Superintendent Prentiss,

Good afternoon.

Section 34-205 of the Illinois School Code provides as follows:

Sec. 34-205. Educational facility standards.  
(a) By January 1, 2012, the district shall publish space utilization standards on the district's website. The standards shall include the following:  
(1) the method by which design capacity is calculated, including consideration of the requirements of elementary and secondary programs, shared campuses, after school programming, the facility needs, grade and age ranges of the attending students, and use of school buildings by governmental agencies and community organizations;  
(2) the method to determine efficient use of a school building based upon educational program design capacity;  
(3) the rate of utilization; and  
(4) the standards for overcrowding and underutilization.

Please provide the location on the District #86 website where I can read (1) "the method to determine efficient use of a school building" and (2) "the standards for overcrowding and underutilization."

Thank you,

Alan Hruby
