) Higher complexity of analysis and reasoning, and (4) Professional level presentation of work.

BUSINESS LAW II Course # 06242

Prereq: Business Law I
Level: 11, 12
Credit: 0.5

Course # 06242: Students will investigate our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Students will also participate in The National On-line Youth Summit sponsored by the American Bar Association.

BUSINESS LAW II w/Honors Option

Course #06252

Prereq: Business Law I
w/Honors Option and
instructor approval
Level: 11, 12
Credit: 0.5

Course #06252 w/Honors Option: This course is an extension of Business Law I Honors Option and is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Topics covered include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Projects and assessments for this option will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time spent out of class.

MANAGEMENT, MARKETING & FINANCE

ACCOUNTING

Course # 06320

Prereq: None
Level: 11, 12
Credit: 1.0

This course covers the principles and procedures of accounting. Both manual and computerized double-entry systems are taught. Practice sets and exercises are used during supervised laboratory sessions to develop skills in practical applications. Through the use of microcomputers, students also gain familiarity with computerized accounting procedures. The objectives of this course include preparing students for initial accounting jobs in business and providing a technical background for college-bound students who plan to enter certain fields of business. All assignments are created using spreadsheet software

ACCOUNTING HONORS

Course # 06350

Prereq: Department
Chairperson approval
Level; 11, 12
Credit: 1.0

In this course, students develop an understanding of double-entry accounting. Topics covered include the following: accounting cycle, banking activities, special journals, payroll, accounting systems and design, internal controls, financial statement analysis, and deferrals and accruals. Students also utilize computer software for problem solving and learn spreadsheet applications. All assignments are created using spreadsheet software.

Business Department

INVESTMENT PLANNING

Course # 06331

Prereq: None
Level: 10, 11, 12
Credit: 0.5

In this course students will study basic investment principles involving stocks, commodities, bonds, and mutual funds. Students will also learn about tax information, effects of the economy on the market, government regulations of securities and on-line investing. Current issues as they relate to investing will be discussed. Teams will be formed to participate in the Stock Market Game by trading on-line.

ENTREPRENEURIAL STUDIES

Course # 06421

Prereq: None
Level: 11, 12
Credit: 0.5

Course # 06421: Entrepreneurial Studies is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. This course is an introduction to current practices in the world of business. Units of instruction include economic trends, entrepreneurship, business organization, human relations, ethics, management, marketing, finance, and international business.

ENTREPRENEURIAL STUDIES w/Honors Option

Course # 06431

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06431 w/Honors Option: Entrepreneurial Studies w/honors option is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. Students will prepare themselves for the challenges of the business world and becoming an entrepreneur/manager by relating current practices in the world of business to: economic trends, business organization, human relations, ethics, management, marketing, finance, and international business.

MARKETING

Course # 06470/#06480

Prereq: None
Credit: 1.0
Supply fee: \$25

Marketing is designed to prepare students for the challenges and opportunities in the field of marketing. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

Course # 06470: Students not enrolled in Business Work Experiences (Course #06490) should select Course #06470. Marketing 06470 is beneficial for those planning to enroll in related business/marketing programs in college.

Course # 06480: Students enrolling in Business Work Experiences (Course #06490) need to be concurrently enrolled in Marketing #06480. This course is designed for students working part-time in related jobs and also for students planning to enroll in related programs in college.

MARKETING w/Honors Option

Course # 06460

Prereq: Instructor approval
Level: 11, 12
Credit: 1.0
Supply fee: \$25

Course # 06460 w/Honors Option: The Honors Option is designed for students with above-average grades, managerial/organizational and intellectual abilities, who plan to major in business/marketing in college. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing. ***In addition, all Marketing students participate in the activities of BPA, an organization for business students.***

Business Department

EMPLOYMENT EXPERIENCE

BUSINESS WORK EXPERIENCES

Course # 06490

Prereq: *Marketing or concurrent enrollment in Marketing and coordinator approval*

Level: 11, 12

Credit: 1.0

Business Work Experiences provides the student with actual paid business experience related to their career goals. Students are employed in local businesses from a minimum of 15 hours to a maximum of 25 hours per week for which they receive monetary compensation. A wide variety of experience is available in fields such as apparel and accessories, automotive, food distribution, food service, hotel and tourism, general merchandise retailing, and various office related careers, including banking, accounting, and administrative assistant positions. This work experience program prepares students for further study or a career in marketing, retailing, management, finance, accounting, or administrative office positions. Students are selected by application and interview with emphasis on factors including reliability, integrity, and career goal. ***It is the student's responsibility to make travel arrangements to and from the job. Students must maintain enrollment and earn a passing grade in Marketing to receive credit for this work experience program.***

INTERNSHIP

Course # 06461

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 per semester (this class may be repeated for up to 1 credit)

Internship is an elective semester program for the highly motivated junior or senior. The program provides students with opportunities in the local community for hands-on career exploration in their chosen field. Acceptance into the program is determined by factors such as faculty letters of recommendation, availability of a community sponsor, and interviews with the coordinator and the community sponsor. Students are required to keep a journal of their experiences and complete a summary report. During the internship, students observe daily operations, confer with other personnel, and participate and contribute to the functions of the organization for at least 50% of the hours spent in the internship experience. Student performance in the Internship program is evaluated on a pass-fail basis. ***The internship is conducted exclusively outside of the school day with no pay for a minimum of 50 hours during the semester. Students must make the travel arrangements necessary to fulfill their internship responsibilities.***

INTERNSHIP w/Honors Option

Course # 06441

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 (this class may be repeated for up to 1 credit)

Course #06441 w/honors option: The core material for this course is similar to Course #06461; however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time. This course is highly recommended for motivated students giving serious consideration to a specific career.

Business Department

PREVOCATIONAL JOB TRAINING

Course #01850

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

The goal of this course is to provide students with an opportunity to learn theory and engage in practical hands on experience. Students will develop job responsibility, initiative, and positive employer-employee relationships. Emphasis will be placed on hands-on in school job training and entry level workplace skill development which may include: following a schedule, time management, efficiency, responsibility, work etiquette, following directions and communicating with coworkers and supervisors. Students may have the opportunity to participate in an off-campus volunteer experience based on student evaluations, opportunity availability and scheduling flexibility.

COOPERATIVE WORK TRAINING

Course #01770

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and teacher on a quarterly basis. *Pass/Fail grades are issued for this course.*

English Department

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques is used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Please see Course Description for detailed Prerequisites.

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen:	English I <u>or</u> English I Honors
Sophomores:	English II <u>or</u> English II AR <u>or</u> English II Honors
Juniors:	English III-American Literature <u>or</u> English III-American Studies <u>or</u> Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their Guidance counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

- Introduction to Theatre Arts
- Journalism: Yearbook
- Journalism: Yearbook w/ honors option
- Humanities
- AP English Literature

One semester (0.5 credit) classes

** indicates classes available to seniors only*

- World Literature: Africa
- World Literature: Asia
- African-American Literature*
- Senior Composition*
- Popular Literature*
- Science Fiction *
- Rhetoric*
- Writing Workshop*
- Advanced Acting
- Speech/Communication
- Film Studies
- Creative Writing
- Journalistic Writing
- Journalistic Writing w/honors option
- Stagecraft
- Oral Interpretation
- Discussion and Debate

Electives: Although the following courses broaden the students' experience in English, they DO NOT satisfy the required 4.0 credits in English. Instead, these classes count towards students' elective credits.

- Academic Reading
- Mass Media
- Digital Video Production

CORE CREDITS

ENGLISH I

Course # 01110

Prereq: None

Level: 9

Credit: 1.0

English I teaches essential written language and communication skills in a program that integrates literary analysis, information literacy, listening skills, problem-solving strategies, teamwork, and multimedia presentations. Students will explore fiction and non-fiction works including short stories, novels, poetry, drama, mythology, and biographies. Information literacy units are taught in conjunction with certified library media specialists and incorporate research skills such as source identification, development of search strategies, attribution, and evaluation of information. The course allows students to express their understanding of important concepts and mastery of skills through discussions, projects, compositions, creative writing, and presentations. ***This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.***

ENGLISH I HONORS

Course # 01120

Prereq: Dept. Chairperson Approval

Level: 9

Credit: 1.0

This course, for the superior academic student, not only incorporates the materials and skills of English I, but also is designed to provide an enriched study of literary forms and purposes, a great variety of student written expression, and more formal oral communication activities. The student will be introduced to the development of literature from its beginnings in the oral tradition to the standard modern literary genres – short story, novel, drama, biography, and poetry. Written assignments stress expository writing, especially mastery of the multi-paragraph essay. More sophisticated grammatical concepts are presented to improve the student's style of expression. Students perform a variety of speech assignments. A vocabulary text is also included. ***This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.***

ENGLISH II

Course # 01210

Prereq: Pass both semesters of English I

Level: 10

Credit: 1.0

A variety of literary works, composition assignments and speaking & listening activities are presented. Within thematic units, various complex texts will be studied and analyzed. Reading comprehension strategies will focus on thoughtful interaction with texts; composition assignments will cover the clear communication of ideas through the multi-paragraph organizational format, although some creative writing may also be expected. Research strategies focused on the access and purposeful use of information are taught and assessed in conjunction with certified library media specialists. Finally speaking and listening activities will stress the importance of collaboration, appropriate modes and mediums and effective communication strategies. ***This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.***

ENGLISH II (AR)

Course # 01200A

Prereq: Pass both semesters of English I & Dept. Chair Approval

Level: 10

Credit: 1.0

Along with following the curriculum of English II, this course also focuses on additional strategies to improve students' academic reading (AR) abilities. Placement in this class is dependent on students' test scores, achievement in English I, and teacher recommendations. ***This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.***

English Department

ENGLISH II HONORS

Course # 01220

Prereq: English I Honors
and/or Dept. Chairperson
approval

Level: 10

Credit: 1.0

This course, for the superior academic sophomore student, is a general survey approach to English literature in which major English authors and their representative works are studied. Authors' themes as well as specific literary types are studied: poetry, drama (especially Shakespeare), short story, and novel. Composition skill development is divided between exposition (critical analysis and personal essays) and creative writing. A research paper is also required, a unit taught in conjunction with certified library media specialists. Vocabulary will be studied in the context of the literature. ***This course fulfills one of two "Intensive Writing" requirement credits. There is required reading during the summer before beginning this course.***

ENGLISH III – AMERICAN LITERATURE

Course # 01330

Prereq: Pass both semesters
of English II

Level: 11

Credit: 1.0

English III builds on the skills acquired in English I and English II. The course focuses on American Literature and emphasizes outstanding American authors from early to modern times in the genres of fiction, non-fiction, drama, and poetry. In addition, there is a challenging emphasis on grammar, vocabulary, and study skills development. Written work consists of the expository essay and the completion of a college level research paper.

There is required reading during the summer before beginning this course.

AMERICAN STUDIES

Course # 01360

Prereq: Pass both semesters
of English II

Level: 11

Credit: 2.0 one for junior level
English; one for U.S. History

This interdisciplinary class is offered for a wide range of junior students who are academically motivated, self-directed, or college bound. The course will take an intensive survey approach to American literature and American history, emphasizing the advantage of seeing the "sense of connectedness" between the history of each era and its relationship to and influence on the art, music, and literature produced during that period. Challenging literary and historical analysis will be pursued throughout the course in lectures, discussions, and writing assignments. In addition, there will be emphasis on vocabulary, study skills, and the development of research expertise. Writing assignments will include the development of literary analysis, expository essays, some creative writing, and independent study towards the research paper. Special projects coordinated between the two disciplines will include the research paper and enrichment field experiences. Reflective of their overall effort and ability to excel in this interdisciplinary environment, students earn a single grade for this two-part course.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LANGUAGE & COMPOSITION

Course # 01320

Prereq: English II Honors
and/or Dept. Chairperson
approval

Level: 11

Credit: 1.0

The AP English Language and Composition course "engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing" (College Board). Major American authors and their representative works will be studied as students comprehend, analyze, and evaluate American literature that encompasses various time periods and literary movements with a focus on rhetorical analysis. Students will develop stylistic maturity in their prose by enhancing their ability to use writing conventions both appropriately and with sophistication focusing on expository, analytical and argumentative writing. ***There is required reading during the summer before beginning this course.***

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

English Department

APPLIED ENGLISH DYNAMICS

Course #01670

Prereq: Department chairperson placement
Level: 9, 10, 11
Credit: 1.0

This course is for students who are reading and writing below grade level. Curriculum is delivered both through scientifically research-based computer programming and teacher facilitated instruction which emphasize basic reading skills, reading comprehension strategies, fluency, vocabulary and writing. In addition, students will participate in various projects that explicitly teach research skills as well as various modes of presentation. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two "Intensive Writing" requirement credits.

APPLIED READING FUNDAMENTALS

Course #01715

Prereq: Department chairperson placement
Level: 9
Credit: 1.0

This course is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary. In addition, students are explicitly taught various reading strategies using fiction and non-fiction texts. It is designed as a "blocked" class with Applied English Dynamics for freshmen students that demonstrate a need for direct instruction in reading strategies because their reading skills are below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED ENGLISH 4

Course #01820

Prereq: Department chairperson placement
Level: 12
Credit: 1.0

The focus is on development and application of skills needed for success in the work place and community. Skill areas include comprehension of informational texts and ability to communicate in the areas of listening, speaking and writing. This course is for students who are reading and writing below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

FOUNDATIONS ENGLISH

Course #11750

Prereq: Department chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental elements of reading, writing, listening and speaking skills that can be generalized in various facets of daily life. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two "Intensive Writing" requirement credits.

OPTIONS FOR FOURTH CREDIT

ADVANCED ACTING

Course # 01601

Prereq: Introduction to Theatre Arts or Dept. Chairperson approval
Level: 10, 11, 12
Credit: 0.5

Advanced Acting is a performance-oriented course that gives the student concentrated training in developing various acting styles and performance techniques. In addition, students advance their study of the art of characterization through the development of bodily movement and vocal expression. Students are individually graded on their progress in learning and applying skills through class performance as they relate to the various dramatic forms. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

English Department

SPEECH/COMMUNICATION

Course # 01631

Prereq: Pass both semesters of English I

Level: 10, 11, 12

Credit: 0.5

This class is designed to give the student background and experience in the study of public speaking and performance. It provides opportunities for the student to learn organizational speech and writing and research skills, write scripts and speeches, prepare cuttings from the works of noted authors, and evaluate his performance and the performances of others. Students will analyze the work of professional and gifted performers in all areas of communication and performance. Students will also receive instruction and practical experience in a variety of speech forms: oratory, extemporaneous speaking, oral interpretation of literature (both prose and poetry), humorous and dramatic interpretation (individual, duet, and group), and radio and television broadcasting.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LITERATURE & COMPOSITION

Course # 01480

Prereq: AP English Language & Composition and/or Dept. Chairperson approval

Level: 12

Credit: 1.0

AP English Literature & Composition, "Great Books," focuses on selected major works of Western Civilization in the field of literature, philosophy, political theory, history, theology, and psychology. Required readings in all the genres of fiction include such writers as Joyce, Dante, Austen, Dostoevsky, Shakespeare, and Sophocles and a spectrum of non-fiction: letters, treatises, essays, handbooks, and dialogues by such writers as Mill, Nietzsche, Locke, Epictetus, and Plato. A summer reading list is required. Students read critically and participate actively in the great and continuing conversations on the pivotal human issues found in these classics. Student partners lead discussions according to the Great Books method. Compositions include papers on analysis, synthesis, evaluation, and hypothesis as well as delineation of each author's arguments in non-fiction. Two semester term papers are also required, analyzing, comparing, and contrasting at least three works, two of which are read outside of class. *This course prepares the student for the Advanced Placement exam in May. There is required reading during the summer before beginning this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

SENIOR COMPOSITION

Course # 01621

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This college bound course is designed for students who wish to improve their critical thinking skills and reading and writing strategies for the heavier demands of college coursework. The topics covered will be literary analysis, reading for the research paper, vocabulary development, and textbook reading strategies. Students will read self-selected novels from a college-bound list. ***There is required reading during the summer before beginning this course.***

FILM STUDIES

Course # 1451

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

Film Studies is a course designed for students who enjoy movies and wish to go beyond merely watching them and into the realm of thinking critically about how they are made. We will consider how directors use sound, lighting, camera movement, and editing in order to create meaning and enjoyment. The students will critique a wide variety of genres, both past and present, and will demonstrate their understanding through engaging class discussions, collaborative projects, and writing, both formal and informal. By the end of the semester, students will grow in their ability to interpret film (as well as written texts) and to appreciate the fascinating world of cinema. ***There is required reading during the summer before beginning this course. Although not all movies are shown in their entirety, written permission must be obtained by a parent at the beginning of this course to allow for students to view the R-rated movies associated with this class. At the time of registration, if R-rated movies are to be utilized in whole or in part, a list of these movies will be available through the English department and online.***

English Department

SCIENCE FICTION

Course # 01431

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This senior elective explores views presented by various science fiction writers. Through this survey of classic and contemporary science fiction, students will consider different attitudes regarding the future of humankind. Along with the reading of novels, students will have a variety of writing experiences including a research paper. Course evaluation will be measured through tests, quizzes, class discussions, three analysis papers, and one research paper. Texts include *Ender's Game*, *The Maze Runner*, *The House of the Scorpion*, and the anthology: *Science Fiction, Science Fact and You*.

There is required reading during the summer before beginning this course.

POPULAR LITERATURE

Course # 01461

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

Designed for college and non-college bound seniors, "Popular Literature" focuses on works of 90s and today, while emphasizing the differences of popular and classical literatures. The origin and dynamic characteristics of this genre in today's society will be analyzed through the reading of class books and literature circles. Types of reading audiences and "requirements" of a popular literature author will also be studied. Students will be required to complete written, oral and group projects in addition to the readings; class discussion will constitute a major portion of the class. Authors to be read and studied may include John Grisham, Harlan Coben, Dan Brown, James Patterson, Patricia Cornwell, Sandra Brown, Stephen King, Danielle Steel, Nicholas Sparks, Mary Higgins Clark, and Tom Clancy. Novels may include *Dark Tower*, *The Notebook*, *The Partner*, *Roses are Red*, *Tell No One*, *Hello Darkness*, *DaVinci Code*, and *Angels and Demons*.

There is required reading during the summer before beginning this course.

CREATIVE WRITING

Course # 01561

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

This elective is designed for students who are interested in exploring more creative aspects of their writing and studies of literature. Creative Writing emphasizes an understanding of traditional literary techniques combined with unconventional, individualized forms of speaking and writing to effectively communicate in an interesting way. The class incorporates a wide variety of verbal and written exercises that require a balancing of individual creativity with disciplined focus for success in the course. Time is dedicated to better understanding the creative process and helping students find inspiration to improve all aspects of their writing. In addition to improvisational exercises and participation in writing groups, students complete a portfolio project each quarter that is the culmination of daily journaling and reading assignments. Emphasis will be placed upon both recognizing the elements of style in classical and contemporary authors in selected reading passages and in developing individual style.

There is required reading during the summer before beginning this course.

RHETORIC

Course # 01531

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This elective is designed for college-bound seniors who desire experience in writing. The course develops student writing in freshman college composition classes. Much emphasis is placed upon review of grammatical principles, improvement of vocabulary, and development of an organized, individual writing style. In addition, the student is also required to apply these principles to a research unit and paper. Students use computers to complete their writing and research assignments.

There is required reading during the summer before beginning this course.

English Department

HUMANITIES

Course # 02260

Prereq: Average to above average grades. Dept. Chairperson approval.
Level: 12
Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

There is required reading during the summer before beginning this course.

INTRODUCTION TO THEATRE ARTS

Course # 01380

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Introduction to Theatre Arts is a performance-oriented drama course geared to developing the creative and dramatic talents of individual students. This course uses student acting and teacher-student evaluation as the major teaching method to help the student understand the medium of theatre. It develops sensitivity to the thoughts, beliefs, and ideas of mankind through study, in-class performance, and theatre attendance. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

AFRICAN-AMERICAN LITERATURE

Course # 01471

Prereq: Pass both semesters of English III
Level: 12
Credit: .5

This course explores the African-American experience as reflected in the literature and oral tradition of the community, from the earliest days of our nation to current writers and thinkers. The course will explore not only traditional literary genres such as fiction, poetry, drama, and essays, but also consider areas of film, music, and art as well. Students will study the wide span of the African-American experience from slave narratives to current rap music. Students will also have an opportunity to explore the history and experience of Chicago's African-American experience and literature as a specific focus as well as pursue a major research project on some area of the African-American experience such as a specific author, prominent figure, or essential artistic/cultural movement. ***Extensive reading is expected in this class.***

JOURNALISM: YEARBOOK

Course # 01400

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01400: This is a writing and production course for students interested in designing a yearbook. The classroom portion of the course emphasizes the mechanics of strong, journalistic writing, strategies for effective communication, digital photography, and graphic design. Researching and interviewing are also covered as students prepare to write stories for the school yearbook, *Vespa*. The student should have above average writing skills. Additional work outside of class is required; the outside assignments may focus on writing, photography, page-layout skills, and the business aspect of the yearbook. Students will also be part of the extra-curricular yearbook activity and must take the course to be eligible for an editor position. Journalism may be repeated for credit with consent of instructor and department chairperson. ***This course does NOT fulfill NCAA initial eligibility requirements for college.***

JOURNALISM: YEARBOOK w/honors option

Course # 01410

Prereq: "C" average and Dept. Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

Course #01410 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the book, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

English Department

JOURNALISTIC WRITING

Course # 01361

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Course #01361: This course is an intensive writing course for those interested in writing for newspapers and magazines. The course covers all types of journalistic writing, including news, features, sports, editorials, columns, and reviews. Information gathering through interviews and library research will refine reading, listening, and speaking skills. In addition, students will learn about the ethics and the history of the journalistic field. Some of the material will be written for publication in *The Stinger*, the student newspaper. This course is a prerequisite for appointment to editorial positions on *The Stinger* staff. *This class can be taken multiple times with teacher approval.*

JOURNALISTIC WRITING

w/honors option

Course # 01371

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Course #01371 w/honors option: To receive honors credit, the student must serve as an editor on the Stinger student news magazine. Editors are chosen through previous journalism experience, an application, and a formal interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle, that include being responsible for a section of the paper, attending be-weekly meetings, attending deadline week, and editing, designing and writing the Stinger. Honors students (editors) will also lead small mini-lessons on topics they have previously mastered; these opportunities will help to increase and sharpen communication and leadership skills. Honors students (editors) must also attend required events scheduled by the adviser.

WRITING WORKSHOP

Course # 01611

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for the student with average to below-average writing skills. The course will build upon writing skills learned freshman, sophomore, and junior years and focuses on using word processing as a tool for writing improvement. This course's structure uses a workshop-style format to help students develop basic writing skills such as brainstorming, effective organizational patterns, establishing a purpose, writing to an audience, vocabulary development, and sentence correctness. Some of the writing assignments include, but are not limited to, descriptive writing, personal narrative, persuasion, and analytic essays. Students will also learn to write for the workplace and will complete a job portfolio. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE:

AFRICAN LITERATURE

Course # 01571

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors and will take students on a literary tour of modern Africa. The class will focus on novels from a variety of geographic regions and historical time periods, but it will also incorporate other media such as film, food, music, and drama. Topics may include analysis of personal freedoms under imperialism as well as the historical role played by language and economics in development across the continent. *World Literature classes are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course. This class will not be offered in 2016-2017.***

WORLD LITERATURE:

LITERATURE OF ASIA &

THE MIDDLE EAST

Course # 01581

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors. It will focus on novels representing various cultural groups; however, students will study Asia and the Middle East. Topics may include the role of women in modern Iran, the Chinese Cultural Revolution, and historical opinions of nuclear warfare in Japan. *World Literature courses are not sequential; therefore, students may take either one or both. ***There is required reading during the summer before beginning this course. This class will not be offered in 2016-2017.***

English Department

ORAL INTERPRETATION

Course # 01511

Prereq: Pass both semesters of English I

Level: 9, 10,11,12

Credit: 0.5

This one-semester course blends an interest in literature with the ability to perform in front of a small group. Students first learn to analyze selections of their choice from various genres: novel, short story, poetry, and drama. Next, they must interpret and communicate the meaning and mood by the way they use the voice and body in reading aloud the selection. The semester will end with a final group performance of a piece of literature that the teacher will direct.

Oral Interpretation is offered on an alternating basis with Stagecraft and will be offered in 2016-2017 school year. It will not be offered in 2017-2018.

STAGECRAFT

Course # 01521

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.5

This one-semester course strengthens students' knowledge of technical theatre. Participation in set construction after school and with the stage crew outside of class is required. Emphasis is placed on both practical experience and academic learning. One half of the course is geared toward a student in scenic design, a variety of scenic styles, play reading, technical crew positions, lighting and sound design, and make-up and costume design. These assignments include written set designs, written reports on script readings, construction of a set model, construction of a stage manager's prompt book, and test on lighting, sound, costumes, make-up, and staging. The second half of the course involves construction of dramatic production: building flats and major set pieces, painting, shadowing, and stenciling.

Stagecraft is offered on an alternating basis with Oral Interpretation and will not be offered in 2016-2017 school year. It will be offered in 2017-2018.

DEBATE AND WRITING

Course # 01641

Prereq: Pass both semesters of English II

Level: 11,12

Credit: 0.5

Listening, leadership, courtesy, topic analysis, research, evaluation of sources and databases, articulation, and confidence—these are the lifelong skills fostered in Debate and Writing. This course helps students learn to access a range of informational sources available at the Hinsdale South library in order to build arguments about contemporary topics used in debates. Students will participate in formal and informal class discussions, a simulated town meeting, a group discussion panel, debates, current event speeches, and a role play of an individual's life after reading a biography or autobiography. Reading, writing, researching, and active participation are all major components of this course. Because multiple performances will be required during the semester, students should already have a familiarity with and a sense of confidence about public speaking. By the end of the semester, students should feel a sense of mastery at organizing, working cooperatively with others, researching, preparing for, and delivering public performances.

ELECTIVES

ACADEMIC READING

Course # A01100

Prereq: Dept. Chairperson recommendation

Level: 9

Credit: 1.0

Academic Reading is designed for ninth grade students whose standardized test scores demonstrate that they would benefit from direct instruction on reading and vocabulary strategies. Students will complete diagnostic tests in several skill areas at both the beginning and end of the school year to track their growth. The curriculum is comprised of units that address skills that “good readers” internalize including previewing, predicting, summarizing, questioning, and analysis of text structure. In addition to these lessons, students will also receive weekly vocabulary instruction. Finally, students will engage in daily sustained silent reading both inside and outside of class. Comprehension of these novels is assessed both orally and in writing through book talks, presentations, class discussions, journals, projects, more formal writing, and a variety of other authentic assessments. Academic Reading students are simultaneously enrolled in both this course and English I; both classes are taught by the same English teacher. Although both Academic Reading and English I have separate curricula, Academic Reading will include some pre-teaching and re-teaching of skills and strategies taught in English I.

MASS MEDIA

Course # 01661

Prereq: Pass both semesters of English II

Level: 11, 12

Credit: 0.5

Mass Media is offered as an introduction to the subject of media issues and contains a blend of theory and practice. Units to be studied include: television, advertising, film, newspapers, radio broadcasting, and audio and video recording. Various creative projects will be pursued as well as projects involving writing and reading. A certain amount of independent library research in the areas studied is expected. An evening film study is also required. Course activities are designed to enable students to understand and evaluate the influence of mass media on their lives.

Mass Media will not be offered in 2016-2017.

DIGITAL VIDEO PRODUCTION

Course # 01651

Prereq: Department chairperson approval

Level: 10, 11, 12

Credit: 0.5

This course is designed to immerse students in all aspects of media production. The classroom portion of the course emphasizes the composition of media, the production process, and the analysis of media and its impact on society. Throughout the course, students will plan and produce a variety of video and audio productions, some of which may be featured in our new student video publication, *The Buzz*. Topics covered in the course will include camera and lighting techniques, audio engineering, research and planning skills, interviewing standards, and teamwork. Students will also be encouraged to be a part of our extra-curricular multi-media activity, and must take this course to be eligible for a producer position for this activity. Digital Video Production may be repeated for credit if the student is a member of the multi-media activity; these “advanced students” will work together with the instructor to create a body of work, some of which will be featured in *The Buzz*. These students will also tend to business and production tasks involved in the quarterly student video production.

Family & Consumer Sciences

Department Chairperson Mr. Matthew Swedko

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses. A fee is required in most foods related courses. Students are required to purchase materials for sewing.

Family & Consumer Sciences related careers and the suggested course sequencing:

CAREER	APPLICABLE COURSES
Architect Interior Designer Construction Project Manager Historical Restoration	Architectural Design & Housing
Dietitian Chef/Baker Hotel/Restaurant Management Food Sales and Marketing	Foods & Nutrition Creative Foods Bakery and Pastry Arts Chef & Restaurant
Fashion Designer/Buyer Fashion Display/Illustrator Tailor/Alterations/Seamstress	Fashion Merchandising & Design Creative Sewing Creative Sewing II
Social Worker Teacher Preschool Teacher Child Care Worker	Child Care & Development Understanding Relationships Invitation to Teach

Course Title	Course No.	Prerequisite	Credit	Levels
Exploring Family & Consumer Sciences	06500	No	1.0	9-12
Foundations Foods	01722	Yes	0.5	9-12
Applied Social Communication	01860	Yes	.5	9-12
Foods & Nutrition	06501	No	0.5	9-12

Invitation to Teach w/honors option	06585	Yes	1.0	12
Senior Foods	06541	No	0.5	12

Family & Consumer Sciences

INTERIOR DESIGN & HOUSING

Course #06621

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$10

This class alternates with Fashion Merchandising and will not be offered during the 2016-2017 school year. It will be offered in 2017-2018.

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Interior Design & Housing is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0 (0.5 Consumer Educ., 0.5 Applied Arts)
Supply fee: \$10

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. **This course fulfills the state mandate for consumer education** and also provides one semester credit for Elective Arts. *Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.*

FOUNDATIONS FOODS

Course #01722

Prereq: Department Chairperson placement
Level: 9, 10, 11, 12
Credit: .5

This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork. *This course may be repeated as necessary.*

APPLIED SOCIAL COMMUNICATION

Course #01860

Prereq: Department Chairperson placement
Level: 9, 10, 11, 12
Credit: .5

The Social Communication class is meant for students who have an identified need in the area of pragmatic language and social interaction skills. The class focuses on explicitly teaching social and emotional vocabulary, problem solving, conversation skills, and other pertinent skills aimed at helping students communicate effectively and appropriately with others. The curriculum is based on Michelle Garcia Winner's Social Thinking approach. The long term goal for the class is to help students learn and utilize social skills so they can be successful in social relationships, classroom environments, and job settings currently and in the future. This course is a pass/fail course.

FOODS & NUTRITION

Course #06501

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students **cannot receive credit** for both Foods & Nutrition and Senior Foods. **Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts**

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is an in-depth continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pasta, breads, deserts, and main dishes. The course is designed for personal enjoyment and to ready students for further training in food service. **Suggested follow-up classes: Bakery & Pastry Arts, Chef & Restaurant.**

Family & Consumer Sciences

BAKERY AND PASTRY ARTS

Course #06511

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce pastry works of art? Baking and Pastry Arts builds on the skills learned in Foods and Nutrition/Senior Foods, emphasizing student preferences and creativity in the pastry area. Students select and prepare a variety of cookies, cakes, breads, and desserts. Activities focus on European baked products and decorating a cake. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Chef & Restaurant, Creative Foods.

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or Senior Foods AND teacher approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a "mini restaurant" incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques.

While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.

SENIOR FOODS

Course #06541

Prereq: none

Level: 12

Credit: 0.5

Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students **cannot receive credit** for both Foods and Nutrition and Senior Foods

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts.

CREATIVE SEWING

Course #06552

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student's preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design, Creative Sewing II

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities.

Suggested follow-up class: Fashion Merchandising & Design

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today's fashion industry. Activities include style analysis, clothing design, fashion trends and personal selection of fashions. Creative projects involving fashion design/sketching, visual displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

This class alternates with Interior Design and will be offered during the 2016-2017 school year. It will not be offered in 2017-2018.

Family & Consumer Sciences

CHILD CARE & DEVELOPMENT

Course #06581

Prereq: none
Level: 10, 11, 12
Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in preschool or elementary education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children's toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children.

Suggested follow-up class: Invitation to Teach or Understanding Relationships.

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none
Level: 11, 12
Credit: 0.5

This course encompasses "a slice of life" and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Care & Development

INVITATION TO TEACH

Course #06595

Prereq: Students signing up for Invitation to Teach will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible

INVITATION TO TEACH w/Honors Option

Course #06585

Prereq: Students signing up for Introduction to Teaching w/Honors Option will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #06585 w/honors option: Invitation to Teach w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects may include creating classroom teaching tools, research, tutoring, or interviews. Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible.

Mathematics Department

Department Chairperson
Mrs. Kerin Sancken

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become problem solvers, productive citizens, and lifelong learners. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

GRAPHING CALCULATORS ARE REQUIRED FOR ALL MATH AND SCIENCE COURSES.

**Suggested calculators: Texas Instruments TI 83, TI 83+, TI 84, TI 84+
Casio 9750, Casio 9860, Casio Prizm**

THE FOLLOWING ARE NOT ALLOWED: TI-Inspire CAS or TI-89.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I or Algebra II in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Please see Course Description for detailed Prerequisites.

Mathematics Department

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content.

Colleges require at least Algebra, Geometry and Algebra II/Trig for admission and may also require a 4th year Math course.

** This course requires Department Chair approval for registration

Mathematics Department

FOUNDATIONS MATH

Course #11760

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental math concepts that can be generalized in various facets of daily life. Curriculum includes problem solving and computations, money and number sense, and basic estimation and measurement. Basic analytical methods, geometry and data analysis are also emphasized. *This course can be taken multiple times with department chair approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. This course fulfills the Algebra I and Geometry content requirements.*

APPLIED MATH

Course #01700

Prereq: Department
Chairperson placement
Level: 9, 10, 11, 12
Credit: 1.0

This course is designed for students performing significantly below grade level in math. A variety of practical topics are covered such as basic probability, creating and interpreting graphs, formulas, fractions, percent's, measurement, perimeter, basic geometry, consumer skills, and basic algebra. Students will be prepared to enter the Applied Consumer Math 1 course sequence or an Algebra 1 course within the mathematics department. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. This course fulfills the Algebra I and Geometry content requirements.*

APPLIED CONSUMER MATH 1

Course #01740

Prereq: Department
Chairperson placement
Level: 10, 11
Credit: 1.0

Students that take this course are looking to gain knowledge and mathematical skills for everyday life. This course will guide students through tackling consumer math scenarios. It is designed for students performing significantly below grade level in math. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED CONSUMER MATH 2

Course #01750

Prereq: Department
Chairperson placement
Level: 11, 12
Credit: 1.0

This course continues the work started in the Applied Consumer Math 1. The course targets continued acquisition of basic mathematical knowledge and skills. Students will practice independently applying problem solving skills in consumer and everyday scenarios. *This course can be taken multiple times with department chair approval. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

ALGEBRA I

Course #03110

Prereq: Recommendation of 8th
grade teacher and Dept.
Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are properties of numbers, equations and inequalities, and an introduction to linear and nonlinear functions, polynomials, graphing, and introductory statistics. *A graphing calculator is required for this course. This course fulfills the Algebra I requirement.*

ALGEBRA I ALGEBRAIC REINFORCEMENT (AR)

Course #A03110

Prereq: Recommendation of
8th grade teacher, MAP scores
Level: 9, 10, 11, 12
Credit: 1.0

This course is designed to support students enrolled in Algebra 1 by providing them additional instruction, individualized practice, and support. It is for the student with skill deficiencies in mathematics as identified by the MAP test and teacher recommendation. *A graphing calculator is required for this course.*

Mathematics Department

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and MAP Test Score

Level: 9, 10, 11, 12

Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 focuses on operations with signed numbers and basic variable manipulation. Core topics include: properties of numbers, polynomial expressions, equations (one-step through multi-step), inequalities, functions, graphing, introductory statistics. Algebra I Part 1 establishes the foundational skills necessary for success in future mathematics classes. ***This course in conjunction with Algebra I Part 2 fulfills the Algebra I requirement. A graphing calculator is required for this course.***

ALGEBRA I Part 2

Course #03130

Prereq: 8th Grade teacher rec and MAP Test Score.

Level: 9, 10, 11, 12

Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 addresses linear and nonlinear functions, polynomials, systems, and graphing. ***This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement. A graphing calculator is required for this course. Most students will take this class in conjunction with Geometric Analysis.***

INTEGRATED ALGEBRA & GEOMETRY HONORS

Course # 03240

Prereq: 8th grade teacher rec, Algebra 1 or Geometry in 8th grade, Department Chairperson Approval.

Level: 9

Credit: 1.0

This honors course explores Algebra 1 and Geometry topics in greater depth than regular Algebra 1. Students who are successful in this course should be well prepared to continue in our honors and AP sequence. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I or Integrated Algebra & Geo at the High School or 8th grade teacher rec + mastery of the algebra skill sheet, Dept. Chairperson Approval.

Level: 9, 10

Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in regular Geometry (Course #03210), but with more depth. Three-dimensional and coordinate geometric proofs are included. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I AR, Identified deficiencies from Freshman MAP tests, semester exams and teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

This course is designed to follow the Algebra I. It deals with the same topics of Geometry (Course #03210) with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. This course would be very beneficial for any student pursuing post-secondary education. Placement in this course is based on identified skill deficiencies as evidenced by the Explore test, semester exams and teacher recommendation. ***A graphing calculator is required for this course. This course satisfies the Geometry content requirement.***

ALGEBRA II / TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry Honors or 8th grade teacher rec + mastery of the algebra skill sheet, Dept. Chairperson Approval.

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry (Course #03310) in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. This is a college-preparatory course. ***A graphing calculator is required for this course.***

Mathematics Department

ALGEBRA II/ TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

This course is designed for college bound students and useful for preparing for College Board tests like the SAT and ACT. It continues the study of linear and quadratic functions, graphing, polynomial, exponential, and logarithmic functions, trigonometry, statistics, and introductory probability. *A graphing calculator is required for this course.*

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and Department Chairperson Approval

Level: 11, 12

Credit: 1.0

This course is recommended for students who completed Algebra 1 AR or Algebra 1 Part 1/Algebra 1 Part 2 and Geometric Analysis. The topics studied are real and complex numbers, exponential, logarithmic, polynomial, and trigonometric functions, statistics, and introductory probability. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/

Trigonometry Honors or A in Algebra II/Trigonometry and Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Precalculus Honors treats the topics of Precalculus (Course #03400) in greater depth, with more emphasis placed on proof, abstract structure, and preciseness of thought and communication. In addition, analytic geometry of the plane, probability, and the polar coordinate system is studied. *A graphing calculator is required for this course.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II/Trigonometry or Algebra II/Trigonometry Honors or

Level: 10, 11, 12

Credit: 1.0

This course is a study of functions and applications. It extends the topics of Algebra 2/Trigonometry and adds conic sections and some finite math topics. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT CALCULUS AB

Course # 03420

Prereq: Successful completion of Precalculus or Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT CALCULUS BC

Course # 03430

Prereq: Precalculus Honors

Level: 11, 12

Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, and infinite series. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Mathematics Department

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Level: 10, 11, 12
Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

STATISTICS

Course # 03470

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
Approval.
Level: 12
Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course will prepare students to take the AP Statistics exam. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2
Trigonometry and Department
Chairperson approval
Level: 10, 11, 12
Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses. Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT COMPUTER SCIENCE PRINCIPLES

Course # 03520

Prereq: Algebra 2
Trigonometry and Department
Chairperson approval
Level: 10, 11, 12
Credit: 1.0

This course is an entry level AP course which presents concepts and computational thinking practices that are central to the computer science discipline. It provides an introduction to the rapidly expanding field of computer technology while focusing on using technology in creative, meaningful ways.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

MATH TOPICS I HONORS

Course # 03511

Prereq: Department
Chairperson approval
Level: 12
Credit: 0.5

Math Topics I is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course.

Mathematics Department

MATH TOPICS II HONORS

Course # 03512

Prereq: Department
Chairperson approval
Level: 12
Credit: 0.5

Math Topics II is a continuation of Math Topics I.

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: Advance Placement
Computer Science A
Department Chairperson
approval
Level: 11,12
Credit: 1.0

Math Topics Computer Science Honors reviews and builds upon the concepts taught in the AP Computer Science A course. The primary emphasis of the course is on data structures algorithms using the JAVA programming language. Stacks, queues, linked lists, trees, heaps, hash tables, sets, maps, and graphs are covered in great detail. Following the data structures unit, students learn a second programming language. GUIs, advanced sorting algorithms, and cell phone applications are explored. Students have the opportunity to complete an independent study project at the conclusion of the course.

Music Department

Department Chairperson Mr. Patrick Maag

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

JAZZ BAND / JAZZ ENSEMBLE

Course #05600

JAZZ BAND HONORS

Course #05630

--See Honors Requirements--

Prerequisites: Audition required and concurrent registration in a band class (exceptions made for piano, bass and guitar).

Level: 9-12

Credit: 1.0

The Jazz Ensemble is the top auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles and frequently perform. Enrolled students should have a good understanding of scale and chord theory and must be comfortable practicing improvisation. This class meets every other day during the "Early Bird" Period 0.

The Jazz Band is an auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles. The class develops an understanding of scale and chord theory and encourages improvisation. This class meets every other day during the "Early Bird" Period 0.

CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4151 to schedule an audition.*

Level: 9-12

Credit: 1.0

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. *Call 630-468-4151 to schedule an audition.*

Level: 10, 11, 12

Credit: 1.0

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC PERCUSSION ENSEMBLE

Course #05660

SYMPHONIC PERCUSSION ENSEMBLE HONORS

Course #05760

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4151 to schedule an audition.*

Level: 9, 10, 11, 12

Credit: 1.0

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

Music Department

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Finale* using Yamaha Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is offered during 2016-2017 school year)

This course is designed for the serious piano student who wants to learn how to improve piano performance, compose and perform original compositions. Students learn to use music writing programs like *Sibelius*, *Finale*, *Band in a Box* and *Cakewalk* using Yamaha synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students may enter competitions with songs they create and additional performance opportunities may be available. *Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).*

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is not offered during the 2016-2017 school year. It will be offered during the 2017-2018 school year)

This course is designed for students who are going to take the AP Music Test in May. Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are required to take the AP Music Test in May. Students will use the music theory learned to compose chorales, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using music composition software.

ORCHESTRA

CONCERT ORCHESTRA

Course #05780

CONCERT ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Audition by High School Director.

Call 630.468.4151 to schedule an audition or get director approval.

Level: 9, 10, 11, 12

Credit: 1.0

The Concert Orchestra is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700
Level: 9, 10, 11, 12
Credit: 1.0

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade females and to all other grade levels who have not participated in vocal music at school before.

BASS CHORUS

Course #05710
Level: 9, 10, 11, 12
Credit: 1.0

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade males and to all other grade levels who have not participated in vocal music at school before.

VARSITY TREBLE CHORUS

Course # 05800

VARSITY TREBLE CHORUS HONORS

Course #05850

--See Honors Requirements--
Prereq: Consent of Director
Level: 10, 11, 12
Credit: 1.0

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to females in grades 10, 11, and 12.

VARSITY BASS CHORUS

Course # 05860

VARSITY BASS CHORUS HONORS

Course #05870

--See Honors Requirements--
Prereq: Consent of Director
Level: 10, 11, 12
Credit: 1.0

Varsity Bass Chorus is the intermediate bass choir ensemble for Sophomore, Junior, and Senior male singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to males in grades 10, 11, and 12.

BELLA VOCE CHORUS

Course # 05730

BELLA VOCE HONORS

Course # 05740

--See Honors Requirements--
Prereq: Audition Required
Level: 11, 12
Credit: 1.0

Bella Voce is the top auditioned women's music ensemble for junior and senior female singers with previous musical experience. Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Prior high school choir experience and director approval. Top-level choir, open to females in grades 11, and 12.

Music Department

MADRIGALS/JAZZ CHOIR

Course # 05830

MADRIGAL/JAZZ HONORS

Course # 05840

---See Honors Requirements---

Prereq: Audition Required

Level: 11, 12

Credit: 1.0

Madrigals/Jazz Choir is a full-year course for selected 11th, and 12th grade students, which will focus on the performance of the Madrigal Show in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Madrigal students are also required to learn and perform the repertoire of the varsity choirs.

Prerequisite: Director approval. Top-level choir, open to grades 11, and 12.

Music Department

HONORS STUDY IN MUSIC

Students will have the opportunity to qualify for honors study in the following performance programs: Symphonic Band Honors (including Symphonic Percussion), Concert Orchestra Honors, Varsity Mixed Chorus, and Madrigal/Jazz Honors. Selections will be the *Illinois Music Educators Association* audition music, which can be obtained from the instructors in June of each year. Honors selection will be based on the IMEA material performed during the third week of September. ***Please read the section below for more information on requirements.***

REQUIREMENTS FOR HONORS STUDY

Advanced students in Concert Band, Symphonic Band, Symphonic Percussion Ensemble, Varsity Choirs, Bella Voce Chorus, Concert Orchestra and Madrigals/Jazz Choir may audition for the honors level of that ensemble. *These students will, as part of the requirements, remain as members of their curricular ensemble and fulfill all obligations of that ensemble.* In addition, students will be required to perform the following activities:

1. Students must audition for the ILMEA District Festival on the State Audition material. This audition will be held in October at a local high school.
2. Private lessons once a week for thirty minutes. The number of lessons per quarter will be one less than the number of weeks in the Quarter. For example, if we have ten weeks in one quarter the students must take nine lessons during that quarter. Students will be responsible for turning in the completed lesson form signed by the private teacher. The teaching staff will approve the private teachers each year.
3. Two solo performances. One will be an Honors Recital scheduled by Director, which will be open to the public. Instrumentalists will perform a major solo work with piano accompaniment. Vocalists must perform at least two songs, one in a foreign language. The recital will be a graded event. Students will be given a set of guidelines before the event, which will be used to assess the performance. Students must show the director the solo selected to check for level of difficulty and appropriateness at least four weeks before the performance.
4. In addition, by November, each student will turn in a 1000 word paper (typed, double spaced) about the selection they are performing. The research paper should cover the composer and his works, historical perspective, as well as the repertoire being performed. Students must use proper format as well as a minimum of five sources with a maximum of two Internet sites.
5. A second performance of a different solo will be in March at the Illinois High School Association State Solo and Ensemble contest for all band students, and a Vocal Solo Contest will be scheduled in the spring. The directors of the honors students will grade the solo and the performance before the contest. Then the students will perform the same solo for the state judge who will rate and make written comments and suggestions. The importance of this experience is that the student receives an outside critique of his/her playing/singing ability and can be better prepared for college auditions, which will be very similar to the this solo experience.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs. Per Board Policy 6:310, some students may qualify for an exemption from their PE course (see page 10 for details).

PHYSICAL EDUCATION ACTIVITIES

Freshman Activities

Aerobics
Badminton
Basketball
Floor Hockey
Folk/Square/Swing Dance
Gymnastics
Physical Fitness Concepts
Physical Fitness Testing
Soccer
Softball
Speed-A-Way
Swimming
Tennis
Touch Football
Track & Field
Volleyball

9^/10/11/12 (Early Bird PE) <i>Early Bird Physical Education starts prior to the regular school day and runs from 7:00 am until 7:50 am. This class allows students to enjoy the positive effects associated with exercise and the benefits it has on learning.</i> (^See page 9 for exclusions)	Course No. 07431	Course No. 07432

Physical, Health, & Driver Education

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.**

Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws. **In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.**

HEALTH EDUCATION

Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)

Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information. *With department chair approval, the Adaptive PE course (07901/#07902) can be taken for Foundations Health credit (#11701).*

ADVANCED HEALTH

Course #07511

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Any students may see the teacher should they have questions on taking the course for 'honors' credit.

Science Department

Department Chairperson
Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

Science Department

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, and reading, writing and note-taking skills.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

Science Department

CORE COURSES

FOUNDATIONS SCIENCE

Course #11770

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students will investigate key elements of physical and social wellness that can be generalized in various facets of daily life, including proper nutrition, sleep, self-care and exercise. They will explore the benefits of leisure activities and socialization. Students will also explore fundamental concepts, principles and interconnections of the life, physical and earth sciences. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This course will be not offered during the 2016-2017 school year; it will not offered during the 2017-2018 school year.

APPLIED EARTH SCIENCE

Course #01730

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: earth, moon, and solar system; stars and galaxies; weather, climate, and the earth's atmosphere; weathering and erosion and forces in the earth. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will be offered during the 2016-2017 school year and will not be offered during the 2017-2018 school year.

APPLIED BIOLOGY

Course #01830

Prereq: Dept. Chair placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: classification of living things, plants, animals, ecology, the human body and health. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will not be offered during the 2016-2017 school year; it will be offered during the 2017-2018 school year.

GEOPHYSICS

Course # 03640

Prereq: *For students recommended for Algebra 1 or lower **OR** for students recommended for "Integrated Algebra and Geometry" who have not mastered HSHS algebra skill sheet*

Level: 9 (higher with recommendation)

Credit: 1.0

This course combines Earth Science content and explores the Physics that underlie observable phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, history of the Earth, velocity, acceleration, waves, energy, forces, magnetism, and atomic structure. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. *This course is also offered in an Academic Reading (AR) format (#03610A) for students who need extra assistance in reading comprehension.*

PHYSICS HONORS

Course #03920

Prereq: *For students recommended for "Integrated Algebra and Geometry" or higher **AND** who have mastered the HSHS algebra skill sheet .*

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging. *Freshmen concurrently enrolled in Algebra II/Trig can take AP Physics 1 as their science option if desired.*

Science Department

CONCEPTS IN CHEMISTRY

Course # 03840

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered, including the nature of science, atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students who need targeted assistance in mathematics and does not serve as a prereq for AP science courses.

For the 2016-2017 school year, this course is offered in an Academic Reading (AR) format (#03850A) for students who need extra assistance in reading comprehension.

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit, successful completion of Algebra I or higher; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered and include the nature of science and chemistry, atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability (enrolled in Geometry or higher) and serves as a prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level understanding is expected, and problem-solving will be more challenging. This course is appropriate for students with above-average math abilities.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11

Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include scientific method, cellular and molecular biology, ecology, evolution, biochemistry, plants and body systems. *This course is also offered in an Academic Reading (AR) format (#03750A) for students who need extra assistance in reading.*

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level) and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12

Credit: 1.0

This math-intensive course (requires strong Algebra I skills) is for students who took GeoPhysics as freshmen but who would like to take a full physics course to better prepare them for college. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy and waves.

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Biology covers two semesters of college-level biology, and applies previous knowledge to topics as designated by the College Board curriculum, such as biochemistry, cellular biology, molecular biology, phylogeny, and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

Science Department

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry covers two semesters of college-level chemistry, and applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics and thermodynamics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Environmental Science covers one semester of college-level environmental science, and explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PHYSICS 1

Course #03910 (11,12)

Prereq: Juniors have completed Chemistry Honors and be concurrently enrolled in a Biology course; Seniors must have completed one or more Honors or AP Science courses; Teacher or Dept. Chairperson approval.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics 1 is equivalent to a first-semester college-level Algebra-based physics course. Topics include motion, work, energy, forces, rotation, momentum, power, waves, sound, and electromagnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PHYSICS 2

Course #03950

Prereq: AP Physics 1; Teacher recommendation

Level: 12

Credit: 1.0

Advanced Placement Physics 2 is equivalent to a second-semester college-level Algebra-based physics course. Topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic/nuclear physics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: Concurrent with Calculus or higher; Completion of Physics, Chemistry, and Biology (may be taken concurrently with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics C is equivalent to two-semester of college-level calculus-based physics course. Topics include in-depth investigations into mechanics, electricity and magnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ELECTIVE COURSES

ASTRONOMY: THE SOLAR SYSTEM/STARS AND GALAXIES

Course # 03691/03692

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.

Level: 11, 12

Credit: 0.5 each

Astronomy—The Solar System investigates the history and origins of astronomy, telescopes, calendars, and the solar system. *Astronomy—Stars and Galaxies* investigates ordinary stars, stellar distances and motions, supernovae, pulsars and black holes, overview of the universe, stellar evolution, and galaxy formation. These two semester courses may be taken independently of each other.

Science Department

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology); Teacher recommendation.
Level: 11, 12
Credit: 1.0

This course develops students' understanding of the workings of the human body. Dissections, including various cow organs and joints and a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

STUDENT INQUIRY AND RESEARCH HONORS

Course #03850

Prereq: Successful completion of an honors level science course or successful completion of a regular level science course and teacher recommendation. Sophomores and Juniors must be concurrently enrolled in a core science course.
Level: 10, 11, 12
Credit 1.0

This is an honors science course designed to teach students the basic methods used in scientific research such as conducting background research, formulating hypotheses, and designing experiments. Students will analyze collected data using various statistical methods. Students will communicate their findings through a research paper, create a research poster, and present their findings orally at a public symposium at the end of the course. Throughout the course, students will collaborate on a whole-class research projects, work collaboratively and individually on an engineering projects, and complete an individual research project on a topic of their choice. This is an elective science course and does not count towards your science graduation requirement nor does it serve as a prerequisite for Advanced Placement science courses. Earned credit will be applied to the student's overall graduation credit total.

Students registered for seven classes who wish to enroll in SIR may be eligible to enroll in eSIR. Interested students must make an appointment with the Department Chair.

Prerequisite: Successful completion of an honors level science course or successful completion of a regular level science course and teacher recommendation. During the school year, 2 years of science or concurrent enrollment in a second year of science. Open to grades 10, 11 and 12.

Upon completion of the first year of SIR, a student is eligible to earn credit for the College Board's A.P. Seminar 1 course by completing the assessment.

Upon completion of the second year of SIR, a student is eligible to earn credit for the College Board's A.P. Seminar 2 course by completing the assessment.

A student enrolled in eSIR is not eligible to complete the assessment for the College Board's A.P. Seminar 1 course because they will not complete the group component required by this course.

Depending on enrollment, this course may be conducted at Hinsdale Central High School during 1st or 10th period.

Social Studies Department

Department Chairperson

Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

Social Studies Department

SOCIAL STUDIES: GENERAL INFORMATION

- House Bill 4025 stipulates that at least one semester of a high school student's mandated two-year social studies graduation requirement in Illinois must be a civics course. The bill was amended by House Bill 800, which states that the requirement is effective immediately for "students entering the 9th grade in the 2016-2017 school year and continues each school year thereafter." **District 86 Board of Education Policy 6:300** complies with this legislative mandate by stating that students attending District 86 schools must earn two credits in Social Studies for graduation with one credit in US History and one credit in World Cultures or World Studies Honors (unless waived by the Principal for academically at-risk students). In addition to earning these two Social Studies credits, beginning with the Class of 2020, students must also take and pass a Civics course.
- All Social Studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Social Studies AP and Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.

WORLD CULTURES

Course # 02470

Prereq: None

Level: 9

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

WORLD STUDIES HONORS

Course # 02390

Prereq: Dept. Chairperson Recommendation

Level: 9

Credit: 1.0

An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. *Students are prepared to take Advanced Placement courses.*

WORLD CULTURES (AR)

Course # 02460A

Prereq: Dept. Chairperson Recommendation

Level: 9, 10

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized, with additional focus on reading strategies. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

ADVANCED PLACEMENT

EUROPEAN HISTORY

Course # 02520

Prereq: Recommendation of World Studies teacher and Dept. Chairperson approval.

Level: 10

Credit: 1.0

This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture.

Upon the conclusion of this course, students are expected to take the AP exam (see page 84 for details).

Social Studies Department

AFRICAN-AMERICAN HISTORY

Course # 02331

Prereq: None

Level: 10, 11, 12

Credit: 0.5

An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.

GEOGRAPHY

Course # 02501

Prereq: None

Level: 10, 11, 12

Credit: 0.5

An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.

PSYCHOLOGY I

Course # 02431

Prereq: None

Level: 10, 11, 12

Credit: 0.5

An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

PSYCHOLOGY II

Course # 02462

Prereq: Psychology I (above average grades) and Dept. Chairperson approval.

Level: 10, 11, 12

Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY

Course # 02510

Prereq: Dept. Chairperson approval

Level: 10, 11, 12

Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ADVANCED PLACEMENT PSYCHOLOGY "RISE"

Course # 02530

Prereq: Dept. Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

Social Studies Department

SOCIOLOGY

Course # 02381

Prereq: None

Level: 11, 12

Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

AMERICAN POLITICS

Course # 02351

Prereq: None

Level: 10, 11, 12

Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

UNITED STATES HISTORY

Course # 02310

Prereq: None

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Transfer students who have not previously done so must pass a test on the Illinois and U.S. Constitutions as a requirement for graduation. In U.S. History students satisfy Illinois requirements for study of the Declaration of Independence, United States Constitution, Illinois State Constitution, and Flag Code. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation.

AMERICAN STUDIES

Course # 01360

Prereq: None

Level: 11

Credit: 2.0 (one in English;
one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

ADVANCED PLACEMENT U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson
approval

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. A test on the Illinois and U.S. Constitution is offered to satisfy the graduation requirement. *This course will prepare students for the Advanced Placement exam in May.* **Students enrolling in AP US History will not be able to drop to regular U.S. History or American Studies in the same school year.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

ECONOMICS

Course # 02341

Prereq: Average or above
average grades

Level: 10, 11, 12

Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity.

This course fulfills the state mandate for consumer education.

Social Studies Department

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361

Prereq: Teacher
recommendation

Level: 11, 12

Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The course will examine the role the U. S. government should play in regulating the American economy and the wages workers should receive for different jobs. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).*

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372

Prereq: Teacher
recommendation

Level: 11, 12

Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** This course is offered second semester only. Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).*

PHILOSOPHY & ETHICS

Course # 02541

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course will not be so much to cover a particular body of philosophers, but to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions.

CONSTITUTIONAL LAW

Course # 02551

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, and the American jury system. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, students try a case for their final exam.

EAST ASIAN STUDIES

Course #02411

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Asian Studies will examine the history and culture of China, Japan and Korea. Possible topics of study include the Samurai and code of Bushido, the emergence of Japan as a colonial power, the Rape of Nanking, the Korean War, the development of nuclear weapons by North Korea, and the emergence of China as a 21st century global superpower. The course is project, writing, and discussion oriented complimented with a field trip and experiential learning. Students will be challenged to avoid ethnocentrism and to understand these civilizations from the perspective of the people who came from them.

Social Studies Department

GLOBAL ISSUES**Course #02421**

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Global Issues examines several major contemporary political, social, and diplomatic dilemmas of the 21st century. After tracing the historical roots of contemporary issues, students will analyze and evaluate each issue from a variety of perspectives. Possible topics include the proliferation of nuclear weapons, human rights and genocide, democracy and dissent, the future of the Middle East, the "war on terror," U.S. foreign policy since Vietnam, and major domestic challenges. Active student participation on a daily basis and developing written and oral arguments are major components of a student's grade.

**ADVANCED PLACEMENT
GOVERNMENT & POLITICS,
U.S.****Course # 02451**

Prereq: Dept. Chairperson approval

Level: 11, 12

Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

HUMANITIES**Course # 02260**

Prereq: Average to above-average grades and Dept. Chairperson approval

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

**FOUNDATIONS SOCIAL
STUDIES****Course #11780**

Prereq: Dept. Chairperson placement

Level: 9,10,11, 12

Credit: 1.0

The goal of this course is to develop in students an understanding of citizenship that can be generalized in various facets of daily life.

Students will sharpen their basic understanding of history, government and social systems through the exploration of current and historical events. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course.*

This will be offered during the 2016-2017 school year, and will be not be offered in 2017-2018.

Technology Center of DuPage

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190
(630) 620-8770
www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Mr. Matthew Swedko

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Description for detailed prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

Technology Education Department

PRE-ENGINEERING I

Course #06741

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING I

w/honors option

Course #06731

Prereq: Teacher approval

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I
Level: 9, 10, 11, 12
Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

PRE-ENGINEERING II

w/honors option

Course #06761

Prereq: Pre-Engineering I &
Teacher recommendation

Course #06751 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

Technology Education Department

ARCHITECTURE & DESIGN

Course #06730

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$15

Course #06730: This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ARCHITECTURE & DESIGN

w/honors option

Course #06710

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$15

Course #6710 w/honors option: The core material for this course is similar to Architecture & Design course #06730, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program or architecture program.

ENGINEERING & DESIGN

Course #06721

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 0.5

Course #06721: This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

ENGINEERING & DESIGN w/honors option

Course #06711

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 0.5

Course #06711 w/honors option: The core material for this course is similar to Engineering & Design course #06711, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

Course #06700

Prereq: Architecture & Design or Architecture & Design w/honors option **and** Engineering & Design or Engineering Design w/honors option.

Level: 11, 12

Credit: 1.0

Course #06700: This is the culminating course in our Technology Education program. Students will have additional challenges as they are introduced to several 3D modeling software programs. Students will be required to use the skills learned in both their engineering and architecture courses as they make the transition from 2D to 3D.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

w/Honors Option

Course #06720

Prereq: Architecture & Design or Architecture & Design w/honors option **and** Engineering & Design or Engineering & Design or Engineering Design w/honors option.

Level: 11, 12

Credit: 1.0

Course #06720 w/honors option: The core material for this course is similar to Advanced Engineering and Architectural Modeling, however, projects and assessments will involve more depth, complexity, and rigor.

Technology Education Department

WOODS I

Course #06771

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$47

Course #06771 This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

WOODS II

Course #06780

Prereq: Woods I & teacher approval
Level: 10, 11, 12
Credit: 1.0
Supply fee: \$137

Course #06780 This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval
Level: 11, 12
Credit: 1.0

Course #06790 This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent. A four-year sequence of honors level courses is available in all languages offered by the department.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. In accordance with board policy 6:320, students who enter high school in Level 2 of any language course can opt-in to receive 1.0 proficiency credit upon earning a C or higher in the Level 2 language course. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed Prerequisites.

HINSDALE SOUTH HIGH SCHOOL
WORLD LANGUAGES DEPARTMENT

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

In addition to French, German, Latin and Spanish, students can also enroll in American Sign Language courses.

World Languages Department

World Languages Department

GERMAN

GERMAN I

Course # 04200

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

German I is an introduction to the German language and culture. An intensive listening and speaking experience, based on everyday situations is provided. Students will learn the basic sounds of the language, pronunciation, grammar, vocabulary, and sentence patterns. Active reading and writing are introduced. Language skills and an understanding of the German people are obtained from the study of folk tales, recipes, songs, videos, and introductory reading from newspaper.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. In addition to the content of the German I course, students will be involved in higher level learning activities in listening, speaking, reading, and writing as a required part of the course. Additional enrichment reading assignments, projects, and presentations are integrated in the form of simple narratives, fairy tales, songs, and poems.

GERMAN II

Course # 04220

Prereq: "C" in German I

Level: 10, 11, 12

Credit: 1.0

German II provides a continuation of the skills learned in German I with an emphasis on communication and culture, while writing skills and practical vocabulary are greatly increased. Writing and performing skits gives the students the chance to "live" the language and an opportunity to more fully enjoy listening to and speaking German.

GERMAN II HONORS

Course # 04270

Prereq: "A" in German I or "B" in German I with Dept. Chairperson approval, or "C" in German I Honors

Level: 10, 11, 12

Credit: 1.0

In addition to the content of the German II course, German II Honors emphasizes higher level learning in listening, speaking, reading and writing. More advanced vocabulary and grammar structures will be studied, as well as German culture, customs, and history. Students are challenged by the addition of reading selection and urged towards mastery in communication skills

GERMAN III

Course # 04280

Prereq: "C" in German II

Level: 11, 12

Credit: 1.0

German III continues to emphasize communication skills, grammatical structures and a cultural approach. Students will increase their reading skills and vocabulary by reading short stories and a selection of poetry. Individualized study projects are integrated as well.

GERMAN III HONORS

Course # 04230

Prereq: "A" in German II or "B" in German II with Dept. Chairperson approval, or "C" in German II Honors

Level: 11, 12

Credit: 1.0

In this course previously learned skills are enhanced. Advanced vocabulary and grammar are studied along with short stories, cultural readings and selections from newspapers and classical literature. A thematic approach is used to integrate advanced learning in speaking, writing and active listening. Individualized study projects are pursued. Students will gain cultural understanding through excerpts from history, art, music, literature, geography, and films. Students are encouraged to begin to prepare for the Advanced Placement Exam in German.

GERMAN IV

Course # 04290

Prereq: "C" in German III

Level: 11, 12

Credit: 1.0

German IV will continue the reading, grammar, listening, and composition writing in German. It will emphasize verbal and written communication and present selections from literature, art, music, science, history, and films. Students enrolled in the class are encouraged to prepare for College Placement tests

World Languages Department

ADVANCED PLACEMENT GERMAN LANGUAGE

Course # 04240

Prereq: "A" in German III "B" in German III with Dept. Chairperson approval, or "C" in German III Honors

Level: 11, 12

Credit: 1.0

Advanced Placement German Language is the fourth course in the German sequence and is a college level course requiring the ability to work independently on a college level. This class emphasizes higher level learning skills in order to increase the student's reading rate and comprehension. Through the reading of literary masterpieces the student is enriched in his personal life as well as in his understanding of contemporary and historical Germany. Individual study projects are pursued.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

GERMAN V HONORS

Course # 04260

Prereq: "A" or "B" in German IV or Depart. Chairperson approval or "C" in Adv. Placement German Language

Level: 12

Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language, since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors

Level: 9, 10, 11, 12

Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: "C" in Latin I

Level: 11, 12

Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

LATIN II HONORS

Course # 04350

Prereq: "B" in Latin I Honors or "A" in Latin I

Level: 10, 11, 12

Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

World Languages Department

ADVANCED PLACEMENT LATIN

Course # 04360

Prereq: Successful completion of a Latin II
Level: 11, 12
Credit: 1.0

Students in this course will read Vergil's epic poem, *The Aeneid* and Caesar's *Gallic War*. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry and prose style. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire. *This course alternates yearly with Latin Literature Honors and it will be offered in 2016-2017.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

LATIN LITERATURE HONORS

Course # 04370

Prereq: Successful completion of a Latin II
Level: 11, 12
Credit: 1.0

This course is designed to solidify students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Cicero, Ovid, Catullus, and others. Students will be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the students' exploration of ancient culture and society. *This course alternates yearly with Advanced Placement Latin and will be offered again in 2017-2018. It is not offered in 2016-2017.*

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: "C" in the World Language most recently studied
Level: 10, 11, 12
Credit: 0.5

This course is designed to increase knowledge and understanding of English vocabulary. Students learn to discover meanings of words through recognition and interpretation of their elements. Supplementary activities add variety to the learning process. Etymology is especially recommended for students who plan to take the PSAT, ACT, SAT or other college entrance exams. *This course is not offered for the 2016-2017 school year.*

FRENCH

FRENCH I

Course # 04100

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using textbook examples. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Although grammar concepts may be taught in English, students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred
Level: 9, 10, 11, 12
Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

World Languages Department

FRENCH II

Course # 04120

Prereq: "C" in French I

Level: 9, 10, 11, 12

Credit: 1.0

French II is a continuation of the French 1 program and continues to build upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: "A" in French I or "B" in French I and Dept. Chairperson approval or "C" in French I Honors

Level: 9, 10, 11, 12

Credit: 1.0

The core material is the same as French 2 with an accelerated pace to allow for the reading and discussion of short stories and short books, as well as other activities to challenge the Honors student. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: "C" in French II

Level: 10, 11, 12

Credit: 1.0

This course reviews and expands upon skills learned in level II with an increased emphasis on extensive vocabulary acquisition and a more complete study of grammar. Students will continue their culturally based study of the language, do oral presentations, write short compositions, and short stories. Students will read a variety of sample literature pieces. During second semester, students read and discuss *Le Petit Prince*. This course is conducted extensively in French.

FRENCH III HONORS

Course # 04180

Prereq: "A" in French II or "B" in French II and Dept. Chairperson approval or "C" in French II Honors

Level: 10, 11, 12

Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: French III

Level: 11, 12

Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

ADVANCED PLACEMENT

FRENCH LANGUAGE

Course # 04150

Prereq: "C" in French III Honors or "A" in French III or "B" in French III with Dept. Chairperson approval

Level: 11, 12

Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

World Languages Department

FRENCH V HONORS

Course # 04190

Prereq: Successful completion of Advanced Placement French IV and Dept. Chairperson approval
Level: 12
Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

SPANISH

SPANISH I

Course # 04510

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish I, the students develop communication skills, study grammatical structures, and learn about culture. Students study the basics of the language: speaking, listening comprehension, reading and writing.

SPANISH II

Course # 04520

Prereq: "C" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish II, the students will continue to develop communication skills, study grammatical structures and learn about culture. Specific cultural emphasis will be given to Mexico, Central America and South America. Specific communication skills will emphasize listening and speaking with increased instruction and practice in reading and writing.

SPANISH II HONORS

Course # 04580

Prereq: "A" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In addition to the content covered in Spanish II, Spanish II Honors will emphasize listening comprehension, meaningful conversation, reading selected text for conversation-stimulating content, and development of writing skills.

SPANISH III

Course # 04530

Prereq: "C" in Spanish II
Level: 10, 11, 12
Credit: 1.0

In Spanish III, students will continue to develop communication skills, grammatical structures and learn about the culture of various Spanish-speaking countries. Specific communication skills will emphasize the development of improved listening comprehension, speaking and writing, as well as further practice in reading and vocabulary building.

SPANISH III HONORS

Course # 04570

Prereq: "A" in Spanish II or "A" or "B" in Spanish II Honors
Level: 10, 11, 12
Credit: 1.0

Spanish III Honors provides the opportunity for students to progress from a structured sequential language program to one, which emphasizes, in a thematic approach, integration of all language skills. Students will progress toward the goal of independent use of the language in speaking, reading, writing, and active listening. Furthermore, students will gain an understanding of Spanish culture through the study of history, art, music, literature, geography, and customs.

SPANISH IV

Course # 04540

Prereq: "C" in Spanish III
Level: 11, 12
Credit: 1.0

Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study and to strengthen their skills in writing, reading, listening, vocabulary and comprehension. Culture is studied through reading, skits and a series entitled "Destinos".

World Languages Department

ADVANCED PLACEMENT SPANISH LANGUAGE

Course # 04550

Prereq: "A" in Spanish III or "A" or "B" in Spanish III Honors or Department Chair approval
Level: 11, 12
Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through listening selections, reading selections and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement.

Upon the conclusion of this course or the Spanish V Honors course, students are expected to take the AP exam (see page 85 for details).

SPANISH V HONORS

Course # 04590

Prereq: "C" in AP Spanish Language or "C" in Spanish IV
Level: 12
Credit: 1

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature.

Upon the conclusion of this course, students are expected to take the AP exam (see page 85 for details).

AMERICAN SIGN LANGUAGE

AMERICAN SIGN LANGUAGE I

Course # 08070

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language I is an introduction to American Sign Language and Deaf culture. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Fundamental skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness, deaf perspectives will also be taught.

AMERICAN SIGN LANGUAGE II

Course # 08080

Prereq: "C" or better in American Sign Language I
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language II is a continuation of American Sign Language I. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Advanced skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness and deaf perspectives will be taught along with deaf perspectives, technology related to deafness and potential career options.

Additional Academic Opportunities

Adult Opportunities: Adult Opportunities (*Course #02930*) is a Community-Based Program for students ages 18-21. The purpose of the program is to implement an innovative, adult-centered community program through a collaborative approach that prepares students for adulthood success while promoting opportunities for independence in the areas of: employment, post-secondary education and training, independent living skills, and community. The goals of the Adult Opportunities program are to: increase independence in adult living situations; improve self-determination skills; improve social and communication skills; increase leisure, recreation, and life skills; experience work-based learning and volunteer work; and prepare for community living and participation. *This District 86 course is offered at the Transition Center.*

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Last year's fee for each AP exam as established by the College Board was \$91 with an additional \$45 per exam late-testing fee. For schools participating in AP Capstone in 2014-15, the fee for AP Seminar is \$139. The College Board has not released the fee for the 2016 AP exams yet. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments

Applied Academic Strategies: In these courses, students receive targeted instruction to improve academic strategies and executive functioning skills such as organization, time management and test preparation. In addition, students receive individual and/or small group tutorial assistance with academic assignments. *Students taking this course are enrolled in Applied Academic Strategies 9 (Course #01720), Applied Academic Strategies 10 (Course #02010), or Applied Academic Strategies 11/12 (Course #01971/#01972).*

Applied Learning Strategies: In this course, students receive targeted instruction to improve basic academic skills. Emphasis is also placed on developing executive function skills, including organization, time management, and study strategies. Students also receive individual and/or small group tutorial assistance with academic assignments and test preparation. *Students taking this course are enrolled in Course #11720.*

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): The College of DuPage awards articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (*Course #01671/#01672*) to recover lost credits from failed courses. Students should speak with their school counselor and the appropriate department chairperson, if interested. *Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab.* The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts

Additional Academic Opportunities

Deaf and Hard Hearing Program: The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education (*Course #07431/#07432*) which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1/Algebraic Reinforcement. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

English Language Learner (ELL) Program: The District 86 ELL Program is housed at Hinsdale Central High School. Families wishing to learn more about this program can contact either their child's Hinsdale South School Counselor, or District 86 ELL Coordinator, Ms. Kelly Sarrells, at 630.570.8591 or at ksarrell@hinsdale8.org.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), and after school (Course #09400).*

Excel-erate Program: Excel-erate is a non-traditional program for students who need to earn credits via supported virtual instruction. This program runs 11:15 am - 4:00 pm (Periods 5 – 11) and students must have the recommendation from the Director of Counseling in order to enroll. *This is Course #09401/#09402.*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course or field of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the relevant department chairperson, the student's counselor, and the Assistant Principal for Curriculum & Instruction. Upon the approval of all of the aforementioned, final approval is contingent upon the workload of the teacher involved.

Program Success: This course provides a highly supportive academic environment with a focus on future planning and social emotional learning. The setting provides an opportunity to process interactions that have occurred and are having an impact on the student. *This is Course #01991/#01992.*

Special Education Program: The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students to assist in the attainment of the students' goals as written in the IEP. See more information on Page 7.

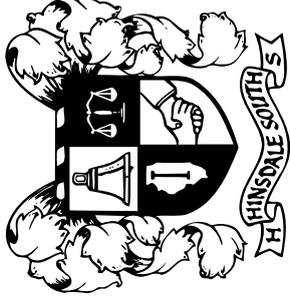

Additional Academic Opportunities

Study Hall and “Hornet Honor” Seniors: All students enrolled in Study Hall are required to attend. The only exception is Seniors who have earned a place on the “*Hornet Honor*” list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. “*Hornet Honor*” seniors have the option of requesting a 1st period “Late Arrival” (*Course #09921/09922*) or a 10th period “Early Dismissal” (*Course #09931/#09932*) in lieu of Study Hall during the course request process. Only “Hornet Honor” seniors who have “Late Arrival” or “Early Dismissal” on their official schedules have earned this privilege of late arrival/early dismissal. “Hornet Honor” seniors who have “Late Arrival” are expected to arrive on time to their 2nd period class and those enrolled in “Early Dismissal” are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for “*Hornet Honor*” seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with “Study Hall” on their official schedule regardless of what period the study hall is or what year the child is in school. *All Hinsdale South students must be enrolled in 6 credit-earning courses each semester.*

Therapeutic Program: The District 86 therapeutic program, HAVEN, is for students whose behavioral and emotional needs impede and/or significantly disrupts the learning environment for other students despite learning environment supports attempted. The goal is to provide students with developmentally appropriate Pro-Social Independence. The program is designed to assess the level of pro-social independence of each student and to devise strategies, interventions and experiences that help the student build their capacity to become increasingly independent and successful in a school setting. Students will engage in academic course work in order to meet District 86 requirements toward graduation. These supports are provided to students a small class setting in order to ensure that their academic and social goals are being met. *HAVEN is an acronym for Hinsdale Area’s Vision of Emotional Needs.*

HINSDALE SOUTH HIGH SCHOOL FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. This plan will be retained by your counselor and used for future academic planning.
6. Indicates flexibility in academic scheduling.

Hinsdale South High School

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2017-2018 school year. This *Program of Studies Handbook* is derived from the District 86 course catalog to provide you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to maximize their academic potential.

Please take the time to carefully review the *Program of Studies Handbook*. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Counseling Department at (630) 468-4251.

Sincerely,

Stephanie Palmer

Principal

General Information

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. *In order to earn a diploma, students must also comply with all state mandated requirements for standardized testing.* All students must complete state-mandated CPR and AED training through their physical education class.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. English I and English II fulfill this requirement as do Applied English and Foundations English.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three credits of Mathematics must be an Algebra course (Algebra 1, Part 1 AND Algebra 1, Part 2, Algebra 1 Block, Algebra 1, Applied Math, or Foundations Math) and one must include Geometry content (Geometric Analysis, Geometry, Applied Math or Foundations Math). Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test -Beginning with the Class of 2020, students must also take and pass either American Politics or AP Government to meet the state-mandated Civics graduation requirement.</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>AP Economics: Micro AP Economics: Macro Economics Exploring Family and Consumer Sciences Foundations Consumer Education Introduction to Business Money Management</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0

State-mandated requirements for standardized testing: SAT

Beginning with the Class of 2018, all 11th grade students are required to take the SAT. In order to be classified as an 11th grader, students must earn a minimum of 11.75 credits prior to the beginning of entering their third year in high school. Students who begin their third year in high school with fewer than 11.75 credits will be classified as 10th graders solely for the purpose of SAT testing.

General Information

What Is AP Capstone?

AP Capstone™ is a College Board program that equips students with the independent research, collaborative teamwork, and communication skills that are increasingly valued by colleges. It cultivates curious, independent, and collaborative scholars and prepares them to make logical, evidence-based decisions.

AP Capstone is comprised of two AP courses — **AP Seminar** and **AP Research** — and is designed to complement and enhance the discipline-specific study in other AP courses.

Benefits of AP Capstone

- Fosters the **research**, argumentation, and communication skills that are at the core of college readiness and essential for lifelong learning
- Provides a setting to build on the knowledge and rigorous course work of AP in an **interdisciplinary** format
- Offers students a unique opportunity to **distinguish** themselves to colleges and universities

Combining Scholarly Practice with Academic Intensity

AP Capstone was developed in response to feedback from higher education. The two AP Capstone courses, with their associated performance tasks, assessments, and application of research methodology, require students to:

- Analyze topics through multiple lenses to construct meaning or gain understanding.
- Plan and conduct a study or investigation.
- Propose solutions to real-world problems.
- Plan and produce communication in various forms.
- Collaborate to solve a problem.
- Integrate, synthesize, and make cross-curricular connections.

General Information

Director of Special Education Mrs. Kristin Marks Pascavage

The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students. These supports include direct instruction, co-teaching in core classes, collaboration with general education teachers, and resource support. Direct instruction in specialized course offerings happens through a *Foundations* or *Applied* philosophical approach:

--*Foundations* courses provide students with an opportunity to focus on functional life skills curriculum within the context of each content area.

--*Applied* courses focus on specific content area concepts and skills with an additional emphasis on practical application.

Additional supports available for students as determined in their individual educational plan could include occupational therapy, physical therapy, speech/language therapy, psychological and social work services. All of the classes are structured to assist in the attainment of the students' goals as written in the IEP.

PLACEMENT IN SPECIAL EDUCATION COURSES IS BASED UPON AN INDIVIDUAL CASE STUDY EVALUATION AND RECOMMENDATION BY THE SPECIAL EDUCATION STUDENT SUPPORT TEAM.

Please see Course Description for detailed Prerequisites.

APPLIED ACADEMIC STRATEGIES 9

Course #01720

Level: 9

Credit: 1.0

APPLIED ACADEMIC STRATEGIES 10

Course #02010

Level: 10

Credit: 1.0

APPLIED ACADEMIC STRATEGIES 11/12

Course #01971/01972

Level: 11,12

Credit: .5 per semester

In these courses, students receive targeted instruction to improve progress on goals in identified areas of need. Student growth is monitored and families are informed of progress quarterly. The smaller group setting is structured so that students can receive assistance accessing the general education curriculum as well as instruction in executive functioning skills such as organization, time management, and test preparation.

APPLIED LEARNING STRATEGIES

Course #11720

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students receive targeted instruction to improve basic academic skills and progress toward identified IEP goals. Emphasis is placed on developing executive function skills, including organization, time management, and study strategies. Students also receive individual and/or small group tutorial assistance with academic assignments and test preparation. Extended resource teachers consult with case managers and classroom teachers to monitor student progress in all school settings.

PROGRAM SUCCESS

Course #01991/01992

Prereq: Approval of Director of Special Education

Level: 9, 10, 11, 12

Credit: 1.0

This course provides a highly supportive academic environment structured to address the behavioral/emotional needs of students throughout the school day. Students also receive instruction in identified goal areas.

THERAPUTIC PROGRAM

Course #09701/09702

Prereq: IEP Team recommendation and Director of Special Education.

Level: 9, 10, 11, 12

Credit: 0.5 per semester

Students in the HAVEN program have access to all courses found in this Program of Studies with select courses being delivered within the HAVEN classroom.

The District 86 therapeutic program, HAVEN, is for students whose behavioral and emotional needs impede and/or significantly disrupts the learning environment for other students despite learning environment supports attempted. The goal is to provide students with developmentally appropriate Pro-Social Independence. The program is designed to assess the level of pro-social independence of each student and to devise strategies, interventions and experiences that help the student build their capacity to become increasingly independent and successful in a school setting. Students will engage in academic course work in order to meet District 86 requirements toward graduation. These supports are provided to students a small class setting in order to ensure that their academic and social goals are being met. HAVEN is an acronym for Hinsdale Area's Vision of Emotional Needs.

General Information

ADULT OPPORTUNITIES

Course #02930/02940

Prereq: IEP team recommendation and approval of Director of Special Education
Level: Ages 18, 19, 20, 21

Credit: No credit
Supply fee: \$180

This is a District 86 program offered at the Transition Center. The school day is from 8:00 AM to 2:00 PM.

Adult Opportunities is a post high school option for students ages 18-21. Adult Opportunities has two programs, The Bridge Program and The Transition Program. The purpose of these program is to implement an innovative, adult-centered community program through a collaborative approach that prepares students for adulthood success while promoting opportunities for independence in the areas of: employment, post-secondary education and training, independent living skills, and community.

The goals of the **Transition Program** are to: increase independence in adult living situations; improve self-determination skills; improve social and communication skills; increase leisure, recreation, and life skills; experience work-based learning and volunteer work; and prepare for community living and participation.

The **Bridge Program** looks to provide young adults with continued special education intervention, services, and supports designed to increase student success in postsecondary academic environments. The program provides supports in the area of executive functioning (managing a schedule, managing course expectations and deadlines, managing testing schedule, managing assignments). The Bridge program supports students in navigating the COD campus (locating offices, locating classes, locating sites such as the library, cafeteria, student center, counseling and academic support centers). The program also supports students with advocating and arranging accommodations and supports on campus. This could include making appointments with office of accommodations, use of "blue card", communication of needs with professors, making appointments with tutoring, the writing center, testing center, etc. The program also supports finding opportunities to socially engage with peers. Another goal is for our students to understand and use the PACE and/or Metra transportation systems. Academic Intervention are continued to increase academic skills necessary for accredited college coursework.

THERAPUTIC PROGRAM

Course #09701/09702

Prereq: IEP Team recommendation and Director of Special Education.
Level: 9, 10, 11, 12
Credit: 0.5 per semester

Students in the HAVEN program have access to all courses found in this Program of Studies with select courses being delivered within the HAVEN classroom.

The District 86 therapeutic program, HAVEN, is for students whose behavioral and emotional needs impede and/or significantly disrupts the learning environment for other students despite learning environment supports attempted. The goal is to provide students with developmentally appropriate Pro-Social Independence. The program is designed to assess the level of pro-social independence of each student and to devise strategies, interventions and experiences that help the student build their capacity to become increasingly independent and successful in a school setting. Students will engage in academic course work in order to meet District 86 requirements toward graduation. These supports are provided to students a small class setting in order to ensure that their academic and social goals are being met. HAVEN is an acronym for Hinsdale Area's Vision of Emotional Needs.

General Information

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality of the student's academic record
- Performance on college admission tests –SAT and/or ACT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	Four (4) Credits Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.
Mathematics	Three (3) Credits Traditional preparation for college mathematics is a credit each of Algebra I, Geometry, and Advanced Algebra, with a fourth credit of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.
Science	Three (3) Credits of a laboratory science Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.
Social Studies	Three (3) Credits (emphasizing history and government) One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.
Other	Two (2) Credits in world languages, music, or art. If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.

In most cases, students pursuing admission to a four year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

General Information

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "WF" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: It is important that students choose their course loads very carefully, as the Master Schedule for the building is based off of these selections. Typically a student is required to stay in a course for an entire quarter before the school will honor a request to change the level of coursework. If a request to move course levels is granted, the grade as of the day of the course change will follow the student to the next class. Students wishing to initiate a level change within the same department must complete the add/drop form and obtain all required signatures (parent/guardian, teacher, department chair, counselor).

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to e-learning, correspondence, distance/blended learning, or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (American School, Illinois Virtual School, etc..) will not appear on the District 86 transcript unless there has been prior written approval by the Director of Counseling. Additionally, transfer students and currently enrolled students requesting to transfer credit for a class from an accredited institution outside of HSHS, may be required to take a placement exam to ensure appropriate level of placement for a higher-level class. The Department Chair for the subject area will set a mastery level for the exam. If mastery is not obtained, then a student may need to repeat that course and credit will not be issued. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school.

Per Board Policy 6:320, students can earn World Language proficiency credit for their 8th grade language class and/or their enrollment in a state-approved ethnic school program or American Sign Language program.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher. Excessive absences may result in removal from class and/or a loss of credit.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the

following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends
- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

- computer input error
- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Counseling recommendation
- successful completion of a summer school class

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation with clearly articulated rationale must be submitted by the family to the Director of Counseling for consideration.

Dean's List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student's grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F or WF	1.0	1.0
I	1.0	1.0

Dean's List and Honor Roll designation will be determined by the following criteria:

Dean's List: 4.5 Weighted GPA with no grade in any course below a "C"

Honor Roll: 4.0 Weighted GPA with no grade in any course below a "D"

Dean's List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean's Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Junior High/Middle School Students: Junior high schools that feed into District 86 (D86) unable to offer advanced coursework for their students may send their students to Hinsdale South High School for those courses. In these cases, all courses, grades and credit earned will appear on the transcript and will be calculated into the grade-point average earned in subsequent years at a high school in D86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day.

General Information

Physical Education Exemptions: Per Board Policy 6:310, students may submit a written request to be excused from physical education courses for the following reasons: (1) For students in grades 11-12, ongoing participation in an interscholastic athletic program as recognized by IHSA, (2) For students in grades 11-12, to enroll in academic classes which are required for graduation from high school, provided that failure to take such classes will result in the pupil being unable to graduate, or (3) For all students, ongoing participation in a Marching Band program for credit. In addition, students in grades 11-12 may also qualify for a Physical Education exemption in order to enroll in an academic class or classes required for admission to the college(s) or university(ies) which said student intends to apply as long as documented substantiation of the prerequisite secondary courses required for admittance to the post-secondary institution is provided. Policy 6:310 also contains provisions for students with IEPs to qualify for PE exemptions based on an IEP team decision or participation in adaptive athletic programs outside the school setting.

Students enrolled in the Hinsdale South High School Bands perform at home games, local parades, pep rallies, formal concerts, and other community events. Band classes improve musicianship, develop technique, and provide performance opportunities featuring a variety of musical styles and ensemble settings. Every band course is an academic class that meets during a class period and also requires occasional rehearsals and performances outside the school day; however, students are encouraged to participate in other academic classes, athletics, and activities. Opportunities for student leadership, overnight travel, and extracurricular performing are available. All band classes can be repeated each year for credit and are open to students in every grade. Every band student performs as part of the Marching Band, which allows band students in Grades 9 - 12 to exempt out of Physical Education for the entire school year.

***Marching Band PE Exemption Procedures:** Band students in grades 9 through 12 may be exempted from Physical Education classes on an athletic exemption during both semesters for ongoing participation in marching band and pep band. "Band" students are defined as students enrolled in one the following courses: Concert Band, Symphonic Band, Wind Symphony Honors, Concert Percussion Ensemble, or Symphonic Percussion Ensemble.*

Students who obtain this exemption must enroll in a minimum of 6 courses in addition to the PE Band Exemption. If a student drops below six courses, the exemption is invalidated and the student will be required to attend Early Bird PE, or enroll in PE during the school day. In all cases the exemption is listed on student schedules as course #09940 PE Band Exemption (1.0 PE Credit).

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student's previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. Pursuant to Hinsdale Township High School District 86 Board of Education Policy 7:50 and 7:60, every family must provide acceptable evidence of residency. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be presented to verify residency. Contact the registrar for more information on adequate proof of residency. A student's grade-point average previously earned at a high school other than a high school in District 86 will be re-calculated based on the grade-point average processes currently used in District 86. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript exactly as they are titled on the sending school's transcript and will be indicated as transfer coursework. If the previous school assigned numerical grades, we will use their key to assign letter grades on the District 86 transcript. If no key is available, these courses will be recorded as "Pass" or "Fail". Transfer courses from schools outside of the United States may receive credit, but grades will be reflected as

General Information

“Pass” or “Fail”. A record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but *the preferred date of completion for the freshman physical is July 1*. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

R-Rated Films Used in Instruction: If R-rated movies or clips from R-rated movies will be used in instruction in any course; a list of those movies will be made available via the Hinsdale South website at the time of registration. Written permission must be obtained by a parent at the beginning of any course showing R-rated movies or clips from R-rated movies to allow students to view in whole or in part the R-rated movies associated with the class.

Seal of Biliteracy: Students who demonstrate proficiency in both English and another language may qualify to earn a Seal of Biliteracy on their transcripts. Families who want more information on this program should contact District 86 ELL Coordinator, Mrs. Kelly Owens, 630-570-8951 or kowens@hinsdale86.org.

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the “Adding/Dropping Courses” procedure outlined on Page 8.

Art Department

Left to right
 Larry James Jr.
 Laura Packeviciute
 Brenda Hu & Allison Jue
 Logan Obermeyer

Department Chairperson
Mr. Patrick Maag

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, digital images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Supply fees are required for participation in all studio courses.**

Art Department

ANIMATION & CARTOONING

Course #05591

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

No experience required - This is an enjoyable course that introduces the student to the art and history of cartooning and animation. Students learn caricature cartooning as well as developing their own cartoon character and comic strips. Techniques of animation are taught and enable students to produce their own animated film shorts. Students will also have hands-on experience using a color video animation system and Toon-Boom software.

VISUAL ART IN OUR WORLD

Course #05011

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee:

No experience required - This is an enjoyable beginning level art class at Hinsdale South. You can be successful even if you have always said, "I cannot draw!" Students will explore what types of art and artists are currently trending and contemporary in the world around us. Gaining an understanding of visual art that surrounds us is as important as the music you listen to or the books you read. Expand your knowledge and have fun trying your hand at some basic art techniques that are used in today's art. Students will get to explore materials including paint markers, spray paint, collage, camera phones, internet images, drawing tablets and various other studio art supplies. Field trips to contemporary art museums in Chicago will also occur.

DRAWING & PAINTING 1

Course #05031

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the beginner studio art class at Hinsdale South. Students will be introduced to a variety of drawing materials such as drawing and colored pencils, charcoals, pastels, markers, pens and other mixed medias. Students will also be introduced to watercolor and acrylic paints as well as painting on paper and canvas boards. Students will learn how to use materials and create 5-7 projects over the semester-long course. Color theory, composition and the elements of art will be the focus of the work in this class.

DRAWING & PAINTING 2

Course #05041

Prereq: Drawing & Painting 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the intermediate studio art class at Hinsdale South. Students who enjoyed Drawing & Painting 1 will further build on the processes learned and materials used in the introductory class. In this class, students will continue to work with the same drawing and painting materials with the addition of more complex project assignments. Students will also be allowed to work with more personal choices for the subjects of their artwork.

DRAWING & PAINTING 3

Course #05051

DRAWING & PAINTING 3

w/Honors Option

Course #05052

Prereq: Drawing & Painting 2
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$40

This is the advanced studio art class at Hinsdale South. Students must complete Drawing & Painting 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen medias. The work produced in this course will now either be all drawing or all painting and may be used as part of the Advanced Placement portfolio.

** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. *(Course may be repeated)*

<p><u>AP STUDIO ART (2D)</u> Course #05200 Prereq: Drawing & Painting 3 or Digital Imaging & Design 3 Level: 10, 11, 12 Credit: 1.0 Supply fee: \$40</p>	<p>This is the college level Advanced Placement studio art class at Hinsdale South. Students must complete Drawing & Painting 3 or Drawing & Painting 3 Honors in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. <i>(Course may be repeated)</i> Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 90 for details).</p>
<p><u>DIGITAL IMAGING & DESIGN 1</u> Course #05071 Prereq: none Level: 9, 10, 11, 12 Credit: 0.5 Supply fee: \$8</p>	<p>This is the beginner computer art class at Hinsdale South. Students will be introduced to two Adobe Design programs including Photoshop and Illustrator. Artistic and creative problem solving strategies are developed where students will use personal photos and images to create original works of art. Various practice exercises will aid the students in creating 4-6 major projects in this class. Color theory, composition and the elements and principles of design will be the focus of study.</p>
<p><u>DIGITAL IMAGING & DESIGN 2</u> Course #05072 Prereq: Digital Imaging & Design 1 Level: 9, 10, 11, 12 Credit: 0.5 Supply fee: \$8</p>	<p>This is the intermediate computer art class at Hinsdale South. Students who enjoyed Digital Imaging 1 will further explore the artistic potential of the computer and creative problem solving strategies used in the introductory class. The first part of this course will continue to explore digital art options while the second part of the course will explore graphic design opportunities. Digital artists and designers will use Wacom Drawing Tablets to aide in their art making as well.</p>
<p><u>DIGITAL IMAGING & DESIGN 3</u> Course #05081 <u>DIGITAL IMAGING & DESIGN 3 w/Honors Option</u> Course #05082 Prereq: Digital Imaging & Design 2 Level: 10, 11, 12 Credit: 0.5 Supply fee: \$8</p>	<p>This is the advanced computer art class at Hinsdale South. Students must complete Digital Imaging 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen ideas. The work produced in this course may be used as part of the Advanced Placement portfolio.** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. <i>(Course may be repeated)</i></p>
<p><u>INTRO TO 3D ART</u> Course #05091 Prereq: none Level: 9, 10, 11, 12 Credit: 0.5 Supply fee: \$40</p>	<p>Intro to 3D Art is designed to introduce students to a wide assortment of media in a hands-on approach to creating three dimensional art. Students will learn basics construction techniques for working in clay, glass, wire and mixed media. Students will also design and create beaded and glass fused jewelry. Emphasis is on creativity, design, vocabulary and having fun. This is a pre-requisite class for taking Glass Workshop, Jewelry and Ceramics.</p>
<p><u>CERAMICS</u> Course #05302 Prereq: 3D Art 1 Level: 9, 10, 11, 12 Credit: 0.5 Supply fee: \$25</p>	<p>Ceramics further explores the challenges of hand building in clay as students learn to make lids and attach handles, feet and spouts to functional projects. They will also learn the art of sgraffito for surface decoration, expand their ceramic vocabulary and continue to utilize the elements of art and principles of design as they design and create more advanced work. <i>(Course may be repeated)</i></p>

Art Department

JEWELRY

Course #05331

Prereq: 3D Art 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$55

Jewelry further explores the process of beading and wire wrapping techniques used to create more unique pieces of beaded jewelry. Fine motor skills, good vision and patience are needed as students design and create more unique beaded pieces of jewelry, chainmail, knotted necklaces, crochet wire beaded necklaces, and macramé. Vocabulary and tool/bead identification will be tested. *(Course may be repeated)*

GLASS WORKSHOP

Course #05561

Prereq: 3D Art 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$40

Glass Workshop will expand on the processes used in fusing, slumping and working with a blow torch as students explore the processes of screen printing, digital photograph, etching, copper inlay, bead making and creating glass mosaics. Patience, attention to detail and thoughtful planning are required as students turn in detailed design sketches for each project and assist with daily clean up. *(Course may be repeated)*

PHOTOGRAPHY 1

Course #05001

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the beginning photo class at Hinsdale South. Change the way you look at the world. Use traditional film cameras and digital cameras to understand how to communicate your ideas visually. Students will also develop and print black and white film in an actual darkroom. Composition, class evaluation and assessments help students to develop a strong photographic portfolio. *Students are required to have their own SLR camera that uses 35mm film. Students will pay a lab fee for film, negative photo paper and photographic developing supplies.*

PHOTOGRAPHY 2

Course # 05012

Prereq: Photography 1
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the intermediate photography class at Hinsdale South. Students who loved photo 1 will enjoy capturing more photographic images in photo 2. Students can experiment with traditional and digital photographic techniques. Do you want a career in photojournalism, advertising photography, portrait photography or fine art photography? Create, communicate and evaluate your images as you develop your photographic portfolio and blog online. *Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.*

PHOTOGRAPHY 3

Course # 05422

PHOTOGRAPHY 3 w/ Honors

Course # 05021

Prereq: Photography 2
Level: 10, 11, 12
Credit: 0.5
Supply fee: \$35

This is the advanced photography class at Hinsdale South. Students must complete Photo 2 to have a complete understanding of what is required in this class. Expand your knowledge and skills to create artistic photographs with your own personal style. An individual course of study will be arranged between student and teacher at the beginning of the semester. Students will organize their images into a photographic portfolio that will be submitted for portfolio competition.

** Honors students will be required to take an outside workshop or equivalent event. Honors students will submit a portfolio to the Scholastic Art competition. Honors students complete a written and picture BLOG as a journaling record of their theme. Honors students will increase rigor by participating in school spirit activities as photojournalism photographers. *Students should have their own 35mm SLR film cameras and digital camera. There is a lab fee at registration for film, negative sleeves, photo paper and photographic developing supplies.*

ADVANCED PLACEMENT ART HISTORY

Course #05580

Prereq: none

Level: 10,11,12

Credit: 1.0

This course provides a survey of the history of western and non-western art from pre-historic times to the present and teaches methods of interpreting and analyzing works of art. Students with good writing skills and an interest in art and its place in our world can do well in the course. Hands on projects, focusing on process rather than product, cooperative group assignments and Internet searches are correlated with the period under study. Field trips to Chicago area museums and important architectural structures enhance classroom learning and help familiarize the students with the cultural offerings of the city.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

AP STUDIO ART (3D)

Course #05400

Prereq: 3D Art 1 and Ceramics, Glass Workshop or Jewelry (2 of the 3)

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement 3D art class at Hinsdale South. Students must complete 3D Art 1 and two of the three other 3D art classes (Ceramics, Jewelry and Glass Workshop) in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 8 thematic artworks called Concentrations in addition to 8 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 90 for details).

AP STUDIO ART (Photography)

Course #05300

Prereq: Photography 3

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement photography class at Hinsdale South. Students must complete Photo 3 in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 90 for details).

Business Department

Department Chairperson Mr. Matthew Swedko

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

ESSENTIAL TECHNOLOGIES (KEYBOARDING)

Course # 06121

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Essential Technologies is designed for the student who wants to acquire skills necessary to enhance the value of the computer for academic and personal use. This course will focus on developing 21st Century technology skills by incorporating study in keyboarding, Internet research, and computer literacy. Through the use of Microsoft Office and other online tools, we will focus on building a student's essential technology skills that will be needed at Hinsdale HSD 86. *Students who desire improvement in keyboarding, computer usage, and basic software application skills will benefit from this course and be better prepared for all high school classes.*

FINANCIAL APPLICATIONS

Course # 06162

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Financial Applications will help students gain an understanding of how to use technology to help them manage financial resources that are essential for success in college, a career, and personal finance. With a focus on financial spreadsheets and reports, students will learn business and personal financial management using various financial software/resources. *Students interested in the areas of Finance, Marketing, Management and Economics should take this course. Suggested courses taken after or during: Accounting or Honors Accounting, Business Management/Entrepreneurial Studies, Marketing, Business Work Experience, and Internship.*

This class will not be offered in the 2017-2018 and will be offered again in 2018-2019.

MULTIMEDIA INNOVATIONS AND APP DESIGN

Course # 06182

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Students will develop a broad perspective of the design, communication theory, processes and tools, applications and occupational opportunities in multimedia design. Editing, animating, and digital-publishing will be emphasized. Using various software programs and online resources, students will design and create audio and visual projects/presentations. *Students interested in Entrepreneurship, Management, and Marketing, should take this course.*

Business Department

APPLIED DIGITAL COMMUNICATION

Course # 01731

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: .5

This course is individualized to meet varying ability levels and needs in developing and improving computer skills for both career and personal use. Each student will learn and develop correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

APPLIED BUSINESS

MONEY MANAGEMENT

Course # 06111

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Money Management will integrate economic concepts with the student's important role in the economy as a citizen, consumer, and worker. Topics include: money management, buying goods and services, banking (savings and checking), investments, the efficient use of credit and loans, consumer protection, insurance, housing, and our tax system.

This course fulfills the state mandate for Consumer Education.

FOUNDATIONS

CONSUMER EDUCATION

Course #11790

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

Students enrolled in this course focus on the concepts of budgeting, money management, self-advocacy, roles of consumers, communication, socialization, functional life skills, recreation/leisure skills, and applying those concepts to real world opportunities through weekly community experiences.

INTRODUCTION TO BUSINESS

Course # 06100

Prereq: None

Level: 9, 10

Credit: 1.0

Course # 06100: This course gives students a background in the basic operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities. This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

INTRODUCTION TO BUSINESS w/Honors Option

Course #06300

Prereq: Instructor approval

Level: 9, 10

Credit: 1.0

Course # 06300 w/Honors Option: Introduction to Business Honors option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business. This course gives students a background in the operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, consumerism, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities that have more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

BUSINESS LAW I***Course # 06231***

Prereq: None
Level: 11, 12
Credit: 0.5

Course #06231: Students will gain an appreciation of our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: our legal system (courts, criminal and civil law) contracts, personal, and consumer law. A field trip to a local court and participation in mock trials as lawyers, witnesses, and/or jurors help students gain an understanding and an appreciation of how the American legal system functions.

**BUSINESS LAW I
w/Honors Option*****Course #06221***

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06221 w/Honors Option: Business Law I w/Honors Option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Students electing the honors option will be required to complete a more rigorous and in depth curriculum for each unit. Students electing the honors credit option will work with the same topical material as the Business Law class. However the topics will be looked at on a different level by all honors students. All unit materials in this course will have the following emphasis: (1) Writing intensive, (2) Research based, (3) Higher complexity of analysis and reasoning, and (4) Professional level presentation of work.

BUSINESS LAW II***Course # 06242***

Prereq: Business Law I
Level: 11, 12
Credit: 0.5

Course # 06242: Students will investigate our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Students will also participate in The National On-line Youth Summit sponsored by the American Bar Association.

**BUSINESS LAW II
w/Honors Option*****Course #06252***

Prereq: Business Law I
w/Honors Option and
instructor approval
Level: 11, 12
Credit: 0.5

Course #06252 w/Honors Option: This course is an extension of Business Law I Honors Option and is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Topics covered include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Projects and assessments for this option will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time spent out of class.

MANAGEMENT, MARKETING & FINANCE

ACCOUNTING***Course # 06320***

Prereq: None
Level: 11, 12
Credit: 1.0

This course covers the principles and procedures of accounting. Both manual and computerized double-entry systems are taught. Practice sets and exercises are used during supervised laboratory sessions to develop skills in practical applications. Through the use of microcomputers, students also gain familiarity with computerized accounting procedures. The objectives of this course include preparing students for initial accounting jobs in business and providing a technical background for college-bound students who plan to enter certain fields of business. All assignments are created using spreadsheet software

Business Department

ACCOUNTING HONORS

Course # 06350

Prereq: Department
Chairperson approval
Level; 11, 12
Credit: 1.0

In this course, students develop an understanding of double-entry accounting. Topics covered include the following: accounting cycle, banking activities, special journals, payroll, accounting systems and design, internal controls, financial statement analysis, and deferrals and accruals. Students also utilize computer software for problem solving and learn spreadsheet applications. All assignments are created using spreadsheet software.

INVESTMENT PLANNING

Course # 06331

Prereq: None
Level; 10, 11, 12
Credit: 0.5

In this course students will study basic investment principles involving stocks, commodities, bonds, and mutual funds. Students will also learn about tax information, effects of the economy on the market, government regulations of securities and on-line investing. Current issues as they relate to investing will be discussed. Teams will be formed to participate in the Stock Market Game by trading on-line.

This class will not be offered in 2017-2018 and will be offered again in 2018-2019.

ENTREPRENEURIAL STUDIES

Course # 06421

Prereq: None
Level: 11, 12
Credit: 0.5

Course # 06421: Entrepreneurial Studies is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. This course is an introduction to current practices in the world of business. Units of instruction include economic trends, entrepreneurship, business organization, human relations, ethics, management, marketing, finance, and international business.

ENTREPRENEURIAL STUDIES w/Honors Option

Course # 06431

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06431 w/Honors Option: Entrepreneurial Studies w/honors option is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. Students will prepare themselves for the challenges of the business world and becoming an entrepreneur/manager by relating current practices in the world of business to: economic trends, business organization, human relations, ethics, management, marketing, finance, and international business.

MARKETING

Course # 06470/#06480

Prereq: None
Credit: 1.0
Supply fee: \$25

Marketing is designed to prepare students for the challenges and opportunities in the field of marketing. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

Course # 06470: Students not enrolled in Business Work Experiences (Course #06490) should select Course #06470. Marketing 06470 is beneficial for those planning to enroll in related business/marketing programs in college.

Course # 06480: Students enrolling in Business Work Experiences (Course #06490) need to be concurrently enrolled in Marketing #06480. This course is designed for students working part-time in related jobs and also for students planning to enroll in related programs in college.

MARKETING w/Honors Option

Course # 06460

Prereq: Instructor approval
Level: 11, 12
Credit: 1.0
Supply fee: \$25

Course # 06460 w/Honors Option: The Honors Option is designed for students with above-average grades, managerial/organizational and intellectual abilities, who plan to major in business/marketing in college. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing. ***In addition, all Marketing students participate in the activities of BPA, an organization for business students.***

EMPLOYMENT EXPERIENCE

TECHNICAL SUPPORT INTERNSHIP(TSI)

Course # 06440

*Prereq: Dept. Chairperson or
coordinator approval*

Level: 10, 11, 12

Credit: 1.0

The Technology Support Internship (TSI) course is a hands-on study of technology integration in an educational context. Students will be trained to oversee daily technology issues in order to assess which problems surface throughout the school day. Students will define the best approach to addressing or solving the problems for students and teachers.

Students will troubleshoot hardware, software, and network problems, as well as process service tickets and inventory stock. Students will be required to complete and maintain several running projects that address problems or solutions in educational tech integration. They will also be expected to provide training sessions on Chromebook use and digital citizenship to incoming freshmen and transfer students. The course also provides students with the opportunity to pursue an independent learning pathway and potential professional certifications in one of four areas: Application, Innovation, Design, and Entrepreneurship.

**Prerequisite: Department Chair approval. Open to grades 10-12
Honors Option available after completion of the first year.**

BUSINESS WORK EXPERIENCES

Course # 06490

*Prereq: Marketing or
concurrent enrollment in
Marketing and coordinator
approval*

Level: 11, 12

Credit: 1.0

Business Work Experiences provides the student with actual paid business experience related to their career goals. Students are employed in local businesses from a minimum of 15 hours to a maximum of 25 hours per week for which they receive monetary compensation. A wide variety of experience is available in fields such as apparel and accessories, automotive, food distribution, food service, hotel and tourism, general merchandise retailing, and various office related careers, including banking, accounting, and administrative assistant positions. This work experience program prepares students for further study or a career in marketing, retailing, management, finance, accounting, or administrative office positions. Students are selected by application and interview with emphasis on factors including reliability, integrity, and career goal. ***It is the student's responsibility to make travel arrangements to and from the job. Students must maintain enrollment and earn a passing grade in Marketing to receive credit for this work experience program.***

INTERNSHIP

Course # 06461

*Prereq: Dept. Chairperson or
coordinator approval*

Level: 11, 12

Credit: .5 per semester (this
class may be repeated for up
to 1 credit)

Internship is an elective semester program for the highly motivated junior or senior. The program provides students with opportunities in the local community for hands-on career exploration in their chosen field. Acceptance into the program is determined by factors such as faculty letters of recommendation, availability of a community sponsor, and interviews with the coordinator and the community sponsor. Students are required to keep a journal of their experiences and complete a summary report. During the internship, students observe daily operations, confer with other personnel, and participate and contribute to the functions of the organization for at least 50% of the hours spent in the internship experience. Student performance in the Internship program is evaluated on a pass-fail basis. ***The internship is conducted exclusively outside of the school day with no pay for a minimum of 50 hours during the semester. Students must make the travel arrangements necessary to fulfill their internship responsibilities.***

Business Department

INTERNSHIP w/Honors Option

Course # 06441

Prereq: Dept. Chairperson or coordinator approval

Level: 11, 12

Credit: .5 (this class may be repeated for up to 1 credit)

Course #06441 w/honors option: The core material for this course is similar to Course #06461; however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time. This course is highly recommended for motivated students giving serious consideration to a specific career.

PREVOCATIONAL JOB TRAINING

Course #01850

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

The goal of this course is to provide students with an opportunity to learn theory and engage in practical hands on experience. Students will develop job responsibility, initiative, and positive employer-employee relationships. Emphasis will be placed on hands-on in school job training and entry level workplace skill development which may include: following a schedule, time management, efficiency, responsibility, work etiquette, following directions and communicating with coworkers and supervisors. Students may have the opportunity to participate in an off-campus volunteer experience based on student evaluations, opportunity availability and scheduling flexibility.

COOPERATIVE WORK TRAINING

Course #01770

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and teacher on a quarterly basis. *Pass/Fail grades are issued for this course.*

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques is used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Some English classes require a \$20 fee for supplemental e-texts used for the purpose of annotation.

Please see Course Description for detailed Prerequisites.

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen: English I or English I Honors
Sophomores: English II or English II (AR) or English II Honors
Juniors: English III-American Literature or English III-American Studies
or Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their school counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

CORE CREDITS

ENGLISH I

Course # 01110

Prereq: None

Level: 9

Credit: 1.0

English I teaches essential written language and communication skills in a program that integrates literary analysis, information literacy, listening skills, problem-solving strategies, teamwork, and multimedia presentations. Students will explore fiction and non-fiction works including short stories, novels, poetry, drama, mythology, and biographies. Information literacy units are taught in conjunction with certified library media specialists and incorporate research skills such as source identification, development of search strategies, attribution, and evaluation of information. The course allows students to express their understanding of important concepts and mastery of skills through discussions, projects, compositions, creative writing, and presentations.

This course fulfills one of two “Intensive Writing” requirement credits. There is required reading during the summer before beginning this course.

ENGLISH I HONORS

Course # 01120

Prereq: Dept. Chairperson

Approval

Level: 9

Credit: 1.0

This course, for the superior academic student, not only incorporates the materials and skills of English I, but also is designed to provide an enriched study of literary forms and purposes, a great variety of student written expression, and more formal oral communication activities. The student will be introduced to the development of literature from its beginnings in the oral tradition to the standard modern literary genres – short story, novel, drama, biography, and poetry. Written assignments stress expository writing, especially mastery of the multi-paragraph essay. More sophisticated grammatical concepts are presented to improve the student’s style of expression. Students perform a variety of speech assignments. A vocabulary text is also included.

This course fulfills one of two “Intensive Writing” requirement credits. There is required reading during the summer before beginning this course.

ENGLISH II

Course # 01210

Prereq: Pass both semesters of English I

Level: 10

Credit: 1.0

A variety of literary works, composition assignments and speaking & listening activities are presented. Within thematic units, various complex texts will be studied and analyzed. Reading comprehension strategies will focus on thoughtful interaction with texts; composition assignments will cover the clear communication of ideas through the multi-paragraph organizational format, although some creative writing may also be expected. Research strategies focused on the access and purposeful use of information are taught and assessed in conjunction with certified library media specialists. Finally speaking and listening activities will stress the importance of collaboration, appropriate modes and mediums and effective communication strategies.

This course fulfills one of two “Intensive Writing” requirement credits. There is required reading during the summer before beginning this course.

ENGLISH II (AR)**Course # 01200A**

Prereq: Pass both semesters of English I & Dept. Chair Approval

Level: 10

Credit: 1.0

Along with following the curriculum of English II, this course also focuses on additional strategies to improve students' academic reading (AR) abilities. Placement in this class is dependent on students' test scores, achievement in English I, and teacher recommendations.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH II HONORS**Course # 01220**

Prereq: English I Honors and/or Dept. Chairperson approval

Level: 10

Credit: 1.0

This course, for the superior academic sophomore student, is a general survey approach to English literature in which major English authors and their representative works are studied. Authors' themes as well as specific literary types are studied: poetry, drama (especially Shakespeare), short story, and novel. Composition skill development is divided between exposition (critical analysis and personal essays) and creative writing. A research paper is also required, a unit taught in conjunction with certified library media specialists. Vocabulary will be studied in the context of the literature.

This course fulfills one of two "Intensive Writing" requirement credits.

There is required reading during the summer before beginning this course.

ENGLISH III – AMERICAN LITERATURE**Course # 01330**

Prereq: Pass both semesters of English II

Level: 11

Credit: 1.0

English III builds on the skills acquired in English I and English II. The course focuses on American Literature and emphasizes outstanding American authors from early to modern times in the genres of fiction, non-fiction, drama, and poetry. In addition, there is a challenging emphasis on grammar, vocabulary, and study skills development. Written work consists of the expository essay and the completion of a college level research paper.

There is required reading during the summer before beginning this course.

AMERICAN STUDIES**Course # 01360**

Prereq: Pass both semesters of English II

Level: 11

Credit: 2.0 one for junior level English; one for U.S. History

This interdisciplinary class is offered for a wide range of junior students who are academically motivated, self-directed, or college bound. The course will take an intensive survey approach to American literature and American history, emphasizing the advantage of seeing the "sense of connectedness" between the history of each era and its relationship to and influence on the art, music, and literature produced during that period. Challenging literary and historical analysis will be pursued throughout the course in lectures, discussions, and writing assignments. In addition, there will be emphasis on vocabulary, study skills, and the development of research expertise. Writing assignments will include the development of literary analysis, expository essays, some creative writing, and independent study towards the research paper. Special projects coordinated between the two disciplines will include the research paper and enrichment field experiences. Reflective of their overall effort and ability to excel in this interdisciplinary environment, students earn a single grade for this two-part course.

There is required reading during the summer before beginning this course.

English Department

ADVANCED PLACEMENT ENGLISH LANGUAGE & COMPOSITION

Course # 01320

Prereq: English II Honors and/or Dept. Chairperson approval

Level: 11

Credit: 1.0

The AP English Language and Composition course “engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer’s purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing” (College Board). Major American authors and their representative works will be studied as students comprehend, analyze, and evaluate American literature that encompasses various time periods and literary movements with a focus on rhetorical analysis. Students will develop stylistic maturity in their prose by enhancing their ability to use writing conventions both appropriately and with sophistication focusing on expository, analytical and argumentative writing. **There is required reading during the summer before beginning this course.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

APPLIED ENGLISH DYNAMICS

Course #01670

Prereq: Director placement

Level: 9, 10 ,11

Credit: 1.0

This course is for students who are reading and writing below grade level. Curriculum is delivered both through scientifically research-based computer programming and teacher facilitated instruction which emphasize basic reading skills, reading comprehension strategies, fluency, vocabulary and writing. In addition, students will participate in various projects that explicitly teach research skills as well as various modes of presentation. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two “Intensive Writing” requirement credits.

APPLIED READING FUNDAMENTALS

Course #01715

Prereq: Director placement

Level: 9

Credit: 1.0

This course is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary. In addition, students are explicitly taught various reading strategies using fiction and non-fiction texts. It is designed as a “blocked” class with Applied English Dynamics for freshmen students that demonstrate a need for direct instruction in reading strategies because their reading skills are below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED ENGLISH 4

Course #01820

Prereq: Director placement

Level: 12

Credit: 1.0

The focus is on development and application of skills needed for success in the work place and community. Skill areas include comprehension of informational texts and ability to communicate in the areas of listening, speaking and writing. This course is for students who are reading and writing below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

FOUNDATIONS ENGLISH

Course #11750

Prereq: Director placement

Level:9,10,11,12

Credit: 1.0

This course explores fundamental elements of reading, writing, listening and speaking skills that can be generalized in various facets of daily life. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

This course fulfills one of two “Intensive Writing” requirement credits.

OPTIONS FOR FOURTH CREDIT

ADVANCED ACTING

Course # 01601

Prereq: Introduction to Theatre Arts or Dept. Chairperson approval

Level: 10, 11, 12

Credit: 0.5

Advanced Acting is a performance-oriented course that gives the student concentrated training in developing various acting styles and performance techniques. In addition, students advance their study of the art of characterization through the development of bodily movement and vocal expression. Students are individually graded on their progress in learning and applying skills through class performance as they relate to the various dramatic forms. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

SPEECH/COMMUNICATION

Course # 01631

Prereq: Pass both semesters of English I

Level: 9, 10, 11, 12

Credit: 0.5

This class is designed to give the student background and experience in the study of public speaking and performance. It provides opportunities for the student to learn organizational speech and writing and research skills, write scripts and speeches, prepare cuttings from the works of noted authors, and evaluate his performance and the performances of others. Students will analyze the work of professional and gifted performers in all areas of communication and performance. Students will also receive instruction and practical experience in a variety of speech forms: oratory, extemporaneous speaking, oral interpretation of literature (both prose and poetry), humorous and dramatic interpretation (individual, duet, and group), and radio and television broadcasting.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LITERATURE & COMPOSITION

Course # 01480

Prereq: AP English

Language & Composition and/or Dept. Chairperson approval

Level: 12

Credit: 1.0

AP English Literature & Composition, "Great Books," focuses on selected major works of Western Civilization in the field of literature, philosophy, political theory, history, theology, and psychology. Required readings in all the genres of fiction include such writers as Joyce, Dante, Austen, Dostoevsky, Shakespeare, and Sophocles and a spectrum of non-fiction: letters, treatises, essays, handbooks, and dialogues by such writers as Mill, Nietzsche, Locke, Epictetus, and Plato. A summer reading list is required. Students read critically and participate actively in the great and continuing conversations on the pivotal human issues found in these classics. Student partners lead discussions according to the Great Books method. Compositions include papers on analysis, synthesis, evaluation, and hypothesis as well as delineation of each author's arguments in non-fiction. Two semester term papers are also required, analyzing, comparing, and contrasting at least three works, two of which are read outside of class. *This course prepares the student for the Advanced Placement exam in May.*

There is required reading during the summer before beginning this course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

English Department

HONORS SEMINAR IN WRITING

Course #01490

Prereq: AP English Language & Composition and/or Dept. Chairperson approval
Level: 12
Credit: 1.0

Honors Seminar in Writing is a class for the intellectually curious who value the power of the written word and are eager to become more sophisticated writers. This year-long course is especially designed for those who have enjoyed the rhetorical nature of AP Language and Composition and are interested in analyzing stylistic elements in professional and personal writing. Students will read texts that are challenging and nuanced and will, in their writing, explore real-world complexities through primary and secondary research. The members of this course are committed to crafting and revising their own nonfiction essays, with the intention of publication. ***There is required reading during the summer before beginning this course.***

NOTE: Students must be concurrently enrolled in AP English Literature and Composition to take this class.

SENIOR COMPOSITION

Course # 01621

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This college bound course is designed for students who wish to improve their critical thinking skills and reading and writing strategies for the heavier demands of college coursework. The topics covered will be literary analysis, reading for the research paper, vocabulary development, and textbook reading strategies. Students will read self-selected novels from a college-bound list.

There is required reading during the summer before beginning this course.

FILM STUDIES

Course # 1451

Prereq: Pass both semesters of English II
Level: 11, 12
Credit: 0.5

Film Studies is a course designed for students who enjoy movies and wish to go beyond merely watching them and into the realm of thinking critically about how they are made. We will consider how directors use sound, lighting, camera movement, and editing in order to create meaning and enjoyment. The students will critique a wide variety of genres, both past and present, and will demonstrate their understanding through engaging class discussions, collaborative projects, and writing, both formal and informal. By the end of the semester, students will grow in their ability to interpret film (as well as written texts) and to appreciate the fascinating world of cinema. ***There is required reading during the summer before beginning this course.***

Although not all movies are shown in their entirety, written permission must be obtained by a parent at the beginning of this course to allow for students to view the R-rated movies associated with this class. At the time of registration, if R-rated movies are to be utilized in whole or in part, a list of these movies will be available through the English department and online.

SCIENCE FICTION

Course # 01431

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This senior elective explores views presented by various science fiction writers. Through this survey of classic and contemporary science fiction, students will consider different attitudes regarding the future of humankind. Along with the reading of novels, students will have a variety of writing experiences including a research paper. Course evaluation will be measured through tests, quizzes, class discussions, three analysis papers, and one research paper. Texts include *Ender's Game*, *The Maze Runner*, *The House of the Scorpion*, and the anthology: *Science Fiction, Science Fact and You*.

There is required reading during the summer before beginning this course.

POPULAR LITERATURE

Course # 01461

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

Designed for college and non-college bound seniors, "Popular Literature" focuses on works of 90s and today, while emphasizing the differences of popular and classical literatures. The origin and dynamic characteristics of this genre in today's society will be analyzed through the reading of class books and literature circles. Types of reading audiences and "requirements" of a popular literature author will also be studied. Students will be required to complete written, oral and group projects in addition to the readings; class discussion will constitute a major portion of the class. Authors to be read and studied may include John Grisham, Harlan Coben, Dan Brown, James Patterson, Patricia Cornwell, Sandara Brown, Stephen King, Danielle Steel, Nicholas Sparks, Mary Higgins Clark, and Tom Clancy. Novels may include *Dark Tower*, *The Notebook*, *The Partner*, *Roses are Red*, *Tell No One*, *Hello Darkness*, *DaVinci Code*, and *Angels and Demons*.

There is required reading during the summer before beginning this course.

CREATIVE WRITING

Course # 01561

Prereq: Pass both semesters of English II

Level: 10, 11, 12

Credit: 0.5

This elective is designed for students who are interested in exploring more creative aspects of their writing and studies of literature. Creative Writing emphasizes an understanding of traditional literary techniques combined with unconventional, individualized forms of speaking and writing to effectively communicate in an interesting way. The class incorporates a wide variety of verbal and written exercises that require a balancing of individual creativity with disciplined focus for success in the course. Time is dedicated to better understanding the creative process and helping students find inspiration to improve all aspects of their writing. In addition to improvisational exercises and participation in writing groups, students complete a portfolio project each quarter that is the culmination of daily journaling and reading assignments. Emphasis will be placed upon both recognizing the elements of style in classical and contemporary authors in selected reading passages and in developing individual style.

There is required reading during the summer before beginning this course.

RHETORIC

Course # 01531

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This elective is designed for college-bound seniors who desire experience in writing. The course develops student writing in freshman college composition classes. Much emphasis is placed upon review of grammatical principles, improvement of vocabulary, and development of an organized, individual writing style. In addition, the student is also required to apply these principles to a research unit and paper. Students use computers to complete their writing and research assignments.

There is required reading during the summer before beginning this course.

HUMANITIES

Course # 02260

Prereq: Average to above average grades. Dept. Chairperson approval.

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

There is required reading during the summer before beginning this course.

English Department

INTRODUCTION TO THEATRE ARTS

Course # 01380

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

Introduction to Theatre Arts is a performance-oriented drama course geared to developing the creative and dramatic talents of individual students. This course uses student acting and teacher-student evaluation as the major teaching method to help the student understand the medium of theatre. It develops sensitivity to the thoughts, beliefs, and ideas of mankind through study, in-class performance, and theatre attendance. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

AFRICAN-AMERICAN LITERATURE

Course # 01471

Prereq: Pass both semesters of English III

Level: 12

Credit: .5

This course explores the African-American experience as reflected in the literature and oral tradition of the community, from the earliest days of our nation to current writers and thinkers. The course will explore not only traditional literary genres such as fiction, poetry, drama, and essays, but also consider areas of film, music, and art as well. Students will study the wide span of the African-American experience from slave narratives to current rap music. Students will also have an opportunity to explore the history and experience of Chicago's African-American experience and literature as a specific focus as well as pursue a major research project on some area of the African-American experience such as a specific author, prominent figure, or essential artistic/cultural movement.

Extensive reading is expected in this class.

JOURNALISM: YEARBOOK

Course # 01400

Prereq: "C" average and

Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Course #01400: This is a writing and production course for students interested in designing a yearbook. The classroom portion of the course emphasizes the mechanics of strong, journalistic writing, strategies for effective communication, digital photography, and graphic design. Researching and interviewing are also covered as students prepare to write stories for the school yearbook, *Vespa*. The student should have above average writing skills. Additional work outside of class is required; the outside assignments may focus on writing, photography, page-layout skills, and the business aspect of the yearbook. Students will also be part of the extra-curricular yearbook activity and must take the course to be eligible for an editor position. Journalism may be repeated for credit with consent of instructor and department chairperson. ***This course does NOT fulfill NCAA initial eligibility requirements for college.***

JOURNALISM: YEARBOOK w/honors option

Course # 01410

Prereq: "C" average and

Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Course #01410 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the book, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

JOURNALISM:
NEWSMAGAZINE
Course # 01370

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course introduces students to the fundamentals of journalism. Emphasis is placed on interviewing, writing, editing, assessing the audience, and meeting deadlines. Units of study include responsibilities and ethics, Associated Press style, interviewing, news writing, feature writing, and page design. All final story assignments must be typed, and the culminating activity is a feature story spread. This course is intended as a practical application of newspaper/newsmagazine news gathering and writing techniques, not as an analysis of the media.

JOURNALISM:
NEWSMAGAZINE
w/honors option
Course #01390

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Course #01390 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the newsmagazine, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

WRITING WORKSHOP
Course # 01611

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for the student with average to below-average writing skills. The course will build upon writing skills learned freshman, sophomore, and junior years and focuses on using word processing as a tool for writing improvement. This course's structure uses a workshop-style format to help students develop basic writing skills such as brainstorming, effective organizational patterns, establishing a purpose, writing to an audience, vocabulary development, and sentence correctness. Some of the writing assignments include, but are not limited to, descriptive writing, personal narratives, and self-reflection. Students will also learn to write for the workplace and will complete a job portfolio.

There is required reading during the summer before beginning this course.

WORLD LITERATURE:
Course # 01571

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors and will take students on a literary tour of locations around the world. The class will focus on novels from a variety of geographic regions and historical time periods, but it will also incorporate other media such as film, food, music, and drama.

There is required reading during the summer before beginning this course.

ORAL INTERPRETATION
Course # 01511

Prereq: Pass both semesters of English I
Level: 9, 10, 11, 12
Credit: 0.5

This one-semester course blends an interest in literature with the ability to perform in front of a small group. Students first learn to analyze selections of their choice from various genres: novel, short story, poetry, and drama. Next, they must interpret and communicate the meaning and mood by the way they use the voice and body in reading aloud the selection. The semester will end with a final group performance of a piece of literature that the teacher will direct.

This class will not be offered in 2017-2018.

English Department

STAGECRAFT

Course # 01521

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.5

This one-semester course strengthens students' knowledge of technical theatre. Participation in set construction after school and with the stage crew outside of class is required. Emphasis is placed on both practical experience and academic learning. One half of the course is geared toward a student in scenic design, a variety of scenic styles, play reading, technical crew positions, lighting and sound design, and make-up and costume design. These assignments include written set designs, written reports on script readings, construction of a set model, construction of a stage manager's prompt book, and test on lighting, sound, costumes, make-up, and staging. The second half of the course involves construction of dramatic production: building flats and major set pieces, painting, shadowing, and stenciling. *This class will not be offered in 2017-2018.*

DEBATE AND WRITING

Course # 01641

Prereq: Pass both semesters of English II

Level: 11,12

Credit: 0.5

Listening, leadership, courtesy, topic analysis, research, evaluation of sources and databases, articulation, and confidence—these are the lifelong skills fostered in Debate and Writing. This course helps students learn to access a range of informational sources available at the Hinsdale South library in order to build arguments about contemporary topics used in debates. Students will participate in formal and informal class discussions, a simulated town meeting, a group discussion panel, debates, current event speeches, and a role play of an individual's life after reading a biography or autobiography. Reading, writing, researching, and active participation are all major components of this course. Because multiple performances will be required during the semester, students should already have a familiarity with and a sense of confidence about public speaking. By the end of the semester, students should feel a sense of mastery at organizing, working cooperatively with others, researching, preparing for, and delivering public performances. *This class will not be offered in 2017-2018.*

INTERVENTION

ACADEMIC READING

Course # A01100

Prereq: Dept. Chairperson recommendation

Level: 9

Credit: 1.0

Academic Reading "AR" is designed for ninth grade students whose standardized test scores demonstrate that they would benefit from direct instruction on reading and vocabulary strategies. Students will complete diagnostic tests in several skill areas at both the beginning and end of the school year to track their growth. The curriculum is comprised of units that address skills that "good readers" internalize including previewing, predicting, summarizing, questioning, and analysis of text structure. In addition to these lessons, students will also receive weekly vocabulary instruction. Finally, students will engage in daily sustained silent reading both inside and outside of class. Comprehension of these novels is assessed both orally and in writing through book talks, presentations, class discussions, journals, projects, more formal writing, and a variety of other authentic assessments. Academic Reading students are simultaneously enrolled in both this course and English I; both classes are taught by the same English teacher. Although both Academic Reading and English I have separate curricula, Academic Reading will include some pre-teaching and re-teaching of skills and strategies taught in English I.

Family & Consumer Sciences

Department Chairperson Mr. Matthew Swedko

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses

Family & Consumer Sciences related careers and the suggested course sequencing:

CAREER	APPLICABLE COURSES
Architect Interior Designer Construction Project Manager Historical Restoration	Architectural Design & Housing
Dietitian Chef/Baker Hotel/Restaurant Management Food Sales and Marketing	Foods & Nutrition Creative Foods Bakery and Pastry Arts Chef & Restaurant
Fashion Designer/Buyer Fashion Display/Illustrator Tailor/Alterations/Seamstress	Fashion Merchandising & Design Creative Sewing Creative Sewing II
Social Worker Teacher Preschool Teacher Child Care Worker	Child Care & Development Understanding Relationships Invitation to Teach

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>
Exploring Family & Consumer Sciences	06500	No	1.0	9-12
Foundations Foods	01722	Yes	0.5	9-12
Applied Social Communication	01860	Yes	.5	9-12
Foods & Nutrition	06501	No	0.5	9-12
Creative Foods	06522	Yes	0.5	9-12

Senior Foods	06541	No	0.5	12

Family & Consumer Sciences

INTERIOR DESIGN & HOUSING

Course #06621

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$10

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Interior Design & Housing is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

This class alternates with Understanding Relationships and will be offered during the 2017-2018 school year. It will not be offered in 2018-2019.

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0 (0.5 Consumer Educ., 0.5 Applied Arts)
Supply fee: \$15

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. ***This course fulfills the state mandate for consumer education*** and also provides one semester credit for Elective Arts. *Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.*

FOUNDATIONS FOODS

Course #01722

Prereq: Director placement
Level: 9, 10, 11, 12
Credit: .5

This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork.

This course may be repeated as necessary.

APPLIED SOCIAL COMMUNICATION

Course #01860

Prereq: Director placement
Level: 9, 10, 11, 12
Credit: .5

The Social Communication class is meant for students who have an identified need in the area of pragmatic language and social interaction skills. The class focuses on explicitly teaching social and emotional vocabulary, problem solving, conversation skills, and other pertinent skills aimed at helping students communicate effectively and appropriately with others. The curriculum is based on Michelle Garcia Winner's Social Thinking approach. The long term goal for the class is to help students learn and utilize social skills so they can be successful in social relationships, classroom environments, and job settings currently and in the future. This course is a pass/fail course.

This will class not be offered in the 2017-2018 school year and will be offered in 2018-2019.

FOODS & NUTRITION

Course #06501

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students **cannot receive credit** for both Foods & Nutrition and Senior Foods. **Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts**

Family & Consumer Sciences

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is an in-depth continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pasta, breads, deserts, and main dishes. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Bakery & Pastry Arts, Chef & Restaurant.

BAKERY AND PASTRY ARTS

Course #06511

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce pastry works of art? Baking and Pastry Arts builds on the skills learned in Foods and Nutrition/Senior Foods, emphasizing student preferences and creativity in the pastry area. Students select and prepare a variety of cookies, cakes, breads, and desserts. Activities focus on European baked products and decorating a cake. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Chef & Restaurant, Creative Foods.

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or Senior Foods AND teacher approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a "mini restaurant" incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques.

While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.

SENIOR FOODS

Course #06541

Prereq: none

Level: 12

Credit: 0.5

Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students **cannot receive credit** for both Foods and Nutrition and Senior Foods

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts.

CREATIVE SEWING I

Course #06542

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student's preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design, Creative Sewing II

Students are required to purchase materials for this class.

Sewing classes alternate with Fashion Merchandising & Design and will be offered during the 2017-2018 school year. They will be not offered in 2018-2019.

Family & Consumer Sciences

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities. **Suggested follow-up class: Fashion Merchandising & Design.**

Students are required to purchase materials for this class.

Sewing classes alternate with Fashion Merchandising & Design and will be offered during the 2017-2018 school year. They will be not offered in 2018-2019.

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today's fashion industry. Activities include style analysis, clothing design, fashion trends and personal selection of fashions. Creative projects involving fashion design/sketching, visual displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

This class alternates with Creative Sewing and will not be offered during the 2017-2018 school year. It will be offered in 2018-2019.

CHILD CARE & DEVELOPMENT

Course #06581

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in preschool or elementary education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children's toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children.

Suggested follow-up class: Invitation to Teach or Understanding Relationships.

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none

Level: 11, 12

Credit: 0.5

This course encompasses "a slice of life" and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Care & Development

This class alternates with Interior Design & Housing and will not be offered during the 2017-2018 school year. It will be offered in 2018-2019.

INVITATION TO TEACH

Course #06595

Prereq: Students signing up for Invitation to Teach will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing.

Previously taken or concurrent enrollment in Child Care & Development is recommended

Level: 12

Credit: 1.0

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible

INVITATION TO TEACH w/Honors Option

Course #06585

Prereq: Students signing up for Introduction to Teaching w/Honors Option will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing.

Previously taken or concurrent enrollment in Child Care & Development is recommended

Level: 12

Credit: 1.0

Course #06585 w/honors option: Invitation to Teach w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects may include creating classroom teaching tools, research, tutoring, or interviews. Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible.

Mathematics Department

Department Chairperson
Mrs. Kerin Sancken

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become problem solvers, productive citizens, and lifelong learners. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

**GRAPHING CALCULATORS ARE REQUIRED FOR
ALL MATH AND SCIENCE COURSES.**

**Suggested calculators: Texas Instruments TI 83, TI 83+, TI 84, TI 84+
Casio 9750, Casio 9860, Casio Prizm**

THE FOLLOWING ARE NOT ALLOWED: TI-Inspire CAS or TI-89.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I or Algebra II in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Please see Course Description for detailed Prerequisites.

Mathematics Department

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content.

Colleges require at least Algebra, Geometry and Algebra II/Trig for admission and may also require a 4th year Math course.

** This course requires Department Chair approval for registration

FOUNDATIONS MATH

Course #11760

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course explores fundamental math concepts that can be generalized in various facets of daily life. Curriculum includes problem solving and computations, money and number sense, and basic estimation and measurement. Basic analytical methods, geometry and data analysis are also emphasized. *This course can be taken multiple times with department chair approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. This course fulfills the Algebra I and Geometry content requirements.*

Mathematics Department

APPLIED MATH

Course #01700

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students performing significantly below grade level in math. A variety of practical topics are covered such as basic probability, creating and interpreting graphs, formulas, fractions, percent's, measurement, perimeter, basic geometry, consumer skills, and basic algebra. Students will be prepared to enter the Applied Consumer Math 1 course sequence or an Algebra 1 course within the mathematics department. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. **This course fulfills the Algebra I and Geometry content requirements.***

APPLIED CONSUMER MATH 1

Course #01740

Prereq: Director placement

Level: 10,11

Credit: 1.0

Students that take this course are looking to gain knowledge and mathematical skills for everyday life. This course will guide students through tackling consumer math scenarios. It is designed for students performing significantly below grade level in math. *Curriculum in this course is a modification of the grade level standards but is aligned to the New Illinois Learning Standards.*

APPLIED CONSUMER MATH 2

Course #01750

Prereq: Director placement

Level: 11,12

Credit: 1.0

This course continues the work started in the Applied Consumer Math 1. The course targets continued acquisition of basic mathematical knowledge and skills. Students will practice independently applying problem solving skills in consumer and everyday scenarios. *This course can be taken multiple times with department chair approval. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

ALGEBRA I

Course #03110

Prereq: Recommendation of 8th grade teacher and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are equations and inequalities, linear and quadratic functions, systems of equations, exponents, polynomials, and introductory statistics. Real world applications are also explored. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I ALGEBRAIC REINFORCEMENT (AR)

Course #A03110

Prereq: Recommendation of 8th grade teacher, MAP scores

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed to support students enrolled in Algebra 1 by providing them additional instruction, individualized practice, and support. It is for the student with skill deficiencies in mathematics as identified by the MAP test. Students will use computer software to assist in remediating the skill deficits. *A graphing calculator is required for this course.*

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and MAP Test Score

Level: 9, 10, 11, 12

Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 examines the first semester of Algebra 1 placing emphasis on manipulating variable expressions and enhancing numerical fluency. Core topics include: expressions, equations and inequalities, representing functions, emphasizing linear functions. This class establishes the foundational skills necessary for success in future mathematics classes and uses computer software to address skill deficits identified on the MAP test. *A graphing calculator is required for this course. **This course in conjunction with Algebra I Part 2 fulfills the Algebra I requirement.***

Mathematics Department

ALGEBRA I Part 2

Course #03130

Prereq: Algebra 1 Part 1

Level: 9, 10, 11, 12

Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 addresses linear and nonlinear functions, polynomials, exponents, systems, and statistics. Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course. **This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement. Most students will take this class in conjunction with Geometric Analysis.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra 1 at the high school

Level: 10, 11, 12

Credit: 1.0

Geometry focuses on plane geometry, properties of lines, angles, triangles, quadrilaterals, and circles. It continues the use of algebra in geometric situations and calls on the power of logic and proof. Special attention is given to the concepts of congruence, perpendicularity, parallelism, area, similarity, coordinate geometry, right triangle trigonometry, and deductive reasoning. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I or Integrated Algebra & Geo at the High School or 8th grade teacher rec + mastery of the algebra skill sheet, Dept. Chairperson Approval.

Level: 9, 10

Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in Geometry (Course #03210), but with more depth. This course provides an in-depth study of Euclidian geometry. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. Students are expected to apply their knowledge to different situations. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I AR, Identified deficiencies from Freshman MAP tests, semester exams and teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

This course deals with the same topics of Geometry (Course #03210) with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

ALGEBRA II / TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

Algebra 2 Trigonometry continues the study of linear functions, topics explored in Algebra and Geometry. It introduces the complex number system and non-linear function families: polynomial, exponential, logarithmic, radical and rational functions. Functions are applied to Trigonometry and a foundation in statistics are introduced so students can explore these topics the following year of mathematics. *A graphing calculator is required for this course.*

ALGEBRA II / TRIGONOMETRY HONORS

Course # 03320

Prereq: B or better in Geometry Honors or 8th grade teacher rec + mastery of the algebra skill sheet, Dept. Chairperson Approval.

Level: 9, 10, 11

Credit: 1.0

This course deals with the topics of Algebra II / Trigonometry (Course #03310) in more depth, emphasizing the function approach and applications. Particular attention will be given to the nature of a mathematical system. *A graphing calculator is required for this course.*

Mathematics Department

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and Identified deficiencies on semester exams, MAP test, and teacher recommendation.

Level: 11, 12

Credit: 1.0

This course deals with the same topics of Algebra II / Trigonometry (Course #3310). Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/ Trigonometry Honors or A in Algebra II/Trigonometry and Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Precalculus Honors treats the topics of Precalculus (Course #03400) in greater depth, emphasizing precision and the communication of ideas. Additional topics of probability, sequences, and limits are addressed. *A graphing calculator is required for this course.*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II/Trigonometry or Algebra II/ Trigonometry Honors or

Level: 10, 11, 12

Credit: 1.0

This course is a study of functions and their applications. It extends the topics of Algebra II / Trigonometry and adds conic sections, parametric equations, polar coordinate system, and trigonometric functions. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT CALCULUS AB

Course # 03420

Prereq: Successful completion of Precalculus or Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT CALCULUS BC

Course # 03430

Prereq: Precalculus Honors

Level: 10, 11, 12

Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, infinite series, and two dimensional vectors. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/ Trigonometry (any level) and Department Chairperson

Level: 10, 11, 12

Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

Mathematics Department

STATISTICS & COLLEGE PREP MATH

Course # 03470

Prereq: C or better in Alg II/ Trigonometry (any level) and Department Chairperson Approval.

Level: 12

Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course also helps students prepare for college entrance math exams. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2 Trigonometry and Department Chairperson approval

Level: 10, 11, 12

Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses. Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT COMPUTER SCIENCE PRINCIPLES

Course # 03520

Prereq: Algebra 1 and Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is an entry level AP course which presents concepts and computational thinking practices that are central to the computer science discipline. It provides an introduction to the rapidly expanding field of computer technology while focusing on using technology in creative, meaningful ways.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

MATH TOPICS HONORS

Course # 03511/03512

Prereq: Department Chairperson approval and Sponsoring Teacher

Level: 11, 12

Credit: 1.0

Math Topics is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course. This course may be taken for a full year or just one semester.

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: Advance Placement Computer Science A, Department Chairperson approval & Sponsoring Teacher

Level: 11,12

Credit: 0.5

Math Topics Computer Science Honors is for students who have completed Advanced Placement Computer Science A and would like to continue their studies in the Computer Science field. Students will complete independent study projects under the supervision of a sponsoring teacher. Students must find a sponsoring teacher in order to sign up for this course. This course may be taken for a full year or just one semester.

Department Chairperson Mr. Patrick Maag

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

JAZZ BAND / JAZZ ENSEMBLE

Course #05600

JAZZ BAND HONORS

Course #05630

--See Honors Requirements--

Prerequisites: Audition required and concurrent registration in a band class (exceptions made for piano, bass and guitar).

Level: 9-12

Credit: 1.0

The Jazz Ensemble is the top auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles and frequently perform. Enrolled students should have a good understanding of scale and chord theory and must be comfortable practicing improvisation. This class meets every other day during the "Early Bird" Period 0.

The Jazz Band is an auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles. The class develops an understanding of scale and chord theory and encourages improvisation. CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. *Call 630-468-4151 to schedule an audition.*

Level: 9-12

Credit: 1.0

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. See page 15 for details. Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. *Call 630-468-4151 to schedule an audition.*

Level: 10, 11, 12

Credit: 1.0

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. See page 15 for details. Please complete P.E. waiver form and return to your counselor during registration.**

WIND SYMPHONY HONORS

Course #05880

Prereq: Audition by High School Band Director. *Call 630-468-4151 to schedule an audition.*

Level: 10, 11, 12

Credit: 1.0

The Wind Symphony is an auditioned concert band made up of a limited number of flute, oboe, clarinet, bassoon, saxophone, trumpet, horn, trombone, baritone, and tuba players. Enrolled students must be proficient at reading and performing music and must meet honors credit requirements. Students will frequently perform advanced standards and the latest compositions of contemporary wind band literature. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. See page 15 for details. Please complete P.E. waiver form and return to your counselor during registration.**

CONCERT PERCUSSION ENSEMBLE

Course #5750

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

The Concert Percussion Ensemble is an entry level class for students interested in performing band music on percussion instruments and drum set. In addition to performing as a percussion ensemble, students will also prepare standard band literature to perform with the wind players in other band classes. Enrolled students will learn the basics of music reading and percussion technique.

Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. See page 15 for details. Please complete P.E. waiver form and return to your counselor during registration.

SYMPHONIC PERCUSSION ENSEMBLE

Course #05660

SYMPHONIC PERCUSSION ENSEMBLE HONORS

Course #05760

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. Call 630-468-4151

to schedule an audition.

Level: 9, 10, 11, 12

Credit: 1.0

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests.

Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. See page 15 for details. Please complete P.E. waiver form and return to your counselor during registration.

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Finale* using Yamaha Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for the serious piano student who wants to learn how to improve piano performance, compose and perform original compositions. Students learn to use music writing programs like *Sibelius*, *Finale*, *Band in a Box* and *Cakewalk* using Yamaha synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students may enter competitions with songs they create and additional performance opportunities may be available.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

This course alternates yearly with AP Music Theory and is not offered during the 2017-2018 school year. It will be offered during the 2018-2019 school year.

Music Department

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students who are going to take the AP Music Test in May. Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are required to take the AP Music Test in May. Students will use the music theory learned to compose chorales, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using music composition software.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

This course alternates yearly with Advanced Piano and is offered during 2017-2018 school year.

ORCHESTRA

CONCERT ORCHESTRA

Course #05780

CONCERT ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Audition by High School Director.

Call 630.468.4151 to schedule an audition or get director approval.

Level: 9, 10, 11, 12

Credit: 1.0

The Concert Orchestra is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700

Level: 9, 10, 11, 12

Credit: 1.0

TREBLE CHORUS HONORS

Course #05890

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade females and to all other grade levels who have not participated in vocal music at school before.

BASS CHORUS**Course #05710**

Level: 9, 10, 11, 12

Credit: 1.0

BASS CHORUS HONORS**Course #05720**

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals. **Prerequisite: None. Open to all ninth grade males and to all other grade levels who have not participated in vocal music at school before.**

VARSITY TREBLE CHORUS**Course # 05800****VARSITY TREBLE CHORUS HONORS****Course #05850**

--See Honors Requirements--

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to females in grades 10, 11, and 12.

VARSITY BASS CHORUS**Course # 05860****VARSITY BASS CHORUS HONORS****Course #05870**

--See Honors Requirements--

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Varsity Bass Chorus is the intermediate bass choir ensemble for Sophomore, Junior, and Senior male singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to males in grades 10, 11, and 12.

BELLA VOCE CHORUS**Course # 05730****BELLA VOCE HONORS****Course # 05740**

--See Honors Requirements--

Prereq: Audition Required

Level: 11, 12

Credit: 1.0

Bella Voce is the top auditioned women's music ensemble for junior and senior female singers with previous musical experience. Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Prior high school choir experience and director approval. Top-level choir, open to females in grades 11, and 12.

MADRIGALS/JAZZ CHOIR**Course # 05830****MADRIGAL/JAZZ HONORS****Course # 05840**

---See Honors Requirements--

Prereq: Audition Required

Level: 11, 12

Credit: 1.0

Madrigals/Jazz Choir is a full-year course for selected 11th, and 12th grade students, which will focus on the performance of the Madrigal Show in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Madrigal students are also required to learn and perform the repertoire of the varsity choirs.

Prerequisite: Director approval. Top-level choir, open to grades 11, and 12.

Music Department

HONORS STUDY IN MUSIC

Students will have the opportunity to qualify for honors study in any advanced music class. Selections will be the *Illinois Music Educators Association* audition music, which can be obtained from the instructors in June of each year. Honors selection will be based on the IMEA material performed during the third week of September. ***Please read the section below for more information on requirements.***

REQUIREMENTS FOR HONORS STUDY

Advanced students in any Band, Choir or Orchestra may audition for the honors level of that ensemble. *These students will, as part of the requirements, remain as members of their curricular ensemble and fulfill all obligations of that ensemble.* In addition, students will be required to perform the following activities:

1. Students must audition (if selected) for the ILMEA District Festival on the State Audition material. This audition will be held in October at a local high school.
2. Private lessons once a week for thirty minutes. The number of lessons per quarter will be one less than the number of weeks in the Quarter. For example, if we have ten weeks in one quarter the students must take nine lessons during that quarter. Students will be responsible for turning in the completed lesson form signed by the private teacher. The teaching staff will approve the private teachers each year.
3. Two solo performances. One will be an Honors Recital scheduled by Director, which will be open to the public. Instrumentalists will perform a major solo work with piano accompaniment. Vocalists must perform at least two songs, one in a foreign language. The recital will be a graded event. Students will be given a set of guidelines before the event, which will be used to assess the performance. Students must show the director the solo selected to check for level of difficulty and appropriateness at least four weeks before the performance.
4. In addition, by November, each student will turn in a 1000 word paper (typed, double spaced) about the selection they are performing. The research paper should cover the composer and his works, historical perspective, as well as the repertoire being performed. Students must use proper format as well as a minimum of five sources with a maximum of two Internet sites.
5. A second performance of a different solo will be in March at the Illinois High School Association State Solo and Ensemble contest for all band students, and a Vocal Solo Contest will be scheduled in the spring. The directors of the honors students will grade the solo and the performance before the contest. Then the students will perform the same solo for the state judge who will rate and make written comments and suggestions. The importance of this experience is that the student receives an outside critique of his/her playing/singing ability and can be better prepared for college auditions, which will be very similar to the this solo experience.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs. Per the mandate House Bill 5391 all students in grades 3-12 will complete fitness testing and data will be reported to the Illinois State Board of Education. Per Board Policy 6:310, some students may qualify for an exemption from their PE course (see page 15 for details).

Physical, Health, & Driver Education

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.** Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws.

In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.

HEALTH EDUCATION: Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)

Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

Students electing to enroll in summer school Health Education will be placed in Physical Education for both semesters in order to be compliant with the mandated daily physical education requirement.

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

With Director approval, the Adaptive PE course (07901/#07902) can be taken for Foundations Health credit (#11701).

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information.

ADVANCED HEALTH

Course #07511

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Any students may see the teacher should they have questions on taking the course for honors credit.

Department Chairperson Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

Science Department

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Colleges expect to students have had successfully experienced the physical sciences (Physics/GeoPhysics and Chemistry) and the life sciences (Biology) while in high school. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, reading, and writing.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- Hinsdale South also offers a variety of electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base. Electives can be taken concurrently with core courses.

CORE & ELECTIVE COURSES

FOUNDATIONS SCIENCE

Course #11770

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students will investigate key elements of physical and social wellness that can be generalized in various facets of daily life, including proper nutrition, sleep, self-care and exercise. They will explore the benefits of leisure activities and socialization. Students will also explore fundamental concepts, principles and interconnections of the life, physical and earth sciences. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This course will be offered during the 2017-2019 school year; it will not be offered during the 2018-2019 school year.

APPLIED EARTH SCIENCE

Course #01730

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: earth, moon, and solar system; stars and galaxies; weather, climate, and the earth's atmosphere; weathering and erosion and forces in the earth. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will not be offered during the 2017-2018 school year; it will be offered during the 2018-2019 school year.

APPLIED BIOLOGY

Course #01830

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: classification of living things, plants, animals, ecology, the human body and health. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will be offered during the 2017-2018 school year; it will not be offered during the 2018-2019 school year.

GEOPHYSICS

Course # 03640

Prereq: For students recommended for Algebra 1 or lower **OR** for students recommended for "Integrated Algebra and Geometry" who have not mastered HSHS algebra skill sheet

Level: 9 (higher with recommendation)

Credit: 1.0

This course combines Earth Science content and explores the Physics that underlie observable phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, history of the Earth, velocity, acceleration, waves, energy, forces, magnetism, and atomic structure. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. *This course is also offered in an Academic Reading (AR) format (#03610A) for students who need extra assistance in reading comprehension.*

PHYSICS HONORS

Course #03920

Prereq: For students recommended for "Integrated Algebra and Geometry" or higher **AND** who have mastered the HSHS algebra skill sheet.

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging.

Science Department

CONCEPTS IN CHEMISTRY

Course # 03850A

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered, including the nature of science, atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students who need targeted assistance in mathematics and does not serve as a prereq for AP science courses. *This course provides assistance in reading comprehension.*

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit, successful completion of Algebra I or higher; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered and include the nature of science and chemistry, atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability (enrolled in Geometry or higher) and serves as a prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level understanding is expected, and problem-solving will be more challenging. This course is appropriate for students with above-average math abilities.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11

Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include scientific method, cellular and molecular biology, ecology, evolution, biochemistry, plants and body systems.

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level) and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12

Credit: 1.0

This math-intensive course (requires strong Algebra I skills) is for students who took GeoPhysics as freshmen but who would like to take a full physics course to better prepare them for college. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy and waves.

EARTH SCIENCE

Course # 03620

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.

Level: 11, 12

Credit: 1.0 or 0.5 each semester

This course covers Earth Science topics not covered in our GeoPhysics course, such as Earth's natural resources, climate, and surface processes, as well as astronomy topics such as the solar system and the universe, stellar evolution, telescopes, calendars, supernovae, stellar distances and motion, blackholes, stars, and galaxy formation. Students can elect to take the fall semester only, the spring semester only, or both semesters.

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Biology and Chemistry (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

This course develops students' understanding of the workings of the human body. Dissections, including various cow organs and joints and a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry, Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Biology covers two semesters of college-level biology, and applies previous knowledge to topics as designated by the College Board curriculum, such as biochemistry, cellular biology, molecular biology, phylogeny, and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology or AP Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry covers two semesters of college-level chemistry, and applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics and thermodynamics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology or AP Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Environmental Science covers one semester of college-level environmental science, and explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT PHYSICS 1

Course #03910 (11,12)

Prereq: Chemistry and Biology completed or concurrent; Alg II or higher completed or concurrent with strong math grades; cannot have taken Physics Honors; Teacher or Dept. Chairperson approval.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics 1 is equivalent to a first-semester college-level Algebra-based physics course. Topics include motion, work, energy, forces, rotation, momentum, power, waves, sound, and electromagnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT PHYSICS 2

Course #03950

Prereq: AP Physics 1; Teacher recommendation

Level: 12

Credit: 1.0

Advanced Placement Physics 2 is equivalent to a second-semester college-level Algebra-based physics course. Topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic/nuclear physics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: Concurrent with Calculus or higher; Completion of Physics, Chemistry, and Biology (may be taken concurrently with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics C is equivalent to two-semester of college-level calculus-based physics course. Topics include in-depth investigations into mechanics, electricity and magnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

Science Department

AP CAPSTONE PROJECT

AP SEMINAR: SCIENCE

Course #03760

Prereq: Successful completion of two years of science; can be concurrent with the second year; cannot displace Biology.

Level: 10, 11, 12

Credit 1.0

AP Seminar: *Science* has a disciplinary focus which engages students in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Throughout the course, students will collaborate on group scientific research assignments, complete individual science research and present and defend their conclusions. The course aims to equip students with the power to analyze and evaluate information with accuracy and precision in order to craft and communicate evidence-based arguments.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

This course is a prerequisite course for AP Research. Students who successfully complete both AP Seminar and AP Research will receive either an AP Certificate or AP Diploma depending on the number of AP courses they have completed. See Page 7 for details regarding AP Capstone.

Depending on enrollment, this course may be conducted at Hinsdale Central High School during 1st or 10th period.

AP RESEARCH: SCIENCE

Course #03770

Prereq: AP Seminar: Science

Level: 11, 12

Credit 1.0

AP Research: *Science* engages students to explore an academic topic, problem, or issue that interests them and with the assistance of a research advisor/mentor, design, plan, and conduct a year-long research-based investigation to address it. Students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question.

Upon successful completion of this course, students are assessed on the academic paper and presentation and oral defense of research which is submitted to College Board for evaluation and scoring to determine the AP grade. See Page 7 for details regarding AP Capstone.

Depending on enrollment, this course may be conducted at Hinsdale Central High School during 1st or 10th period.

Department Chairperson Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

SOCIAL STUDIES: GENERAL INFORMATION

- House Bill 4025 stipulates that at least one semester of a high school student's mandated two-year social studies graduation requirement in Illinois must be a civics course. The bill was amended by House Bill 800, which states that the requirement is effective immediately for "students entering the 9th grade in the 2016-2017 school year and continues each school year thereafter." **District 86 Board of Education Policy 6:300** complies with this legislative mandate by stating that students attending District 86 schools must earn two credits in Social Studies for graduation with one credit in US History and one credit in World Cultures or World Studies Honors (unless waived by the Principal for academically at-risk students). In addition to earning these two Social Studies credits, beginning with the Class of 2020, students must also take and pass a Civics course.
- All Social Studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Social Studies AP and Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.

<p><u>WORLD CULTURES</u> Course # 02470 Prereq: None Level: 9 Credit: 1.0</p>	<p>An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.</p>
<p><u>WORLD STUDIES HONORS</u> Course # 02390 Prereq: Dept. Chairperson Recommendation Level: 9 Credit: 1.0</p>	<p>An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. <i>Students are prepared to take Advanced Placement courses.</i></p>
<p><u>WORLD CULTURES (AR)</u> Course # 02460A Prereq: Dept. Chairperson Recommendation Level: 9, 10 Credit: 1.0</p>	<p>An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized, with additional focus on reading strategies. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.</p>
<p><u>ADVANCED PLACEMENT EUROPEAN HISTORY</u> Course # 02520 Prereq: Recommendation of World Studies teacher and Dept. Chairperson approval. Level: 10 Credit: 1.0</p>	<p>This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture.</p> <p><i>Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).</i></p>

Social Studies Department

AFRICAN-AMERICAN HISTORY

Course # 02331
Prereq: None
Level: 10, 11, 12
Credit: 0.5

An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.

GEOGRAPHY

Course # 02501
Prereq: None
Level: 10, 11, 12
Credit: 0.5

An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.

PSYCHOLOGY I

Course # 02431
Prereq: None
Level: 10, 11, 12
Credit: 0.5

An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

PSYCHOLOGY II

Course # 02462
Prereq: Psychology I (above average grades) and Dept. Chairperson approval.
Level: 10, 11, 12
Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY

Course # 02510
Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ADVANCED PLACEMENT PSYCHOLOGY "RISE"

Course # 02530
Prereq: Dept. Chairperson approval
Level: 10, 11, 12
Credit: 1.0
Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

Social Studies Department

SOCIOLOGY

Course # 02381

Prereq: None

Level: 11, 12

Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

AMERICAN POLITICS

Course # 02351

Prereq: None

Level: 10, 11, 12

Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

UNITED STATES HISTORY

Course # 02310

Prereq: None

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Transfer students who have not previously done so must pass a test on the Illinois and U.S. Constitutions as a requirement for graduation. In U.S. History students satisfy Illinois requirements for study of the Declaration of Independence, United States Constitution, Illinois State Constitution, and Flag Code. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation.

AMERICAN STUDIES

Course # 01360

Prereq: None

Level: 11

Credit: 2.0 (one in English;
one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

ADVANCED PLACEMENT

U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson
approval

Level: 11

Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. A test on the Illinois and U.S. Constitution is offered to satisfy the graduation requirement. *This course will prepare students for the Advanced Placement exam in May.* **Students enrolling in AP US History will not be able to drop to regular U.S. History or American Studies in the same school year.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

ECONOMICS

Course # 02341

Prereq: Average or above
average grades

Level: 10, 11, 12

Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity.

This course fulfills the state mandate for consumer education.

Social Studies Department

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361

Prereq: Teacher
recommendation

Level: 11, 12

Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The course will examine the role the U. S. government should play in regulating the American economy and the wages workers should receive for different jobs. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).*

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372

Prereq: Teacher
recommendation

Level: 11, 12

Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** This course is offered second semester only. Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).*

PHILOSOPHY & ETHICS

Course # 02541

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course is to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions. *This class will not be offered in the 2017-2018 school year.*

CONSTITUTIONAL LAW

Course # 02551

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, and the American jury system. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, students try a case for their final exam.

EAST ASIAN STUDIES

Course #02411

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Asian Studies will examine the history and culture of China, Japan and Korea. Possible topics of study include the Samurai and code of Bushido, the emergence of Japan as a colonial power, the Rape of Nanking, the Korean War, the development of nuclear weapons by North Korea, and the emergence of China as a 21st century global superpower. The course is project, writing, and discussion oriented complimented with a field trip and experiential learning. Students will be challenged to avoid ethnocentrism and to understand these civilizations from the perspective of the people who came from them. *This class will not be offered in the 2017-2018 school year.*

Social Studies Department

GLOBAL ISSUES

Course #02421

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Global Issues examines several major contemporary political, social, and diplomatic dilemmas of the 21st century. After tracing the historical roots of contemporary issues, students will analyze and evaluate each issue from a variety of perspectives. Possible topics include the proliferation of nuclear weapons, human rights and genocide, democracy and dissent, the future of the Middle East, the "war on terror," U.S. foreign policy since Vietnam, and major domestic challenges. Active student participation on a daily basis and developing written and oral arguments are major components of a student's grade.

ADVANCED PLACEMENT GOVERNMENT & POLITICS, U.S.

Course # 02451

Prereq: Dept. Chairperson approval
Level: 11, 12
Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

HUMANITIES

Course # 02260

Prereq: Average to above-average grades and Dept. Chairperson approval
Level: 12
Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

FOUNDATIONS SOCIAL STUDIES

Course #11780

Prereq: Director placement
Level: 9,10,11, 12
Credit: 1.0

The goal of this course is to develop in students an understanding of citizenship that can be generalized in various facets of daily life. Students will sharpen their basic understanding of history, government and social systems through the exploration of current and historical events. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course. This will not be offered during the 2017-2018 school year, and will be offered in 2018-2019.*

Technology Center of DuPage

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190

(630) 620-8770

www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement. Some TCD programs can be utilized to fulfill the math or science high school graduation requirements. Students should see their counselor for additional information.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Mr. Matthew Swedko

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Description for detailed prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>
Pre-Engineering I	06741	No	0.5	9-12
Pre-Engineering I w/honors option	06731	Yes	0.5	9-12

Woods II	06780	Yes	1.0	10-12
Woods III	06790	Yes	1.0	11-12

PRE-ENGINEERING I

Course #06741

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING I

w/honors option

Course #06731

Prereq: Teacher approval

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I

Level: 9, 10, 11, 12

Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

PRE-ENGINEERING II

w/honors option

Course #06761

Prereq: Pre-Engineering I &

Teacher approval

Course #06751 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

Technology Education Department

ARCHITECTURE & DESIGN

Course #06730

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Course #06730: This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ARCHITECTURE & DESIGN

w/honors option

Course #06710

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 1.0

Course #6710 w/honors option: The core material for this course is similar to Architecture & Design course #06730, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program or architecture program.

ENGINEERING & DESIGN

Course #06721

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 0.5

Course #06721: This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

ENGINEERING & DESIGN w/honors option

Course #06711

Prereq: Pre-Engineering II

Level: 10, 11, 12

Credit: 0.5

Course #06711 w/honors option: The core material for this course is similar to Engineering & Design course #06711, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

Course #06700

Prereq: Architecture & Design or Architecture & Design w/honors option **and** Engineering & Design or Engineering Design w/honors option.

Level: 11, 12

Credit: 1.0

Course #06700: This is the culminating course in our Technology Education program. Students will have additional challenges as they are introduced to several 3D modeling software programs. Students will be required to use the skills learned in both their engineering and architecture courses as they make the transition from 2D to 3D.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

w/Honors Option

Course #06720

Prereq: Architecture & Design or Architecture & Design w/honors option **and** Engineering & Design or Engineering & Design or Engineering Design w/honors option.

Level: 11, 12

Credit: 1.0

Course #06720 w/honors option: The core material for this course is similar to Advanced Engineering and Architectural Modeling, however, projects and assessments will involve more depth, complexity, and rigor.

Technology Education Department

WOODS I

Course #06771

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$45

Course #06771: This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

WOODS II

Course #06780

Prereq: Woods I & teacher approval

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$125

Course #06780: This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval

Level: 11, 12

Credit: 1.0

Course #06790: This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Fran Mirro

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of foreign cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows evermore interdependent. A four-year sequence of honors level courses is available in all languages offered by the department.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. In accordance with board policy 6:320, students who enter high school in Level 2 of any language course can opt-in to receive 1.0 proficiency credit upon earning a C or higher in the Level 2 language course. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed Prerequisites.

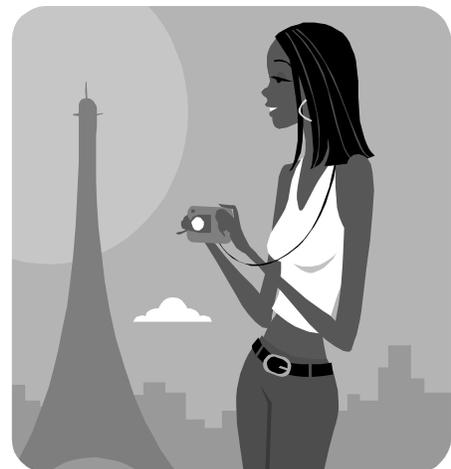

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

World Languages Department

HINSDALE SOUTH HIGH SCHOOL WORLD LANGUAGES DEPARTMENT

Two credits of Elective Arts are required for graduation. World Languages are considered one of the Elective Arts. However, only one credit in World Languages may be applied to this graduation requirement. Some colleges require 2 years of the same World Language for college entrance and admission consideration. Entrance into our Honors programs requires department chair approval.

In addition to French, German, Latin and Spanish, students can also enroll in American Sign Language courses.

GERMAN

GERMAN I

Course # 04200

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

German I is an introduction to the German language and culture. An intensive listening and speaking experience, based on everyday situations is provided. Students will learn the basic sounds of the language, pronunciation, grammar, vocabulary, and sentence patterns. Active reading and writing are introduced. Language skills and an understanding of the German people are obtained from the study of folk tales, recipes, songs, videos, and introductory reading from newspaper.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. In addition to the content of the German I course, students will be involved in higher level learning activities in listening, speaking, reading, and writing as a required part of the course. Additional enrichment reading assignments, projects, and presentations are integrated in the form of simple narratives, fairy tales, songs, and poems.

GERMAN II

Course # 04220

Prereq: "C" in German I

Level: 10, 11, 12

Credit: 1.0

German II provides a continuation of the skills learned in German I with an emphasis on communication and culture, while writing skills and practical vocabulary are greatly increased. Writing and performing skits gives the students the chance to "live" the language and an opportunity to more fully enjoy listening to and speaking German.

GERMAN II HONORS

Course # 04270

Prereq: "A" in German I or "B" in German I with Dept. Chairperson approval, or "C" in German I Honors

Level: 10, 11, 12

Credit: 1.0

In addition to the content of the German II course, German II Honors emphasizes higher level learning in listening, speaking, reading and writing. More advanced vocabulary and grammar structures will be studied, as well as German culture, customs, and history. Students are challenged by the addition of reading selection and urged towards mastery in communication skills

GERMAN III

Course # 04280

Prereq: "C" in German II

Level: 11, 12

Credit: 1.0

German III continues to emphasize communication skills, grammatical structures and a cultural approach. Students will increase their reading skills and vocabulary by reading short stories and a selection of poetry. Individualized study projects are integrated as well.

GERMAN III HONORS

Course # 04230

Prereq: "A" in German II or "B" in German II with Dept. Chairperson approval, or "C" in German II Honors

Level: 11, 12

Credit: 1.0

In this course previously learned skills are enhanced. Advanced vocabulary and grammar are studied along with short stories, cultural readings and selections from newspapers and classical literature. A thematic approach is used to integrate advanced learning in speaking, writing and active listening. Individualized study projects are pursued. Students will gain cultural understanding through excerpts from history, art, music, literature, geography, and films. Students are encouraged to begin to prepare for the Advanced Placement Exam in German.

GERMAN IV

Course # 04290

Prereq: "C" in German III

Level: 11, 12

Credit: 1.0

German IV will continue the reading, grammar, listening, and composition writing in German. It will emphasize verbal and written communication and present selections from literature, art, music, science, history, and films. Students enrolled in the class are encouraged to prepare for College Placement tests.

World Languages Department

ADVANCED PLACEMENT GERMAN LANGUAGE

Course # 04240

Prereq: A" in German III "B" in German III with Dept. Chairperson approval, or "C" in German III Honors
Level: 11, 12
Credit: 1.0

Advanced Placement German Language is the fourth course in the German sequence and is a college level course requiring the ability to work independently on a college level. This class emphasizes higher level learning skills in order to increase the student's reading rate and comprehension. Through the reading of literary masterpieces the student is enriched in his personal life as well as in his understanding of contemporary and historical Germany. Individual study projects are pursued.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

GERMAN V HONORS

Course # 04260

Prereq: "A" or "B" in German IV or Depart. Chairperson approval or "C" in Adv. Placement German Language
Level: 12
Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language, since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors
Level: 9, 10, 11, 12
Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: "C" in Latin I
Level: 11, 12
Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

LATIN II HONORS

Course # 04350

Prereq: "B" in Latin I Honors or "A" in Latin I
Level: 10, 11, 12
Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

ADVANCED PLACEMENT LATIN

Course # 04360

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

Students in this course will read Vergil's epic poem, *The Aeneid and Caesar's Gallic War*. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry and prose style. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire. *This course alternates yearly with Latin Literature Honors and it will be not offered in 2017-2018. It will be offered in 2018-2019.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

LATIN LITERATURE HONORS

Course # 04370

Prereq: Successful completion of a Latin II

Level: 11, 12

Credit: 1.0

This course is designed to solidify students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Cicero, Ovid, Catullus, and others. Students will be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the students' exploration of ancient culture and society. *This course alternates yearly with Advanced Placement Latin and will be offered 2017-2018.*

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: "C" in the World Language most recently studied

Level: 10, 11, 12

Credit: 0.5

This course is designed to increase knowledge and understanding of English vocabulary. Students learn to discover meanings of words through recognition and interpretation of their elements. Supplementary activities add variety to the learning process. Etymology is especially recommended for students who plan to take the PSAT, ACT, SAT or other college entrance exams. *This course is not offered for the 2017-2018 school year.*

FRENCH

FRENCH I

Course # 04100

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using textbook examples. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Although grammar concepts may be taught in English, students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred

Level: 9, 10, 11, 12

Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

World Languages Department

FRENCH II

Course # 04120

Prereq: "C" in French I

Level: 9, 10, 11, 12

Credit: 1.0

French II is a continuation of the French 1 program and continues to build upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: "A" in French I or "B" in French I and Dept. Chairperson approval or "C" in French I Honors

Level: 9, 10, 11, 12

Credit: 1.0

The core material is the same as French 2 with an accelerated pace to allow for the reading and discussion of short stories and short books, as well as other activities to challenge the Honors student. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: "C" in French II

Level: 10, 11, 12

Credit: 1.0

This course reviews and expands upon skills learned in level II with an increased emphasis on extensive vocabulary acquisition and a more complete study of grammar. Students will continue their culturally based study of the language, do oral presentations, write short compositions, and short stories. Students will read a variety of sample literature pieces. During second semester, students read and discuss *Le Petit Prince*. This course is conducted extensively in French.

FRENCH III HONORS

Course # 04180

Prereq: "A" in French II or "B" in French II and Dept. Chairperson approval or "C" in French II Honors

Level: 10, 11, 12

Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: French III

Level: 11, 12

Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

ADVANCED PLACEMENT

FRENCH LANGUAGE

Course # 04150

Prereq: "C" in French III Honors or "A" in French III or "B" in French III with Dept. Chairperson approval

Level: 11, 12

Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

FRENCH V HONORS

Course # 04190

Prereq: Successful completion of Advanced Placement French IV and Dept. Chairperson approval

Level: 12

Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. *Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.*

SPANISH

SPANISH I

Course # 04510

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish I, the students develop communication skills, study grammatical structures, and learn about culture. Students study the basics of the language: speaking, listening comprehension, reading and writing.

SPANISH II

Course # 04520

Prereq: "C" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In Spanish II, the students will continue to develop communication skills, study grammatical structures and learn about culture. Specific cultural emphasis will be given to Mexico, Central America and South America. Specific communication skills will emphasize listening and speaking with increased instruction and practice in reading and writing.

SPANISH II HONORS

Course # 04580

Prereq: "A" in Spanish I
Level: 9, 10, 11, 12
Credit: 1.0

In addition to the content covered in Spanish II, Spanish II Honors will emphasize listening comprehension, meaningful conversation, reading selected text for conversation-stimulating content, and development of writing skills.

SPANISH III

Course # 04530

Prereq: "C" in Spanish II
Level: 10, 11, 12
Credit: 1.0

In Spanish III, students will continue to develop communication skills, grammatical structures and learn about the culture of various Spanish-speaking countries. Specific communication skills will emphasize the development of improved listening comprehension, speaking and writing, as well as further practice in reading and vocabulary building.

SPANISH III HONORS

Course # 04570

Prereq: "A" in Spanish II or "A" or "B" in Spanish II Honors
Level: 10, 11, 12
Credit: 1.0

Spanish III Honors provides the opportunity for students to progress from a structured sequential language program to one, which emphasizes, in a thematic approach, integration of all language skills. Students will progress toward the goal of independent use of the language in speaking, reading, writing, and active listening. Furthermore, students will gain an understanding of Spanish culture through the study of history, art, music, literature, geography, and customs.

SPANISH IV

Course # 04540

Prereq: "C" in Spanish III
Level: 11, 12
Credit: 1.0

Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study and to strengthen their skills in writing, reading, listening, vocabulary and comprehension. Culture is studied through reading, skits and a series entitled "Destinos".

World Languages Department

ADVANCED PLACEMENT SPANISH LANGUAGE

Course # 04550

Prereq: "A" in Spanish III or "'A" or "B" in Spanish III Honors or Department Chair approval
Level: 11, 12
Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through listening selections, reading selections and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement.

Upon the conclusion of this course or the Spanish V Honors course, students are expected to take the AP exam (see page 90 for details).

SPANISH V HONORS

Course # 04590

Prereq: "C" in AP Spanish Language or "C" in Spanish IV
Level: 12
Credit: 1

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature.

Upon the conclusion of this course, students are expected to take the AP exam (see page 90 for details).

AMERICAN SIGN LANGUAGE

AMERICAN SIGN LANGUAGE I

Course # 08070

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language I is an introduction to American Sign Language and Deaf culture. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Fundamental skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness, deaf perspectives will also be taught.

AMERICAN SIGN LANGUAGE II

Course # 08080

Prereq: "C" or better in American Sign Language I
Level: 9, 10, 11, 12
Credit: 1.0

American Sign Language II is a continuation of American Sign Language I. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Advanced skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness and deaf perspectives will be taught along with deaf perspectives, technology related to deafness and potential career options.

Additional Academic Opportunities

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Last year's fee for each AP exam as established by the College Board was \$93 with an additional \$17 per exam late-testing fee. For schools participating in AP Capstone in 2017-18, the fee for AP Seminar was \$141. The College Board has not released the fee for the 2018 AP exams yet. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): The College of DuPage awards articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (*Course #01671/#01672*) to recover lost credits from failed courses. Students should speak with their school counselor and the appropriate department chairperson, if interested. Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab. The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts

Deaf and Hard Hearing Program: The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education (*Course #07431/#07432*) which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1/Algebraic Reinforcement. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

English Language Learner (ELL) Program: The District 86 ELL Program is housed at Hinsdale Central High School. Families wishing to learn more about this program can contact either their child's Hinsdale South School Counselor, or District 86 ELL Coordinator, Mrs. Kelly Owens, at 630.570.8591 or at kowens@hinsdale86.org.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's

Additional Academic Opportunities

achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), and after school (Course #09400).*

Excel-erate Program: Excel-erate is a non-traditional program for students who need to earn credits via supported virtual instruction. This program runs 11:15 am - 4:00 pm (Periods 5 – 11) and students must have the recommendation from the Director of Counseling in order to enroll. *This is Course #09401/#09402.*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course or field of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the relevant department chairperson, the student's counselor, and the Assistant Principal for Curriculum & Instruction. Upon the approval of all of the aforementioned, final approval is contingent upon the workload of the teacher involved.

Study Hall and "Hornet Honor" Seniors: All students enrolled in Study Hall are required to attend. The only exception is seniors who have earned a place on the "*Hornet Honor*" list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. "*Hornet Honor*" seniors have the option of requesting a 1st period "Late Arrival" (Course #09921/09922) or a 10th period "Early Dismissal" (Course #09931/#09932) in lieu of Study Hall during the course request process. Only "Hornet Honor" seniors who have "Late Arrival" or "Early Dismissal" on their official schedules have earned this privilege of late arrival/early dismissal. "Hornet Honor" seniors who have "Late Arrival" are expected to arrive on time to their 2nd period class and those enrolled in "Early Dismissal" are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for "*Hornet Honor*" seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with "Study Hall" on their official schedule regardless of what period the study hall is or what year the child is in school. *All Hinsdale South students must be enrolled in 6 credit-earning courses each semester. Please note that being a "Hornet Honor" senior is a privilege that can be revoked by the Building Leadership Team should it be determined to be in the best interest of the student.*

Writing Lab: Writing Lab is available before school, after school, and during all lunch periods. Students may make appointments to meet with a teacher to receive help in any stage of the writing process, from idea generation to polishing the final draft. Students can seek out help in writing for any subject area, not just English, and for writing beyond that assigned for school. Writing Lab is also the perfect place to receive feedback on college application essays and scholarship essays. The Writing Lab is located in Room

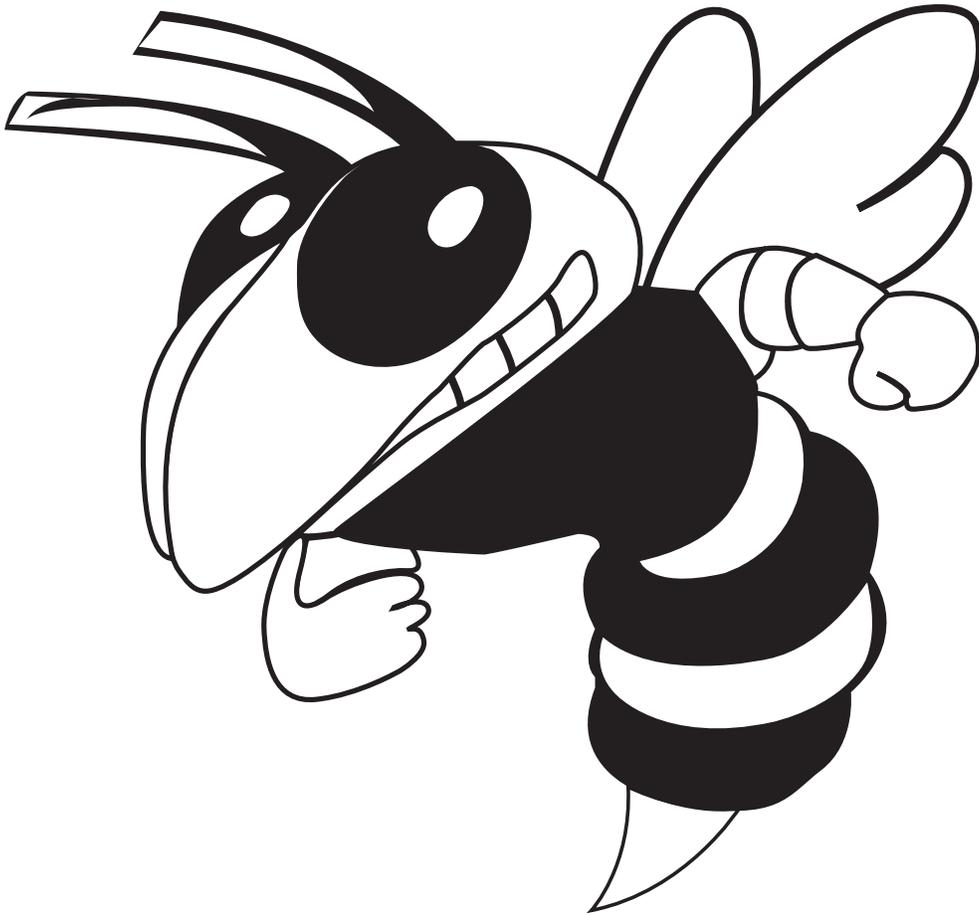

HINSDALE SOUTH COUNSELING DEPARTMENT FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. Indicates flexibility in academic scheduling.

Dear Students, Parents and Guardians:

You will soon begin the process of selecting courses for the 2018-2019 school year. This *Program of Studies Handbook* is derived from the District 86 course catalog to provide you with an overview of the courses offered here at Hinsdale South High School. It also serves as a comprehensive guide to graduation requirements, the grading system and other information directly related to the academic experience. Please know that our Counseling staff is also available to assist each student in the process of designing a comprehensive four-year program.

At Hinsdale South, student learning is our primary focus. As a part of this emphasis, we require that all students take a minimum course load of six credits. This allows them to be actively engaged in the learning process for most of their school day. Furthermore, we encourage students to select a course sequence that it is rigorous and relevant in a manner that will allow them to maximize their academic potential.

Please take the time to carefully review the *Program of Studies Handbook*. We invite parents and students to be our partners in providing the best possible education at Hinsdale South High School. Should you have any questions after reading the information provided in this book, please feel free to contact our Counseling Department at (630) 468-4251.

Sincerely,

Arwen Pokorny Lyp

General Information

Graduation Requirements

Each student must successfully complete the following course requirements in order to graduate from Hinsdale South High School. In addition, no student shall receive a diploma without passing a satisfactory examination on the federal and Illinois constitutions. In order to earn a diploma, students must also comply with all state mandated requirements for standardized testing. All students must complete state-mandated CPR and AED training through their physical education class.

To graduate, a student must earn **a minimum of 24.0 credits** and successfully meet the listed requirements. A given course cannot be used to satisfy a requirement in more than one area, with the exception of the “intensive writing” requirement.

State law mandates all students to earn two credits in courses designated as “intensive writing” courses. English I and English II fulfill this requirement as do Applied English and Foundations English.

Graduation Requirements	Credit
English	4.0
Mathematics <i>One of the three credits of Mathematics must be an Algebra course (Algebra 1, Part 1 AND Algebra 1, Part 2, Algebra 1 Block, Algebra 1, Applied Math, or Foundations Math) and one must include Geometry content (Geometric Analysis, Geometry, Applied Math or Foundations Math). Credits must be earned over three school years.</i>	3.0
Science	2.0
Social Studies <i>World Cultures or World Studies Honors (1.0) U.S. History, American Studies or AP U.S. History (1.0) Passing of the U.S. Constitution Test -Beginning with the Class of 2020, students must also take and pass either American Politics or AP Government to meet the state-mandated Civics graduation requirement.</i>	2.0
Elective Arts <i>A student can select from one of seven Elective Arts areas, including all courses in: Art, Business, Family & Consumer Sciences, World Languages, Music, Technology Education or TCD. A student may only declare one (1) credit per department/discipline to count towards this specific graduation requirement.</i>	2.0
Consumer Education <i>AP Economics: Micro AP Economics: Macro Economics Exploring Family and Consumer Sciences Foundations Consumer Education Introduction to Business Money Management</i>	0.5
Physical Education/Health <i>Health is a required course taken during sophomore year typically in tandem with one semester of Physical Education. Students have the option of enrolling in an additional semester of Physical Education during their sophomore year for an additional 0.5 credits.</i>	4.0

State-mandated requirements for standardized testing: SAT

Beginning with the Class of 2018, all 11th grade students are required to take the SAT. In order to be classified as an 11th grader, students must earn a minimum of 11.75 credits prior to the beginning of entering their third year in high school. Students who begin their third year in high school with fewer than 11.75 credits will be classified as 10th graders solely for the purpose of SAT testing.

What Is AP Capstone?

AP Capstone™ is a College Board program that equips students with the independent research, collaborative teamwork, and communication skills that are increasingly valued by colleges. It cultivates curious, independent, and collaborative scholars and prepares them to make logical, evidence-based decisions.

AP Capstone is comprised of two AP courses — **AP Seminar** and **AP Research** — and is designed to complement and enhance the discipline-specific study in other AP courses.

Benefits of AP Capstone

- Fosters the **research**, argumentation, and communication skills that are at the core of college readiness and essential for lifelong learning
- Provides a setting to build on the knowledge and rigorous course work of AP in an **interdisciplinary** format
- Offers students a unique opportunity to **distinguish** themselves to colleges and universities

Combining Scholarly Practice with Academic Intensity

AP Capstone was developed in response to feedback from higher education. The two AP Capstone courses, with their associated performance tasks, assessments, and application of research methodology, require students to:

- Analyze topics through multiple lenses to construct meaning or gain understanding.
- Plan and conduct a study or investigation.
- Propose solutions to real-world problems.
- Plan and produce communication in various forms.
- Collaborate to solve a problem.
- Integrate, synthesize, and make cross-curricular connections.

General Information

Director of Special Education Mrs. Kristin Marks Pascavage

The Special Education Department provides the continuum of educational support services to students with disabilities as defined by the Individuals with Disabilities Improvement Act and the Illinois 23 Administrative Code. Programs are developed to meet the unique individual needs of students. These supports include direct instruction, co-teaching in core classes, collaboration with general education teachers, and resource support. Direct instruction in specialized course offerings happens through a *Foundations* or *Applied* philosophical approach:

--*Foundations* courses provide students with an opportunity to focus on functional life skills curriculum within the context of each content area.

--*Applied* courses focus on specific content area concepts and skills with an additional emphasis on practical application.

Additional supports available for students as determined in their individual educational plan could include occupational therapy, physical therapy, speech/language therapy, psychological and social work services. All of the classes are structured to assist in the attainment of the students' goals as written in the IEP.

PLACEMENT IN SPECIAL EDUCATION COURSES IS BASED UPON AN INDIVIDUAL CASE STUDY EVALUATION AND RECOMMENDATION BY THE SPECIAL EDUCATION STUDENT SUPPORT TEAM.

Please see Course Description for detailed Prerequisites.

APPLIED STRATEGIES
9/10

Course #01920

Level: 9, 10

Credit: 1.0

APPLIED STRATEGIES
11/12

Course #01930

Level: 11, 12

Credit: 1.0

PROGRAM SUCCESS

Course #01991/01992

Prereq: Approval of
Director of Special
Education

Level: 9, 10, 11, 12

Credit: 1.0

ADULT
OPPORTUNITIES

Course #02930/02940

Prereq: IEP team
recommendation and
approval of Director of
Special Education
Level: Ages 18, 19, 20,
21

Credit: No credit

Supply fee: \$180

*This is a District 86
program offered at the
Transition Center. The
school day is from 8:00
AM to 2:00 PM.*

In these courses, students receive targeted instruction to improve progress on goals in identified areas of need. Student growth is monitored and families are informed of progress quarterly. The smaller group setting is structured so that students can receive assistance accessing the general education curriculum as well as instruction in executive functioning skills such as organization, time management, and test preparation.

This course provides a highly supportive academic environment structured to address the behavioral/emotional needs of students throughout the school day. Students also receive instruction in identified goal areas.

Adult Opportunities is a post high school option for students ages 18-21. Adult Opportunities has two programs, The Bridge Program and The Transition Program. The purpose of these program is to implement an innovative, adult-centered community program through a collaborative approach that prepares students for adulthood success while promoting opportunities for independence in the areas of: employment, post-secondary education and training, independent living skills, and community.

The goals of the **Transition Program** are to: increase independence in adult living situations; improve self-determination skills; improve social and communication skills; increase leisure, recreation, and life skills; experience work-based learning and volunteer work; and prepare for community living and participation.

The **Bridge Program** looks to provide young adults with continued special education intervention, services, and supports designed to increase student success in postsecondary academic environments. The program provides supports in the area of executive functioning (managing a schedule, managing course expectations and deadlines, managing testing schedule, managing assignments). The Bridge program supports students in navigating the COD campus (locating offices, locating classes, locating sites such as the library, cafeteria, student center, counseling and academic support centers). The program also supports students with advocating and arranging accommodations and supports on campus. This could include making appointments with office of accommodations, use of "blue card", communication of needs with professors, making appointments with tutoring, the writing center, testing center, etc. The program also supports finding opportunities to socially engage with peers. Another goal is for our students to understanding and use the PACE and/or Metra transportation systems. Academic Intervention are continued to increase academic skills necessary for accredited college coursework.

THERAPUTIC PROGRAM

Course #09701/09702

Prereq: IEP Team recommendation and Director of Special Education.

Level: 9, 10, 11, 12

Credit: 0.5 per semester

Students in the HAVEN program have access to all courses found in this Program of Studies with select courses being delivered within the HAVEN classroom.

HAVEN is an acronym that stands for Hinsdale Area's Vision of Emotional Needs. This self-contained therapeutic program has a commitment to providing quality special education services to students qualified under the category of an Emotional Disability. Entrance into the HAVEN Program occurs as a result of thorough planning and consideration by the student's home school and IEP team, which includes parents/guardians. District 86 students will be recommended for this program if they demonstrate the need for additional academic, emotional and behavioral supports that cannot be provided in a traditional general education setting with special education supports. The HAVEN Program is designed to provide a positive learning environment where students can develop successful academic behaviors, increased self-awareness and attentional control, reduced impulsivity, increased emotional regulation, and improved interpersonal effectiveness. Mastery of these skills will lead to reintegration into the general education setting and will prepare students to achieve their postsecondary goals. District 86 will provide each student with an optimal learning experience that includes a well-structured, safe, engaging, and responsive environment with increased therapeutic support offered through a team of highly qualified individuals.

General Information

College Admission Requirements

Criteria for college admission vary greatly. The admission committees at various colleges and universities across the country consider, to varying degrees, the following:

- Type of high school courses taken when compared to the courses available in the high school
- Quality and rigor of the student's academic record
- Performance on college admission tests –SAT and/or ACT
- Development and maturity of the individual in areas outside the academic classroom

Students and parents are advised that the Illinois Board of Higher Education has adopted these entrance requirements for the state's public universities and baccalaureate transfer programs at community colleges:

English	<p>Four (4) Credits</p> <p>Course work should emphasize reading, writing, speaking, and listening (written and oral communication skills). Particularly important is emphasis on sentence structure, paragraph structure, systematic organization, and diction--word choice that is appropriate, clear and effective. Analysis of literature might include characteristics such as point of view, theme, setting, character, and style to help the student become more sensitive and appreciative as a reader.</p>
Mathematics	<p>Three (3) Credits</p> <p>Traditional preparation for college mathematics is a credit each of Algebra I, Geometry, and Advanced Algebra, with a fourth credit of advanced mathematics for engineering, science, and many business majors. Many colleges require a minimum of Algebra and Geometry. Acceptable computer science courses may include the study of a structured programming language and use of computing as a means to solve problems.</p>
Science	<p>Three (3) Credits of a laboratory science</p> <p>Traditional preparation for college is a minimum of three years of core laboratory science courses. Core laboratory science courses include GeoPhysics, Physics, Chemistry, and Biology.</p>
Social Studies	<p>Three (3) Credits (emphasizing history and government)</p> <p>One year of United States History or a combination of United States History and American Government is required. Beyond history and government, acceptable social studies include World Studies, Economics, Geography, Political Science, Psychology, and Sociology.</p>
Other	<p>Two (2) Credits in world languages, music, or art.</p> <p>If world languages are chosen, a minimum of two years of the same language is recommended and in some cases required. Some universities consider sign language as a world language, but some do not. Check with the college/university to which you are applying to verify specific entrance requirements.</p>

In most cases, students pursuing admission to a four-year university should complete four credits of English, Math, Science, and Social Studies. Colleges and universities may also establish specific criteria for provisional admission to baccalaureate and baccalaureate transfer programs for applicants who do not meet minimum high school course requirements and any other institutional requirements for regular admission.

Adding/Dropping Courses:

Once a school year begins, schedule changes are permitted only if they meet one of the following conditions.

DROPPING A COURSE: Students may request to drop a course for a study hall only if they are enrolled in the maximum number of courses (seven) per semester and only after they have attended and participated in the course for three class periods. Students wishing to drop a course must first discuss it with their parents, teacher and counselor. After a parent/guardian signs the request to drop a course, the counselor and department chair will sign the request as well. A grade of "WF" will be reflected on the transcript of a student who chooses to drop a course after the fourth week of a semester. Students enrolled in yearlong courses will not be allowed to drop at the end of first semester unless it is recommended by the department.

ADDING A COURSE: Students may add a class to increase the number of attempted credits, provided that space is available and there is minimal disruption to the student's schedule. This addition must be made by the end of the eighth school day.

LEVEL CHANGES: It is important that students choose their course loads very carefully, as the Master Schedule for the building is based off of these selections. Typically, a student is required to stay in a course for an entire quarter before the school will honor a request to change the level of coursework. If a request to move course levels is granted, the grade as of the day of the course change will follow the student to the next class. Students wishing to initiate a level change within the same department must complete the add/drop form and obtain all required signatures (parent/guardian, teacher, department chair, counselor).

Alternative Credit: Credits from non-traditional courses and programs including, but not limited to e-learning, correspondence, distance/blended learning, or college courses may be counted toward graduation. Such courses must be from an accredited institution and the student/family assumes responsibility for all fees. Coursework taken by current District 86 students via these alternative paths (Digital Learning Center, Illinois Virtual School, etc..) will not appear on the District 86 transcript *unless there has been prior written approval by the Director of Counseling*. Additionally, transfer students and currently enrolled students requesting to transfer credit for a class from an accredited institution outside of HSHS, may be required to take a placement exam to ensure appropriate level of placement for a higher-level class. The Department Chair for the subject area will set a mastery level for the exam. If mastery is not obtained, then a student may need to repeat that course and credit will not be issued. Such approved coursework will appear on the high school transcript as transfer credit indicating course name, grade and credit earned. The grade will be calculated into the grade-point average of the District 86 high school.

Class Rank: District 86 does not maintain class rank.

Course Credit: Credit in full-year as well as semester courses is earned by semester. That is, students earn a .50 unit of credit for successful completion of each semester (.25 for Driver Education & Staff Aide). Credit is earned by successfully completing all course requirements as established by the teacher.

Course Request Procedure: Each spring our school works to create a schedule of classes for the following academic year that best meets the needs of our students, while still staying within the parameters of staffing requirements (i.e. number of teachers, class size, teaching schedules, state and federal mandates). We work very hard to accommodate student requests; however, due to the complexity of the scheduling process, sometimes student schedules may need to be adjusted. Course selections will be made available online through Home Access Center in early June.

Please keep in mind that changes in course requests or class assignments will **not** be accepted for any of the following reasons:

- to accommodate a job schedule
- to change teachers
- to change lunches or classes to be with friends

General Information

- to have first or last period free
- to accommodate a change of mind

Acceptable reasons for schedule changes may include:

- computer input error
- scheduling conflicts
- failure or near failure in a second semester or year course
- failure to meet a pre-requisite for a course
- Department Chair or Director of Counseling recommendation
- successful completion of a summer school class

Early Graduation: Students may be able to pursue early graduation as prescribed by the State of Illinois, if they meet District 86 graduation requirements. Interested students must initiate a thorough transcript review and credit check with their school counselor. After the transcript review, a written request for early graduation with clearly articulated rationale must be submitted by the family to the Director of Counseling for consideration.

Dean’s List/Honor Roll Requirements: Grades earned in all courses, exclusive of Physical Education, Driver Education, and Staff Aide will be used to calculate a student’s grade point average (GPA) according to the following grade point system:

Grade	Weighted Grade Point (Honors/AP)	Unweighted Grade Point
A	6.0	5.0
B	5.0	4.0
C	4.0	3.0
D	2.0	2.0
F or WF	1.0	1.0
I	1.0	1.0

Dean’s List and Honor Roll designation will be determined by the following criteria:

Dean’s List: 4.5 Weighted GPA with no grade in any course below a “C”

Honor Roll: 4.0 Weighted GPA with no grade in any course below a “D”

Dean’s List and Honor Roll are based on quarter grades, not semester grades. Thus, there are four Honor Rolls and Dean’s Lists per year; one each quarter. Incomplete grades are not accepted and a minimum of four (4) credit-earning courses are needed to qualify for either list.

Junior High/Middle School Students: Junior high schools that feed into District 86 (D86) unable to offer advanced coursework for their students may send their students to Hinsdale South High School for those courses. In these cases, all courses, grades and credit earned will appear on the transcript and will be calculated into the grade-point average earned in subsequent years at a high school in D86. If the course is taken at a D86 school and the student attends the other D86 school, the course, grades, and credit earned will appear as transfer credit. If the course is taken at the D86 school the student attends, the course, grades, and credit earned will appear as regular credit.

Minimum Attendance Requirement: Section 18.8 of the *School Code of Illinois* requires that all students be in attendance for a minimum of 300 minutes per day, exclusive of lunch and passing time. Therefore, all students must be enrolled for at least six periods of instruction per day. Excessive absences may result in removal from class and/or a loss of credit.

Physical Education Exemptions: Per policy 6:310, a student in grades 9-12, unless otherwise stated, may submit a written request to the Building Principal to be excused from physical education courses for the reasons stated below. The Superintendent or designee shall maintain records showing that the criteria set forth in this policy were applied to the student’s individual circumstances.

1. For students in grades 11-12, ongoing participation in an interscholastic athletic program as recognized by IHSA.
2. For students in grades 11-12, to enroll in academic classes which are required for graduation from high school, provided that failure to take such classes will result in the pupil being unable to graduate.
3. For ongoing participation in a Marching Band program for credit.

In addition, students in grades 11-12 may also qualify for a Physical Education exemption in order to enroll in an academic class or classes required for admission to the college(s) or university(ies) which said student intends to apply as long as documented substantiation of the prerequisite secondary courses required for admittance to the postsecondary institution is provided. Policy 6:310 also contains provisions for students with IEPs to qualify for PE exemptions based on an IEP team decision or participation in adaptive athletic programs outside the school setting.

PHYSICAL EDUCATION EXEMPTIONS FOR SPECIAL EDUCATION STUDENTS

A student requiring adapted physical education must receive that service in accordance with the student's Individualized Educational Program/Plan (IEP).

A student who is eligible for special education may be excused from physical education courses when:

1. He or she is in grades 9-12, and his or her IEP requires that special education support and services be provided during physical education time, and the student's parent/guardian agrees or the IEP team makes the determination;
2. He or she has an IEP and is participating in an adaptive athletic program outside of the school setting, and the parent/guardian documents the student's participation as required by the Superintendent or designee.

PHYSICAL EDUCATION EXEMPTIONS FOR MARCHING BAND STUDENTS

Students enrolled in the Hinsdale South High School Bands perform at home games, local parades, pep rallies, formal concerts, and other community events. Band classes improve musicianship, develop technique, and provide performance opportunities featuring a variety of musical styles and ensemble settings. Every band course is an academic class that meets during a class period and requires occasional rehearsals and performances outside the school day; however, students are encouraged to participate in other academic classes, athletics, and activities. Opportunities for student leadership, overnight travel, and extracurricular performing are available. All band classes can be repeated each year for credit and are open to students in every grade. Every band student performs as part of the Marching Band, which allows band students in Grades 9 - 12 to exempt out of Physical Education for the entire school year.

Students interested in exempting out of PE during their 2017– 2018 marching band season in order to take a Physical Education Resource need to be aware of the following:

Marching Band PE Exemption Procedures: Band students in grades 9 through 12 may be exempted from Physical Education classes on an athletic exemption during both semesters for *ongoing participation in marching band and pep band*. In order for a music student to obtain a PE Exemption, they **MUST** be enrolled in a class that is part of the Hinsdale South Marching Band, and continuous enrollment in that class is required to maintain the exemption. This includes the marching band courses of: Symphonic Band, Concert Band, Symphonic Percussion, Wind Symphony Honors.

Students who obtain this exemption must enroll in a minimum of 6 courses in addition to the PE Band Exemption. If a student drops below six courses, the exemption is invalidated and the student will be required to attend Early Bird PE, or enroll in PE during the school day. In all cases the exemption is listed on student schedules and the student will receive a 1.0 PE Credit.

PHYSICAL EDUCATION EXEMPTIONS FOR IN-SCHOOL STUDENT-ATHLETES

Varsity/Junior Varsity student-athletes who are juniors or seniors may be exempted from Physical Education their junior and senior years. There are no exemptions allowed for freshmen or sophomore student-athletes per Illinois Sate Code 105 ILCS 5/27-6.

CRITERIA TO BE ELIGIBLE FOR AN EXEMPTION

General Information

1. The sport is an IHSA sanctioned sport and runs through the Hinsdale South Athletic Department.
2. The sport requires an athletic permit to participate.
3. The sport involves a schedule of interscholastic competition.
4. The student-athlete must attend practices and games consistently throughout the season.
5. The student-athlete must be on the roster to actually compete in interscholastic competition.
6. The student-athlete must complete all state mandated fitness assessments, regardless of exemption.

Athletes seeking an exemption need to obtain a Physical Education Exemption form in the Athletic Office and follow the procedures outlined on the form.

Registration Requirements for New Students: Hinsdale South course recommendations are based upon evidence of normal progress and achievement in the student's previous school. Incoming freshmen are required to submit evidence of satisfactory completion of the 8th grade. Transcripts of credits earned and grade placement are required from the previous school for all students transferring from other secondary schools. Additionally, all students transferring from an Illinois public high school must obtain the ISBE student in good standing form from the previous school in order to register. Parents of transfer students must present a birth certificate for the student at the time of registration. Pursuant to Hinsdale Township High School District 86 Board of Education Policy 7:50 and 7:60, every family must provide acceptable evidence of residency. One of the following documents is required for registration: a current real estate tax bill, mortgage papers, agreement of sale, or a signed lease agreement with student(s) listed as occupants. Two additional documents reflecting the current in-district address must also be presented to verify residency. Contact the registrar for more information on adequate proof of residency. A student's grade-point average previously earned at a high school other than a high school in District 86 will be re-calculated based on the grade-point average processes currently used in District 86. Transfer courses, grades earned and grade-point average will appear on the District 86 high school transcript exactly as they are titled on the sending school's transcript and will be indicated as transfer coursework. If the previous school assigned numerical grades, we will use their key to assign letter grades on the District 86 transcript. If no key is available, these courses will be recorded as "Pass" or "Fail". Transfer courses from schools outside of the United States may receive credit, but grades will be reflected as "Pass" or "Fail". A record of a health examination and immunizations at the 9th grade level is required by law. Students will not be allowed to attend school if this state requirement is not met. Incoming freshmen must have a physical performed prior to the purchase of books during the month of August, but the preferred date of completion for the freshman physical is July 1. In addition, all students participating in athletics must have a physical examination for each year in which they participate.

Repeating Courses: A course may be repeated only when a student has previously received a "D" or "F". All attempts will be recorded on a student's transcript and will be computed into the grade point average. Repeated courses will not count toward meeting graduation requirements unless a student has previously received an "F".

R-Rated Films Used in Instruction: If R-rated movies or clips from R-rated movies will be used in instruction in any course; a list of those movies will be made available via the Hinsdale South website at the time of registration. Written permission must be obtained by a parent at the beginning of any course showing R-rated movies or clips from R-rated movies to allow students to view in whole or in part the R-rated movies associated with the class.

Seal of Biliteracy: Students who demonstrate proficiency in both English and another language may qualify to earn a Seal of Biliteracy on their transcripts. Families who want more information on this program should contact District 86 ELL Coordinator, Mrs. Kelly Owens, 630-570-8951 or kowens@hinsdale86.org.

Staff Aides: Students may earn .25 credit per semester by serving as a staff aide. To pursue this option, students need to speak to a staff member and their school counselor and follow the "Adding/Dropping Courses" procedure outlined on Page 14.

Department Chairperson
Mr. Patrick Maag

Left to right
Natalie Mcgee
AP Students Artworks
Ian LaPat

The art curriculum strives to develop the student's interests and abilities as a consumer, hobbyist, or professional career artist. Though the majority of art courses are studio oriented and concentrate on the production of art, one of the primary aims of the art curriculum is to expand the student's ability to understand, enjoy and critique not only art of his/her own creation, but also the great art masterpieces of the past and present. Many visuals such as prints, digital images, videos and actual work, as well as field trips and technology, are used to stimulate an appreciation of great art and to demonstrate art techniques and processes. **Supply fees are required for participation in all studio courses.**

<p>Beginner Level Courses: All Beginner courses are .5 credits and are open to all grades and require no previous knowledge or pre-requisite. These courses introduce students to materials and processes.</p> <p>Intermediate Level Courses: All Intermediate courses are .5 credits and are open to all grades and require the prerequisite above it on the chart. These courses further build on the processes and practices using materials learned in the intro class.</p> <p>Advanced Level Courses: All Advanced courses are .5 credits and can be repeated. These are open to sophomores, juniors, and seniors and require the two previous prerequisites on the chart. ** These courses also have an Honors section.</p> <p>Advanced Placement Level Courses: All AP courses are 1.0 credits and can be repeated. They are open to juniors and seniors and require the three previous prerequisites on the chart. ***AP ART HISTORY has no Prerequisite.</p>	↓	↓	↓	↓	↓

ANIMATION & CARTOONING**Course #05591**

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

No experience required - This is an enjoyable course that introduces the student to the art and history of cartooning and animation. Students learn caricature cartooning as well as developing their own cartoon character and comic strips. Techniques of animation are taught and enable students to produce their own animated film shorts. Students will also have hands-on experience using a color video animation system and Toon-Boom software.

VISUAL ART IN OUR WORLD**Course #05011**

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$25

No experience required - This is an enjoyable beginning level art class at Hinsdale South. You can be successful even if you have always said, "I cannot draw!" Students will explore what types of art and artists are currently trending and contemporary in the world around us. Gaining an understanding of visual art that surrounds us is as important as the music you listen to or the books you read. Expand your knowledge and have fun trying your hand at some basic art techniques that are used in today's art. Students will get to explore materials including paint markers, spray paint, collage, camera phones, internet images, drawing tablets and various other studio art supplies. Field trips to contemporary art museums in Chicago will also occur.

DRAWING & PAINTING 1

Course #05031

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

This is a beginner studio art class for students who are interested in trying a variety of types of drawing and painting. Students will be introduced to a variety of drawing materials, paint media, and printmaking processes including: charcoal, oil pastels, acrylic and watercolor paints, and forms of block printing. Students will create 5-7 projects over the semester-long course as they explore a variety of themes.

DRAWING & PAINTING 2

Course #05041

Prereq: Drawing & Painting 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

This is the intermediate studio art class at Hinsdale South. Students who enjoyed Drawing & Painting 1 will build on the processes learned and materials used in the introductory class. In this class, students will continue to work with both familiar and unfamiliar drawing and painting materials as they complete more complex artworks. Projects in this class will give the students more choice in subject matter.

DRAWING & PAINTING 3

Course #05051

DRAWING & PAINTING 3

w/Honors Option

Course #05052

Prereq: Drawing & Painting 2

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$40

This is the advanced studio art class at Hinsdale South. Students must complete Drawing & Painting 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen medias. The work produced in this course will now either be all drawing or all painting and may be used as part of the Advanced Placement portfolio.

** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. *(Course may be repeated)*

AP STUDIO ART (2D)

Course #05200

Prereq: Drawing & Painting 3 or Digital Imaging & Design 3

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement studio art class at Hinsdale South. Students must complete Drawing & Painting 3 or Drawing & Painting 3 Honors in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work.

(Course may be repeated)

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 94 for details).

DIGITAL IMAGING & DESIGN 1

Course #05071

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the beginner computer art class at Hinsdale South. Students will be introduced to two Adobe Design programs including Photoshop and Illustrator. Artistic and creative problem solving strategies are developed where students will use personal photos and images to create original works of art. Various practice exercises will aid the students in creating 4-6 major projects in this class. Color theory, composition and the elements and principles of design will be the focus of study.

DIGITAL IMAGING & DESIGN 2

Course #05072

Prereq: Digital Imaging & Design 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the intermediate computer art class at Hinsdale South. Students who enjoyed Digital Imaging 1 will further explore the artistic potential of the computer and creative problem solving strategies used in the introductory class. The first part of this course will continue to explore digital art options while the second part of the course will explore graphic design opportunities. Digital artists and designers will use Wacom Drawing Tablets to aide in their art making as well.

Art Department

DIGITAL IMAGING & DESIGN 3

Course #05081

DIGITAL IMAGING & DESIGN 3

w/Honors Option

Course #05082

Prereq: Digital Imaging & Design 2

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$8

This is the advanced computer art class at Hinsdale South. Students must complete Digital Imaging 2 to have a complete understanding of what is required in this class. Students will create a body of artwork based on a personal exploration of a central theme or idea. This body of work represents the results of rigorous research, planning, self-assessment, and problem solving. Each student is required to create a reference sketchbook that demonstrates multiple explorations of their chosen ideas. The work produced in this course may be used as part of the Advanced Placement portfolio.** The Honors Option requires the student to enroll and participate in more outside of school art opportunities as well as completing one more major project. *(Course may be repeated)*

CERAMICS 1

Course #05302

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$25

Students will get a little messy (in a good way) during Ceramics 1 as they explore the basic techniques for making things out of clay. Students will create projects by hand building, wheel throwing, and glazing. Projects will be both functional and sculptural. Students will make mugs, bowls, representational sculptures, and teapots.

CERAMICS 2

Course #05312

Prereq: Ceramics & Clay Sculpture 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

If you loved making things out of clay in Ceramics 1, then this class is for you! Students will advance their skills, and create more complex works out of clay. Students will advance their pottery skills by working on the wheel, experimenting with new hand building processes and types of clay.

GLASS & METALSMITHING 1

Course #05561

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

Glass & Metalsmithing 1 is a dynamic and fun class. No art experience needed. This class will introduce students to the basics metalsmithing and glass to create small sculptures and wearable objects. The basics of metalsmithing will be covered including: sawing, soldering, riveting, and wire working. Glass processes include: fusing, slumping, enameling and torch working.

GLASS & METALSMITHING 2

Course #05331

Prereq: Glass & Metalsmithing 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$40

Students will delve deeper into experimentation with metalsmithing and glass processes, and begin to incorporate themes into their projects. Students will creatively explore how to express their unique style through their sculptural artworks. Higher level metalsmithing and glass processes will be incorporated into the student's projects.

PHOTOGRAPHY 1

Course #05001

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$35

This is the beginning photo class at Hinsdale South. Change the way you look at the world. Use traditional film cameras and digital cameras to understand how to communicate your ideas visually. Students will also develop and print black and white film in an actual darkroom. Composition, class evaluation and assessments help students to develop a strong photographic portfolio. *Photographic equipment and supplies be provided along with cameras for students who do not have access to a Single Lens Reflex (SLR) camera.*

PHOTOGRAPHY 2

Course #05012

Prereq: Photography 1

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$35

This is the intermediate photography class at Hinsdale South. Students who loved photo 1 will enjoy capturing more photographic images in photo 2. Students can experiment with traditional and digital photographic techniques. Do you want a career in photojournalism, advertising photography, portrait photography or fine art photography? Create, communicate and evaluate your images as you develop your photographic portfolio and blog online. *Photographic equipment and supplies be provided along with cameras for students who do not have access to a Single Lens Reflex (SLR) camera.*

PHOTOGRAPHY 3

Course #05422

PHOTOGRAPHY 3 w/ Honors

Course #05021

Prereq: Photography 2

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$35

This is the advanced photography class at Hinsdale South. Students must complete Photo 2 to have a complete understanding of what is required in this class. Expand your knowledge and skills to create artistic photographs with your own personal style. An individual course of study will be arranged between student and teacher at the beginning of the semester. Students will organize their images into a photographic portfolio that will be submitted for portfolio competition.

** Honors students will be required to take an outside workshop or equivalent event. Honors students will submit a portfolio to the Scholastic Art competition. Honors students complete a written and picture BLOG as a journaling record of their theme. Honors students will increase rigor by participating in school spirit activities as photojournalism photographers. *Photographic equipment and supplies be provided along with cameras for students who do not have access to a Single Lens Reflex (SLR) camera.*

ADVANCED PLACEMENT

ART HISTORY

Course #05580

Prereq: none

Level: 10,11,12

Credit: 1.0

This course provides a survey of the history of western and non-western art from pre-historic times to the present and teaches methods of interpreting and analyzing works of art. Students with good writing skills and an interest in art and its place in our world can do well in the course. Hands on projects, focusing on process rather than product, cooperative group assignments and Internet searches are correlated with the period under study. Field trips to Chicago area museums and important architectural structures enhance classroom learning and help familiarize the students with the cultural offerings of the city.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

AP STUDIO ART (3D)

Course #05400

Prereq: 3D Art 1 and Ceramics, Glass Workshop or Jewelry (2 of the 3)

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement 3D art class at Hinsdale South. Students must complete 3D Art 1 and two of the three other 3D art classes (Ceramics, Jewelry and Glass Workshop) in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 8 thematic artworks called Concentrations in addition to 8 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 94 for details).

AP STUDIO ART (Photography)

Course #05300

Prereq: Photography 3

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$40

This is the college level Advanced Placement photography class at Hinsdale South. Students must complete Photo 3 in order to be experienced enough to submit their portfolio of work to the AP College Board. Students complete a series of 12 thematic artworks called Concentrations in addition to 12 exploration pieces called Breadths. The advanced placement program requires more time and commitment than typical high school art courses. Therefore, the student enrolling in the course should be highly motivated, serious, self-directed and willing to work. *(Course may be repeated)*

Upon the conclusion of this course, students are expected to submit an AP Portfolio (see page 94 for details).

Business Department

Department Chairperson Mr. Matthew Swedko

Business courses are designed to prepare students for college, careers and employment in the computer, financial, legal, management and marketing fields. Our department shares the fundamental responsibilities of public education and strives to provide our students a safe, caring, up-to-date environment while helping ensure that all students attain appropriate levels of achievement in areas vital to their continuing development. We feel that it is our responsibility to plan, implement, and update enthusiastic programs. Students can then attain a satisfactory level of achievement appropriate to either immediate employment or advanced education in preparation for career opportunities. Opportunities are abundant for students in the business world if their preparation is complete and their attitudes are positive. The Business teachers of Hinsdale South High School identify those opportunities for our students and help them in attaining high personal goals for the future. Elective Arts credit is given for all Business courses.

INFORMATION PROCESSING

ESSENTIAL TECHNOLOGIES (KEYBOARDING)

Course # 06121

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Essential Technologies is designed for the student who wants to acquire skills necessary to enhance the value of the computer for academic and personal use. This course will focus on developing 21st Century technology skills by incorporating study in keyboarding, Internet research, and computer literacy. Through the use of Microsoft Office and other online tools, we will focus on building a student's essential technology skills that will be needed at Hinsdale HSD 86. *Students who desire improvement in keyboarding, computer usage, and basic software application skills will benefit from this course and be better prepared for all high school classes.*

MULTIMEDIA INNOVATIONS AND APP DESIGN

Course # 06182

Prereq: None

Level: 9, 10, 11, 12

Credit: 0.5

Students will develop a broad perspective of the design, communication theory, processes and tools, applications and occupational opportunities in multimedia design. Editing, animating, and digital-publishing will be emphasized. Using various software programs and online resources, students will design and create audio and visual projects/presentations and applications used on today's cell phones and tablets. *Students interested in Entrepreneurship, Management, and Marketing, should take this course.*

APPLIED DIGITAL COMMUNICATION

Course # 01731

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: .5

This course is individualized to meet varying ability levels and needs in developing and improving computer skills for both career and personal use. Each student will learn and develop correct fingering techniques for the operation of the computer keyboard and completes drills designed to develop speed and accuracy. Operating both hardware and software associated with a desktop computer that uses the Microsoft Windows/Office environment, students will focus on developing and improving basic navigation, problem solving, and obtaining job related computer skills.

Business Department

APPLIED BUSINESS

MONEY MANAGEMENT

Course # 06111

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Money Management will integrate economic concepts with the student's important role in the economy as a citizen, consumer, and worker. Topics include: money management, buying goods and services, banking (savings and checking), investments, the efficient use of credit and loans, consumer protection, insurance, housing, and our tax system.

This course fulfills the state mandate for Consumer Education.

FOUNDATIONS

CONSUMER EDUCATION

Course #11790

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

Students enrolled in this course focus on the concepts of budgeting, money management, self-advocacy, roles of consumers, communication, socialization, functional life skills, recreation/leisure skills, and applying those concepts to real world opportunities through weekly community experiences.

INTRODUCTION TO BUSINESS

Course # 06100

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

Course # 06100: This course gives students a background in the basic operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities. This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

INTRODUCTION TO BUSINESS w/Honors

Option

Course #06300

Prereq: Instructor approval

Level: 9, 10, 11, 12

Credit: 1.0

Course # 06300 w/Honors Option: Introduction to Business Honors option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business. This course gives students a background in the operations of business and develops an understanding of the economic role of business in our society. Topics covered include types of business organization, marketing, advertising, accounting, human resources, management decision making, investing, finance, international business, consumerism, and economics. Skill is developed through a wide variety of activities including computer research, projects, and classroom activities that have more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class.

Students who pass both semesters will fulfill the state mandate for Consumer Education.

This course is recommended for students who wish to further study business (Business Management, Accounting, Marketing, and Law) at Hinsdale South.

BUSINESS LAW I

Course # 06231

Prereq: None

Level: 11, 12

Credit: 0.5

Course #06231: Students will gain an appreciation of our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: our legal system (courts, criminal and civil law) contracts, personal, and consumer law. A field trip to a local court and participation in mock trials as lawyers, witnesses, and/or jurors help students gain an understanding and an appreciation of how the American legal system functions.

BUSINESS LAW I w/Honors Option

Course #06221

Prereq: Instructor approval

Level: 11, 12

Credit: 0.5

Course #06221 w/Honors Option: Business Law I w/Honors Option is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Students electing the honors option will be required to complete a more rigorous and in depth curriculum for each unit. Students electing the honors credit option will work with the same topical material as the Business Law class. However the topics will be looked at on a different level by all honors students. All unit materials in this course will have the following emphasis: (1) Writing intensive, (2) Research based, (3) Higher complexity of analysis and reasoning, and (4) Professional level presentation of work.

BUSINESS LAW II

Course # 06242

Prereq: Business Law I

Level: 11, 12

Credit: 0.5

Course # 06242: Students will investigate our legal system as it relates to their personal lives, business practices, and office procedures. Topics include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Students will also participate in The National On-line Youth Summit sponsored by the American Bar Association.

BUSINESS LAW II w/Honors Option

Course #06252

Prereq: Business Law I

w/Honors Option and

instructor approval

Level: 11, 12

Credit: 0.5

Course #06252 w/Honors Option: This course is an extension of Business Law I Honors Option and is recommended for the highly motivated student, especially those interested in pursuing a degree in Business or Law. Topics covered include: The Supreme Court System, property law, sales law, money law and business/employment law. Group discussions, case studies, guest speakers and a field trip will be utilized to present and examine these concepts. To develop a better understanding of the legal system, students will participate in a mock trial tournament throughout the semester. Projects and assessments for this option will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time spent out of class.

MANAGEMENT, MARKETING & FINANCE

ACCOUNTING

Course # 06320

Prereq: None

Level: 11, 12

Credit: 1.0

This course covers the principles and procedures of accounting. Both manual and computerized double-entry systems are taught. Practice sets and exercises are used during supervised laboratory sessions to develop skills in practical applications. Through the use of microcomputers, students also gain familiarity with computerized accounting procedures. The objectives of this course include preparing students for initial accounting jobs in business and providing a technical background for college-bound students who plan to enter certain fields of business. All assignments are created using spreadsheet software

Business Department

ACCOUNTING HONORS

Course # 06350

Prereq: Department
Chairperson approval
Level: 11, 12
Credit: 1.0

In this course, students develop an understanding of double-entry accounting. Topics covered include the following: accounting cycle, banking activities, special journals, payroll, accounting systems and design, internal controls, financial statement analysis, and deferrals and accruals. Students also utilize computer software for problem solving and learn spreadsheet applications. All assignments are created using spreadsheet software.

INVESTMENT PLANNING

Course # 06331

Prereq: None
Level: 10, 11, 12
Credit: 0.5

In this course students will study basic investment principles involving stocks, commodities, bonds, and mutual funds. Students will also learn about tax information, effects of the economy on the market, government regulations of securities and on-line investing. Current issues as they relate to investing will be discussed. Teams will be formed to participate in the Stock Market Game by trading on-line.

ENTREPRENEURIAL STUDIES

Course # 06421

Prereq: None
Level: 11, 12
Credit: 0.5

Course # 06421: Entrepreneurial Studies is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. This course is an introduction to current practices in the world of business. Units of instruction include economic trends, entrepreneurship, business organization, human relations, ethics, management, marketing, finance, and international business.

ENTREPRENEURIAL STUDIES w/Honors Option

Course # 06431

Prereq: Instructor approval
Level: 11, 12
Credit: 0.5

Course #06431 w/Honors Option: Entrepreneurial Studies w/honors option is designed for students with above-average grades who are planning to major in business in college or are interested in starting or managing their own business. Students will prepare themselves for the challenges of the business world and becoming an entrepreneur/manager by relating current practices in the world of business to: economic trends, business organization, human relations, ethics, management, marketing, finance, and international business.

MARKETING

Course # 06470

Prereq: None
Credit: 1.0
Supply fee: \$25

Course # 06470: is designed to prepare students for the challenges and opportunities in the field of marketing. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing. Marketing is beneficial for those planning to enroll in related business/marketing programs in college.

MARKETING w/Honors Option

Course # 06460

Prereq: Instructor approval
Level: 11, 12
Credit: 1.0
Supply fee: \$25

Course # 06460 w/Honors Option: The Honors Option is designed for students with above-average grades, managerial/organizational and intellectual abilities, who plan to major in business/marketing in college. Topics covered include current trends in marketing, consumer behavior, sales, advertising, entrepreneurship, human relations and sports marketing.

EMPLOYMENT EXPERIENCE

TECHNICAL SUPPORT INTERNSHIP(TSI)

Course # 06440

Prereq: Dept. Chairperson
or coordinator approval

Level: 10, 11, 12

Credit: 1.0

The Technology Support Internship (TSI) course is a hands-on study of technology integration in an educational context. Students will be trained to oversee daily technology issues in order to assess which problems surface throughout the school day. Students will define the best approach to addressing or solving the problems for students and teachers.

Students will troubleshoot hardware, software, and network problems, as well as process service tickets and inventory stock. Students will be required to complete and maintain several running projects that address problems or solutions in educational tech integration. They will also be expected to provide training sessions on Chromebook use and digital citizenship to incoming freshmen and transfer students. The course also provides students with the opportunity to pursue an independent learning pathway and potential professional certifications in one of four areas: Application, Innovation, Design, and Entrepreneurship.

**Prerequisite: Department Chair approval. Open to grades 10-12
Honors Option available after completion of the first year.**

BUSINESS WORK EXPERIENCES

Course # 06490

Prereq: Marketing or
concurrent enrollment in
Marketing and coordinator
approval

Level: 11, 12

Credit: 1.0

Business Work Experiences provides the student with actual paid business experience related to their career goals. Students are employed in local businesses from a minimum of 15 hours to a maximum of 25 hours per week for which they receive monetary compensation. A wide variety of experience is available in fields such as apparel and accessories, automotive, food distribution, food service, hotel and tourism, general merchandise retailing, and various office related careers, including banking, accounting, and administrative assistant positions. This work experience program prepares students for further study or a career in marketing, retailing, management, finance, accounting, or administrative office positions. Students are selected by application and interview with emphasis on factors including reliability, integrity, and career goal. ***It is the student's responsibility to make travel arrangements to and from the job. Students must maintain enrollment and earn a passing grade in Marketing to receive credit for this work experience program.***

INTERNSHIP

Course # 06461

Prereq: Dept. Chairperson
or coordinator approval

Level: 11, 12

Credit: .5 per semester (this
class may be repeated for up
to 1 credit)

Internship is an elective semester program for the highly motivated junior or senior. The program provides students with opportunities in the local community for hands-on career exploration in their chosen field. Acceptance into the program is determined by factors such as faculty letters of recommendation, availability of a community sponsor, and interviews with the coordinator and the community sponsor. Students are required to keep a journal of their experiences and complete a summary report. During the internship, students observe daily operations, confer with other personnel, and participate and contribute to the functions of the organization for at least 50% of the hours spent in the internship experience. Student performance in the Internship program is evaluated on a pass-fail basis. ***The internship is conducted exclusively outside of the school day with no pay for a minimum of 50 hours during the semester. Students must make the travel arrangements necessary to fulfill their internship responsibilities.***

Business Department

**INTERNSHIP w/Honors
Option**

Course # 06441

Prereq: Dept. Chairperson
or coordinator approval

Level: 11, 12

Credit: .5 (this class may be
repeated for up to 1 credit)

Course #06441 w/honors option: The core material for this course is similar to Course #06461; however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time. This course is highly recommended for motivated students giving serious consideration to a specific career.

**PREVOCATIONAL JOB
TRAINING**

Course #01850

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

The goal of this course is to provide students with an opportunity to learn theory and engage in practical hands on experience. Students will develop job responsibility, initiative, and positive employer-employee relationships. Emphasis will be placed on hands-on in school job training and entry level workplace skill development which may include: following a schedule, time management, efficiency, responsibility, work etiquette, following directions and communicating with coworkers and supervisors. Students may have the opportunity to participate in an off-campus volunteer experience based on student evaluations, opportunity availability and scheduling flexibility.

**COOPERATIVE WORK
TRAINING**

Course #01770

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

Students are employed in the local community for a minimum of ten to a maximum of twenty five hours per week. Students are evaluated cooperatively by the employer and teacher on a quarterly basis. *Pass/Fail grades are issued for this course.*

Department Chairperson Mr. David Anderson

The English Department offers a variety of courses designed to develop essential communication skills in not only reading, writing, and speaking, but also listening and thinking skills. Students will be grouped in order to assure the most challenging and productive studies according to their abilities and achievement levels. A variety of materials and instructional techniques are used to match the capabilities of the groups established: Honors and Regular. Such groupings for the freshman year are based upon scores on standardized tests and ability as demonstrated in junior high school, teacher recommendation, and a writing sample. Placement in any level is not static but subject to review and change resulting from the student's progress during freshman year and before enrollment in successive courses, sophomore through senior years. **Four (4.0) credits in English are required for graduation.** English I, II, and III are required for graduation, but the fourth credit may be earned in a variety of combinations of English electives. Because of the sequencing of the writing and reading assignments in the required courses in English I, II, and III, students must pass both semesters of a class before being able to advance to the next level. **Therefore, students cannot be concurrently enrolled in English I, II, or III.** Failures in English I, II, or III are required to be made up during summer school. NOTE: Students must be enrolled in an English class for every semester in attendance.

Some English classes require a \$20 fee for supplemental e-texts used for the purpose of annotation.

Please see Course Description for detailed Prerequisites.

CATEGORIES OF ENGLISH CLASSES

While four (4.0) credits in English are required for graduation, students have the following options in taking English credit. These options fall in several categories:

Core Credits: Students must follow this sequence of courses. If a student fails a semester of one of these classes, the student must make up the failing grade during summer school before advancing to the next level.

Freshmen:	English I <u>or</u> English I Honors
Sophomores:	English II <u>or</u> English II Honors
Juniors:	English III-American Literature <u>or</u> English III-American Studies <u>or</u> Advanced Placement English Language & Composition.

Options for the Fourth Credit: Students may take any combination of the following classes for the fourth credit in English. Note that some classes are a full year (1.0 credit) and some are a semester long (0.5 credit). When planning courses for this fourth credit, students are advised to check with their English III teachers and their school counselors for the best fit for college and career requirements.

Full year (1.0 credit) classes

- Introduction to Theatre Arts
- Journalism: Yearbook
- Journalism: Yearbook w/ honors option
- Journalism: Newsmagazine
- Journalism: Newsmagazine w/honors option
- Humanities
- AP English Literature
- Honors Seminar in Writing

One semester (0.5 credit) classes

** indicates classes available to seniors only*

- World Literature
- Debate and Writing (not offered in 18-19)
- African-American Literature*
- Senior Composition*
- Creative Writing
- Popular Literature*
- Science Fiction
- Film Studies *
- Rhetoric*
- Writing Workshop*
- Advanced Acting
- Speech/Communication
- Fantasy Literature
- Stagecraft (not offered in 18-19)
- Oral Interpretation (not offered in 18-19)

English Department

CORE CREDITS

ENGLISH I

Course # 01110

Prereq: None

Level: 9

Credit: 1.0

English I teaches essential written language and communication skills in a program that integrates literary analysis, information literacy, listening skills, problem-solving strategies, teamwork, and multimedia presentations. Students will explore fiction and non-fiction works including short stories, novels, poetry, drama, mythology, and biographies. Information literacy units are taught in conjunction with certified library media specialists and incorporate research skills such as source identification, development of search strategies, attribution, and evaluation of information. The course allows students to express their understanding of important concepts and mastery of skills through discussions, projects, compositions, creative writing, and presentations. ***There is required reading during the summer before beginning this course.***

This course fulfills one of two "Intensive Writing" requirement credits.

ENGLISH I HONORS

Course # 01120

Prereq: Dept. Chairperson

Approval

Level: 9

Credit: 1.0

This course, for the superior academic student, not only incorporates the materials and skills of English I, but also is designed to provide an enriched study of literary forms and purposes, a great variety of student written expression, and more formal oral communication activities. The student will be introduced to the development of literature from its beginnings in the oral tradition to the standard modern literary genres – short story, novel, drama, biography, and poetry. Written assignments stress expository writing, especially mastery of the multi-paragraph essay. More sophisticated grammatical concepts are presented to improve the student's style of expression. Students perform a variety of speech assignments. A vocabulary text is also included. ***There is required reading during the summer before beginning this course.***

This course fulfills one of two "Intensive Writing" requirement credits.

ENGLISH II

Course # 01210

Prereq: Pass both semesters of English I

Level: 10

Credit: 1.0

A variety of literary works, composition assignments and speaking & listening activities are presented. Within thematic units, various complex texts will be studied and analyzed. Reading comprehension strategies will focus on thoughtful interaction with texts; composition assignments will cover the clear communication of ideas through the multi-paragraph organizational format, although some creative writing may also be expected. Research strategies focused on the access and purposeful use of information are taught and assessed in conjunction with certified library media specialists. Finally speaking and listening activities will stress the importance of collaboration, appropriate modes and mediums and effective communication strategies. ***There is required reading during the summer before beginning this course.***

This course fulfills one of two "Intensive Writing" requirement credits.

ENGLISH II HONORS

Course # 01220

Prereq: English I Honors
and/or Dept. Chairperson
approval

Level: 10

Credit: 1.0

This course, for the superior academic sophomore student, is a general survey approach to English literature in which major English authors and their representative works are studied. Authors' themes as well as specific literary types are studied: poetry, drama (especially Shakespeare), short story, and novel. Composition skill development is divided between exposition (critical analysis and personal essays) and creative writing. A research paper is also required, a unit taught in conjunction with certified library media specialists. Vocabulary will be studied in the context of the literature. ***There is required reading during the summer before beginning this course.***

This course fulfills one of two "Intensive Writing" requirement credits.

ENGLISH III – AMERICAN LITERATURE

Course # 01330

Prereq: Pass both semesters
of English II

Level: 11

Credit: 1.0

English III builds on the skills acquired in English I and English II. The course focuses on American Literature and emphasizes outstanding American authors from early to modern times in the genres of fiction, non-fiction, drama, and poetry. In addition, there is a challenging emphasis on grammar, vocabulary, and study skills development. Written work consists of the expository essay and the completion of a college level research paper. ***There is required reading during the summer before beginning this course.***

AMERICAN STUDIES

Course # 01360

Prereq: Pass both semesters
of English II

Level: 11

Credit: 2.0 one for junior level
English; one for U.S. History

This interdisciplinary class is offered for a wide range of junior students who are academically motivated, self-directed, or college bound. The course will take an intensive survey approach to American literature and American history, emphasizing the advantage of seeing the "sense of connectedness" between the history of each era and its relationship to and influence on the art, music, and literature produced during that period. Challenging literary and historical analysis will be pursued throughout the course in lectures, discussions, and writing assignments. In addition, there will be emphasis on vocabulary, study skills, and the development of research expertise. Writing assignments will include the development of literary analysis, expository essays, some creative writing, and independent study towards the research paper. Special projects coordinated between the two disciplines will include the research paper and enrichment field experiences. Reflective of their overall effort and ability to excel in this interdisciplinary environment, students earn a single grade for this two-part course. ***There is required reading during the summer before beginning this course.***

English Department

ADVANCED PLACEMENT ENGLISH LANGUAGE & COMPOSITION

Course # 01320

Prereq: English II Honors and/or Dept. Chairperson approval

Level: 11

Credit: 1.0

The AP English Language and Composition course “engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer’s purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing” (College Board). Major American authors and their representative works will be studied as students comprehend, analyze, and evaluate American literature that encompasses various time periods and literary movements with a focus on rhetorical analysis. Students will develop stylistic maturity in their prose by enhancing their ability to use writing conventions both appropriately and with sophistication focusing on rhetorical analysis, argument, and synthesis writing. ***There is required reading during the summer before beginning this course.*** Upon the successful conclusion of this course, students will be prepared to take the AP exam (see page 94 for details).

APPLIED ENGLISH DYNAMICS 1

Course #01670

Prereq: Director placement

Level: 10 ,11

Credit: 1.0

These courses are for students who are reading and writing below grade level. Curriculum is delivered both through scientifically research-based computer programming and teacher facilitated instruction which emphasize basic reading skills, reading comprehension strategies, fluency, vocabulary and writing. In addition, students will participate in various projects that explicitly teach research skills as well as various modes of presentation. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

APPLIED ENGLISH DYNAMICS 2

Course #01680

Prereq: Director placement

Level: 11, 12

Credit: 1.0

These courses fulfill the two “Intensive Writing” requirement credits.

APPLIED READING FUNDAMENTALS

Course #01715

Prereq: Director placement

Level: 9

Credit: 1.0

This course is a supplemental class that targets growth in the areas of decoding, comprehension, fluency and vocabulary. In addition, students are explicitly taught various reading strategies using fiction and non-fiction texts. It is designed as a “blocked” class with Applied English Dynamics for freshmen students that demonstrate a need for direct instruction in reading strategies because their reading skills are below grade level. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

FOUNDATIONS ENGLISH

Course #11750

Prereq: Director placement

Level:9,10,11,12

Credit: 1.0

This course explores fundamental elements of reading, writing, listening and speaking skills that can be generalized in various facets of daily life. *This course can be taken multiple times with teacher approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the new Illinois Learning Standards.*

This course fulfills one of two “Intensive Writing” requirement credits.

OPTIONS FOR FOURTH CREDIT

ADVANCED ACTING

Course # 01601

Prereq: Introduction to Theatre Arts or Dept. Chairperson approval

Level: 10, 11, 12

Credit: 0.5

Advanced Acting is a performance-oriented course that gives the student concentrated training in developing various acting styles and performance techniques. In addition, students advance their study of the art of characterization through the development of bodily movement and vocal expression. Students are individually graded on their progress in learning and applying skills through class performance as they relate to the various dramatic forms. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

SPEECH/COMMUNICATION

Course # 01631

Prereq: Pass both semesters of English I

Level: 9, 10, 11, 12

Credit: 0.5

This class is designed to give the student background and experience in the study of public speaking and performance. It provides opportunities for the student to learn organizational speech and writing and research skills, write scripts and speeches, prepare cuttings from the works of noted authors, and evaluate their performance and the performances of others. Students will analyze the work of professional and gifted performers in all areas of communication and performance. Students will also receive instruction and practical experience in a variety of speech forms: oratory, extemporaneous speaking, oral interpretation of literature (both prose and poetry), humorous and dramatic interpretation (individual, duet, and group), and radio and television broadcasting.

There is required reading during the summer before beginning this course.

ADVANCED PLACEMENT ENGLISH LITERATURE & COMPOSITION

Course # 01480

Prereq: AP English

Language & Composition and/or Dept. Chairperson approval

Level: 12

Credit: 1.0

AP English Literature & Composition, "Great Books," focuses on selected major works of Western Civilization in the field of literature, philosophy, political theory, history, theology, and psychology. Required readings in all the genres of fiction include such writers as Joyce, Dante, Austen, Dostoevsky, Shakespeare, and Sophocles and a spectrum of non-fiction: letters, treatises, essays, handbooks, and dialogues by such writers as Mill, Nietzsche, Locke, Epictetus, and Plato. A summer reading list is required. Students read critically and participate actively in the great and continuing conversations on the pivotal human issues found in these classics. Student partners lead discussions according to the Great Books method. Compositions include papers on analysis, synthesis, evaluation, and hypothesis as well as delineation of each author's arguments in non-fiction. Two semester term papers are also required, analyzing, comparing, and contrasting at least three works, two of which are read outside of class. *This course prepares the student for the Advanced Placement exam in May.*

There is required reading during the summer before beginning this course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

English Department

HONORS SEMINAR IN WRITING

Course #01490

Prereq: AP English Language & Composition and/or Dept. Chairperson approval
Level: 12
Credit: 1.0

Honors Seminar in Writing is a class for the intellectually curious who value the power of the written word and are eager to become more sophisticated writers. This year-long course is especially designed for those who have enjoyed the rhetorical nature of AP Language and Composition and are interested in analyzing stylistic elements in professional and personal writing. Students will read texts that are challenging and nuanced and will, in their writing, explore real-world complexities through primary and secondary research. The members of this course are committed to crafting and revising their own nonfiction essays, with the intention of publication. ***There is required reading during the summer before beginning this course.***

NOTE: Students must be concurrently enrolled in AP English Literature and Composition to take this class.

SENIOR COMPOSITION

Course # 01621

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This college bound course is designed for students who wish to improve their critical thinking skills and reading and writing strategies for the heavier demands of college coursework. The topics covered will be literary analysis, reading for the research paper, vocabulary development, and textbook reading strategies. Students will read self-selected novels from a college-bound list.

There is required reading during the summer before beginning this course.

FILM STUDIES

Course # 1451

Prereq: Pass both semesters of English II
Level: 11, 12
Credit: 0.5

Film Studies is a course designed for students who enjoy movies and wish to go beyond merely watching them and into the realm of thinking critically about how they are made. We will consider how directors use sound, lighting, camera movement, and editing in order to create meaning and enjoyment. The students will critique a wide variety of genres, both past and present, and will demonstrate their understanding through engaging class discussions, collaborative projects, and writing, both formal and informal. By the end of the semester, students will grow in their ability to interpret film (as well as written texts) and to appreciate the fascinating world of cinema. ***There is required reading during the summer before beginning this course.***

Although not all movies are shown in their entirety, written permission must be obtained by a parent at the beginning of this course to allow for students to view the R-rated movies associated with this class. At the time of registration, if R-rated movies are to be utilized in whole or in part, a list of these movies will be available through the English department and online.

SCIENCE FICTION

Course # 01431

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This senior elective explores views presented by various science fiction writers. Through this survey of classic and contemporary science fiction, students will consider different attitudes regarding the future of humankind. Along with the reading of novels, students will have a variety of writing experiences including a research paper. Course evaluation will be measured through tests, quizzes, class discussions, three analysis papers, and one research paper. Texts include *Ender's Game*, *The Maze Runner*, *The House of the Scorpion*, and the anthology: *Science Fiction, Science Fact and You*.

There is required reading during the summer before beginning this course.

POPULAR LITERATURE

Course # 01461

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

Designed for college and non-college bound seniors, "Popular Literature" focuses on works of 90s and today, while emphasizing the differences of popular and classical literatures. The origin and dynamic characteristics of this genre in today's society will be analyzed through the reading of class books and literature circles. Types of reading audiences and "requirements" of a popular literature author will also be studied. Students will be required to complete written, oral and group projects in addition to the readings; class discussion will constitute a major portion of the class. Authors to be read and studied may include John Grisham, Harlan Coben, Dan Brown, James Patterson, Patricia Cornwell, Sandara Brown, Stephen King, Danielle Steel, Nicholas Sparks, Mary Higgins Clark, and Tom Clancy. Novels may include *Dark Tower*, *The Notebook*, *The Partner*, *Roses are Red*, *Tell No One*, *Hello Darkness*, *DaVinci Code*, and *Angels and Demons*.

There is required reading during the summer before beginning this course.

CREATIVE WRITING

Course # 01561

Prereq: Pass both semesters of English II

Level: 10, 11, 12

Credit: 0.5

This elective is designed for students who are interested in exploring more creative aspects of their writing and studies of literature. Creative Writing emphasizes an understanding of traditional literary techniques combined with unconventional, individualized forms of speaking and writing to effectively communicate in an interesting way. The class incorporates a wide variety of verbal and written exercises that require a balancing of individual creativity with disciplined focus for success in the course. Time is dedicated to better understanding the creative process and helping students find inspiration to improve all aspects of their writing. In addition to improvisational exercises and participation in writing groups, students complete a portfolio project each quarter that is the culmination of daily journaling and reading assignments. Emphasis will be placed upon both recognizing the elements of style in classical and contemporary authors in selected reading passages and in developing individual style.

There is required reading during the summer before beginning this course.

RHETORIC

Course # 01531

Prereq: Pass both semesters of English III

Level: 12

Credit: 0.5

This elective is designed for college-bound seniors who desire experience in writing. The course develops student writing in freshman college composition classes. Much emphasis is placed upon review of grammatical principles, improvement of vocabulary, and development of an organized, individual writing style. In addition, the student is also required to apply these principles to a research unit and paper. Students use computers to complete their writing and research assignments.

There is required reading during the summer before beginning this course.

HUMANITIES

Course # 02260

Prereq: Average to above average grades. Dept. Chairperson approval.

Level: 12

Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

There is required reading during the summer before beginning this course.

English Department

INTRODUCTION TO THEATRE ARTS

Course # 01380

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

Introduction to Theatre Arts is a performance-oriented drama course geared to developing the creative and dramatic talents of individual students. This course uses student acting and teacher-student evaluation as the major teaching method to help the student understand the medium of theatre. It develops sensitivity to the thoughts, beliefs, and ideas of mankind through study, in-class performance, and theatre attendance. Included are field trips to see plays representative of the style studied and a final audience-invited performance.

AFRICAN-AMERICAN LITERATURE

Course # 01471

Prereq: Pass both semesters of English III

Level: 12

Credit: .5

This course explores the African-American experience as reflected in the literature and oral tradition of the community, from the earliest days of our nation to current writers and thinkers. The course will explore not only traditional literary genres such as fiction, poetry, drama, and essays, but also consider areas of film, music, and art as well. Students will study the wide span of the African-American experience from slave narratives to current rap music. Students will also have an opportunity to explore the history and experience of Chicago's African-American experience and literature as a specific focus as well as pursue a major research project on some area of the African-American experience such as a specific author, prominent figure, or essential artistic/cultural movement.

Extensive reading is expected in this class.

JOURNALISM: YEARBOOK

Course # 01400

Prereq: "C" average and

Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Course #01400: This is a writing and production course for students interested in designing a yearbook. The classroom portion of the course emphasizes the mechanics of strong, journalistic writing, strategies for effective communication, digital photography, and graphic design. Researching and interviewing are also covered as students prepare to write stories for the school yearbook, *Vespa*. The student should have above average writing skills. Additional work outside of class is required; the outside assignments may focus on writing, photography, page-layout skills, and the business aspect of the yearbook. Students will also be part of the extra-curricular yearbook activity and must take the course to be eligible for an editor position. Journalism may be repeated for credit with consent of the instructor and department chairperson. ***This course does NOT fulfill NCAA initial eligibility requirements for college.***

JOURNALISM: YEARBOOK w/honors option

Course # 01410

Prereq: "C" average and

Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

Course #01410 w/honors option: To receive honors credit the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the book, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

JOURNALISM:
NEWSMAGAZINE
Course # 01370

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course introduces students to the fundamentals of journalism. Emphasis is placed on interviewing, writing, editing, assessing the audience, and meeting deadlines. Units of study include responsibilities and ethics, Associated Press style, interviewing, news writing, feature writing, and page design. All final story assignments must be typed, and the culminating activity is a feature story spread. This course is intended as a practical application of newspaper/newsmagazine news gathering and writing techniques, not as an analysis of the media.

JOURNALISM:
NEWSMAGAZINE
w/honors option
Course #01390

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Course #01390 w/honors option: To receive honors credit, the student must serve as an editor. Editors are chosen through previous journalism experience, an application, and an interview with the adviser. The honors level includes all the elements of the regular level course plus the additional workload an editor must handle. This includes planning the newsmagazine, coaching and leading the staff, revising their work, and attending all meetings and events required by the adviser.

WRITING WORKSHOP
Course # 01611

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for the student with average to below-average writing skills. The course will build upon writing skills learned freshman, sophomore, and junior years and focuses on using word processing as a tool for writing improvement. This course's structure uses a workshop-style format to help students develop basic writing skills such as brainstorming, effective organizational patterns, establishing a purpose, writing to an audience, vocabulary development, and sentence correctness. Some of the writing assignments include, but are not limited to, descriptive writing, personal narratives, and self-reflection. Students will also learn to write for the workplace and will complete a job portfolio. ***There is required reading during the summer before beginning this course.***

WORLD LITERATURE:
Course # 01571

Prereq: Pass both semesters of English III
Level: 12
Credit: 0.5

This course is designed for college-bound seniors and will take students on a literary tour of locations around the world. The class will focus on novels from a variety of geographic regions and historical time periods, but it will also incorporate other media such as film, food, music, and drama. ***There is required reading during the summer before beginning this course.***

ORAL INTERPRETATION
Course # 01511

Prereq: Pass both semesters of English I
Level: 9, 10, 11, 12
Credit: 0.5

This course blends an interest in literature with the ability to perform in front of a small group. Students first learn to analyze selections of their choice from various genres: novel, short story, poetry, and drama. Next, they must interpret and communicate the meaning and mood by the way they use their voice and body in reading aloud the selection. The semester will end with a final group performance of a piece of literature that the teacher will direct.

This class will not be offered in 2018-2019.

English Department

STAGECRAFT

Course # 01521

Prereq: Pass both semesters of English I

Level: 10,11,12

Credit: 0.5

This one-semester course strengthens students' knowledge of technical theatre. Participation in set construction after school and with the stage crew outside of class is required. Emphasis is placed on both practical experience and academic learning. One half of the course is geared toward a student in scenic design, a variety of scenic styles, play reading, technical crew positions, lighting and sound design, and make-up and costume design. These assignments include written set designs, written reports on script readings, construction of a set model, construction of a stage manager's prompt book, and test on lighting, sound, costumes, make-up, and staging. The second half of the course involves construction of dramatic production: building flats and major set pieces, painting, shadowing, and stenciling. *This class will not be offered in 2018-2019.*

DEBATE AND WRITING

Course # 01641

Prereq: Pass both semesters of English II

Level: 11,12

Credit: 0.5

Listening, leadership, courtesy, topic analysis, research, evaluation of sources and databases, articulation, and confidence—these are the lifelong skills fostered in Debate and Writing. This course helps students learn to access a range of informational sources available at the Hinsdale South library in order to build arguments about contemporary topics used in debates. Students will participate in formal and informal class discussions, a simulated town meeting, a group discussion panel, debates, current event speeches, and a role play of an individual's life after reading a biography or autobiography. Reading, writing, researching, and active participation are all major components of this course. Because multiple performances will be required during the semester, students should already have a familiarity with and a sense of confidence about public speaking. By the end of the semester, students should feel a sense of mastery at organizing, working cooperatively with others, researching, preparing for, and delivering public performances. *This class will not be offered in 2018-2019.*

INTERVENTION

ACADEMIC READING 1

Course # A01100

Prereq: Dept. Chairperson recommendation

Level: 9

Credit: 1.0

Academic Reading 1 is designed for ninth grade students whose standardized test scores demonstrate that they would benefit from direct instruction on reading and vocabulary strategies. Students will complete diagnostic tests in several skill areas at both the beginning and end of the school year to track their growth. The curriculum is comprised of units that address skills that "good readers" internalize including previewing, predicting, summarizing, questioning, and analysis of text structure. In addition to these lessons, students will also receive weekly vocabulary instruction. Finally, students will engage in daily sustained silent reading both inside and outside of class. Comprehension of these novels is assessed both orally and in writing through book talks, presentations, class discussions, journals, projects, more formal writing, and a variety of other authentic assessments. Academic Reading students are simultaneously enrolled in both this course and English I; both classes are taught by the same English teacher. Although both Academic Reading and English I have separate curricula, Academic Reading will include some pre-teaching and re-teaching of skills and strategies taught in English I.

Academic Reading 2
Course # A01200

Prereq: Pass both semesters
of English I & Dept. Chair

Approval

Level: 10

Credit: 1.0

Academic Reading 2 is designed for tenth-grade students who were identified during their ninth-grade year as likely to benefit from direct reading and writing instruction and supplemental in-school language arts instruction and support. Guided by multiple diagnostic assessments and a review of student data, teachers will target specific student needs while utilizing engaging, purposeful, research-based practices. Student progress is monitored regularly to ensure that students are receiving the best instruction for their specific needs. Academic Reading 2 students are simultaneously enrolled in this course and English II.

Family & Consumer Sciences

Department Chairperson Mr. Matthew Swedko

The Department of Family & Consumer Sciences is concerned with enhancing the social, intellectual, economic, aesthetic, and physical well-being of both individuals and families. The courses in the department provide students with the basic skills and tools necessary to perform the various functions of the family. Family members will use critical thinking skills to analyze the effects of technology and its multitude of new resources and products on the family. Courses in this department offer opportunities for creative expression and personal fulfillment as well as employment skills. Elective Arts credit is given for all Family and Consumer Sciences courses

Family & Consumer Sciences related careers and the suggested course sequencing:

Family & Consumer Sciences

INTERIOR DESIGN & HOUSING

Course #06621

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$10

In this project-oriented class students learn to apply the elements and principles of design to architecture and interior spaces. Students explore the development of housing styles as well as identifying furniture styles, designing kitchen layouts and creating beautiful living areas. The final project involves designing a dream home including architectural drafting techniques, floor plans, arranging furniture and decorating with samples of paint, wallpaper and carpet. Interior Design & Housing is for personal enjoyment and creative expression as well as career preparation.

Suggested concurrent or follow-up class: Pre-Engineering I

This class alternates with Understanding Relationships and will not be offered during the 2018-2019 school year. It will be offered in 2019-2020.

EXPLORING FAMILY & CONSUMER SCIENCES

Course #06500

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0 (0.5 Consumer Educ., 0.5 Applied Arts)
Supply fee: \$15

This survey class introduces the student to all areas of Family & Consumer Sciences: consumer economics, foods, sewing, child development, housing, fashion, interior design and personal development. Projects and practical applications actively involve the students. This is a good place to begin Family and Consumer Sciences studies. ***This course fulfills the state mandate for consumer education*** and also provides one semester credit for Elective Arts. *Student must pass the semester in which the Consumer Unit is taught in order to fulfill the state mandate.*

FOUNDATIONS FOODS

Course #01722

Prereq: Director placement
Level: 9, 10, 11, 12
Credit: .5

This course is designed to give students an opportunity to practice creating meals that they will be able to recreate on their own. Emphasis is on safety, sanitation, nutrition, following a basic recipe, and creating simple meals independently. The lab activities also provide experiences in time management and teamwork.

This course may be repeated as necessary.

APPLIED SOCIAL COMMUNICATION

Course #01860

Prereq: Director placement
Level: 9, 10, 11, 12
Credit: .5

This course is also offered as 01860H for students in the Haven program and 01860P for students in the Program Success Program.

The Social Communication class is meant for students who have an identified need in the area of pragmatic language and social interaction skills. The class focuses on explicitly teaching social and emotional vocabulary, problem solving, conversation skills, and other pertinent skills aimed at helping students communicate effectively and appropriately with others. The curriculum is based on Michelle Garcia Winner's Social Thinking approach. The long term goal for the class is to help students learn and utilize social skills so they can be successful in social relationships, classroom environments, and job settings currently and in the future. This course is a pass/fail course.

FOODS & NUTRITION

Course #06501

Prereq: none
Level: 9, 10, 11, 12
Credit: 0.5
Supply fee: \$20

Do you love to cook or want to learn to cook? Foods and Nutrition is the first of three courses in foods. It is a concentrated study of nutrition, food preparation, consumer buying and meal planning. Emphasis is on correct food preparation techniques and principles of cookery. Lab periods provide practical experiences in time management, equipment use, food preparation skills and serving meals. The course is designed for personal enjoyment and as preparation for further training in food service. Students **cannot receive credit** for both Foods & Nutrition and Senior Foods.

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts

Family & Consumer Sciences

CREATIVE FOODS

Course #06522

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce culinary works of art? Creative Foods is an in-depth continuation of Foods and Nutrition, emphasizing student preferences and creativity. Students select and prepare a variety of appetizers, pasta, breads, deserts, and main dishes. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Bakery & Pastry Arts, Chef & Restaurant.

BAKERY AND PASTRY ARTS

Course #06511

Prereq: Foods and Nutrition or Senior Foods

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$20

Do you like using your creative talents to produce pastry works of art? Baking and Pastry Arts builds on the skills learned in Foods and Nutrition/Senior Foods, emphasizing student preferences and creativity in the pastry area. Students select and prepare a variety of cookies, cakes, breads, and desserts. Activities focus on European baked products and decorating a cake. The course is designed for personal enjoyment and to ready students for further training in food service.

Suggested follow-up classes: Chef & Restaurant, Creative Foods.

CHEF AND RESTAURANT

Course #06532

Prereq: Foods and Nutrition or Senior Foods AND teacher approval

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$20

This course is designed for future chefs and those who are interested in the commercial food industry. Students will operate a "mini restaurant" incorporating all aspects of food service and serve luncheon meals to Hinsdale South staff. Activities include menu selection, recipe testing, cost analysis, table settings, meal preparation, meal service and commercial cleanup techniques.

While Creative Foods is not required as a prerequisite for enrollment, it is strongly recommended.

SENIOR FOODS

Course #06541

Prereq: none

Level: 12

Credit: 0.5

Supply fee: \$20

Do you want to learn how to cook before going to college or living on your own? Senior Foods is designed to give students an overview of meal preparation and nutrition. Emphasis is on nutrition, food preparation, meal planning and food purchasing. Lab periods provide experiences in time management, equipment use and food preparation techniques. Students **cannot receive credit** for both Foods and Nutrition and Senior Foods

Suggested follow-up classes: Creative Foods, Bakery & Pastry Arts.

CREATIVE SEWING I

Course #06552

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Do you like to express yourself creatively by the clothes you wear? Learn to sew your own unique clothes using commercial patterns. In this class, emphasis is placed on individual projects suited to the student's preferences and abilities. Students will use a computerized sewing machine to produce high quality clothing they will be proud to wear. In addition to personal enjoyment, sewing is excellent preparation for careers in fashion and interior design.

Suggested follow-up classes: Fashion Merchandising & Design, Creative Sewing II

Students are required to purchase materials for this class.

Sewing classes alternate with Fashion Merchandising & Design and will not be offered during the 2018-2019 school year. They will be offered in 2019-2020.

Family & Consumer Sciences

CREATIVE SEWING II

Course # 06562

Prereq: Creative Sewing

Level: 10, 11, 12

Credit: 0.5

Supply fee: \$10

This course focuses on advanced sewing techniques with various projects chosen by the student and approved by the instructor. Areas of study may include textile arts, tailoring, formalwear, serging techniques and fashion design. Each project incorporates new clothing construction skills based on student preferences and abilities. **Suggested follow-up class: Fashion Merchandising & Design.**

Students are required to purchase materials for this class.

Sewing classes alternate with Fashion Merchandising & Design and will not be offered during the 2018-2019 school year. They will be offered in 2019-2020.

FASHION MERCHANDISING & DESIGN

Course #06571

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$10

Fashion Merchandising & Design brings the exciting world of fashion to life through the study of today's fashion industry. Activities include style analysis, clothing design, fashion trends and personal selection of fashions. Creative projects involving fashion design/sketching, visual displays and a student fashion show are emphasized. This course may be taken for personal enrichment as well as preparation for fashion related careers.

Suggested concurrent or follow-up class: Creative Sewing I

This class alternates with Creative Sewing and will be offered during the 2018-2019 school year. It will not be offered in 2019-2020.

CHILD CARE & DEVELOPMENT

Course #06581

Prereq: none

Level: 10, 11, 12

Credit: 0.5

Do you love working with children or hope to be a parent someday? Are you thinking of a teaching career in preschool or elementary education? This course helps you understand how young children develop physically, intellectually, socially and emotionally. Class activities include conducting a preschool program in the school, observing young children, listening to guest speakers and evaluating children's toys and activities. Students plan activities appropriate for various age groups and participate in the fun with the children.

Suggested follow-up class: Invitation to Teach or Understanding Relationships.

UNDERSTANDING RELATIONSHIPS

Course #06611

Prereq: none

Level: 11, 12

Credit: 0.5

This course encompasses "a slice of life" and provides an opportunity for students to better understand themselves and discuss issues relevant to adolescents. Topics include personal identity, self-esteem, values, dating, marriage and meaningful relationships with family and friends. Through class discussions and group work, students practice life skills in communication, stress management, decision-making and conflict resolution. Understanding Relationships is recommended for all Juniors and Seniors interested in personal development or careers requiring interpersonal skills.

Suggested follow-up class: Child Care & Development

This class alternates with Interior Design & Housing and will not be offered during the 2018-2019 school year. It will be offered in 2019-2020.

Family & Consumer Sciences

INVITATION TO TEACH

Course #06595

Prereq: Students signing up for Invitation to Teach will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

INVITATION TO TEACH w/Honors Option

Course #06585

Prereq: Students signing up for Introduction to Teaching w/Honors Option will need to fill out an application (available in FACS office 152A or from the School Counselor) and must be in good academic standing. Previously taken or concurrent enrollment in Child Care & Development is recommended
Level: 12
Credit: 1.0

Course #6595: This course offers a realistic teaching experience enabling students to work under the supervision of certified staff at elementary and middle schools. Students will spend four days a week at their assigned school. One day per week will be a classroom component to study related issues in education. Students will keep a journal of experiences. Responsibilities include creation of a teaching unit, visual displays, and tutoring younger children.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible

Course #06585 w/honors option: Invitation to Teach w/honors option offers a more advanced teaching experience at a local elementary or middle school. Students will spend four days a week at the assigned school working under the supervision of certified staff collaborating with their mentor teacher and high school teacher to determine mutually agreed upon projects that will create a more in-depth experience for the student. Projects may include creating classroom teaching tools, research, tutoring, or interviews. Students who register for the course should have leadership ability, be organized, and be a goal setter who reaches their goals.

Applications available in FACS office (152A) or from the School Counselor.

Personal transportation preferred, however carpooling is possible.

**Department Chairperson
Mrs. Kerin Sancken**

Mission: The mission of the Mathematics Department is to develop in our students the mathematical abilities they will need to become problem solvers, productive citizens, and lifelong learners. We are committed to providing curriculum, instruction, and assessment that will actively involve students in constructing and applying mathematical ideas to solve problems and enable students to express the mathematical connections in the world around us with algebraic, geometric, or numeric representations.

**GRAPHING CALCULATORS ARE REQUIRED FOR
ALL MATH AND SCIENCE COURSES.**

**Suggested calculators: Texas Instruments TI 83, TI 83+, TI 84, TI 84+
Casio 9750, Casio 9860, Casio Prizm**

THE FOLLOWING ARE NOT ALLOWED: TI-Inspire CAS or TI-89.

Note:

Any student who earns a D in a mathematics course is strongly recommended to retake one or both semesters in summer school before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

It is not recommended to take Algebra I or Algebra II in summer school to accelerate since Algebra is the foundation of all secondary school mathematics. It is recommended to be taken during the school year. Students wishing to advance should take a summer school course after completing Algebra 1 during the regular school year.

Department chairperson approval is required when a change of level is requested. Failure of a course in a given track, in and of itself, does not imply an automatic change to a lower sequence.

Please see Course Description for detailed Prerequisites.

Mathematics Department

Three years of Mathematics are required for graduation. One of the three years must be an Algebra course and one course must include Geometry content.

Colleges require at least Algebra, Geometry and Algebra II/Trig for admission and may also require a 4th year Math course.

** This course requires Department Chair approval for registration

FOUNDATIONS MATH

Course #11760

Prereq: Department Chairperson placement

Level: 9, 10, 11, 12
Credit: 1.0

This course explores fundamental math concepts that can be generalized in various facets of daily life. Curriculum includes problem solving and computations, money and number sense, and basic estimation and measurement. Basic analytical methods, geometry and data analysis are also emphasized. *This course can be taken multiple times with department chair approval. Pass/Fail grades are issued for this course. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. **This course fulfills the Algebra I and Geometry content requirements.***

Mathematics Department

APPLIED MATH

Course #01700

Prereq: Department Chairperson placement

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed for students performing significantly below grade level in math. A variety of practical topics are covered such as basic probability, creating and interpreting graphs, formulas, fractions, percents, measurement, perimeter, basic geometry, consumer skills, and basic algebra. Students will be prepared to enter the Applied Consumer Math 1 course sequence or an Algebra 1 course within the mathematics department. *Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards. **This course fulfills the Algebra I and Geometry content requirements.***

APPLIED CONSUMER MATH 1

Course #01740

Prereq: Department Chairperson placement

Level: 10, 11

Credit: 1.0

Students that take this course are looking to gain knowledge and mathematical skills for everyday life. This course will guide students through tackling consumer math scenarios. It is designed for students performing significantly below grade level in math. *Curriculum in this course is a modification of the grade level standards but is aligned to the New Illinois Learning Standards.*

APPLIED CONSUMER MATH 2

Course #01750

Prereq: Department Chairperson placement

Level: 11, 12

Credit: 1.0

This course continues the work started in the Applied Consumer Math 1. The course targets continued acquisition of basic mathematical knowledge and skills. Students will practice independently applying problem solving skills in consumer and everyday scenarios. *This course can be taken multiple times with department chair approval. Curriculum in this course is a modification of the grade level standards but is in alignment with the New Illinois Learning Standards.*

ALGEBRA I

Course #03110

Prereq: Recommendation of 8th grade teacher and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is required for entrance to most colleges. It is also basic to a career or future study in all fields. Mastery of the basic arithmetic skills is a prerequisite for this course. The primary topics studied are equations and inequalities, linear and quadratic functions, systems of equations, exponents, polynomials, and introductory statistics. Real world applications are also explored. *A graphing calculator is required for this course. **This course fulfills the Algebra I requirement.***

ALGEBRA I ALGEBRAIC REINFORCEMENT (AR)

Course #A03110

Prereq: Recommendation of 8th grade teacher, MAP scores

Level: 9, 10, 11, 12

Credit: 1.0

This course is designed to support students enrolled in Algebra 1 by providing them additional instruction, individualized practice, and support. It is for the student with skill deficiencies in mathematics as identified by the MAP test. Students will use computer software to assist in remediating the skill deficits. *A graphing calculator is required for this course.*

ALGEBRA I Part 1

Course #03120

Prereq: 8th Grade teacher recommendation and MAP Test Score

Level: 9, 10, 11, 12

Credit: 1.0

This is the first course in a two-year algebra sequence. Algebra I Part 1 examines the first semester of Algebra 1 placing emphasis on manipulating variable expressions and enhancing numerical fluency. Core topics include: expressions, equations and inequalities, representing functions, emphasizing linear functions. This class establishes the foundational skills necessary for success in future mathematics classes and uses computer software to address skill deficits identified on the MAP test. *A graphing calculator is required for this course. **This course, in conjunction with Algebra I Part 2, fulfills the Algebra I requirement.***

Mathematics Department

ALGEBRA I Part 2

Course #03130

Prereq: Algebra 1 Part 1

Level: 9, 10, 11, 12

Credit: 1.0

This is the second course in a two-year algebra sequence. Algebra I Part 2 addresses linear and nonlinear functions, polynomials, exponents, systems, and statistics. Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course. **This course in conjunction with Algebra I Part 1 fulfills the Algebra I requirement. Most students will take this class in conjunction with Geometric Analysis.***

INTEGRATED ALGEBRA & GEOMETRY HONORS

Course # 03240

Prereq: 8th grade teacher rec, Algebra 1 or Geometry in 8th grade, Department Chairperson Approval.

Level: 9

Credit: 1.0

This honors course explores Algebra 1 and Geometry topics in greater depth than regular Algebra 1. Students who are successful in this course should be well prepared to continue in our honors and AP sequence. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY

Course # 03210

Prereq: C or better in Algebra 1 at the high school

Level: 10, 11, 12

Credit: 1.0

Geometry focuses on plane geometry, properties of lines, angles, triangles, quadrilaterals, and circles. It continues the use of algebra in geometric situations and calls on the power of logic and proof. Special attention is given to the concepts of congruence, perpendicularity, parallelism, area, similarity, coordinate geometry, right triangle trigonometry, and deductive reasoning. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRY HONORS

Course # 03220

Prereq: A in Algebra I or Integrated Algebra & Geo at the High School or 8th grade teacher rec + mastery of the algebra skill sheet, Dept. Chairperson Approval.

Level: 9, 10

Credit: 1.0

Geometry Honors is designed for the superior mathematics student and deals with the topics included in Geometry (Course #03210), but with more depth. This course provides an in-depth study of Euclidian geometry. Particular attention is given to the nature of mathematical systems, logic, and deductive and inductive proofs. Students are expected to apply their knowledge to different situations. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

GEOMETRIC ANALYSIS

Course #03230

Prereq: Algebra I AR, Identified deficiencies from Freshman MAP tests, semester exams and teacher recommendation.

Level: 10, 11, 12

Credit: 1.0

This course deals with the same topics of Geometry (Course #03210) with emphasis on hands-on-learning, practical applications and informal argument instead of formal proof. Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course. **This course satisfies the Geometry content requirement.***

ALGEBRA II / TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

Algebra 2 Trigonometry continues the study of linear functions, topics explored in Algebra and Geometry. It introduces the complex number system and non-linear function families: polynomial, exponential, logarithmic, radical and rational functions. Functions are applied to Trigonometry and a foundation in statistics are introduced so students can explore these topics the following year of mathematics. *A graphing calculator is required for this course.*

Mathematics Department

ALGEBRA II / TRIGONOMETRY

Course # 03310

Prereq: C or better in Algebra I and Geometry

Level: 10, 11, 12

Credit: 1.0

Algebra 2 Trigonometry continues the study of linear functions, topics explored in Algebra and Geometry. It introduces the complex number system and non-linear function families: polynomial, exponential, logarithmic, radical and rational functions. Functions are applied to trigonometry and a foundation in statistics are introduced so students can explore these topics the following year of mathematics. *A graphing calculator is required for this course.*

ADVANCED ALGEBRAIC TOPICS

Course # 03330

Prereq: Geometric Analysis and identified deficiencies on semester exams, MAP test, and teacher recommendation.

Level: 11, 12

Credit: 1.0

This course deals with the same topics of Algebra II / Trigonometry (Course #3310). Students will also address skill deficits identified on the MAP test and use computer software to assist in remediating them. *A graphing calculator is required for this course.*

PRECALCULUS HONORS

Course # 03410

Prereq: B or better in Algebra II/ Trigonometry Honors or A in Algebra II/Trigonometry and Department Chairperson approval

Level: 10, 11, 12

Credit 1.0

Precalculus Honors treats the topics of Precalculus (Course #03400) in greater depth, emphasizing precision and the communication of ideas. Additional topics of probability, sequences, and limits are addressed. *A graphing calculator is required for this course*

PRECALCULUS

Course # 03400

Prereq: C or better in Algebra II/Trigonometry or Algebra II/ Trigonometry Honors

Level: 10, 11, 12

Credit 1.0

This course is a study of functions and their applications. It extends the topics of Algebra II / Trigonometry and adds conic sections, parametric equations, polar coordinate system, and trigonometric functions. This course is recommended for students who are preparing to enter a profession, a technical or semi-technical field, or planning to take at least one college-level mathematics course. *A graphing calculator is required for this course.*

ADVANCED PLACEMENT

CALCULUS AB

Course # 03420

Prereq: Successful completion of Precalculus or Department Chairperson approval

Level: 11, 12

Credit 1.0

Advanced Placement Calculus is a college level course offered for serious students interested in advanced placement in college or for mathematics, science, engineering, or business students. Material studied includes beginning differential and integral calculus and applications. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT

CALCULUS BC

Course # 03430

Prereq: Precalculus Honors

Level: 10, 11, 12

Credit: 1.0

This course covers material contained in AP Calculus AB, application of integrals, differential equations, infinite series, and two dimensional vectors. *A graphing calculator is required for this course.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

Mathematics Department

ADVANCED PLACEMENT STATISTICS

Course # 03440

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson

Level: 10, 11, 12

Credit: 1.0

The purpose of Advanced Placement Statistics is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The following themes are covered; exploring data, planning a study, anticipating patterns, and statistical inference. This course would be excellent for students planning to major in business or social sciences as well as science or mathematics. *A graphing calculator is required for this course. Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).*

STATISTICS & COLLEGE PREP MATH

Course # 03470

Prereq: C or better in Alg II/
Trigonometry (any level) and
Department Chairperson
approval

Level: 12

Credit: 1.0

The primary topics to be studied are data analysis, including representing and describing data and creating and analyzing a survey, probability and hypothesis testing. This course is appropriate for college-bound students and is, therefore, recommended for all Advanced Algebraic Topics students who achieved at the C or above level. This course also helps students prepare for college entrance math exams. *A graphing calculator is required for this course*

ADVANCED PLACEMENT COMPUTER SCIENCE A

Course # 03500

Prereq: Algebra 2 Trigonometry
and Department Chairperson
approval

Level: 10, 11, 12

Credit: 1.0

The Computer Science A AP College Board curriculum guidelines are followed in this course. The emphasis of this course is to prepare students for the AP Exam and future programming courses. Programming concepts including variables, constants, expressions, conditionals, arrays, ArrayLists, iteration, functions, and object oriented programming using classes are covered. An emphasis is placed on problem solving. Additionally, programming methodology and design, pre-defined and abstract data types, sorting, data structures, and algorithms related to data structures are discussed. Applications of computing, a working knowledge of hardware and software systems, and the ethical and social implications of computing are examined. The programming language is JAVA. *Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details)*

ADVANCED PLACEMENT COMPUTER SCIENCE PRINCIPLES

Course # 03520

Prereq: Algebra 1 and Department
Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

This course is an entry level AP course which presents concepts and computational thinking practices that are central to the computer science discipline. It provides an introduction to the rapidly expanding field of computer technology while focusing on using technology in creative, meaningful ways. *Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).*

MATH TOPICS HONORS

Course # 03511/03512

Prereq: AP Calculus BC and
Department Chairperson approval

Level: 11, 12

Credit: 1.0

Math Topics is for students who have completed Advanced Placement Calculus BC and/or Advanced Placement Statistics and would like to continue their studies of topics in Advanced Calculus, Linear Algebra or Advanced Statistics. Students must find a sponsoring teacher in order to sign up for this course. This course may be taken for a full year or just one semester.

MATH TOPICS COMPUTER SCIENCE HONORS

Course # 03510

Prereq: AP Computer Science A,
Department Chairperson approval

Level: 11,12

Credit: 0.5

Math Topics Computer Science Honors is for students who have completed Advanced Placement Computer Science A and would like to continue their studies in the Computer Science field. Students will complete independent study projects under the supervision of a sponsoring teacher. Students must find a sponsoring teacher in order to sign up for this course. This course may be taken for a full year or just one semester.

Music Department

Department Chairperson Mr. Patrick Maag

Music education is critical in the education of well-rounded citizens. By providing students with varied musical experiences, we will create, foster and develop individuals with a better understanding of the arts. Through music education we hope to develop better performance skills, creativity, and musical literacy. We also teach students to be problem solvers, communicators, critical thinkers, and cooperative workers. The Music Department enhances student understanding of music's connection to all academic disciplines and the world in which they live. **Students may earn up to four credits in the same music course.**

Please see Course Description for detailed Prerequisites.

<u>Course Title</u>	<u>Course No.</u>	<u>Prerequisite</u>	<u>Credit</u>	<u>Levels</u>

BAND

JAZZ BAND

Course #05600

JAZZ BAND HONORS

Course #05630

--See Honors Requirements--

Prerequisites: Audition required and concurrent registration in a band class (Exceptions made for piano, bass and guitar).

Level: 9-12

Credit: 1.0

Course Fee \$28

The Jazz Band is the top auditioned traditional big band made up of saxophone, trombone, trumpet, piano, bass, guitar, and drum set players. Students enrolled in this class study jazz performance in a variety of styles and frequently perform. Enrolled students should have a good understanding of scale and chord theory and must be comfortable practicing improvisation. This class meets every day during the "Early Bird" Period 0.

CONCERT BAND

Course #05610

CONCERT BAND HONORS

Course #05620

--See Honors Requirements--

Prereq: Previous middle school band experience or High School Band Director approval. Call 630-468-4151 to schedule an audition.

Level: 9-12

Credit: 1.0

Course Fee \$100

This course is the music ensemble open to all freshman, sophomore, junior and senior band students. The Concert Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

SYMPHONIC BAND

Course #05680

SYMPHONIC BAND HONORS

Course #05690

--See Honors Requirements--

Prereq: Audition by High School Band Director. Call 630-468-4151 to schedule an audition.

Level: 10, 11, 12

Credit: 1.0

Course Fee \$100

Symphonic Band is the top-level band ensemble for sophomore, junior and seniors with previous musical experience. Admittance is by audition only. The Symphonic Band is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include all home football games, two to three marching band competitions, winter and spring band concerts, and Illinois High School large group (Band), solo, and ensemble contests. Students will also further develop their music literacy through music theory study. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

WIND SYMPHONY HONORS

Course #05880

Prereq: Audition by High School Band Director. Call 630-468-4151 to schedule an audition.

Level: 10, 11, 12

Credit: 1.0

Course Fee \$100

The Wind Symphony is an auditioned concert band made up of a limited number of flute, oboe, clarinet, bassoon, saxophone, trumpet, horn, trombone, baritone, and tuba players. Enrolled students must be proficient at reading and performing music and must meet honors credit requirements. Students will frequently perform advanced standards and the latest compositions of contemporary wind band literature. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

Music Department

CONCERT PERCUSSION ENSEMBLE

Course #5750

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0
Course Fee \$50

The Concert Percussion Ensemble is an entry level class for students interested in performing band music on percussion instruments and drum set. In addition to performing as a percussion ensemble, students will also prepare standard band literature to perform with the wind players in other band classes. Enrolled students will learn the basics of music reading and percussion technique.

SYMPHONIC PERCUSSION ENSEMBLE

Course #05660

SYMPHONIC PERCUSSION ENSEMBLE HONORS

Course #05760

--See Honors Requirements--
Prereq: Previous middle school band experience or High School Band Director approval. Call 630-468-4151 to schedule an audition.
Level: 9, 10, 11, 12
Credit: 1.0
Course Fee \$100

The Symphonic Percussion course is a performance-oriented class, which offers percussion students a challenging daily percussion experience. Members of the class are still a part of the band for all performances. The percussion students will be taught a curriculum where tympani, snare, mallets and multiple percussion techniques are all used in both small and large group ensembles. Performances include all home football games, two to three marching competitions, winter and spring band concerts, and Illinois High School Large (band), solo and ensemble contests. **Marching band students in grades 9 - 12 may be exempt from Physical Education during the school year for participation in band. Please complete P.E. waiver form and return to your counselor during registration.**

MUSIC THEORY

BEGINNING PIANO/MUSIC THEORY/COMPOSITION

Course #05640

Prereq: none
Level: 9, 10, 11, 12
Credit: 1.0

This course is designed for students to learn how to read music and play the piano. Students learn to use the music writing program *Finale* using Yamaha Synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students will learn to read music and develop technical facility on the piano through preparation and performance of progressively more difficult music.

ADVANCED PIANO COMPOSITION/THEORY

Course #05650

Prereq: Department Chairperson approval
Level: 9, 10, 11, 12
Credit: 1.0
(This course is offered during 2018-2019 school year)

This course is designed for the serious piano student who wants to learn how to improve piano performance, compose and perform original compositions. Students learn to use music writing programs like *Sibelius*, *Finale*, *Band in a Box* and *Cakewalk* using Yamaha synthesizer workstations. Theory will be taught throughout the year as well as composition technique. Students may enter competitions with songs they create and additional performance opportunities may be available.

AP MUSIC THEORY

Course #05670

Prereq: Department Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

(This course is not offered during the 2018-2019 school year. It will be offered during the 2019-2020 school year)

This course is designed for students who are going to take the AP Music Test in May. Students taking the course must have previous musical skills and performance skills on piano or some type of instrument. Approval of the instructor is required. The assignments and daily work are designed to prepare students for the test and the areas specified by the College Board. Students wanting to learn music theory only should take the Advanced Piano Course that is offered. AP Music credit may be used in college as both an elective humanities credit and a music credit in college. Students enrolled are encouraged to take the AP Music Test in May. Students will use the music theory learned to compose chorales, cadences, melodies, bass lines, melodic dictation examples for the class in addition to composing sample questions for the class similar to the questions used in the retired AP Exams using music composition software.

ORCHESTRA

CONCERT ORCHESTRA

Course #05780

CONCERT ORCHESTRA HONORS

Course #05790

--See Honors Requirements--

Prereq: Audition by High School Director.

Call 630.468.4151 to schedule an audition or get director approval.

Level: 9, 10, 11, 12

Credit: 1.0

Course Fee \$28

The Concert Orchestra is a performance-oriented class which offers challenging musical experiences. The performance schedule is designed to give students musical opportunities in both small and large groups. Performances include four concerts and Illinois High School large group (Orchestra), solo, and ensemble contests. Students will also further develop their music literacy through music theory study.

CHORUS

TREBLE CHORUS

Course #05700

Level: 9, 10, 11, 12

Credit: 1.0

TREBLE CHORUS HONORS

Course #05890

Course Fee \$28

This course is the entry-level vocal music ensemble open to all female treble singers. Through the study and performance of treble and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade females and to all other grade levels who have not participated in vocal music at school before.

BASS CHORUS

Course #05710

Level: 9, 10, 11, 12

Credit: 1.0

BASS CHORUS HONORS

Course #05720

Course Fee \$28

This course is the entry-level vocal music ensemble open to all male tenor and bass singers. Through the study and performance of bass choir and mixed choir literature, not only will individual students further develop their own music literacy and personal singing skills, but large group skills will also benefit. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: None. Open to all ninth grade males and to all other grade levels who have not participated in vocal music at school before.

Music Department

VARSITY TREBLE CHORUS

Course # 05800

VARSITY TREBLE CHORUS HONORS

Course #05850

--See Honors Requirements--

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Course Fee \$28

Varsity Treble Chorus is the intermediate treble choir ensemble for Sophomore, Junior, and Senior female singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to females in grades 10, 11 and 12.

VARSITY BASS CHORUS

Course # 05860

VARSITY BASS CHORUS HONORS

Course #05870

--See Honors Requirements--

Prereq: Consent of Director

Level: 10, 11, 12

Credit: 1.0

Course Fee \$28

Varsity Bass Chorus is the intermediate bass choir ensemble for Sophomore, Junior, and Senior male singers with previous musical experience. It is the purpose of the course to incorporate individual and group music skill building through the preparation and performance of advanced treble choir literature. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: At least one year of high school choir experience or director approval. Open to males in grades 10, 11 and 12.

BELLA VOCE CHORUS

Course # 05730

BELLA VOCE HONORS

Course # 05740

--See Honors Requirements--

Prereq: Audition Required

Level: 11, 12

Credit: 1.0

Course Fee \$28

Bella Voce is the top auditioned women's music ensemble for junior and senior female singers with previous musical experience.

Through the study and performance of a wide variety of choral music for the advanced mixed chorus, both individual and large group music skills will be further developed. Course requirements include participating in all concerts (fall, winter, spring), competitions/clinics, and special rehearsals, in conjunction with daily in-class rehearsals.

Prerequisite: Prior high school choir experience and director approval. Top-level choir, open to females in grades 11 and 12.

MADRIGALS/JAZZ CHOIR

Course # 05830

MADRIGAL/JAZZ HONORS

Course # 05840

---See Honors Requirements--

Prereq: Audition Required

Level: 11, 12

Credit: 1.0

Course Fee \$55

Madrigals/Jazz Choir is a full-year course for selected 11th, and 12th grade students, which will focus on the performance of the Madrigal Show in the fall semester and the Vocal Jazz Concert in the spring semester, along with outside performance opportunities throughout the year. Madrigal students are also required to learn and perform the repertoire of the varsity choirs.

Prerequisite: Director approval. Top-level choir, open to grades 11 and 12.

Honors level study is available to students enrolled in any music department course.

- To enroll in the Honors section of your performance music class you must sign up by mid-September and complete the requirements below.
- Students who do not register by the deadline will be placed in the regular section of their performance music class.
- All private lesson, performance, and leadership verification will be submitted online through the music department website.
- All activities used to earn Honors Credit must occur between the published first and last days of the school year.
- Any alterations to the Honors Credit plan will be considered on an individual basis and must be approved by your director in advance.

REQUIRED:	CHOOSE 1:	CHOOSE 2 :	CHOOSE 1:	CHOOSE 1:
(a) Receive regular, weekly private instruction with a professional musician, or at least 210 minutes each quarter, throughout the entire school year. This requirement is waived for students taking a second music class for honors.	(a) Perform an appropriate solo at the Solo & Ensemble Festival. (b) Perform a solo in a performance setting like a private lesson studio recital or church service. (c) Enroll in a non-credit bearing supplemental music experience course.	(a) Participate in the ILMEA District 1 auditions process. (b) Perform in an extracurricular ensemble. (c) Perform at five home game performances. (d) Perform in an ensemble outside of school like a community orchestra or church choir.	(a) Be a Section Leader or a member of the Student Staff. (b) Complete a music department project, like sorting music, organizing uniforms, or cleaning up after a performance. (c) Serve in a leadership role in another school or community organization. A signed verification form is required. (d) Perform an additional solo at an Honors Recital.	(a) Write a research paper on a director-approved musical topic. (b) Compose or arrange a written piece of music. This project requires pre-approval from your director.

Physical, Health, & Driver Education

Department Chairperson Mr. Paul Hoel

The Physical Education Department offers a variety of courses designed to develop skills and knowledge in the following areas: team sports, individual sport activities, personalized fitness/wellness programs, and life-long learning activities. Students have the opportunity to select from a wide variety of course offerings that will best meet their individual Physical Education needs. Per the mandate House Bill 5391 all students in grades 3-12 will complete fitness testing and data will be reported to the Illinois State Board of Education. Per Board Policy 6:310, some students may qualify for an exemption from their PE course (see pages 15 – 17 for details).

PHYSICAL EDUCATION ACTIVITIES

Freshman Activities

Aerobics
Badminton
Basketball
Floor Hockey
Folk/Square/Swing Dance
Gymnastics
Physical Fitness Concepts
Physical Fitness Testing
Soccer
Softball
Speed-A-Way
Swimming
Tennis
Touch Football
Track & Field
Volleyball

Sophomore, Junior and Senior Activities

Aerobics	Recreational Sports
Aerobic Fitness	Rhythmic Gymnastics
Archery	Roller Blading
Badminton	Self-defense
Basketball	Snorkeling
Fitness	Soccer
Flickerball	Softball
Floor Hockey	Speed-A-Way
Golf	Tchoukball
Ice Skating	Team Handball
Lacrosse	Tennis
Navy Football	Touch Football
Net Games	Ultimate Frisbee
Outdoor Education	Volleyball (indoor)
Pickleball	Water Games
Pilates	Weight Lifting
Lifeguard Certification	Yoga

Freshmen, Juniors, and Seniors must register for Physical Education EACH semester.

LEARNING READINESS PE (9)

Course #07161 & #07162

Prereq: None

Level: 9

Credit: 1.0

This class will stress movement, cross lateral activities, and aerobic exercise; taking full advantage of the effects that exercise and movement have on learning.

LIFEGUARDING/CPR/FIRST AID

Course # 07591 & #07592

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Meets requirements for American Red Cross Lifesaving Certification, Cardiopulmonary Resuscitation Certification and Standard First Aid Certification. Students must be able to swim 500 yards continuously to enroll in this class. No student may use the P.E. exemption in this class and receive Red Cross certification or recertification.

AQUATICS/WATER GAMES

Course # 07551 & #07552

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Includes sports and activities designed for the aquatic environment. Included are the development of skills in the four competitive strokes, as well as starts and turns. Water safety habits, water aerobics, and water games will be a main focus of this class.

Physical, Health, & Driver Education

PERSONAL FITNESS

Course # 07611 & 07612

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Variable course content. Teacher directed workouts and individualized conditioning programs designed to address individualized fitness goals. Principles and skills relating to cardiovascular endurance, muscular strength, muscular endurance, and flexibility are incorporated. Equipment orientation includes cardiovascular machines, proper weight training techniques, and circuit training. Upon completion of this course students will be able to design and implement their own fitness program.

TEAM GAMES

Course # 07581 & #07582

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Includes sports and activities for lifelong participation. Students will participate in various sports such as: volleyball, basketball, softball, flickerball, navy football, kickball, lacrosse, hockey, tchoukball, soccer, spike ball, and other team oriented games that students can participate in for a lifetime.

INDIVIDUAL SPORTS 1

Course # 07561

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Students will participate in activities that they can do for a lifetime. Students will participate in golf, tennis, badminton, pickle ball, archery, ping pong, eclipse ball, and spike ball.

This course will be offered 1st semester only.

INDIVIDUAL SPORTS 2

Course # 07572

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Students will participate in activities that they do for a lifetime. Students will participate in archery, frisbee golf, badminton, soccer golf, tennis, and bowling.

This course is offered 2nd semester only and requires a \$50 fee to pay for bowling and transportation.

GROUP FITNESS

Course # 07541 & 07542

Prereq: None
Level: 10, 11, 12
Credit: 0.5

This class will utilize activities such as yoga, pilates, aerobics, rhythmic gymnastics, RAD-self-defense/rape prevention, and dance to enhance individual fitness and wellness.

OUTDOOR EDUCATION

Course # 07621 & 07622

Prereq: None
Level: 10, 11, 12
Credit: 1.0

This course is aimed at acquiring and developing a range of skills and knowledge related to lifelong outdoor activity. Units of study will include group dynamics and team building, kayaking and boating, archery, fishing, navigation and non-traditional outdoor sports/activities. The course will meet in the pool and some units may require active participation in the water

TUMBLING

Course #07481 & #07482

Prereq: None
Level: 10, 11, 12
Credit: 1.0

Tumbling class focuses on developing the strength, flexibility, and techniques necessary to learn how to safely tumble. Fundamental skills and strength will be taught through progressions with emphasis on form.

Physical, Health, & Driver Education

EARLY BIRD PE**Course # 07431 & 07432**

Prereq: None

* See page 90 for exclusions

Level: 9, 10, 11, 12

Credit: 1.0

Early Bird Physical Education starts prior to the regular school day and runs from 7:00 am until 7:50 am. This class allows students to enjoy the positive effects associated with exercise and the benefits it has on learning.

ADAPTIVE PHYSICAL EDUCATION**Course #07901 & #07902**

Prereq: Special Education Placement

Level: 9, 10, 11, 12

Credit: 1.0

Adaptive PE offers an alternative PE option for students who are unable to participate in a regular physical education course. Adaptive PE is designed to meet the needs of students with a variety of physical, cognitive, or social needs.

ADAPTIVE PE/PEER PARTNERS**Course #07801 & #07802**

Prereq: Application from PE Office and Departmental Approval

Level: 10, 11, 12

Credit: 1.0

The Adaptive Peer Partner class is offered to sophomores, juniors and seniors who are interested in working with students with a variety of physical, cognitive, and social needs.

DRIVER EDUCATION

FEE: \$350

Counselors will assign freshman and sophomore students to the appropriate semester for their Driver Education and Health classes based on their birth date. This designation will be determined at the registration counseling session that will be held in early February with each student and counselor. This same determination will take place for any junior or senior student who has not completed the Driver Education program. **Due to recent changes in Drivers Education laws by the State of Illinois, our school may not be able to honor all requests by students to enroll in Drivers Education during their sophomore year. Students will be enrolled according to birthdates.** Successful completion of the course is required to obtain an Illinois driver's license prior to the age of 18 years. Driver Education is a multiphase course designed to meet all of the current driver education laws.

In addition, Public Act 88-188 requires that a student must have passed at least eight (8) courses in the previous two semesters in order to be eligible to take Driver Education. In other words, if a student fails too many classes, he or she will not be eligible to take Driver Education and will be withdrawn from the class.

Physical, Health, & Driver Education

HEALTH EDUCATION: Sophomores have the option of taking Health Education for one semester and Physical Education for the other semester by registering for the following courses:

- Semester One: Select either Physical Education (Course #07471) or Health (Course #07501)
- Semester Two: Select either Physical Education (Course #07472) or Health (Course #07502)

Students electing to enroll in summer school Health Education will be placed in Physical Education for both semesters in order to be compliant with the mandated daily physical education requirement.

HEALTH EDUCATION

Course #07501 (1st semester)

Course #07502 (2nd semester)

Prereq: none

Level: 10

Credit: 0.5

With Director approval, the Adaptive PE course (07901/#07902) can be taken for Foundations Health credit (#11701).

Health Education involves the promotion and development of health knowledge, attitudes, and skills useful in adolescent and adult life. Its aim is to produce health literacy by engaging students in a self-directed exploration of the concept of personal wellness. Such exploration will empower students to make informed lifestyle decisions as they relate to emotional health, alcohol, tobacco and other drugs, nutrition, fitness and weight maintenance as well as the risks and consequences of sexual activity. A number of teaching and learning strategies shall be used in this course including guided lecture and discussion, group work, presentations, hands-on activities and projects, guest speakers, and utilizing the Internet to gain valid and reliable health information.

ADVANCED HEALTH

Course #07511

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Course #07511: The foundation of this course is *engaging students in exploring the concepts of critical thinking and reflection* through the investigation of current events and controversial issues in health and society. Students will demonstrate an understanding of the variety of viewpoints of the leaders in various fields of health, medicine, and public health policy and how these dynamic issues ultimately impact personal, community, and global health. *Regular attendance and active participation* in class discussions are paramount to the student-centered and project based format of the course.

ADVANCED HEALTH

w/honors option

Course #07531

Prereq: "B" or better in Health Education or instructor's consent

Level: 11, 12

Credit: 0.5

Any students may see the teacher should they have questions on taking the course for honors credit.

Course #07531 w/honors option: Those taking this course for honors credit and those taking this course in its general format will meet universal course requirements as well as shared goals and objectives. However this course will be differentiated for honors students in that those that choose to take this class for honors credit will be expected to perform all common course assessments that will include supplements, modifications and/or variations that will provide an increased rigor and level of depth to these shared course objectives that is above and beyond the 'basic' course. The time and commitment involved will reflect the honors credit received.

Science Department

Department Chairperson Dr. Julie Gaubatz

The Science Department provides students with opportunities to develop problem-solving skills and build content knowledge that will benefit students as they enter the worlds of college and work.

Please see Course Description for detailed prerequisites.

- Students are strongly encouraged to take **four** years of science courses. Most colleges require a minimum of three science credits. Students may take multiple science courses their junior and senior years.
- All science courses emphasize laboratory investigations, problem-solving skills, real world applications, technology in the classroom, reading, and writing.
- Advanced Placement (AP) courses provide the opportunity for students to earn college credits upon successful completion of the AP exam, depending on the AP policy of the college you will be attending (see www.collegeboard.com/ap/creditpolicy). AP courses cover college-level material at a college-level pace with college-level expectations. Because of this level of rigor, teacher recommendations are required. Students who plan to attend college are encouraged to take the appropriate prerequisites to develop skills and work habits that will prepare them for AP classes their junior or senior years.
- In addition to our AP courses, Hinsdale South also offers science electives for juniors and seniors that allow students to explore the sciences and expand their knowledge base.

Science Department

CORE & ELECTIVE COURSES

FOUNDATIONS SCIENCE

Course #11770

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

In this course, students will investigate key elements of physical and social wellness that can be generalized in various facets of daily life, including proper nutrition, sleep, self-care and exercise. They will explore the benefits of leisure activities and socialization. Students will also explore fundamental concepts, principles and interconnections of the life, physical and earth sciences. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

This course will not offered during the 2018-2019 school year.

APPLIED EARTH SCIENCE

Course #01730

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: earth, moon, and solar system; stars and galaxies; weather, climate, and the earth's atmosphere; weathering and erosion and forces in the earth. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

APPLIED BIOLOGY

Course #01830

Prereq: Director placement

Level: 9, 10, 11, 12

Credit: 1.0

This course will explore the nature of scientific exploration through hands-on activities, laboratory investigations and research. Topics will include: classification of living things, plants, animals, ecology, the human body and health. An emphasis will be placed on developing a student's ability to make accurate quantitative measurements, qualitative observations and increasing critical thinking skills. This course is designed for students reading significantly below grade level.

This course will not be offered during the 2018-2019 school year.

GEOPHYSICS

Course # 03640

Prereq: *For students recommended for Algebra 1 or lower **OR** for students recommended for "Integrated Algebra and Geometry" who have not mastered HSHS algebra skill sheet*

Level: 9

Credit: 1.0

This course uses Physics as a tool to explore Earth Science phenomenon. Topics include plate tectonics, mountain-building and volcanoes, astronomy, structure of the Earth, velocity, acceleration, waves, energy, and forces. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry.

PHYSICS HONORS

Course #03920

Prereq: *For students recommended for "Integrated Algebra and Geometry" or higher **AND** who have mastered the HSHS algebra skill sheet.*

Level: 9

Credit: 1.0

Topics include the study of motion, forces, momentum, work, energy, power, waves, sound, light, optics and electromagnetism. These topics will be explored via inquiry, graphing and applied mathematics which will be built on in students' sophomore year science course, Chemistry. A high level of understanding is expected and problem-solving will be challenging.

CHEMISTRY CONCEPTS

Course # 03840

Prereq: Completion of GeoPhysics or transfer credit science; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered, including atomic structure, nuclear chemistry, matter, periodic table, moles, bonding, gases, organic chemistry, and chemical equations. This course is appropriate for students who need targeted assistance in mathematics and does not serve as a prereq for AP science courses. *This course provides assistance in reading comprehension.*

CHEMISTRY

Course # 03810

Prereq: Completion of GeoPhysics or Physics Honors or transfer science credit, successful completion of Algebra I or higher; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Traditional chemistry topics are covered and include atomic structure, nuclear chemistry, matter and the periodic table, moles, stoichiometry, bonding, thermodynamics, gases, organic and biochemistry, and chemical equations. This course is appropriate for students with average math ability (enrolled in Geometry or higher) and serves as a prereq for AP science courses.

CHEMISTRY HONORS

Course # 03830

Prereq: Completion of GeoPhysics or Physics Honors; Teacher recommendation.

Level: 10

Credit: 1.0

Supply fee: \$10

Similar topics are covered as in Chemistry, but a higher level of academic independence and a deeper level of understanding is expected, and problem-solving will be more independent and challenging. This course is appropriate for students with above-average math abilities.

BIOLOGY

Course # 03720

Prereq: Chemistry (all levels); Teacher recommendation

Level: 11

Credit: 1.0

This course introduces students to the study of life through various thematic units. Students are expected to have a solid understanding of chemistry prior to this course. Topics covered include energetics, cellular and molecular biology, ecology, evolution, biochemistry, plants, and animals.

PHYSICS

Course # 03970

Prereq: Completion of GeoPhysics, Chemistry (any level) and Biology (may be concurrent with Biology); Concurrent with Algebra II or higher.

Level: 11, 12

Credit: 1.0

This math-intensive course requires strong Algebra I skills, and is designed for students who took GeoPhysics as freshmen but who would like to take a full physics course. This course emphasizes experimentation and exploration of the physical world and focuses on the study of relevant and real-world events. Example topics include motion, forces, energy, and waves.

EARTH SCIENCE

Course # 03620

Prereq: Completion of three core science credits; can be concurrent with third core science; Teacher recommendation.

Level: 11, 12

Credit: 1.0 or 0.5 each semester

This course covers Earth Science topics such as Earth's natural resources, climate, and surface processes, as well as astronomy topics such as the solar system and the universe, stellar evolution, telescopes, calendars, supernovae, stellar distances and motion, black holes, stars, and galaxy formation. Students can elect to take the fall semester only, the spring semester only, or both semesters.

ANATOMY AND PHYSIOLOGY

Course # 03980

Prereq: Successful completion of Biology and Chemistry (may be concurrent with Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

This course develops students' understanding of the workings of the human body. Reading and memorization are key skills required for this course. Dissections, including various cow organs and joints, as well as a mink, play an important role in the learning process of this course. Careers in health-related fields are emphasized through in-class activities and field trips.

Science Department

ADVANCED PLACEMENT COURSES

ADVANCED PLACEMENT BIOLOGY

Course # 03740

Prereq: Successful completion of Chemistry, Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Biology covers two semesters of college-level biology and applies previous knowledge to topics as designated by the College Board curriculum, such as energetics, biochemistry, cellular biology, molecular biology, ecology, and population biology. This course can be taken junior year after completion of Chemistry and in place of Biology Honors as a first-year Biology course, or it can be taken senior year after Biology as a second-year Biology course.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT CHEMISTRY

Course # 03820

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology or AP Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Supply fee: \$10

Advanced Placement Chemistry covers two semesters of college-level chemistry, and applies previous knowledge to atomic structure, bonding, nuclear chemistry, solutions, oxidation-reduction, kinetics, and thermodynamics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT ENVIRONMENTAL SCIENCE

Course # 03670

Prereq: Successful completion of Chemistry and Biology (may be concurrent with Biology or AP Biology); Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Environmental Science covers one semester of college-level environmental science, and explores the natural world and man's relationships with it. Cycles of matter, man's resource and energy use, global climate change, chemistry in the environment, ecosystems, and population are some of the topics covered.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT PHYSICS 1

Course #03910 (11,12)

Prereq: Chemistry and Biology completed or concurrent; Alg II or higher completed or concurrent with strong math grades; cannot have taken Physics Honors; Teacher or Dept. Chairperson approval.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics 1 is equivalent to a first-semester college-level Algebra 2/Trig.-based physics course. Topics include motion, work, energy, forces, rotation, momentum, power, waves, and sound.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT PHYSICS 2

Course #03950

Prereq: AP Physics 1; Teacher recommendation

Level: 12

Credit: 1.0

Advanced Placement Physics 2 is equivalent to a second-semester college-level Algebra-based physics course. Topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic/nuclear physics.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT PHYSICS C

Course # 03940

Prereq: Concurrent with Calculus or higher; Completion of Physics, Chemistry, and Biology -Teacher recommendation.

Level: 11, 12

Credit: 1.0

Advanced Placement Physics C is equivalent to two-semester of college-level calculus-based physics course. Topics include in-depth investigations into mechanics, electricity and magnetism.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

AP CAPSTONE PROJECT

AP SEMINAR: SCIENCE

Course #03760

Prereq: Successful completion of two years of science; can be concurrent with the second year; cannot displace Biology.

Level: 10, 11, 12

Credit 1.0

AP Seminar: *Science* has a disciplinary focus which engages students in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Throughout the course, students will collaborate on group scientific research assignments, complete individual science research and present and defend their conclusions. The course aims to equip students with the power to analyze and evaluate information with accuracy and precision in order to craft and communicate evidence-based arguments.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

This course is a prerequisite course for AP Research. Students who successfully complete both AP Seminar and AP Research will receive either an AP Certificate or AP Diploma depending on the number of AP courses they have completed. See Page 8 for details regarding AP Capstone.

Depending on enrollment, this course may be conducted at Hinsdale Central High School during 1st or 10th period.

AP RESEARCH: SCIENCE

Course #03770

Prereq: AP Seminar: Science

Level: 11, 12

Credit 1.0

AP Research: *Science* engages students to explore an academic topic, problem, or issue that interests them and with the assistance of a research advisor/mentor, design, plan, and conduct a year-long research-based investigation to address it. Students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question.

Upon successful completion of this course, students are assessed on the academic paper and presentation and oral defense of research which is submitted to College Board for evaluation and scoring to determine the AP grade. See Page 8 for details regarding AP Capstone.

Depending on enrollment, this course may be conducted at Hinsdale Central High School during 1st or 10th period.

Social Studies Department

Department Chairperson Mr. Matthew Guritz

For students to develop as citizens, they must learn democratic values and practice democratic process skills that are appropriate for their age and maturity. Social studies courses teach students these essential values and skills. Additionally, students must be prepared for success in college and the work place through practice in data analysis, analytical writing, and development of presentation skills. Regardless of a student's career and life choices, all students will deal with politics, cultural and religious differences, and social conflict on a daily basis. A strong social science education is vital for success in a diverse and rapidly changing society.

See course description for detailed prerequisite.

Social Studies Department

SOCIAL STUDIES: GENERAL INFORMATION

- House Bill 4025 stipulates that at least one semester of a high school student's mandated two-year social studies graduation requirement in Illinois must be a civics course. The bill was amended by House Bill 800, which states that the requirement is effective immediately for "students entering the 9th grade in the 2016-2017 school year and continues each school year thereafter." **District 86 Board of Education Policy 6:300** complies with this legislative mandate by stating that students attending District 86 schools must earn two credits in Social Studies for graduation with one credit in US History and one credit in World Cultures or World Studies Honors (unless waived by the Principal for academically at-risk students). In addition to earning these two Social Studies credits, beginning with the Class of 2020, students must also take and pass a Civics course.
- All Social Studies courses emphasize analytical writing, primary and secondary source interpretation, real world applications, technology in the classroom, and reading, writing and note taking skills.
- Hinsdale South High School's Social Studies AP and Honors classes require motivated students who are able to complete work independently and consistently while applying critical thinking and problem-solving skills. Honors classes require teacher recommendations.

WORLD CULTURES

Course # 02470

Prereq: None

Level: 9

Credit: 1.0

An examination of global history, geography, economics, culture, government and contemporary concerns. Students discover the common elements of human cultures and their diversity. The course is organized by social science themes and standards. Development of reading, writing, thinking, and communication skills are emphasized. Use of maps, primary and secondary sources, reading strategies, and the resources of the Library Media Center are taught.

WORLD STUDIES HONORS

Course # 02390

Prereq: Dept. Chairperson

Recommendation

Level: 9

Credit: 1.0

An in-depth study of important episodes in World History from Renaissance to modern times. The historical development of modern problems is emphasized. Extensive supplemental reading is required. Development of writing skills is an important goal of this course. *Students are prepared to take Advanced Placement courses.*

American Diversity and Multicultural Education

Course # 02371

Prereq: None

Level: 10,11,12

Credit: .5

This course includes the study of United States history from the perspectives of race, religion, gender, ethnicity, and class. Topics will include understanding the diverse demographic that is "The American People," and an in-depth examination of some of the major racial and ethnic groups that have come together to form the American Experience. Beyond racial and ethnic identities, the course will examine socio-economic identities and emerging new conversations around sexuality and gender identity.

ADVANCED PLACEMENT EUROPEAN HISTORY

Course # 02520

Prereq: Recommendation of World Studies teacher or Dept. Chairperson approval.

Level: 10

Credit: 1.0

This intensive study of European History for sophomores covers the period from the Renaissance to the present. This course demands college level reading and writing assignments, historiographical analysis, and careful study of primary source documents. European artistic traditions are also an important component of this class including opera, painting, and sculpture.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

Social Studies Department

AFRICAN-AMERICAN HISTORY

Course # 02331

Prereq: None

Level: 10, 11, 12

Credit: 0.5

NOT OFFERED IN 2018-19

An in-depth elective that enhances the World Cultures and United States History curricula by tracing the experiences of African-Americans from pre-revolutionary America to present day. In addition, it will enhance existing African-American strands in both English and art courses offered at Hinsdale South. It will encourage students to think critically and reflect upon modern day American society and racism. It will emphasize depth compared to the breadth of U.S. History, it will investigate the concept of race and its application in American society, and it will involve issues of race and culture in a multicultural society.

GEOGRAPHY

Course # 02501

Prereq: None

Level: 10, 11, 12

Credit: 0.5

An examination of human societies in their habitat. Exploration of the inter-relationships between human beings and our physical environment. Analysis of the physical bases of geography. Focus on selected regions throughout the world, examining political, historical, social, and cultural consequences of physical geography. Considerable map work, oral and written reports, and some supplemental reading are required.

PSYCHOLOGY I

Course # 02431

Prereq: None

Level: 10, 11, 12

Credit: 0.5

An introduction to the principles of human behavior, including learning, motivation, personality development, and adjustment. Students will have an opportunity to test various theories of psychology using their own life experiences. Some typical activities include discussions, experiments, readings, and a variety of audio-visual materials. Much importance is placed on classroom discussion.

PSYCHOLOGY II

Course # 02462

Prereq: Psychology I (above average grades) or Dept. Chairperson approval.

Level: 10, 11, 12

Credit: 0.5

An advanced analysis of the major learning and personality theories in the field of psychology. The students' experiences are organized around a variety of activities that will probe these psychological theories in depth. Designing as well as participating in several experiments are a major component of this course.

ADVANCED PLACEMENT PSYCHOLOGY

Course # 02510

Prereq: World Studies or US history teacher rec. or DC Approval

Level: 10, 11, 12

Credit: 1.0

An intensive study of the principles of human behavior, including learning, motivation, personality development, and adjustment. College-level readings and activities are assigned.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ADVANCED PLACEMENT PSYCHOLOGY "RISE"

Course # 02530

Prereq: World Studies or US history teacher rec or DC approval

Level: 10, 11, 12

Credit: 1.0

Note: This is a PASS/FAIL course. A letter grade will be earned in the AP Psych section.

This course is part of our District Improvement Plan and was created to help District 86 meet the goal of increasing participation in our AP program. It is open only to students identified and recommended by the Social Studies department. It is an additional credit of content instruction, test taking preparation, and skill building for AP Psychology students who have no previous honors or AP level classes in their background. This class will be taught by one of the AP Psychology teachers and will provide the additional support, instruction, and preparation necessary for regular level students to achieve success on the AP Psychology exam.

Social Studies Department

SOCIOLOGY

Course # 02381

Prereq: None
Level: 11, 12
Credit: 0.5

Sociology is the study of how groups affect human behavior. In this course we will examine the principles of sociology and apply them to current problems that face American society. The course focuses on developing students' viewpoints and insights on problems facing American society through small group and class discussions. Some of the topics discussed are the future of marriage and the family, world population problems, abortion, crime in America, and the future of American cities.

AMERICAN POLITICS

Course # 02351

Prereq: None
Level: 10, 11, 12
Credit: 0.5

A hands-on analysis of government and politics in the United States. Students learn general concepts used to interpret American politics. Analysis of specific case studies through simulation and community activity familiarizes students with the groups, organizations, issues, and ideas that make up the American political system. Students will explore the causes of different political beliefs and behaviors and the role of interest groups and political parties. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

UNITED STATES HISTORY

Course # 02310

Prereq: None
Level: 11
Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students practice critical inquiry into the past in relationship to the present. Students are evaluated on written projects, tests, and class participation. A key component of this class is practice and performance by each student in creating an effective Document Based Essay.

AMERICAN STUDIES

Course # 01360

Prereq: None
Level: 11
Credit: 2.0 (one in English;
one in Social Studies)

Juniors are required to pass U.S. History, American Studies or AP U.S. History. An interdisciplinary study of U.S. history and literature. Connections are drawn between historical events and themes and literary works and their themes. Students earn a single grade for this two-period course.

ADVANCED PLACEMENT U.S. HISTORY

Course # 02320

Prereq: Dept. Chairperson
approval
Level: 11
Credit: 1.0

Juniors are required to pass U.S. History, American Studies or AP U.S. History. Students read college-level materials and write argumentative essays. Coverage of American history is chronological. Various interpretations of crucial historical issues is emphasized. Students will use original documents to develop skills in interpretation of events and making generalizations. *This course will prepare students for the Advanced Placement exam in May.*

Students enrolling in AP US History may not be able to drop to regular U.S. History or American Studies in the same school year.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

ECONOMICS

Course # 02341

Prereq: Average or above
average grades
Level: 10, 11, 12
Credit: 0.5

The Social Studies Department recommends Economics for college-bound students, and students who will be pursuing careers in business, finance, politics, or engineering. Students examine the choices made in the use of natural resources and division of national wealth. Students study national and global affairs by reading newspapers, magazines, and viewing videos. A stock market simulation is a major activity.

This course fulfills the state mandate for consumer education.

Social Studies Department

ADVANCED PLACEMENT ECONOMICS: MICRO

Course # 02361
Prereq: Teacher
recommendation
Level: 11, 12
Credit: 0.5

Microeconomics is the study of individual businesses, households, and workers in the American economy. Students will learn how prices are determined in a capitalist economy, how businesses can maximize profits, and the different levels of competition between firms in different industries. The course will examine the role the U. S. government should play in regulating the American economy and the wages workers should receive for different jobs. Microeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).*

ADVANCED PLACEMENT ECONOMICS: MACRO

Course # 02372
Prereq: Teacher
recommendation
Level: 11, 12
Credit: 0.5

Macroeconomics is the study of the United States' economy. Students will examine economic topics such as unemployment, inflation, GDP, interest rates, monetary policy, fiscal policy, and the national debt and deficit. Students will come to understand the causes for problems in the economy and be able to prescribe economic policies for both healthy and unhealthy economies. Macroeconomics is an interdisciplinary course combining the social sciences with mathematical analysis and graphing. ***This course fulfills the state mandate for consumer education.*** This course is offered second semester only. Prior year AP results reveal an advantage to taking AP Micro and AP Macro in the same year. *Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).*

PHILOSOPHY & ETHICS

Course # 02541
Prereq: None
Level: 10, 11, 12
Credit: 0.5

Philosophy and Ethics will offer interested and intellectually curious students the opportunity to reflect on fundamental questions related to the human condition, such as the basis of knowledge, ethical theories and issues, artificial intelligence, free will versus determinism, rational proofs for the existence of God, and the meaning of evil and suffering. The goal of the course is to raise important issues that will spur students to further inquiry, study, and application in their own lives. Much of the class will involve reading, discussion, and writing. Students will be expected to read carefully, write critically, and participate in class discussions.

CONSTITUTIONAL LAW

Course # 02551
Prereq: None
Level: 10, 11, 12
Credit: 0.5

Constitutional Law is an introductory legal course which investigates many topics, including criminal law, trial rules, court systems, juvenile law, and the American jury system. In addition to using contemporary legal cases, a wide variety of teaching methods are used, including mock trial hearings, mock jury simulations, and videos. The primary learning tool in Constitutional Law is class discussion. Additionally, students try a case for their final exam.

EAST ASIAN STUDIES

Course #02411
Prereq: None
Level: 10, 11, 12
Credit: 0.5

Asian Studies will examine the history and culture of China, Japan and Korea. Possible topics of study include the Samurai and code of Bushido, the emergence of Japan as a colonial power, the Rape of Nanking, the Korean War, the development of nuclear weapons by North Korea, and the emergence of China as a 21st century global superpower. The course is project, writing, and discussion oriented complimented with a field trip and experiential learning. Students will be challenged to avoid ethnocentrism and to understand these civilizations from the perspective of the people who came from them. *This class will not be offered in the 2018-2019 school year.*

Social Studies Department

GLOBAL ISSUES

Course #02421

Prereq: None
Level: 10, 11, 12
Credit: 0.5

Global Issues examines several major contemporary political, social, and diplomatic dilemmas of the 21st century. After tracing the historical roots of contemporary issues, students will analyze and evaluate each issue from a variety of perspectives. Possible topics include the proliferation of nuclear weapons, human rights and genocide, democracy and dissent, the future of the Middle East, the "war on terror," U.S. foreign policy since Vietnam, and major domestic challenges. Active student participation on a daily basis and developing written and oral arguments are major components of a student's grade.

ADVANCED PLACEMENT GOVERNMENT & POLITICS, U.S.

Course # 02451

Prereq: Dept. Chairperson approval
Level: 11, 12
Credit: 0.5

Students develop the knowledge and analytical skills needed to evaluate contemporary American government. Students study political scientists' theories about the Congress, the Presidency and the Judiciary. Students analyze some principal areas of public policy such as economic, foreign affairs, defense and welfare. **For the class of 2020 and beyond, this course will fulfill the Illinois requirement of one semester of civics education, as well as mandated study of the US and Illinois Constitution.**

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

HUMANITIES

Course # 02260

Prereq: Average to above-average grades and Dept. Chairperson approval
Level: 12
Credit: 2.0 (one in English; one in Social Studies)

An interdisciplinary study of world history and literature with emphasis on philosophy, religions, and the arts of various peoples throughout history as they faced the universal questions of life and existence. The origins of Western culture will be highlighted. Students earn a single grade for this two-period course.

FOUNDATIONS SOCIAL STUDIES

Course #11780

Prereq: Director placement
Level: 9,10,11, 12
Credit: 1.0

The goal of this course is to develop in students an understanding of citizenship that can be generalized in various facets of daily life. Students will sharpen their basic understanding of history, government and social systems through the exploration of current and historical events. *This course can be taken multiple times with teacher approval.* Pass/Fail grades are issued for this course.

Mr. Steve Carr, TCD Principal

301 S. Swift Road, Addison, IL 60190
(630) 620-8770
www.tcdupage.org

Hinsdale High School District 86 has joined with seven other high school districts in DuPage County to establish a career vocational center called The Technology Center of DuPage (TCD). TCD is not a separate educational institution, trade school or college. Rather, TCD is a part of the high school curriculum just like Art or Foreign Language. The programs are considered elective subjects and some of them are transferable for college credits.

The mission of TCD is to provide an educational environment that supports and encourages individual learning styles, develops occupational skills and professionalism, promotes academic growth, and assists students in discovering their potential.

Eligible juniors and seniors who choose the TCD elective spend a part of each school day at both their "home" high school and at the TCD Career Center. Hinsdale South provides bus transportation to the Center (located in Addison) for the half day session at TCD. Class time at the Center and travel times takes four periods; therefore students may enroll for three classes at Hinsdale South. The 3.0 per year and 1.5 per semester credits earned at TCD are used to satisfy the 24.0 unit graduation requirement. Some TCD programs can be utilized to fulfill the math or science high school graduation requirements. Students should see their counselor for additional information.

In addition to receiving credits at Hinsdale South, some programs at TCD contribute to long term career and college planning by offering college credits at local colleges or credentials towards state, federal and/or national licensing exams or by offering credentials towards apprenticeships. For more detailed and up-to-date information regarding this, please go to the TCD website (www.tcdupage.org/aboutus.html).

Technology Center of DuPage

The following are programs offered through TCD. For more detailed information about the program description and employers involved, please go to the TCD website (www.tcdupage.org/programs.html).

Building and Machining	Business	Communications
Construction Trades	Computer Information Systems	Graphic Communications
Manufacturing Technology	Data Entry Occupations	Multimedia & Television Production
Pre-Architectural & Pre-Engineering CAD	Office Systems Technology	
Health & Safety Services	Mechanical	Personal Services
Certified Nurse Assistant	Auto Body Repair & Refinishing	Culinary, Pastry Arts, & Hotel Management
Medical & Health Care Careers	Automotive Technology	Early Childhood Education & Care
Fire Science		Cosmetology
	Technical	
	Electronics & Computers Technology	
	Heating, Ventilation, Air Conditioning & Refrigeration	
	Network Technician	

STUDENTS ELECTING TO ENROLL IN ANY OF THE TCD PROGRAMS SHOULD USE COURSE CODE 09000 ON THEIR ENROLLMENT FORM.

Final eligibility for all TCD programs will be made by Hinsdale South High School. Eligibility criteria will include past history of attendance, discipline, and academic progress.

Technology Education Department

Department Chairperson Mr. Matthew Swedko

The Technology Education Department offers two areas of study which include design/drafting (CAD) and woodworking. These courses are laboratory classes which provide skills, such as problem solving and group work, necessary to adult life. Technology courses fulfill the practical arts graduation requirement. If you are interested in engineering, architecture, or construction management, you should enroll in the computer aided design and/or woods sequence. A fee is charged to cover the cost of materials for project work. Technology Education is a continuously growing and changing field of study. The Technology Education curriculum at Hinsdale South will give students the latest information necessary to prepare for their post-secondary education or for careers in these fields. Elective Arts credit is given for all Technology Education courses.

Please see Course Description for detailed prerequisites.

PRE-ENGINEERING I

Course #06741

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Course #6741: This introductory course to computer aided design covers practical drafting and problem-solving skills. Most work will be done on the computers using AutoCAD by Autodesk through the introduction of two and three-dimensional problems. Some manual sketching will be introduced during the drawing process. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING I

w/honors option

Course #06731

Prereq: Teacher approval

Course #06731 w/honors option: *Pre-Engineering I w/honors option* is recommended for the highly motivated student, especially those interested in pursuing a career in the field of Engineering. This course to computer aided design covers practical drafting and problem-solving skills. Students will be introduced to computer aided design using AutoCAD, Inventor, and REVIT for two and three-dimensional problems. It is a hands-on course, which covers information on a basic level to understanding the concepts and commands necessary to create, edit, and plot drawings. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 4 hours of college credit.***

PRE-ENGINEERING II

Course #06751

Prereq: Pre-Engineering I

Level: 9, 10, 11, 12

Credit: 0.5

Course #06751: This follow-up course to Pre-Engineering I will enable students to develop more advanced techniques in computer aided design through three-dimensional modeling problems and more advanced two-dimensional drawing and dimensioning. The capstone project will be solid modeling and presentation drawings of an engineering concept. AutoCAD will be used for most of this course. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

PRE-ENGINEERING II

w/honors option

Course #06761

Prereq: Pre-Engineering I &

Teacher approval

Course #06751 w/honors option: While using AutoCAD, Inventor, and REVIT, *Pre-Engineering II w/honors option* enables a student to develop more advanced techniques in computer aided design through an in-depth study of two- and three-dimensional modeling, drawing and dimensioning problems. Students will develop a presentation of an engineering field they are interested in. A capstone project will be solid modeling and presentation drawings of an engineering concept. ***This course is also run as a Dual Credit class with Moraine Valley Community College with the possibility of 3 hours of college credit.***

Technology Education Department

ARCHITECTURE & DESIGN

Course #06730

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 1.0

Course #06730: This course will introduce students to residential architecture. Students will learn the technical information necessary to draw a set of blueprints for a single-family home. The first semester project will consist of planning and designing a complete set of prints using industry standards as examples. The second semester will be devoted to constructing a scale model using basswood and a three-dimensional model using Revit of the home designed. Information regarding building and contracting a home will be used to help understand residential construction in the Midwest.

ARCHITECTURE & DESIGN w/honors option

Course #06710

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 1.0

Course #6710 w/honors option: The core material for this course is similar to Architecture & Design course #06730, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program or architecture program.

ENGINEERING & DESIGN

Course #06721

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06721: This course provides students with technical information necessary to plan and design products for industry. The students will plan, research, design, create, and test products to improve the efficiency of advanced applications. In addition, students will learn how to render their projects to present their ideas to employers.

ENGINEERING & DESIGN w/honors option

Course #06711

Prereq: Pre-Engineering II
Level: 10, 11, 12
Credit: 0.5

Course #06711 w/honors option: The core material for this course is similar to Engineering & Design course #06711, however, projects and assessments will involve more depth, complexity, and rigor. Expectations for this course are much higher and will require additional time outside of class. This course is highly recommended for motivated students planning to enter a college engineering program.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING

Course #06700

Prereq: Architecture & Design or
Architecture & Design w/honors option
and Engineering & Design or
Engineering Design w/honors option.
Level: 11, 12
Credit: 1.0

Course #06700: This is the culminating course in our Technology Education program. Students will have additional challenges as they are introduced to several 3D modeling software programs. Students will be required to use the skills learned in both their engineering and architecture courses as they make the transition from 2D to 3D.

ADVANCED ENGINEERING AND ARCHITECTURAL MODELING w/Honors Option

Course #06720

Prereq: Architecture & Design or
Architecture & Design w/honors option
and Engineering & Design or
Engineering & Design or Engineering
Design w/honors option.
Level: 11, 12
Credit: 1.0

Course #06720 w/honors option: The core material for this course is similar to Advanced Engineering and Architectural Modeling, however, projects and assessments will involve more depth, complexity, and rigor.

Technology Education Department

WOODS I

Course #06771

Prereq: none

Level: 9, 10, 11, 12

Credit: 0.5

Supply fee: \$45

Course #06771: This introductory course to modern woodworking will allow students to help plan, design, and create at least three assigned wood projects using various types of wood. In addition students will develop and practice safety in a wood shop laboratory.

WOODS II

Course #06780

Prereq: Woods I & teacher approval

Level: 10, 11, 12

Credit: 1.0

Supply fee: \$125

Course #06780: This follow-up course to Woods I will allow students to further their knowledge of woodworking by planning and building more advanced projects. In addition, students will use more technical set-ups to build four projects: three assigned and one student choice.

WOODS III

Course #06790

Prereq: Woods II & teacher approval

Level: 11, 12

Credit: 1.0

Course #06790: This is an advanced woodworking course utilizing all of the information from Woods I and II. Students will design, plan and build a project of their own, consistent with their abilities, interest, and time. In addition, students will have the opportunity to design and build projects for Hinsdale South High School. A fee will be applied as needed depending on projects built.

World Languages Department

Department Chairperson Mrs. Sarah Lombard

The World Languages Department seeks to develop its students into well-rounded, multi-dimensional individuals who have both knowledge and appreciation of world cultures and civilizations and a tolerance and acceptance of the cultural differences of various peoples. We recognize and wish to make our students aware of the personal, national, economic, and academic limitations of provincialism as our world grows more interdependent. In alignment with national world language standards, our courses aim to foster the growth of students' proficiency in interpersonal, interpretive, and presentational modes of communication within a cultural context. A four-year sequence of honors level courses is available in all languages offered by the department. Students have the opportunity to earn the Trilingual Scholar award as a senior for successfully completing four years of one language and at least two years of another.

Two years of the same language will fulfill the entrance requirement of the state public universities in Illinois. Many universities require more than one year of world language study for admission and may require it for graduation from specific degree programs. Therefore, high school students preparing for college should include one or more world languages in their preparation. Credit for a full year of world language will fulfill one-year of the two-year District 86 Elective Arts requirement. Any student who earns a D in a World Language course is strongly recommended to retake one or both semesters before attempting the next course in the sequence. The deficiencies indicated by the D grade will make success in the next course in the sequence very difficult.

Students entering the ninth grade with previous world language experience can complete the equivalent of five years of high school work which may include Advanced Placement work. Students who complete the upper levels of a language often test out of the world language requirements, receive college credit, and/or are placed in advanced language courses in college.

As seniors, students have an opportunity to earn the Seal of Biliteracy. The Illinois State Board of Education recognizes students for demonstrating proficiency in English and one additional language. An official seal will be placed on diplomas and official recognition will be documented on transcripts for those who qualify. Students who earn the Seal and attend public Illinois universities can receive up to eight hours of college credit for their language study in high school. Interested students should ask their teachers for more information.

Etymology, a semester course, is highly recommended to all students and especially to those planning to continue in upper level languages courses. Etymology is also excellent preparation for college admission testing (PSAT, SAT).

Please see Course Description for detailed prerequisites.

ETYMOLOGY

ETYMOLOGY

Course # 04701

Prereq: None

Level: 10, 11, 12

Credit: 0.5

Etymology is designed to increase one's knowledge and understanding of English vocabulary through the study of the most important Greek and Latin roots. Students learn to discover meanings of words through recognition and interpretation of their elements. The skills learned in Etymology equip students to decode vocabulary words encountered elsewhere (transfer of knowledge). The ability to memorize is a necessary fundamental skill. Recommended for all qualifying students who would like to develop their vocabulary before taking standardized tests.

GERMAN

GERMAN I

Course # 04200

Prereq: None

Level: 9, 10, 11, 12

Credit: 1.0

German I is an introduction to the German language and German-speaking cultures. An immersive listening and speaking experience based on everyday situations is provided. Through consistent daily use of German, students actively engage in a variety of structured activities, interactive conversations, games, and short presentations that develop their basic language skills of listening, speaking, reading, and writing. Though this is a beginning level course, students are expected to use German to the extent possible.

GERMAN I HONORS

Course # 04210

Prereq: Concurrent registration in English Honors and/or Math Honors and Dept. Chairperson approval

Level: 9, 10, 11, 12

Credit: 1.0

In German I Honors the student will be introduced to the German language and culture. The sequential core material for this course is the same as German I. The pace is accelerated; the breadth and scope of the coverage is expanded, and material is added in order to allow for more investigation of the language and culture. This course is conducted in German to a greater extent than is German I. Furthermore, German I Honors students are expected to speak as much German as possible in class.

GERMAN II

Course # 04220

Prereq: C or better in German I

Level: 10, 11, 12

Credit: 1.0

This course is a continuation of the first level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. Students are expected to function in German to a greater extent, and all four skills are evaluated. Cultural topics will be explored throughout the year. This course is conducted extensively in German.

GERMAN II HONORS

Course # 04270

Prereq C or better in German 1 Honors, or A in German 1, or B in German 1 with Dept. Chair approval

Level: 10, 11, 12

Credit: 1.0

This course is a continuation of the first level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. Although the core material for this course is the same as German II, this course is accelerated and allows for more investigation of the language and culture. The materials used in this course are authentic sources in order to further develop students' proficiency. All modes of communication are practiced and assessed regularly. This course is designed for students who have had success in German I and who demonstrate the characteristics of a self-directed and motivated language learner. This course is conducted in German to a greater extent than is German I.

World Languages Department

GERMAN III

Course # 04280

Prereq: C or better in German II

Level: 11, 12

Credit: 1.0

This course provides more extensive development and practice in listening, speaking, reading, and writing as well as increased awareness of and focus on German-speaking cultures, while honing grammar skills. New thematic topics and grammar concepts are introduced to students. All modes of communication are practiced and assessed regularly. This course is conducted in German to a greater extent than is German II.

GERMAN III HONORS

Course # 04230

Prereq: C or better in German II Honors, or A in German II, or B in German II with Dept. Chair approval

Level: 11, 12

Credit: 1.0

In this course previously learned skills are enhanced. A thematic approach is used to integrate advanced learning in speaking, writing, reading, and listening. The sequential core material for this course is the same as German III. The pace is accelerated; the breadth and scope of the coverage is expanded. Material is added in order to allow more investigation of the language and culture. The course is conducted entirely in German; students are expected to respond to in-class discussion with thoughtfulness and linguistic sophistication.

GERMAN IV

Course # 04290

Prereq: C or better in German III

Level: 11, 12

Credit: 1.0

This course is a continuation of the third level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. German IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study. Culture is studied through reading, viewing, and listening to a variety of authentic resources. Students are expected to respond to in-class discussion with thoughtfulness and linguistic sophistication.

ADVANCED PLACEMENT

GERMAN LANGUAGE

Course # 04240

Prereq: C or better in German III Honors, or A in German III, or B in German III with Dept. Chair approval

Level: 11, 12

Credit: 1.0

Advanced Placement German Language & Culture is conducted exclusively in German utilizing authentic materials from the German-speaking cultures. Students have regular and ample opportunities to improve all four language skills and to prepare for the AP Language and Culture Exam. Course content comes from authentic sources produced by native speakers intended for a native speaker audience. This advanced placement course provides intensive and extensive reading, discussion, and analysis in German of diverse sources. The analysis of these sources will specifically target the following AP themes: Personal and Public Identities, Family and Community, Contemporary Life, Global Challenges, Science and Technology, and Beauty and Aesthetics. Language skills are not taught in isolation, but rather integrated to communicate about a wide range of topics and media. The class prepares students to take the Advanced Placement Exam in German Language & Culture. This course is conducted entirely in German; students are expected to respond to in-class discussion with thoughtfulness and linguistic sophistication. *Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).*

GERMAN V HONORS

Course # 04260

Prereq: C or better in AP German, or A in German IV, or B in German IV with Dept. Chair approval

Language

Level: 12

Credit: 1.0

German V Honors is the fifth course offered in the German language sequence and requires the ability to work independently on a college level. The student will read and analyze the masterpieces of German literature. Advanced study of grammar and writing practice are provided. Students will complete essays and compositions in German. Individualized study projects make up a large part of this course.

LATIN

LATIN I

Course # 04300

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

This course provides an introduction to the language, culture, and civilization of the Romans. Particular attention is also paid to increasing students' proficiency in their own language, since over 50% of the words in the English language are derived from Latin. Grammar, syntax, vocabulary and translation are stressed. Classical allusions to our own civilization and the Roman contribution to western civilization are also emphasized.

LATIN I HONORS

Course # 04310

Prereq: Concurrent registration in English Honors and/or Math Honors
Level: 9, 10, 11, 12
Credit: 1.0

In Latin I Honors, students will be introduced to the language, culture, and civilization of the Romans. This course differs from Latin I in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required.

LATIN II

Course # 04320

Prereq: C or better in Latin I
Level: 11, 12
Credit: 1.0

This course includes a review of the material studied in Latin I. Attention is devoted to grammar, vocabulary and reading passages from important Roman authors. Supplementary units will include Roman mythology, history, and the derivation of English words from their Latin roots. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

LATIN II HONORS

Course # 04350

Prereq: C or better in Latin 1 Honors, or A in Latin 1, or B in Latin 1 with Dept. Chair approval
Level: 10, 11, 12
Credit: 1.0

In addition to the content in Latin II, Latin II Honors includes an increase in the number and variety of textbook and workbook assignments. Also, special projects and written or oral presentations are required. *Successful completion of this course with a grade of "B" or higher is a prerequisite for Advanced Placement Latin or Latin Literature Honors.*

ADVANCED PLACEMENT

LATIN

Course # 04360

Prereq: B or better in Latin II or Latin II Honors
Level: 11, 12
Credit: 1.0

Students in this course will read Vergil's epic poem, The Aeneid and Caesar's Gallic War. While grammar and syntax remain important, more attention is paid to the development of an appreciation for epic poetry and prose style. Reading assignments alternate with group discussion and individual reports on topics in the history and literature of the late Roman Republic and early Roman Empire. *This course alternates yearly with Latin Literature Honors and will be offered in 2018-2019.*

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details). **Pending confirmation of approval, this course may be offered for dual credit through Loyola University Chicago. More information will be provided to interested students at the beginning of 2019-2020 school year.**

LATIN LITERATURE HONORS

Course # 04370

Prereq: B or better in Latin II or Latin II Honors
Level: 11, 12
Credit: 1.0

This course is designed to solidify students' understanding of both basic and advanced Latin grammar. It also introduces students to the intensive study of major Latin authors, including Cicero, Ovid, Catullus, and others. Students will be introduced to critical analysis of Latin literature including reading of secondary scholarship on texts. Continuing also is the student's exploration of ancient culture and society. *This course alternates yearly With AP Latin and it will be not offered in 2018-2019. It will be offered in 2019-2020.*

World Languages Department

FRENCH

FRENCH I

Course # 04100

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

French I offers a culturally based study of the language. From the start, students are given the tools to express themselves and interact meaningfully with others. They will be taught basic reading, writing, listening, and speaking skills using a wide variety of authentic resources. These skills will be practiced and assessed regularly in a highly interactive classroom experience. Students are expected to use French in class to the extent possible. This course is conducted mostly in French. Juniors who have not studied a foreign language, or who would like to diversify their foreign language skills while enhancing their English vocabulary, are encouraged to take a two-year sequence of French in their program.

FRENCH I HONORS

Course # 04110

Prereq: None – concurrent enrollment in other Honors courses preferred
Level: 9, 10, 11, 12
Credit: 1.0

The French I Honors program is the same as French I but for the student who is usually enrolled in Honors courses and who wishes to participate in higher-level learning activities. Emphasis is placed on enriching listening, speaking, reading, and writing skills as well as heightened awareness through projects. All Honors students are required to participate in the National French Contest.

FRENCH II

Course # 04120

Prereq: C or better in French I
Level: 9, 10, 11, 12
Credit: 1.0

French II allows the French I student to develop additional competency in a culturally-centered thematic-based atmosphere. Students continue to explore French culture while building upon the four skills of communication: listening, reading, writing, and speaking. Students are expected to participate actively in class activities and to function in French.

FRENCH II HONORS

Course # 04170

Prereq: C or better in French 1 Honors, or A in French 1, or B in French 1 with Dept. Chair approval
Level: 9, 10, 11, 12
Credit: 1.0

The core material is the same as French 2 with an emphasis and expectation of accelerated language development. Students are expected to participate actively in class activities and to function in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III

Course # 04130

Prereq: C or better in French II
Level: 10, 11, 12
Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional performance in French II or French II Honors. Students will be required to communicate extensively in French with an emphasis and expectation of accelerated language development. All Honors students are required to participate in the National French Contest in the spring.

FRENCH III HONORS

Course # 04180

Prereq: C or better in French II Honors, or A in French II, or B in French II with Dept. Chair approval
Level: 10, 11, 12
Credit: 1.0

French III Honors is the same as French III, but for the student who demonstrated exceptional proficiency in French II or French II Honors. Students will be required to communicate extensively in French. All Honors students are required to participate in the National French Contest in the spring.

FRENCH IV

Course # 04140

Prereq: C or better in French III
Level: 11, 12
Credit: 1.0

French IV provides a complete review of French grammar and continued acquisition of vocabulary, including idioms. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

World Languages Department

ADVANCED PLACEMENT FRENCH LANGUAGE

Course # 04150

Prereq: C or better in French III Honors, or A in French III, or B in French III with Dept. Chair approval
Level: 11, 12
Credit: 1.0

AP French IV is a college level course that entails intensive vocabulary and grammar enrichment. Emphasis is placed on improving communication: interpersonal, interpretive, and presentational. The course study involves daily discussions of reading assignments enriched through film, French TV, radio and music. Students are expected to synthesize and analyze course materials in French. The course is conducted exclusively in French. Course content is designed to improve all language skills and to prepare students to take all college entrance and achievement exams in French.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

FRENCH V HONORS

Course # 04190

Prereq: C or better in AP French, or A in French IV, or B in French IV with Dept. Chair approval
Level: 12
Credit: 1.0

French V Honors is a course that integrates the study of literature, the history, and the art of France throughout the centuries. The course provides intensive and extensive reading, discussion, and analysis of selected literary masterpieces. Students will write compositions and prepare presentations on non-literary topics and study current events from French TV and radio broadcasts. Advanced grammar review is continued. There is a special emphasis on idiomatic usage of vocabulary and a further refinement of the four language skills. Students enrolled in this course will be prepared to take the Advanced Placement Exam in May.

SPANISH

SPANISH I

Course # 04510

Prereq: None
Level: 9, 10, 11, 12
Credit: 1.0

Spanish I is an introduction to the Spanish language and Spanish-speaking cultures. An immersive listening and speaking experience, based on everyday situations is provided. Through consistent daily use of Spanish, students actively engage in a variety of structured activities, interactive conversations, games, and short presentations that develop their basic language skills of listening, speaking, reading, and writing. Though this is a beginning level course, students are expected to use Spanish to the extent possible.

SPANISH II

Course # 04520

Prereq: C or better in high-school Spanish I or recommendation of the junior high teacher
Level: 9, 10, 11, 12
Credit: 1.0

This course is a continuation of the first level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. Students are expected to function in Spanish to a greater extent, and all four skills are evaluated. Cultural topics will be explored throughout the year. This course is conducted extensively in Spanish.

World Languages Department

SPANISH II HONORS

Course # 04580

Prereq: A in Spanish 1, or B in Spanish 1 with Dept. Chair approval
Level: 9, 10, 11, 12
Credit: 1.0

This course is a continuation of the first level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. Although the core material for this course is the same as Spanish II, this course is accelerated and allows for more investigation of the language and culture. The materials used in this course are authentic sources in order to further develop students' proficiency. All modes of communication are practiced and assessed regularly. This course is designed for students who have had success in Spanish I (or the junior high equivalent) and who demonstrate the characteristics of a self-directed and motivated language learner. This course is conducted in Spanish to a greater extent than is Spanish II.

SPANISH III

Course # 04530

Prereq: C or better in Spanish II
Level: 10, 11, 12
Credit: 1.0

This course is a continuation of the second level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. This course provides more extensive development and practice in listening, speaking, reading, and writing as well as increased awareness of and focus on Spanish-speaking cultures, while honing grammar skills. New thematic topics and grammar concepts are introduced to students. All modes of communication are practiced and assessed regularly. This course is conducted in Spanish to a greater extent than is Spanish II.

SPANISH III HONORS

Course # 04570

Prereq: C or better in Spanish II Honors, or A in Spanish II, or B in Spanish II with Dept. Chair approval
Level: 10, 11, 12
Credit: 1.0

In this course previously learned skills are enhanced. A thematic approach is used to integrate advanced learning in speaking, writing, reading, and listening. The sequential core material for this course is the same as Spanish III. The pace is accelerated; the breadth and scope of the coverage is expanded. Material is added in order to allow more investigation of the language and culture. The course is conducted entirely in Spanish; students are expected to respond to in-class discussion with thoughtfulness and linguistic sophistication.

SPANISH IV

Course # 04540

Prereq: C or better in Spanish III
Level: 11, 12
Credit: 1.0

This course is a continuation of the third level course, developing more complex reading, writing, speaking, and listening skills with a goal of increased grammatical accuracy. Spanish IV provides an opportunity for students to develop their fluency through intensive conversational practice and grammar study. Culture is studied through reading, viewing, and listening to a variety of authentic resources. Students are expected to respond to in-class discussion with thoughtfulness and linguistic sophistication.

ADVANCED PLACEMENT

SPANISH LANGUAGE

Course # 04550

Prereq: C or better in Spanish III Honors, or A in Spanish III, or B in Spanish III with Dept. Chair approval
Level: 11, 12
Credit: 1.0

Advanced Placement Spanish Language offers students a college level experience. It is the fourth course in the Spanish sequence and provides an opportunity for students to further develop their skills in writing, speaking, reading, and listening comprehension. Culture is studied through listening selections, reading selections and discussions. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement.

Upon the conclusion of this course or the Spanish V Honors course, students are expected to take the AP exam (see page 94 for details).

SPANISH V HONORS

Course # 04590

Prereq: C or better in AP Spanish, or A in Spanish IV, or B or better in Spanish IV

Level: 12

Credit: 1

Spanish V Honors provides an opportunity for students to further develop their skills in writing, speaking, reading and listening comprehension. Intensive work in grammar and vocabulary will be required in order to help students prepare for college board achievement and placement. Culture is studied through literature.

Upon the conclusion of this course, students are expected to take the AP exam (see page 94 for details).

American Sign Language

AMERICAN SIGN LANGUAGE I

Course # 08070

Prereq: none

Level: 9, 10, 11, 12

Credit: 1.0

American Sign Language I is an introduction to American Sign Language and Deaf culture. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Fundamental skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness, deaf perspectives will also be taught.

AMERICAN SIGN LANGUAGE II

Course # 08080

Prereq: "C" or better in American Sign Language I

Level: 9, 10, 11, 12

Credit: 1.0

American Sign Language II is a continuation of American Sign Language I. Due to the nature of the language, this is a performance based class which includes interactive practice of the language with staff and peers, and direct visual presentation of material. Advanced skills taught in the course are the student's expressive and receptive skills in ASL, understanding basic vocabulary, grammatical structures, and appropriate use of space and body. Deaf culture topics such as knowledge of deafness and deaf perspectives will be taught along with deaf perspectives, technology related to deafness and potential career options.

Additional Academic Opportunities

Advanced Placement Program: Advanced Placement (AP) courses are offered in seven departments: Art, English, World Languages, Mathematics, Music, Science and Social Studies. These courses adhere to the suggested College Board course descriptions and serve as the primary vehicle to prepare students for the AP examination in May. In addition to preparing students for the AP exam, AP courses allow students to experience the pace and intensity of a college-level course while still in high school. Although each college determines what AP examination grades it will accept for credit, the great majority of colleges require scores of 3 or better and award the student credit in the subject matter tested (see www.collegeboard.com/ap/creditpolicy). In some cases, no credit is given, but the student begins their program of study at an advanced level. Last year's fee for each AP exam as established by the College Board was \$93 with an additional \$17 per exam late-testing fee. For schools participating in AP Capstone in 2016-17, the fee for AP Seminar was \$141. The College Board has not released the fee for the 2018 AP exams yet. There may be additional district fees associated with AP exams, which is allowed by the College Board. Please consult the course descriptions for the list of Advanced Placement courses in each of the aforementioned departments

Articulated Credit and Dual Credit at the College of DuPage (C.O.D.): Loyola University and The College of DuPage award articulated or dual credit when learning experiences at the secondary level of instruction duplicate those at the post-secondary level. These programs enable students to save time and avoid duplication of material already learned in high school. Articulated credits are only applicable to Loyola or the College of DuPage while dual credits can be accepted at any college or university that accepts transfer credits. Students may request a transcript from Loyola or C.O.D. with these course listed after the end of the semester. A list of courses for which students may earn articulated or dual credits will be available during registration.

Credit Recovery: Students may be able to enroll in a section of Credit Recovery Lab (*Course #01671/#01672*) to recover lost credits from failed courses. Students should speak with their school counselor and the appropriate department chairperson, if interested. *Prior approval from the Director of Counseling is required to enroll in Credit Recovery Lab.* The recovered credit will not replace the original grade earned in the course. Recovered credits earn a new grade that is posted on student transcripts

Deaf and Hard Hearing Program: The Deaf and Hard of Hearing Department provides educational and support services for Deaf and Hard of Hearing students in the DuPage West Cook Regional Program. These supportive services include: interpreters, program assistants, tutorial, Social Work services, Speech and Language services, behavior supports, Guidance Counselors specifically for the Deaf and Hard of Hearing, Vocational Support Team, and self-contained classes taught by teachers of the Deaf and Hard of Hearing.

Early Bird Physical Education: Students may decide to earn their Physical Education credit by enrolling in Early Bird Physical Education (*Course #07431/#07432*) which meets daily from 7:00 – 7:50 a.m. This opportunity is open to all seniors, juniors and sophomores and also to freshmen who are enrolled in instrumental or vocal music classes or who are dually enrolled in English 1/Academic Reading and Algebra 1/Algebraic Reinforcement. All students that elect to enroll in Early Bird Physical Education and a study hall are required to attend their assigned study hall. Freshmen may not enroll concurrently in Early Bird Physical Education and a study hall. Early Bird PE is only possible on a space available basis.

English Language Learner (ELL) Program: The District 86 ELL Program is housed at Hinsdale Central High School. Families wishing to learn more about this program can contact either their child's Hinsdale South School Counselor, or District 86 ELL Coordinator, Mrs. Kelly Owens, at 630.570.8591 or at kowens@hinsdale86.org.

Excel Program: Excel is an academic support program where students meet in a structured environment to receive tutorial assistance in core academic areas. As part of the Excel curricula, students learn executive functioning skills including organization, study skills, and time management. In this program, students are also shown how to study for classes and prepare for tests. As a result, students are required to use an assignment

Additional Academic Opportunities

notebook. The Excel staff members consult with classroom teachers and parents to help improve each student's achievement in courses. A 0.5 credit is earned per semester for successful participation in this program. *The Excel Program is offered before school (Course #09100), during the school day (Course #09201/09202), and after school (Course #09400).*

Excel-erate Program: Excel-erate is a non-traditional program for students who need to earn credits via supported virtual instruction. This program runs 11:15 am - 4:00 pm (Periods 5 – 11) and students must have the recommendation from the Director of Counseling in order to enroll. *This is Course #09401/#09402.*

Honors Program: Honors courses are designed to challenge students with superior academic ability and motivation. They provide accelerated course content and require a higher standard of achievement. Honors placement is made by the respective Department Chairperson based on past academic record, Explore test scores, subject area test scores, and teacher recommendation.

Independent Study: Independent Study options may be provided for motivated and mature students who have exhausted the course options of a particular course or field of study. Independent Study courses are initiated on a case-by-case basis through any faculty member and are subject to the approval of the relevant department chairperson, the student's counselor, and the Assistant Principal for Curriculum & Instruction. Upon the approval of all of the aforementioned, final approval is contingent upon the workload of the teacher involved.

Study Hall and "Hornet Honor" Seniors: All students enrolled in Study Hall are required to attend. The only exception is seniors who have earned a place on the "*Hornet Honor*" list by consistently demonstrating the Hornet Habit principles of accountability, respect and engagement. "*Hornet Honor*" seniors have the option of requesting a 1st period "Late Arrival" (Course #09921/09922) or a 10th period "Early Dismissal" (Course #09931/#09932) in lieu of Study Hall during the course request process. Only "Hornet Honor" seniors who have "Late Arrival" or "Early Dismissal" on their official schedules have earned this privilege of late arrival/early dismissal. "Hornet Honor" seniors who have "Late Arrival" are expected to arrive on time to their 2nd period class and those enrolled in "Early Dismissal" are expected to vacate the building at the conclusion of 9th period. Study Hall attendance is required for "*Hornet Honor*" seniors enrolled in Study Hall during periods 2 – 9. Study Hall attendance is required for every student with "Study Hall" on their official schedule regardless of what period the study hall is or what year the child is in school. *All Hinsdale South students must be enrolled in 6 credit-earning courses each semester. Please note that being a "Hornet Honor" senior is a privilege that can be revoked by the Building Leadership Team should it be determined to be in the best interest of the student.*

Writing Lab: Writing Lab is available before school, after school, and during all lunch periods. Students may make appointments to meet with a teacher to receive help in any stage of the writing process, from idea generation to polishing the final draft. Students can seek out help in writing for any subject area, not just English, and for writing beyond that assigned for school. Writing Lab is also the perfect place to receive feedback on college application essays and scholarship essays. The Writing Lab is located in Room

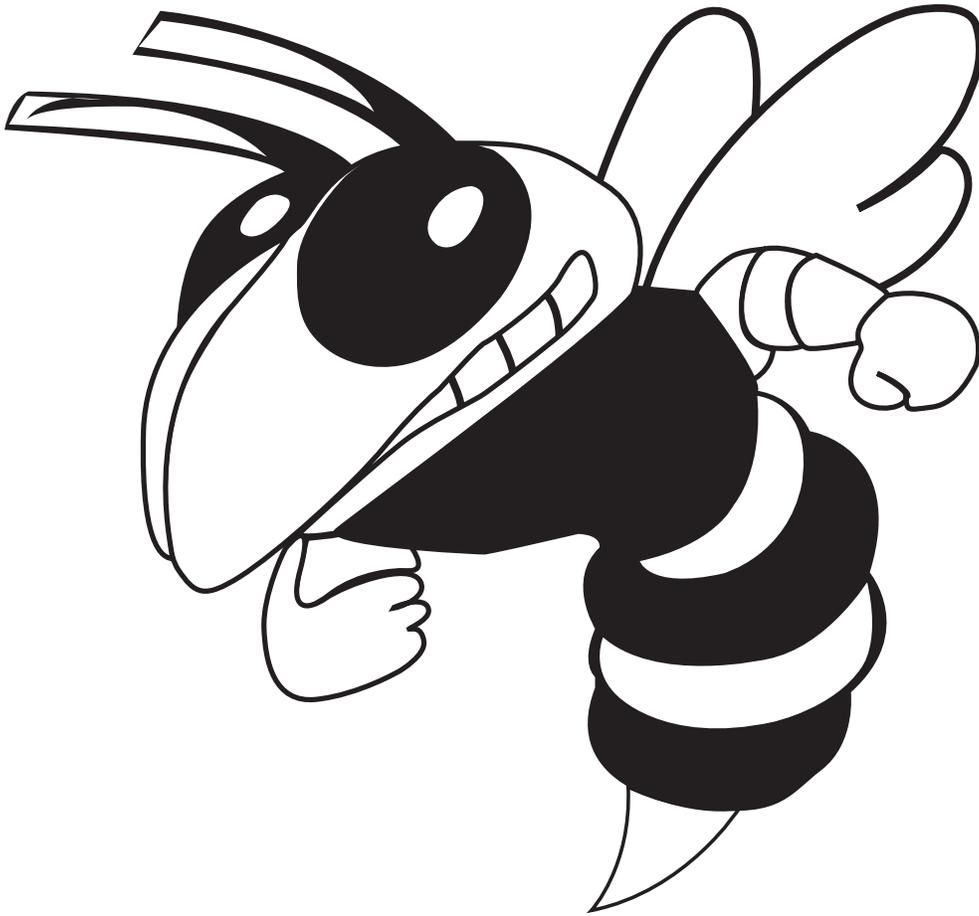

HINSDALE SOUTH COUNSELING DEPARTMENT FOUR YEAR ACADEMIC PLAN

INSTRUCTIONS:

1. Please complete / update your 4 year plan of courses by filling in the blanks for each year.
2. Check your selections to make sure you will meet graduation requirements.
3. If college-bound, check to make sure that you are meeting minimum requirements for college entrance.
4. Bring this sheet with you to your counselor appointment along with your course selection sheet to finalize your course requests.
5. Indicates flexibility in academic scheduling.
